SECRETARY.—T. N. Cathrall, Esq.

Temporary Offices—35A Moorgate street, E.C.; and 196 Strand, London, W.C.

This Company is established to provide a want long felt, whereby freehold and every description of land and property may be made easily negotiable, and greater facilities given to secure immediate advances on this class of securities.

The Credit Foncier, a Company similar to the London and Provincial Mortgage Bank of England, at their last meeting declared that their net profits for the six months ending August 27, after paying all expenses, amounted to £42,219 5s 11d, or equal to 10s per cent. per annum on the amount of capital called up.

The great delay, difficulty, and heavy charges entailed in the present mode of obtaining an advance by the mortgage of property will by this Company be avoided, and a more simple and expeditious system afforded.

The Company will act as agents to investors and borrowers, and a register will be kept of all sums available for investment and sums wanted to be borrowed. A commission will be charged on each transaction, and from this source considerable profits will be realised.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, 196 Strand, London, W.C., 35A Moorgate street; of the Broker; of the Solicitor; and of the Bankers.

THE GENERAL CREDIT AND FINANCE COMPANY OF LONDON (Limited).

At the Second Ordinary General Meeting of the shareholders in this Company, held at the London Tavern, on Monday, the 6th February, 1865, at One o'clock,

SAMUEL LAING, Esq., in the Chair,

the following report and balance sheet, to the 31st December, 1864, were presented:—

In submitting the accounts of the Company's operations for the first complete year of its existence, viz., 1864, the Directors have much pleasure in congratulating the shareholders on the results.

The paid-up capital employed was £500,000 during the first six months, and £1,000,000 during the second six months, or on the average £750,000 during the year. The apparent net profits of the year (less rebate) amount to £287,996.

But of this £125,000 results from the premium of £1 per share on the creation of new capital, and £31,250 from 5s per share charged in lieu of interest on the new shares, so as to entitle them to rank for dividend from the 1st January, 1864. Apart, therefore, from the issue of new shares, the result would have been a net profit of £131,656, earned by the employment of a capital of £750,000, or at the rate of 17½ per cent.

In this account of profit all securities have been taken at their market price on the 31st of December. As the creation of new shares at a premium is an exceptional source of profit, the Directors recommend that the £125,000 resulting therefrom be carried to the reserve fund. This leaves a balance of £160,731, out of which an interim dividend of 2s per share, amounting to £25,000, has been already paid.

The Directors recommend that an additional dividend of 10s per share, free of income tax, be now declared, amounting to £125,000, and making, with the 2s paid in August, a total dividend of 12s for the year, or at the rate of 15 per cent. on the whole capital of £1,000,000. This will leave a balance of £22,440 to be carried forward to next year's account, making, with the reserve fund of £125,000, a sum of £147,440 undivided, in addition to the £150,000 distributed as dividend.

The Directors have, in accordance with the provisions of the articles of association, filled up the vacancy caused by the retirement of Mr Charles Devaux, by the election of his brother and partner, Mr Alexander Devaux.

Messrs Quilter, Ball, and Co., the Auditors appointed at last meeting, offer themselves for re-election.

S. LAING, Chairman.

No. 7 Lothbury, E.C., January, 1865.

S. LAING, Chairman.

January 26, 1865.

Audited and found correct—Quilter, Ball, and Co.

The following resolutions were carried unanimously:

That the report of the Directors and statement of accounts now read be received and adopted.

That in accordance with the recommendation therein contained the sum of £125,000 be carried to a reserve fund, and

That a dividend at the rate of 10s per share, free of income tax, be now declared on the share capital of the Company, in addition to the 2s per share paid on account in August last, making a total dividend of 12s per share for the past year on the share capital of the Company, and be payable on the 12th February inst.

That Messrs Quilter, Ball, and Co., the auditors, retiring at this meeting, be and they are hereby re-elected for the ensuing year.

That the thanks of this meeting be given to the Chairman for his conduct in the chair, and to himself and the Directors for their management of the Company's affairs.

R. J. BUTLER, Secretary.

No. 7 Lothbury, E.C., February 7, 1865.

THE LAND MORTGAGE BANK OF INDIA

(CREDIT FONCIER INDIEN) Limited.

Capital £2,000,000, in 100,000 Shares of £20 each.

Paid-up, £400,000.

Debenture issue of 1864, bearing 5 per cent. interest, payable half-yearly, redeemable at par within thirty years, by half-yearly drawings, and secured by the whole of the invested funds in India, which must always be equal to the amount of debentures current, by the uncalled-up capital of the bank, and by the entire assets of the Company.

Half the above issue of £500,000 having been subscribed for at £83 6s 8d per £100 bond, the Directors are prepared to receive applications for the balance (after deducting £100,000 reserved for India,) at £87 for every £100 bond, at which price they will yield 5¾ per cent interest, independently of the advantage to be derived from the redemption of the bonds at par by the half-yearly drawings, which on the average drawing amounts to an additional half per cent.

The bonds bear coupons payable 1st January and 1st July in each year, and the first half-yearly drawing will take place on the 1st January, 1866.

Applications to be made at the offices of the Company, 17 Change alley, E.C., where all further information may be obtained.

SEVEN PER CENT. DEBENTURES.

W. C. WINTERBOTTOM, Secretary.

rosby House, 95 Bishopsgate street within.

SOCIETIE FINANCIERE D'EGYPTE.

CALL OF £4 PER SHARE, MAKING £10 PER SHARE PAID.

Notice is hereby given, that in consequence of the extensive development of the affairs of the Societie, the Council of Administration have decided upon making a CALL of £4 per share, payable on the 27th February next, in Paris or Alexandria, at the offices of the Societie, and in London at the offices of the Agents of the Societie, the Imperial Mercantile Credit Association (Limited).

The proprietors resident in England are therefore required to pay the amount of said Call, on or before the 27th February next, to the Imperial Mercantile Credit Association (Limited), 95 Bishopsgate street, Within; and interest at the rate of six per cent. per annum will be charged from that date on all calls remaining unpaid.

The amount of £4 per share now called will not rank for dividend with the £6 previously paid until after the 30th April next, but interest will be allowed up to that date at the rate of 5 per cent. per annum.

Proprietors are required first to deposit their certificates at the offices of the Agents to the Societie, for which they will receive a call letter, to be presented to the Bankers when the call is paid, after which the certificates will be stamped and returned to the proprietors upon the production of the Bankers' receipt.

Signed on behalf of the London Agents,

The Imperial Mercantile Credit Association (Limited),

W. C. WINTERBOTTOM, Secretary.

Crosby house, 95 Bishopsgate street,

London, January 28th, 1865.

Temporary offices—41 Threadneedle street.

This line complete, the inner metropolitan railway system, as sanctioned by Parliament after a lengthened inquiry, first before the joint committee, and afterwards before separate committees of both Houses.

The existing Metropolitan Railway from Paddington to Farringdon street has been open two years, and, although it is still incomplete and the traffic imperfectly developed, pays seven per cent. dividend, and its shares are at a premium of £30 per £100.

The New Metropolitan Railway, for which the present subscription is invited, starts from a junction with the existing Metropolitan and West London lines at Kensington, and proceeds through the heart of Brompton and Pimlico by the Victoria Station and the Houses of Parliament, along the new Thames Embankment, parallel to the Strand and Fleet street, to a station in Cannon street, near the Bank of England.

The Stations at present contemplated are the following:—

1. At the extreme western point, Richmond road (West London Extension).
2. Kensington.
3. Gloucester road (South Kensington).
4. Cromwell road (Brompton).
5. Sloane square.
6. Victoria Station.
7. Westminster Bridge (Houses of Parliament).
8. Charing cross.
9. Norfolk street (Strand).
10. Bridge street (Blackfriars).
11. Cannon street (near the Bank of England).

Ultimately, the line will be continued to a junction with the Metropolitan Railway at Trinity square (Tower hill), with intermediate stations at King William street and Mark lane; thus completing, with the Western Junction at Kensington, the railway known as the "Inner Circle."

The traffic on this line, as is clearly proved by the working of the existing Metropolitan Railway, will be limited only by the number of trains which it is possible to run.

If the present Metropolitan line, running along the New road, with trains every five and ten minutes, carries traffic enough to pay 7 per cent., it is evident that a much larger traffic must be carried with three times the number of trains, which may be easily run, and will be required, on the line now proposed parallel to the Strand and Fleet street, when the circular system is completed.

The only question is whether, with a larger traffic, the cost of construction will not be also largely enhanced. Upon this point, however, the Directors are able to give the most satisfactory assurances. A guarantee contract with the firms of Peto and Betts, Kelk, and Waring Brothers, secures the construction of the works for a fixed sum, which includes interest at 5 per cent. per annum on all capital paid up during construction, and on shares paid up in advance at 6 per cent.

Lord Stanley's award determines the amount to be paid to the Metropolitan Board for permission to carry the railway along the new Thames Embankment from Westminster to Blackfriars, which would otherwise have been the most costly part of the undertaking, and provisional agreements have been entered into with many of the principal owners of land and house property for the remainder of the line, which enable the Directors to define its cost within unusually narrow limits.

The Directors, therefore, feel confident that the new Metropolitan Railway, of six miles, from Kensington to Cannon street, will not cost more per mile, including interest during construction, than the existing Metropolitan Railway from Paddington to Finsbury circus.

The questions for an investor are thus narrowed to these:

1. Whether he is satisfied that the traffic on the line of the Strand and Fleet street will at least equal that on the line of the New road?

2. If so, whether it is worth his while to invest at 6 per cent. for 2½ years (the probable period of construction), in order to have, at the end of that time, shares in an undertaking at least as good as the existing Metropolitan Railway, whose stock is now worth £30, and probably by that time will be worth £50, £60, or even £100 premium?

It is intended to proceed vigorously with the immediate construction of the portion of the line between Westminster station and Cannon street, so that it may be opened to the public contemporaneously with the Thames Embankment.

It must further be remembered that this line will practically enjoy the advantage, which is possessed by few others, of being protected against any competition. No line could divert traffic from it which did not run closely parallel; and such a line is rendered out of the question alike by the interference with property which it would involve and by the expressed views of Parliament.

Undisturbed by competition, the traffic of a leading metropolitan line must always be a a rapidly growing quantity, as is sufficiently proved by the fact that the traffic of the existing Metropolitan Railway has increased in the last six months by £500 per week, or 27 per cent., and is still steadily increasing.

To meet the convenience of subscribers who have expressed a desire to pay up in full, it has been decided to allow any one who wishes it, until further notice, to do so, receiving interest at the rate of 6 per cent. per annum, payable half-yearly, until the line is opened for traffic.

On registration of the scrip, of which due notice will be given, the certificates for £100 will be divided into five shares of £20 each.

Prospectuses and forms of application may be obtained of Messrs Cazenove and Co., and Messrs George Seymour and Co., the Brokers of the Company; or at the Temporary Offices of the Company, 41 Threadneedle street. The deposit of £3 per cent. on the amount applied for must be paid to the Company's bankers on application, which will be returned if no allotment be made.

Temporary Offices, 41 Threadneedle street.

FORM OF APPLICATION FOR SHARES,

To the Directors of the Metropolitan District Railway Company, 41 Threadneedle street.

Gentlemen,—Having paid to the Bankers of the Company the sum of £ to your credit, I request you to allot me scrip certificates of £100 each in the Metropolitan District Railway Company; and I agree to accept such scrip, or any less amount that may be allotted to me, and to pay the further sum of £7 per certificate due upon such allotment.

Burton-on-Trent—Messrs J and W. J. Drewry's offices, High street.

PROSPECTUS.

The first object of this Company is to purchase and work Cressey's patents for manufacturing casks.

This machinery has for some time been in successful operation at Messrs Bass, Ratcliff, and Gretton's, the celebrated brewers at Burton-upon-Trent, and was adopted by them after careful comparison with other inventions.

It is computed that at least £3,000,000 worth of casks are used annually in this country for beer only; and for all purposes more than double that amount is expended.

The objects of this Company have the strong approval of the brewing and other cask-requiring trades, and such an amount of capital and support is already promised, that the Directors will, immediately after allotment, commence the construction of factories on a large scale at Burton-upon-Trent and in London, with the certainty of orders for all the casks the Company can manufacture; and extending their works hereafter to such other places as may appear desirable.

Extract from the Report of Messrs Fothergill, Samuelson, and Smith, upon the Cask-making machinery in use at the celebrated Brewery of Messrs Bass, Ratcliff, and Gretton, Burton-upon-Trent.

The entire process is there systematised in the most perfect order. The wood is first subjected to a steaming process for the purpose of extracting the acid therefrom, after which it is conveyed to the machinery department, where it is reduced into staves, cut to an uniform and exact size by circular saws, and then converted into their required form with such exactness, that any one stave will fit any other cask.

The same system is applied to the heads of the casks, thereby enabling the cooper to produce an article, in every sense of the word so perfect, that not the slightest leakage or waste can arise in their employment: this we found to be the case, by witnessing the testing of a number of casks taken indiscriminately from the cooper's hands, by the admission into the interior, of steam, to a pressure of 12 lbs to the square inch, and not in one single instance did it escape through any of the joints of the casks.

In order to arrive at a just conclusion as to the efficiency of the system referred to, we would strongly recommend any person wishing to embark in the enterprise to visit the above establishment, when the value of the invention will at once become apparent.

We have had handed to us in confidence, a statement showing that in the manufacture of 300,000 barrels per annum, the selling price of which would amount to £240,000, that the net profit thereon, after allowing for labour, material, and charges of every kind, would amount to about £42,000; leaving a very handsome profit upon the capital required for the purpose of establishing works of this character.

FOTHERGILL, SAMUELSON, and SMITH,
Consulting Engineers, 27 Cornhill, London, E.C.
December 7, 1864.

£50,000 is an ample sum to turn out 300,000 hogsheads per annum.

The Articles of Association may be inspected at the Company's Offices, where specimen casks may also be seen.

Prospectuses and forms of application for shares may be obtained at the bankers, and their several branches; or of the brokers and solicitors, and at the temporary offices of the Company.

ABRIDGED PROSPECTUS.

This Company has been established for the purpose of facilitating the registration of titles to landed estates, under the provisions of the "Land Registration Act," and also for the purchase of freehold land, the titles to which have been already registered, or are capable of being brought within the operation of the Act.

The especial object of this Company is to assist owners of property who, from want of funds or other causes, have hitherto been unable to avail themselves of the advantages offered by the Act. The Company will undertake the examination and registration of titles to landed estates; it will provide the funds for the necessary preliminary expenditure; discharge the various incumbrances, where the value of the estate bears a just proportion to the amount charged upon it; and will also facilitate the arrangements of persons desirous of lending or borrowing on landed security. Whilst, from the nature of these operations and the securities held by the Company, it will be protected against all risk of loss, considerable profits must be derived, and owners of land will find their advantage in the increased value of their property.

The Company will purchase registered and other landed estates, and re-sell them in lots or otherwise, where the advantages of a simple and Parliamentary title enable them to effect the distribution and re-sale without delay and without expense.

REGISTERED LAND COMPANY,

LIMITED.

Notice is hereby given, that NO APPLICATION for SHARES in this Company will be RECEIVED after WEDNESDAY NEXT, the 15th instant, for London, and THURSDAY, the 16th instant, for the Country.—By order,

HENRY C. DARLINGTON, Secretary (pro. tem).

27 Cannon street, London, February 9th, 1865.

HOUSE FURNISHING.—Persons commencing housekeeping, or making additions thereto, are invited to visit the great FURNISHING ESTABLISHMENT of Messrs DRUCE and Co., 68, 69, and 58 Baker street, and 3 and 4 King street, Portman square, the largest showrooms and furnishing galleries in the kingdom, containing a superficial area of 48,000 ft (upwards of an acre in extent), where they can make their own calculations for furnishing a whole house or a single room from the goods before them, which are all marked in plain figures, without the annoyance of being importuned to purchase; or, if preferred, estimates will be given free of charge. From the extent of the premises the immense stock has been arranged in various departments, in the most convenient manner for inspection and selection, and purchasers are invited to view the elegant and extensive assortment of fashionable drawing room, dining room, and chamber furniture, Brussels and other carpets, new fabrics for curtains, &c., particularly a large collection of beautiful buhl and marqueterie cabinets, tables, &c., from Paris, at extremely low prices; also 500 easy chairs, settees, and ottomans, 60 sideboards, 50 sets of dining tables, in fine mahogany, oak, and walnut, manufactured by first-rate workmen of the best seasoned material; capital dining room chairs, covered with real morocco leather, 21s ed each; 100 bedsteads in various woods and metals, with the superior bedding, 150 wardrobes and chests of drawers. BISHOP OF LONDON'S FUND FOR

PROVIDING for the SPIRITUAL WANTS of the METROPOLIS and its SUBURBS.

The Executive Committee earnestly request attention to the annexed statements:—

The statistical report showed that, on a moderate estimate, there were 211 parishes in the diocese deficient in provision for religious worship and instruction. The Committee, by the work they have been able to institute, have removed some of these from the category of deficient parishes; but even in these cases much remains to be done. Fifty parishes whose claims are now under consideration are amongst those in which nothing has been yet done, and in which large deficiencies exist. The available balance at the disposal of the Committee is utterly inadequate to deal with the great bulk of the work before them.

The Committee are most desirous to press on public attention the urgent motive for the vigorous prosecution of this work supplied by the Endowment Grants of the Ecclesiastical Commission. The amount of permanent aid which may be obtained through these grants for the diocese depends on the voluntary efforts which are made to secure them. To break up the large overgrown parishes into manageable districts, and to provide these districts with immediate mission agencies, so disposed as to prepare for ultimate parochial organisation, is the special and characteristic work of this Fund. As it helps to provide each new district parish with its permanent Church and School, and places it in a position to claim its Endowment Grant from the revenues of the Commission, the Fund retires and leaves each new parish thus furnished to draw from its own population the means necessary for the maintenance of Christian worship and instruction. In the belief that this scheme of action is definite and efficient, the Committee ask to be enabled to apply it to the large number of deficient parishes which demand their aid. They trust that the Fund will thus serve to spread new Christian influences amongst a vast population around us, whose wants we dare not neglect, and will also, when its office ceases, leave its mark in the diocese, and transmit its influence to other generations.

For the effectual prosecution of this work the effort required must be united. In a diocese with so much diffused wealth, and which, when occasion arises, does not fail to show a large liberality, the Committee believe they will not ask in vain for a much wider support for this movement than it has yet obtained. Urgent and especial as is the call on landowners and other proprietors to consecrate an adequate portion of their wealth to Christian uses, and on those engaged in commerce or trade to recollect the religious necessities of the multitudes who live by labour, this work has claims on all whose residence in London draws together the poor to minister to their wants. To all the Committee appeal for that hearty and general effort which is essential to success. Nor, as they consider the moral influence which in various ways London exercises on the whole country, and the large annual immigration from the rural districts, do they hesitate to ask these in other parts of England, for whose own wants the zeal and self-denial of former generations have already provided, to promote a work which is one of national interest and concern.

Subscriptions for ten or any number of years, or donations in one sum, will be appropriated according to the will of the donor, either to the general fund or to any of its special objects; and further, if desired, to any particular locality.

Subscriptions may be paid to Messrs Herries, Farquhar, and Co., 16 St James's street; Messrs Hoare and Co., 37 Fleet street; Sir Samuel Scott, Bart., and Co., 1 Cavendish square; Messrs Coutts and Co., 59 Strand; Messrs Barnett and Co., 62 Lombard street; the Bank of England; or to Thomas Bodley, Esq., Secretary, at the office, 46A Pall Mall, S.W.

Cheques sent to the office should be crossed Herries and Co.; and Post-office orders can be made payable to the Secretary.

46A Pall Mall, Feb. 4, 1865.

PRIZE MEDAL AWARDED.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues by post free.

Also, Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands Canteens, &c., by post free.

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Horse Piazzas, Liverpool.

THEATRE ROYAL, DRURY LANE.

Managers, Messrs Edmund Falconer and F. B. Chatterton.

Notice.—The public is respectfully informed that notwithstanding the success of the revival of Shakespere's play of HENRY THE EIGHTH, it cannot be performed longer than Saturday, Feb. 18, in consequence of the representation of Sir E. L. Bulwer Lytton's play of RICHELIEU on Monday, Feb. 20. Morning Performance of the Pantomime on Wednesday and Saturday next, at Two o'clock, being the last morning performance of the season.

On Monday, and during the week, Shakespere's play of HENRY THE EIGHTH, terminating with the Fall of Wolsey. Cardinal Wolsey, Mr Phelps; Henry the Eighth, Mr Walter Lacy; Queen Katherine, Miss Atkinson. Other characters by Messrs H. Marston, E. Phelps, Barrett, Sinclair, Raynor, Spencer, Fitzjames; Miss R. Leclercq, and Mrs Zandenhoff, &c To conclude with (the 59th, 60th, 61st, 62nd, 63rd, and 64th time) the Grand Christmas Comic Pantomime, written by E. L. Blanchard, Esq., entitled, HOP O'MY THUMB. The scenery by Mr William Beverley, whose personal services have been retained this Christmas exclusively for the Theatre Royal, Drury Lane. The general action of the Pantomime arranged by, and the whole produced under the direction of, Mr Robert Roxby. Characters in the opening:—Miss Lydia Thompson, Miss E. Falconer, Miss Hudspeth; Mr G. Belmore, Tom Matthews, Mr Fitzjames, Mr Meagreson, Mr G. Weston, Master Percy Roselle, &c. The Harlequinade will include the services of those popular pantomimists (forming a double company)—Harry Boleno and Mr C. Lauri, Clowns; Mr W. A. Barnes and Mr J. Morris, Pantaloons; Mr Cormack and Mr S. Saville, Harlequins; Mdme. Boleno and the Misses Gunnis, Columbines; and Mdlle. Detetto, four years of age, who will introduce her celebrated imitations a la Perea Nena. The masks, dresses, and devices, from designs by the humorously renowned Dyk-wyn-kyn. Doors open at half-past six, performances to commence at seven. Box Office open from Ten till Five daily.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.

Mr J. L. Toole in the new drama of STEPHEN DIGGS every night The great Adelphi drama of THE FLOWERS OF THE FOREST every evening.

Monday, and during the week, STEPHEN DIGGS Messrs J. L. Toole, Billington, Eburne, Stephenson; Mrs A. Mellon, Miss H. Simms, and Mrs Billington. THE FLOWERS OF THE FOREST. Messrs J. L. Toole, P. Bedford, Billington, Stuart, C. J. Smith, Romer, Stephenson; Mrs A. Mellon, Mrs Billington, Miss K Kelly, and Miss A. Seaman. Commence at 7. Due notice will be given of Miss Bateman's reappearance.

ROYAL POLYTECHNIC.

— Patron H. R. H. the Prince of Wales. — Important Discovery—The human breath on the screen —explanation daily at 2.15, and at 7.30, by Professor Pepper. The discoverer, Mr W. Lens Aldous will be in attendance to delineate the breath of any visitor by appointment. — Professor Pepper's Third Ghost Lecture (J. H. Pepper and Henry Dircks joint inventors).—Nil's Sauce, or the Travels of Bruce and the Wonderful Rovings of the Great Baron Munchausen. —Stokes on Memory daily.—All the other entertainments as usual.—Admission to the whole 1s.—Open 12 to 5, and 7 to 10.

UNPRECEDENTANT AND

UNPARALLELED ATTRACTION. — THE WORLD NEVER SAW THE LIKE!—ST. JAMES'S HALL, PICADILLY.—GENERAL TOM THUMB and his beautiful LITTLE WIFE respectfully announce that they have concluded an arrangement to APPEAR for a short time only, previous to their departure for the Continent, at the above Hall, in conjunction with those establi hed little favourites, Commodore Nutt and Miss Minnie Warren, and that they will hold Three Levees daily, viz., at Eleven, Three, and Half-past Seven o'Clock, commencing on Monday, Feb. 13th. This wonderful Diminutive Group will appear at each Levee in a popular entertainment, consisting of a variety of Songs, Dances, Duets &c &c., appearing in each in various costumes. At the Eleven o'clock Levee, the world Four will appear in the identical Wedding Costume which they wore at Grace Church, Broadway, New York, at General Tom Thumb's Wedding. The rich, rare, elegant, and costly presents belonging to the General and Commodore Nutt will be exhibited at each entertainment. This group of Nature's smallest edition of her choicest works, consisting of four persons of mature age, weighing a trifle over 100 lbs in weight. The General's Infant Daughter, "The Wonder of the Age," will also be present at each Levee. The whole party, consisting of five persons, will ride to and from the Hall in their Miniature Carriage, drawn by four of the smallest ponies in the world. - Admission to the Day Levees, 1s, 2s, and 3s; Evenings, 1s to all parts of the house except ing a few seats at 2s. Children under Ten Years of Age, Half-price.

KINAHAN'S LL WHISKY

v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 6d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whisky.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1864.

As part of an early Number of the Economist, *we shall issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of trade, Lists of New Companies, Returns of Prices, Accounts of the Banks of England and France, &c. The object of the Supplement being to place in possession of our readers a Commercial History of* 1864 *worthy of preservation and adapted for reference.*

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

MR GLADSTONE'S BILL RESPECTING THE COUNTRY ISSUES.

Mr Gladstone has brought in a Bill respecting the country issues, which is in its essence good, and which is all the better because in the present divided state of currency opinion it is a small measure and not a great measure.

The country issuers in England have one peculiar privilege and certain peculiar disadvantages. It is proposed to remove these disadvantages if the banks desire it upon their paying the State for that privilege. They have the exclusive privilege of local issue, and coupled with that, they have also some peculiar and almost accidental disadvantages. It is proposed to remove the peculiar disadvantages on the concession of a portion of the advantage.

In relation to such a small measure it is not desirable to open unlimited questions of currency. Two principles may be laid down. 1st. That so long as an exclusive privilege exists it is desirable that the State should buy up as much as possible of the profits of that privilege. 2ndly. That it is very desirable, as long as there are local issues, that those issues should be made by *sound* banks. Of all exclusive privileges (respect being had to vested interests) the State ought to have as much of the profit as possible: if country issues be an evil, we ought to suppress them; but we ought not to add to their evil by making, or at all tending to make, the issuing banks *by law* unsound.

The latter principle is, indeed, sometimes by implication denied. It is said we ought to do nothing to "*strengthen* the "country issues,"—that, in fact, these issues are a great evil, which we hope will die out in course of time. But, if these issues are in fact so great an evil, they ought to be abolished by enactment. A hundredfold greater interests than issuing bankers' have been times without number dealt with by Parliament, and, if the public interest requires it, they should be dealt with. It is not for the public interest that they should be made unsound by law in order that their unsoundness may destroy them. We must not create so great an artificial evil as a bad bank in order to secure the earlier cessation of a currency that is supposed to be defective.

The disadvantages of a joint stock bank of issue are two:—

First. That it is excluded from the London markets. By an almost, if not quite, accidental insertion of certain words in an Act of Parliament, a joint stock issuing bank cannot pay its own notes in London, or carry on any banking business in London. It is obliged to employ an *agent* to pay its notes. Of course, no principle has suggested this enactment. Whether the notes of a country bank are *paid* by that bank, or by Glyn's, or by any other London banker, is in principle immaterial. The exclusion of issuing joint stock banks from London is exceptional, just as their exclusive privilege of issue is exceptional.

Secondly. Joint stock banks are forbidden to acquire, by purchase or otherwise, the circulation of other issuing banks. This is, as we have often shown in the Economist, exceedingly inexpedient. It tends to preserve a bank which ought not to be preserved—a little bank of issue which ought to merge in a larger does not merge. *It has a property to keep which is not a property to sell.* This is a bounty on remaining as it is, and the natural tendency is to remain. But the public suffers. The doors of a little bank are kept open, and perhaps some day or other they will open no longer: it will be found that the bank has stopped.

Thirdly. *Private* banks of issue cannot have more than six partners. This is an evil to the public in the same way as the last. It tends to prevent "new blood," as it is called, being introduced, and to make the bank less safe, sound, and substantial than it would otherwise be.

These disadvantages the Chancellor of the Exchequer proposes to remove upon a payment to the State—upon a relinquishment of the profit of the corresponding exclusive advantages—of 1*l* 18s per cent. 2*l* 5s is the sum named, but as the existing stamp duty may be taken at 7s, the new tax is 1*l* 18s.

Nothing can be wiser or better than to sell to the joint stock banks the privilege of going to London. They have

Digitized by Google

privilege of which they derive the sole benefit, and are under a restriction which they alone suffer and feel. It is perfectly wise, natural, and legitimate to ask those who wish to be relieved from the exclusive burden to concede some part of the exclusive privilege. But the same reasons do not apply to the permission to private banks to augment the number of their partners, and to joint stock banks to purchase the issue of banks wishing to retire. *Of these restrictions the public suffers the evil.* There is a likelihood of bad banks being thus preserved; there is a tendency to preserve them, It is, therefore, matter for grave reflection, whether we ought to oppose any difficulty—to require any payment—in emancipating the issuing banks from these restrictions. As this part of our legislation is injurious to the public, abolish it. The regulating principle of such matters is, sell concessions which do good only to the buyer; but make freely—do *not* sell—the concessions which are desirable for the public.

There are two other matters of detail in the Bill which we think objectionable. First, the amount of the tax is too high. No country banker will ever pay it, except under very exceptional circumstances. 1*l* 18s is a very great per centage, and the advantages to be gained are not of the first magnitude. The London market is now thronged with banks, and it is becoming daily more difficult to obtain a banking business there which is worth having. The larger issuing banks can, and in some cases do now, come there, as capitalists, and the additional advantage of being bankers can scarcely be reckoned worth so considerable a sum as that fixed by the Bill.

Mr Gladstone says the National Provincial Bank is willing to pay over that sum, but this bank is a very peculiar one. The head office and seat of government is in London, and therefore an exclusion from the London market with which its directors are more connected than any other market is particularly vexatious. This bank will pay more than any other because it is more hampered than any other by the restriction, and is more likely than any other to make a profitable use of the new privilege. It may also be said, "Who cares if the tax is too high or not? If the issuing bankers care to take advantage of the concession, let them; if not, it is their affair." But if a sale is to be made, it should be as profitable a sale as possible. In the interests of the revenue Mr Gladstone ought to get as much money as possible. He will not get all he can get; he will hardly get anything by placing the price so high that scarcely more than a single bank will think of paying it.

Lastly. The Bill contains clauses giving a lease for a certain term of years to banks taking the benefit of it. But we do not see the connection of this guaranteed lease with the main object of the Bill:—the removal of restrictions on condition of the relinquishment of privileges. The concession of a terminable property is an entirely new idea not required by the scope of the Act, and having neither a real nor an apparent connection with it. It is possible that it may have been inserted as an additional incentive to pay the tax. But most bankers will think that the chances of the future are better than a tax of 1*l* 18s. If any tax be hereafter imposed by Parliament, it is sure not to be greater than this. It is not worth while to give up the principal profit of the circulation to secure a lease for a moderate term of the remnant.

There are two objections of principle also. 1st. The subject of the country circulation is already complicated enough. and it is something which can only be explained by a long history, which is full of anomalies. It is, therefore, most inexpedient to introduce a guaranteed lease and compensatory clauses in case the lessee becomes a bankrupt. In legislation, added complexity is an evil proportioned to previous complexity; the more various and curious a subject, the greater is the inexpediency of adding to it a more curious variety. 2ndly. There is much reason in this singular and involved subject for leaving entirely unfettered the future discretion of Parliament. It will not be unfettered; it will be hampered by the inevitable precedent of anomalous leases if this part of the proposed Bill be enacted.

On the whole, therefore, the principle of Mr Gladstone's Bill is exceedingly good, but the mode of carrying it into effect is capable, as we believe, of most material improvement. Those parts of the Banking Acts which forbid the purchase of the circulation of retiring banks, and which limit the number of partners in private banks, should be altogether repealed. They do harm principally to the public, and should, therefore, be abolished at once and as a whole. They are not privileges to sell; they are grievances to remove.

2ndly. The amount of tax suggested seems not to be that calculated to bring in the *maximum* revenue, but the *minimum* revenue.

3rdly. The terminable leases should be altogether omitted as an additional complexity in a topic already far too involved.

NEGOTIATIONS FOR PEACE.

EARLY in the week the public mind was again much excited by the prospect of a speedy termination of the American conflict. A few moments given to a calm consideration of the difficulties that lie in the way of any terms of accommodation might have sufficed to moderate the fears of some and the hopes of others; but it was certain that Mr Lincoln and Mr Seward had actually gone to Fort Monroe to meet the Vice-President of the Southern Confederacy and two of his colleagues for the avowed purpose of seeing whether negotiations were practicable; and this was so much more decided a step towards arrangement than any that had yet been taken, as fully to warrant the impression that the affair "looked "like business," and that something *might* come of it. The envoys have met, and separated; and though the American papers are still full of speculation on the subject, nothing has been announced, and the general belief is that nothing has been done.

It would much modify the sensitiveness of the mercantile mind in this country if we were thoroughly to represent to ourselves the difficulties attendant on each of the various bases which it is imaginable might be adopted as the startling point for negotiating terms of peace or accommodation. It is clear no doubt that, for some reason or other, there has been just of late a more decided inclination on the Federal side, if not on both sides, to try and ascertain if it were possible to find any terms on which a treaty could be set on foot, than had hitherto been manifested. What this reason may be,—whether Mr Lincoln thinks the South so completely beaten and down-hearted that it would be willing to return to the Union if the way back could anyhow be smoothed,—or whether he is really staggered and uneasy at the state of his finances,—or whether he can have in truth, or can think he has, any ground for fearing a European intervention,—we have no means of knowing. But the fact remains that he appears *actively* willing, if not anxious, to negotiate; and, however explained, it is a significant fact enough. But what can be the *basis* of a negotiation?

In ordinary wars between ordinary nations, peace can at any time be cooked up easily enough, as soon as both parties really wish for it, or as soon as one party wishes for it strongly and is willing to pay for it handsomely. A little territory given up, or a heavy indemnity consented to, or an advantageous commercial treaty arranged, can usually pave the way to a decent compromise, the worsted party, of course, conceding the most. But in the present instance, *compromise* would seem out of the question. When each party is fighting for a distinct and positive purpose and principle, compromise means surrender. The South might have had peace at any moment since the commencement by abandoning their object,—*viz.*, independence. The North might have made peace at any moment by abandoning their object,—*viz.*, the maintenance of the Union. Is it supposed that either of these surrenders is to be the basis of the negotiations now attempted to be set on foot?

(1.) Peace may be made on the principle of the South avowing itself beaten, and consenting to re-enter the Union on such conditions as its conquerors may grant. We have no doubt the Federal leaders would be disposed to make these terms as easy as they could, but does any one fancy the South to be so shattered, or divided, or disheartened as thus to surrender at discretion? It is certain there are no signs of this as yet,—so that supposition may be put aside. (2.) Peace may be inaugurated by the North consenting to the independence of the South, on condition of limiting that independence to the States now actually held by the Confederacy, *i.e.*, to East Virginia, the Carolinas, Georgia, Alabama, and perhaps Florida, thus permitting a dissolution of the Union on condition that only a small portion shall be rent away? But are there any the slightest indications, that the North is ready to dream of such a surrender of its cherished aim and fancy, which would still leave slavery standing and the Union dis-

Digitized by Google

severed? And would not this be about the most unwise condition of peace for both parties?—inasmuch as it would at best but postpone the final subjugation of the South and the ultimate victory of the North, leaving only an armed truce and a perpetual menace to fill up the interim before the inevitable drama was played out. Thus there seems not the faintest rational ground for anticipating that negotiations could be based upon the surrender by either belligerent of the very object for which it entered into, and has hitherto persisted in, the war. The North are not likely to forego the hope of maintaining the Union intact, or restoring its former integrity, just at the moment when, for the first time, there has seemed a reasonable prospect of realising their ambitious and patriotic vision. The South are not likely to give up *their* object,—to surrender at once independence and property,—their freedom *and* their slaves,—while it is still in their power, hard hit as they have been and exhausted as they no doubt are, to save one at least—and that the dearest—of their aims, by voluntarily sacrificing the other;—to secure their independence by liberating and arming their slaves. It would seem as if they could have no motive for seeking peace on a basis which would leave them not only baffled and defeated, but utterly ruined and denuded. If their cherished institution and their valid property *must* be sacrificed (they may well argue), let them and not their enemies claim the merit and reap the benefit of the surrender.

But there are two other *conceivable* bases on which negotiations might, it is suggested, be set on foot. The Confederates might (3) return to their allegiance on condition of amnesty, equal rights, blended debts, and restored property,—in a word, a re-construction of the Union, with slavery as it stood before secession. A while ago, there is no doubt the North, by an immense majority, would have conceded such terms at once. Even now, probably, most persons would be *disposed* to grant them, if they could. Some even would prefer them to universal emancipation and unconditional surrender. But are such terms any longer possible? In the first place, it is not easy to see how Mr Lincoln *could*, without actual infamy, consent to the re-establishment of slavery where his abolition proclamation has reached, and where his troops have occupied the territory and set free the negroes,—or to the continuance and guarantee of it as of yore in the regular Slave States. Two years since, perhaps even eighteen months since, such a scheme seemed the most natural, and would certainly have been the most popular and welcome solution of the difficulty, but too much has been said and done to make it admissible with honour now. In the second place, how, even if accepted, could such a scheme be made to work? Which are to be considered as Slave States, and which as Free? In which category are to be classed Louisiana, Mississippi, Missouri, and Tennessee? How could 2,500,000 slaves get on—*factionner*, as the French say—with 1,500,000 free blacks on the other side of nearly every frontier river or imaginary line? How little could either party hope to profit by a compromise so discreditable to both? The North would get back their Union shattered, embittered, enfeebled, and disgraced; and the South would get back their "domestic institution" mutilated, impaired, impoverished, and doomed. But, in the third place, *could* such a compromise be consented to by the North? Is not the abolition party far too strong, too resolute, and too sanguine to suffer it? Would not a Southern secession, healed in such a fashion, be a certain signal for a New England secession almost as difficult to heal or crush?

(4.) It has been hinted more than once in American journals, that the two combatants have reached that pitch of excoriated and infuriated temper, that they could arrange their own differences on the general basis of animosity to everybody else. It is said, and by some the notion evidently finds favour, that the South might well surrender something of its grand scheme of Imperial independence, and the North some of its passion for the Union and its dislike for slavery, for the sake of being once more in a position to warn or drive every European people off Transatlantic soil. The proposed federation of the British North American colonies, the establishment of the Mexican Empire under Maximilian, and the late extravagant rumour of the cession of some important provinces adjoining the southern frontier of the United States to France, have, it is said, combined to convince both belligerents that foreign nations are profiting by their dissensions, and that, unless they can adjust their quarrel speedily and unite as one people against the rest of the world, their cherished idea—cherished by both alike—of having the entire continent to themselves must be definitively abandoned. "And what," it is asked, "in comparison with this grand "idea, are minor questions of internal administration and the "negro's future? Is there no contrivance by which the "South may have her independence, and yet the Union be "preserved, and the great Republic be again the pattern, the "hope, the terror to all other nations that she once was? "Why, as we had before thirty-three Sovereign States, can we "not have now two Sovereign Federations, free and independent, "united together, as regards all foreign action, by one indissoluble bond, and more capable than ever, when thus fused "in a new crucible, of once more giving the law to "Europe?" Such is the idea which at this moment is unquestionably exciting the brains of many of the least worthy and the most American on both sides of the Potomac; and, knowing how excitable the American mind is on the subject of empire and exclusive possession of a continent, we should not like to pronounce too confidently on the extent to which such feelings may operate in making negotiators on both sides (if ever negotiations are begun) anxious to come to terms, if by any contrivance, any gloss, any compromise, accommodation should appear possible. Two remarks only we would make on such a basis for peace:—First. That, considering the ineradicable differences of character and temper between North and South, to say nothing of those differences of interest which must continue to prevail till the true principles of economic science are understood in America,—we should feel little confidence in the permanent agreement as to views of foreign policy between the two sections of such a great Republic, unless fortified and fixed by hostile action against others or hostile pressure from without. Secondly. That the rest of the world could not look with much favour or anticipated comfort on the formation of a new power thus motived and thus clenched,—a power whose two fundamental rules of action and *raisons d'être* would be, to defy its neighbour, and to annex its neighbour's land.

THE EMPEROR'S SPEECH.

THE speech of the Emperor of the French delivered at the opening of the Chambers has, we think, been received in this country with satisfaction. It is free from that sensational element which, though it adds to the dramatic interest of politics, affects too suddenly and too powerfully the ordinary course of European affairs. It either indicates that His Majesty is either growing weary of expeditions to all parts of the world, or is becoming aware that Frenchmen, however passionately attached to glory, prefer to obtain it by action within the limits of their habitual outlook. The armies maintained in Mexico, China, Cambodia, and Rome, are all being withdrawn, and the garrison of Algeria, in spite of the abortive insurrection, has been visibly reduced. Promises, moreover, are made of great and perhaps too rapid progress in the public works still necessary for the departments, roads, railways, and canals, clear enough to show that the Emperor has no present intention of engaging in new conflicts. At the same time the speech betrays no intention of abandoning the only foreign effort made by the Emperor in which Englishmen have heartily sympathised, the liberation of Italy. On the contrary, its tone indicates that Napoleon has at length reconciled himself to the idea of Italian unity, that he believes in the permanency of the kingdom as a great European State, and that he has really decided to give up the occupation of Rome. Besides stating briefly and, considering the importance of the statement, somewhat bluntly, that the troops "will soon be withdrawn," he utters this remarkable paragraph:—

"In the South, the action of France had to be exercised "more resolutely. I have desired to render possible the solu"tion of a difficult problem. The Convention of the 15th "September, freed from interpretations dictated by passions, "consecrates two great principles—the consolidation of the "new kingdom of Italy and the independence of the Holy See. "The provisional precarious situation which excited so many "alarms, is about to disappear. It is no longer the scattered "members of the Italian nation, seeking to attach themselves "by feeble ties to a little State situated at the foot of the "Alps: it is a great country, which, elevating itself above "local prejudices and despising thoughtless invitations, trans"fers boldly to the heart of the Peninsula its capital, and "places it in the midst of the Apennines as an impregnable

Digitized by Google

"citadel. By this patriotism, Italy definitely constitutes her-
"self, and at the same time reconciles herself, with Catholi-
"city. She engages to respect the independence of the Holy
"See, to protect the frontiers of the Roman States, and thus
"to allow us to withdraw our troops. The Pontifical terri-
"tory, efficaciously guaranteed, is placed under the protection
"of a treaty which solemnly binds the two Governments.
"The Convention is, therefore, not an arm of war, but
"work of peace and conciliation."

In other words, Italy and the Roman States are to settle their own difficulty for themselves, subject only to this proviso, that the Italian Government shall not actually invade Rome. Should the Papacy, pressed by internal revolution, and finding no help abroad, ask aid from the Government of Florence, then of course there will be, under the French precedent of occupation, no invasion whatever.

All this is satisfactory so far as it goes, though it might have gone further with advantage in the direction of military reduction, but this is not the portion of the speech on which Englishmen will dwell with most pleasure. There is something much more important behind, the determined frankness with which the Emperor persists in the policy of free trade. Upon that subject he is as outspoken as he has occasionally been upon European politics. It is free trade, he says distinctly, which has raised the commerce of France from 104 millions sterling to 280 millions, and he intends therefore obviously to persist in it, taking this year the immense step of abolishing the Navigation Laws which, drawn up originally by Colbert—whose notion of progress was to work France as if it were a private estate—have been "modified," and "improved," and "explained" by successive enactments till they act like swaddling clothes on a child able to walk about. The Emperor not only menaces them, but deliberately reasons against them, and institutions attacked in his public speeches are generally very near their end. The immediate action to be taken is not, however, of so much moment, as the fact that France and her ruler are firm in their resolution to advance in the direction of free trade. It is impossible to exaggerate the importance of that resolve, for it will loosen the fetters of commerce, not in France only, but all over Europe. The Continent is very apt to distrust English commercial reforms for two powerful but widely different reasons. It has happened that most of them have been suggested and urged on by Liberals, and have experienced great resistance from the Conservative party, and continental statesmen have thus been led to see a dangerous principle in reforms, which by enriching the people really indispose them towards political innovation. Why, they say, should English Tories resist schemes which economists think wise, unless afraid of endangering things more valuable than money. That objection cannot, however, be raised to the action of the Emperor of the French. Continental statesmen are aware that he at least is no enemy to the "just influence of autho-
"rity," and when he begins to move along the English groove half these secret alarms begin to vanish at once. The continental peoples again are possessed with the notion that England is governed by an astute, selfish, but determined aristocracy, which is always ready to plunder the rest of the world, which devises unscrupulous and successful commercial schemes, but which cannot be imitated by conscientious men. It is not, therefore, till a democratic Sovereign—and Napoleon, however absolute, is democratic—begins to move, that they are tempted to examine the new doctrine without a secret distrust of its applicability to countries differently organised from Great Britain. Above all, Europe is accustomed to look to France and not to England for the initiative. English ideas do not spread, not we think because English instructors do not comprehend the thoughts of other races, but because they never understand the hiatuses in those thoughts. They assume data, which in their pupils' minds have yet to be proved. The Frenchman rarely makes that mistake, simply because his own countrymen have just the same blanks to be filled up, and an idea once become French spreads very fast. Should the thinking class in France ever, therefore, become converted to free trade,—and experience is sure to produce conversion,—we may expect to see the cultivated class in Germany, in Spain, and even in Russia, shortly acknowledge that their prejudices are untenable, perhaps defend restriction solely on the ground of the ignorance of the masses. Free trade throughout Europe will then be near at hand, for no Government, once aware that its governing classes are convinced of the social advantages of free trade, will long resist the temptation of an increasing revenue. The decision of the Emperor Napoleon may, therefore, and we believe will, in a few years, throw open all the ports of Europe to a trade burdened only with the duties necessary to revenue, a reform of incalculable importance both to Great Britain and the world, one which would compensate this country for the American war, and Europe for the vast armaments which the energy and the success of the French Emperor has compelled it to maintain.

THE CRISIS IN NEW ZEALAND.

The news of the formation of a Ministry in New Zealand, under Mr Weld, with the defined object of getting rid of the Queen's troops, in order to get rid also of of the embarrassments they impose on colonial policy, is the natural result of the quaint theory avowed by Mr Cardwell in the last despatch to the Governor of New Zealand, which he has presented to Parliament. In that despatch Mr Cardwell explains to Sir George Grey that his recent despatches were not intended to reverse, and have not in any way since reversed, the policy announced by the Duke of Newcastle of leaving the control of colonial policy to the responsible Government of New Zealand. Mr Cardwell thinks that while few troops were in the colony, the Duke of Newcastle was quite right in leaving the colony to manage its own affairs, but that when many troops were there it became the duty of the Home Government to bridle and hamper the policy so begun. In other words, the policy should vary with the number of Her Majesty's troops employed,—a theory which has certainly been practically illustrated in this unhappy war, with what result the present complications vividly remind us. Mr. Cardwell further asserts: "I have always declared my determination not
"to interfere with the principle of local self-government
"as regards the affairs either of the colonists or the
"natives. But self-government means the control by any
"people of their own forces, their own finances, and their own
"relations of peace and war. It does not mean that the
"right of establishing a policy shall belong to one body, and
"the duty of carrying that policy into effect shall be laid upon
"another." That is excellent doctrine, the only misfortune being that, practically, the affairs of New Zealand *have* been managed precisely on this principle, with this further complication that a policy conceived by the colonists without interference from home and partially carried out, was checked in mid-career from home because it was found to be costing the Imperial Government too much, and no other coherent policy substituted in its place, so that now it is impossible to say that any one at all is responsible for our New Zealand policy. The new Government certainly is not, for it began on the principle of letting the colonists manage their own affairs so long as there were but few English troops there. The colonists certainly are not, for it went on on the principle that they were not to manage their own affairs when the number of troops had been increased from 3,000 to 10,000. Sir George Grey is not, for he never had a policy, and is incapable of forming one, his policy being of that vacillating and feeble kind which he has really so quaintly illustrated in the case of the Kawau prisoners, who, when first taken prisoners, were properly guarded,—then, at Sir George Grey's own instance, were set apart on an island (whence they could escape) to enjoy a limited freedom,—when they had escaped, were permitted to fortify themselves against the Queen's troops, and to excite peaceful natives to rebellion, and have since been offered free leave from Sir George Grey to abandon their present situation and depart among the Waikatos, there to foment further rebellion, but who, like the settlers, distrust Sir George Grey's kindness, and will not commit themselves for a moment to his power. No one, indeed, neither the Home Government, nor the colonists, nor Sir George Grey, nor the Commander-in-Chief, nor any one else, would be willing to accept the responsibility of the no-policy which has prevailed in New Zealand. But if self-government, both as to colonial and native affairs, is to be the rule *till* a war becomes serious, and then in the thick of it, all sorts of sudden checks aud devices for saving expense to the Home Government are to be adopted, we think the result will be pretty uniformly what it has been in this case, that preparations will be made for a policy which cannot be carried out, and all the evils of it incurred without gaining the benefit.

Digitized by Google

We look, therefore, to the formation of Mr Weld's Ministry in New Zealand with more hope than to any event of late years in that colony. The Ministry has taken every necessary precaution, in the present state of public confidence —or diffidence—towards Sir George Grey, to get from the Governor, *in writing*, a pledge to support Mr Weld's policy if approved by the Assembly. Mr Weld proposes to dispense with the Queen's troops as soon as possible, on condition of having the whole responsibility of carrying out, as far as may be possible, the original policy of the settlers to confiscate some of the wild land for the military colonists, and some of it to defray the expenses of the war. Mr Cardwell can certainly offer no objection to this proposal, as the "principle of "self-government both in colonial and native affairs" will then be really applicable, and the full results of the policy they may select will be felt by the settlers and the settlers alone. There is but one thing wanted to give this great experiment a fair trial, and that is the appointment of a Governor in whom the settlers may place some reasonable confidence. No one feels confidence in Sir George Grey, nor has he entitled himself to any from any side. The natives say that while General Cameron's policy was straightforward, and Mr Fox's (the recent Minister's) also straight, the Governor's is in the shape of an O, that is an infinite series of deflections from the straight line he lays down. The colonists cannot trust him, and Mr Weld has to extort a written promise before he has any chance of obtaining a colleague. Even to his predecessor Sir George Grey was untrue, and received from the late Duke of Newcastle, in a very memorable despatch, a severe rebuke for trying, and without justification, to throw the blame of the war on Governor Browne's purchase of the Waitara block of land, made after careful investigation and the full confirmation of the *bona fide* owners.

Without Sir George Grey's recall, we do not see how any intelligible policy can be carried out. While it suits him, he takes the advice of his Ministers, and when he thinks from the tenor of his despatches from home that he has gone too far, he suddenly dismisses them, only to accept similar advice from the next Government he may be fortunate or unfortunate enough to make. If Sir George Grey could but be replaced by a Governor of simpler policy, we should look forward with great interest to the experiment of true self-government in New Zealand, in spite of the reduced means with which the colonists would be obliged to prosecute the war. It should, too, we think, be a great relief to Mr Cardwell, whose ideas of the sort of check he ought to put on the prosecution by colonial authorities of a war of which he neither understands the development, nor at this distance from the scene of action is able to modify the development even if he understood it, are evidently becoming highly confused and embarrassing. His theory is that he is to diminish the expenditure and hasten peace *somehow*, but as every instruction he sends in that direction, after refraction through the mind of Sir George Grey, results in making peace look more distant, he is naturally and very pardonable puzzled how to carry out his theory that the interferences with colonial policy should be exactly proportioned to the number of Her Majesty's troops employed. It *is* an awkward theory to make anything useful of; and we strongly recommend him to encourage to the best of his ability this new effort of the colonists to increase their responsibilities by throwing off the embarrassing help of the English troops.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 16th inst. The return for the previous week is added:—

DEBTOR.	Feb. 16, 1865. f	c		Feb. 9, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,013,359	9	.....	7,007,295	24
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	801,601,175	0	.....	805,966,575	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	5,859,523	42	.....	6,246,618	64
Treasury account	87,040,609	32	.....	86,966,341	16

Ditto on securities in the Credit Foncier in Paris	520,500	0	.....	522,600	0
Ditto in the provinces	322,150	0	.....	531,150	0
Ditto to the State	60,000,000	0	.....	60,000,000	0
Government stock reserve	12,980,750	14	.....	12,980,750	14
Ditto other securities	36,696,737	91	.....	36,696,737	91
Securities held	100 000,000	0	.....	100,000,000	0
Hotel and property of the bank and branches	8,408,595	0	.....	8,408,546	0
Expenses of management	223,930	56	.....	221,860	6
Sundries	2,801,268	65	.....	6,754,389	71
	1,272,417,135	41	.....	1,287,921,267	81

The return of the Bank of France shows that this week, compared with last, there has been a diminution of 31,163,000f in the discounts, which is a figure unpleasantly large. In the stock of coin and bullion there is an augmentation of 15,327,000f, and in the circulation of notes a decline of 4,365,000f. The deposits have augmented by rather more than 13,000f.

The Bourse has again been extremely inactive, and from the same cause, the abstention of the great bankers and speculators. Even the Emperor's speech from the throne, though promising what *Boursiers* desire above all things—the maintenance of peace —produced scarcely any effect. The following are the quotations:—

	Feb. 9. f	c		Feb. 16. f	c

The affair of the National Bank of Mexico, which has been long talked of, and about which there has been considerable competition, is at last settled. The privilege of establishing the Bank has been accorded to Mr Finlay Hodson, of London, and to Messrs Pillet Will, Mallet Frères, F. A. Sellière, Marcuard, and Heine, of Paris. The capital is to be 10,000,000 piastres (about 2,160,000*l*), but it may be doubled if the shareholders should think fit. The Bank is to have the exclusive privilege of issuing notes, and the notes are to be a legal tender. Operations are to be commenced within six months from the date of the concession. In Mexico, the province of the Bank is to be under the control of a committee composed of the important local firms of Mr Baron, M. Bestigny, and M. Martin Darran, subject, however, to the reservation of important matters for the decision of the founders in Europe. The Governor is to be nominated by the Emperor of Mexico on the recommendation of these latter gentlemen. No limit is to be imposed on the Bank with regard to the rate of interest. One-third of the capital is to be reserved for Mexican houses:—the rest the European founders have undertaken to raise.

The report of the directors of the Bank of France on the operations of 1864 presented at a meeting of the shareholders held on the 29th January, has been issued to-day. It states that the total operations amounted to 7,909,327,600f, which was 367,051,500f more than in 1863. The rate of discount was changed several times, and was as high as 8 per cent. from the 13th October to 3rd November, and the average during the year was 6·51 per cent. The amount of bills discounted was 6,550,735,400f, which was 862,500,800f more than in 1863. The advances more on securities were 423,278,100f, or decline of 575,971,700f. The minimum of the metallic reserve was on the 18th January, when it was 151,925,000f, the maximum on the 24th December, 367,503,000f. The minimum of the circulation of notes was on the 6th June, 720,397,700f, the maximum, on 30th January, 839,641,800f. The expenses of management were 6,737,913f, and the dividend (as already known) 200f.

In the questions of the Superior Council of Commerce, in the inquiry into the currency published in last ECONOMIST, Nos. 24 and 25, are by a typographical error united. The 25th begins at: "What are the advantages, &c?" The latter part of question 29 is, by the misprint of the word *of* instead of *or*, rendered unintelligible—it should read: "Ought the issue to be proportionate to the metallic reserve, *or* to the capital?"

From passages in the Emperor's speech on opening the Parliamentary session, it appears that the Government intends to continue the work of commercial reform.

His Majesty announced measures for giving greater liberty to mercantile companies, and for freeing the Government of all responsibillty with respect to them. At present the departments of Finance and Commerce are supposed to exercise a certain degree of surveillance over many companies, and the latter have to present them with statements of their situation; but it is clear that the Government cannot watch with any efficacy the proceedings of commercial establishments, and cannot tell whether or not the statements presented are exact. His Majesty also announced the removal of restrictions to the establishment of societies for the improvement of the condition of the working classes. But the most important declaration made by His Majesty was that the protection which French shipping has hitherto enjoyed is to be abolished:—"A Bill," said he, "is in preparation for establishing at sea that competition which alone excites progress." Your readers were informed in November last that a measure of this kind was in contemplation.

There is one statement in the Emperor's speech which is calculated to create misapprehension:—"Thanks," said he, "to liberal legislation, thanks to the impulsion given to all the elements of national wealth, our foreign trade (*commerce exterieur*), which in 1851 was 2,614,000,000f, now attains the prodigious figure of more than 7,000,000,000f (280,000,000*l*). Now, by "foreign trade" the public generally understands only the exports of French productions—and they in 1864 amounted to 2,909,439,000f. Taking, however, the term to include imports as well as exports, we arrive at a total of not more than 5,389,653,000f. Even if we add the precious metals imported and exported, which in France are never counted as part of commerce, are yet not higher than 6,785,590,000f. It follows, therefore, that the Emperor has made up his 7 *milliards* either by counting in round figures, or by borrowing a few millions from the transit trade.

A treaty of commerce and navigation between France and Sweden and Norway was signed yesterday at the Ministry of Foreign Affairs. In direct navigation it places the vessels of each country in the ports of the other on the same footing as national vessels, and adopts a liberal system as regards imports.

The Minister of Finance fixed the interest of Treasury bills on the 13th at 3½ per cent. for bills of from three to five months, 4 for those of from six to eleven months, and 4½ for those of a year; and to-day he has reduced all these rates ½ per cent. It is extremely rare for two reductions in Treasury bills to be made in one week, and the fact proves how vigilant the Minister is in making the Treasury profit by the state of the market.

The Isthmus of Suez Canal Company announces that it will not have need "for the present" to make the last call which has to be paid on the shares, and that consequently the shares now held by the public need not be exchanged for new ones.

An action now pending before the Imperial Court excites great interest in the financial and commercial worlds. It is an appeal from a judgment of an inferior tribunal rejecting, for want of sufficient grounds, a demand made by certain shareholders of the Ports of Marseilles for the annulling of the amalgamation effected between that Company and the Immobilière Company of Paris, and M. Emile Pereire as proprietor of the Rue Imperiale at Marseilles. The appeal is based on the allegations that the meeting of the shareholders of the Ports of Marseilles, in which the amalgamation was pronounced, was a fraudulent one, inasmuch as a number of persons figured in it as shareholders who were not possessors of shares, and that if the votes they gave were deducted, there would a majority adverse to the amalgamation; and that, besides, the amalgamation was illegal as contrary to the statutes of the Company. The advocate charged to support the appeal affirmed that M. Emile Pereire had packed the meeting, that he had done so because the fusion of the companies was extremely advantageous to him personally; and he attacked that gentleman with a virulence of language rarely tolerated in a civil case in a court of justice. The answer to the appeal was that the Ports of Marseilles Company, by mismanagement, and by the disaster which befel M. Mires, its founder, was brought to the verge of ruin, and that it was only by the amalgamation to which M. Pereire consented that the property of the shareholders was preserved; that if there had been any irregularities in the meeting they were unimportant in themselves, and had been corrected by subsequent acts of the shareholders; that M. Pereire had had no hand or part in them; that the amalgamation was not contrary to the statutes, and that the upsetting of it now would be disastrous to the shareholders. M. Pereire's advocate repelled with much indignation the attacks made on him, and said sharp things of the parties by whom the appeal was concocted. The Court has reserved judgment.

The following is the market report:—

FLOUR.—At *Paris*, prices are firmer; yesterday they ranged from 41f to 46f the sack of 157 kilogs. Six marks disposable were offered at 46f; March and April, 46f 25c; May and June, 47f 75c; four months of May, 49f. Type Paris, the 101 kilogs, 28f 25c disposable.

WHEAT.—Provincial markets have been more active, and some have risen. At *Paris*, prices are the same as those of last week.

COTTON.—The market at *Havre*, in the week ending Friday, was agitated. The sales were 6,446 bales and piculs, and the arrivals 880. The stock was estimated at 62,375 bales; at the corresponding date of last year it was 35,210. The closing quotations were 5f lower for United States sorts and Jumel, 5f lower for certain qualities of Surat, 5f to 10f higher for Tinnevelly, Madras, and Coconada, 5f higher for choice. Low New Orleans was consequently 305f the 50 kilogs, and good ordinary qualities in Broach, 205f; in Tinnevelly, 195f; in Madras, 88f; in China, 155f; and in Egypt, 270f. On the first two days of the week the market was very inactive, and prices had a downward tendency. Yesterday, owing to the news from America, scarcely anything was done. Surat was at 165f; Japan, 160f; and American, 290f.

COFFEE.—In the week ending Friday, at *Havre*, the demand was active and prices were firm. 185 sacks Port-au-Prince and Mirogoano, disposable, 82f to 83f the 50 kilogs, in bond; 900 sacks ditto, for delivery, 83f; 1,600 Jeremie and Cayes, for delivery, 82f to 82f 50c; 100 Cape, disposable, 87f; 800 ditto, for delivery, 85f 75c to 87f; 1,400 Gonaives, disposable, 89f to 90f; 3,300 ditto, for delivery, 89f; 50 Saint Marc, for delivery, 91f; 1,621 Rio, not washed, disposable or in the port, 75f to 82f; 90 Costa Rica, indirect import, 89f 50c to 91f, high duty; 1,000 Mysore, 87f 50c. By auction, some damaged Hayti and Port-au-Prince were sold. The arrivals exceeded 15,500 sacks. This week, Hayti, 83f; Rio, 75f 50c; Malabar, 86f 50c. By auction, some sales of damaged. At *Nantes*, last week, no sales, and none this week. At *Bordeaux*, last week, the demand was calm. 195 sacks Rio washed and some Santiago at prices not stated; 200 La Guayra, 105f. This week, by auction, La Guryra, sound, 103f 50c to 104f; also some damaged. At *Marseilles*, last week, 600 sacks Rio, in the port, 75f; 2,000 at 80f; 600 at prices not stated. This week, there have been no sales, but prices are firm.

SUGAR.—The market at *Havre* was calm in the week ending Friday. 14,000 bales Reunion, 51f the 50 kilogs, bonne quatrieme duty paid; 264 casks Cuba, 49f ditto; 1,065 casks Havana, 30f 50c to 31f, No. 12 in bond. The arrivals were insignificant. This week, Havana, 28f 50c, No. 12 in bond; also 30f 25c. A quantity of Mauritius for Nantes, at prices kept secret. By auction some damaged Havana. At *Nantes*, last week, in consequence of holders having consented to make concessions, 289 sacks Reunion, old, went at 50f, which was equal to 51f 50c bonne quatrieme; 10,722 Reunion on the basis of 52f 75c bonne quatrieme; 350 at 53f 75c, equal to the same price and quality. There was besides an exchange of 4,000 sacks. In Mauritius, 5,953 sacks, floating conditions, 30f 25c, No. 12, duty paid. Some small lots of French West In dia went at 51f 37½c, and 77 Guadaloupe, 46f 25c; 500 at 51f: the whole being equal to 49f 75c the type. This week, a quantity of Mauritius from entrepots of Havre, 30f, No. 12; Reunion, 52f 75c and 51f 75c bonne quatrieme; also on sample 57f 75c. At *Bordeaux*, last week, 30 casks French West India, 49f bonne quatrieme; 1,000 sacks Reunion, gros grain, 53f ditto; 4,693 at 52f 50c ditto; 160 indifferent quality, 46f; 9,036 sacks Mauritius, 53f bonne quatrieme. This week French West India 48f; ditto usine, 58f. At *Marseilles*, last week,, 3,000 bales Reunion in the port, at prices not stated; 1,500 for delivery, 52f 50c bonne quatrieme; 150 casks French West India for delivery, 33f ditto; 250 Cienfuegos, 30f 75c ditto, in bond. No sales this week.

INDIGO.—At *Havre*, in the week ending Friday, there was an auction, at which 83 chests Bengal, 12 of the season 1864, 12 Madras, and 3 Kurpah, all sound, were offered, and of them the only sales effected were 48 chests Bengal, at 8f 50c to 10f 80c the half-kilog, which was from 20c below to 20c above the estimates for the greater part, and 45c to 65c premium for some chests. Apart from the auction, 30 chests Bengal went part at 50c above the estimates, part prices kept secret, and 65 serons Guatemala, at prices not stated. The arrivals were 163 serons for England. This week, Bengal at a premium of 50c. Guatamala at prices kept secret. At *Bordeaux*, last week, 54 chests Bengal, 26 Kurpah, 12 Madras, at established prices. No sales this week.

HIDES.—The demand at *Havre*, in the week ending Friday, was irregular: 1,665 Monte Video dry, 75f to 82f 50c the 50 kilogs for cow, light or old, and 110f to 115f for ox; 500 Rio Grande salted ox, 55f; 2,300 Rio Janeiro salted ox, 52f, cow, 44f; 1,475 Pernambuco drysalted, 66f to 67f; 400 Maraguan ditto, 58f; 567 Rio Hacha dry, 59f; 832 Valparaiso salted cow, 46f 50c to 47f; 1,821 ditto, drysalted cow, 68f 50c to 69f; 1,500 New York salted cow, 38f; 1,200 horse, salted Monte Video, 42f 50c; 500 Calcutta calf, 100f. The arrivals were only about 2,100. This week, Rio Grande salted cow, 46f, ox, 56f; ditto dry, 87f 50c; Valparaiso drysalted ox, 70f 50c and 78f; ox and cow, drysalted, 71f 50c; Rio Janeiro salted cow, 44f; Monte Video dry ox, 110f; Uruguay damaged, 44f 50c. Some lots of different sorts of damaged were also sold.

WOOL.—The sales at *Havre*, in the week ending Friday, were only 9 bales La Plata, 1f 75c to 2f 25c the kilog, and 66 *ballots* Peru washed, 2f 65c to 3f 5c. The arrivals were 127 bales. This week, Monte Video washed, 2f 80c; and unwashed, 1f 42½c.

TALLOW.—At *Havre*, in the week ending Friday, the sales were 43 casks La Plata, disposable, 49f 50c the 50 kilogs, and 200 ditto for delivery, 50f to 49f 25c. No arrivals. This week, La Plata, 49f 50c, 49f 75c, and 50f; New York, 49f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 105f 70c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, were 54f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 73f; beet-root, first quality, 90 deg., 61f.

COMMERCIAL AND MISCELLANEOUS NEWS.

A new Tariff has been passed in New Zealand raising the import duty on spirit, from 6d to 2s 6d; cigars and snuff, from 3s to 4s 6d; tobacco, from 1s 6d to 2s 6d; wines, from 3s to 4s in wood, and to 5s in bottle; ale, from 6d to 9d and from 1s to 1s 6d in bottle; tea, from 4d to 6d; and on general goods, from 4s to 5s per cubic foot, and from 3s to 4s per cwt. Sugar and a few other articles not increased.

In reference to bullion movements at Hong Kong, for the fortnight ending Jan. 1, Messrs Sharp and Co. write as follows:—Gold—During the last two weeks there has arrived the equivalent in value of 510,000 dols, whilst the sums exported are equal to 770,000 dols; the chief portion of this is to India. Silver—The receipts of the fortnight are about 171,000 dols; the shipments outwards are equal to 130,000 dols. Dollar Currency—There has come to hand a total of 1,090,000 dols; and 730,000 dols have been sent away. Clean coin has remained, as last quoted, at the lowest price. Discounts and Mortgages—There has been but small demand for money; and the few loans negotiated have been at lower rates. Exchange—Rates have ruled very steady during the mail at much the same as those quoted in our last circular; and the closing point may be said to be identical, both in sterling and rupees. Exchange and Bullion—Closing Quotations—On London, 6 months' sight, bank, 4s 8½d; ditto, ditto, private, 4s 9d; on Calcutta, 3 days' sight, 234 rs; ditto, London drawn, 224½ rs; on Bombay, 3 days' sight, 224½ rs; on Shangai, 30 days' sight, 73 tls; ditto, 60 days' sight, 74 tls. Bar silver, 8 per cent. prem.; Mexicans, unopened invoices, ½ per cent. prem.; gold leaf, 22.45 dols per tael; gold bars, 21.40 dols per tael, equivalent 100 touch; sovereigns, 4.39 dols each; American double eagles, 18 dols each; discount, 8 per cent.

The imports of gold in the week ending Feb. 15, current year, were valued at 332,813*l*, silver 190,437*l*. The exports were—gold, 188,668*l*; silver, 87,012*l*.

From Mr F. M. Page's circular we extract the following table, showing the export of specie to the East, through Alexandria, in January, 1864 and 1865:—

Shipped from—	Total during January, 1865. £	Total during corresponding period in 1864. £
Alexandria	537,534	1,051,965
Aden	62,080	7,724
Australia	5,131	5,550
Bombay	470,812	1,843,106
Madras	44,447	119,690
Calcutta	110,480	776,086
Singapore	67,564	47,447
China	37,298	154,278
Sundry ports	7,000	...
	1,342,346	4,005,846

The following is a statement of the cash balances in India, at the close of October last, contrasted with those of previous years:—

According to the present Returns of the several Governments.	Oct., 1862. £	Oct., 1863. £	Oct., 1864. £
Government of India	5,702,206	3,172,489	1,640,500
Bengal	1,833,092	2,096,714	1,580,587
North-Western Provinces	2,459,870	2,262,066	1,457,441
Punjab	860,456	891,007	1,140,028
Bombay	2,392,240	1,815,763	1,761,709
Central Provinces	437,199	395,018	363,370
Deccan	123,985	226,757	164,154
Madras	2,140,885	2,339,667	1,863,175
Total	15,949,933	13,199,486	9,910,964

In reference to freights, the *Shipping Gazette* observes:—The tonnage loading on the berth for India, China, and the Cape of Good Hope is reduced to 35,000 tons, and that for Australia and New Zealand to 44,900 tons. Small ships continue in request. A limited order is in the market, Chinchas to Mauriutis, at 60s for guano. Brazil and West India freights are unaltered. There is more activity in coal freights from the North of England and Wales to the Mediterranean.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 15th day of February, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,432,415	Government Debt	11,015,100
		Other Securities	3,631,900
		Gold Coin and Bullion	13,784,415
		Silver Bullion	...
	28,432,415		28,432,415

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (Including Dead Weight Annuity)	11,023,211
Rest	3,619,136	Other Securities	18,886,988
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,572,512	Notes	8,497,310
Other Deposits	13,969,659	Gold and Silver Coin	771,456
Seven Day and other Bills	464,658		
	39,178,965		39,178,965

Dated the 16th February 1865. GEO. FORBES Deputy-Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,399,763	Securities	30,007,199
Public Deposits	6,572,512	Coin and Bullion	14,553,871
Private Deposits	13,969,659		
	40,941,934		44,561,070

The balance of Assets above Liabilities being 3,619,136*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£344,042
An INCREASE of Public Deposits of	319 620
An INCREASE of Other Deposits of	155,596
No change in Government Securities.	
An INCREASE of Other Securities of	99,097
An INCREASE of Bullion of	42,260
An INCREASE of Rest of	10,183
An INCREASE of Reserve of	387,010

The increase in the public and other deposits have caused a rather large augmentation in the reserve, notwithstanding the addition to the other securities. Although a heavy withdrawal of gold has taken place for Portugal, a moderate increase is shown in the bullion.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20 141.040	£ 20,772,726	£ 19,916 496	£ 20 696,172	£ 20,399,763
Public deposits	4,898,602	5 397,144	7 413 275	7,079,789	6,572,512
Other deposits	10 174,871	15,085 843	13,769,276	13,306 156	13,969,659
Government securities	11,538,227	11,101,862	11 043,079	11,124,584	11,023,211
Other securities	14,546 240	17,573 010	18,750,424	19,856,744	18,886,988
Reserve of notes & coin	7,734,631	10,414 895	9 923,502	8,085 655	9,268,766

Bank rate of discount	5 p. c.	2½ p. c.	4 p. c.	7 p. c.	5 p. c.
Price of Consols	91¼	93⅜	92¼	91½	89¼
Average price of wheat	70s 3d	59s 10d	47s 2d	40s 8d	38s 4d
Exchange on Paris (short)	25 5 12½	25 12½ 20	25 15 22½	25 30 40	25 10 20
— Amsterdam ditto	11 15⅞ 16⅛	11 16 16⅛	11 15 15⅝	11 17⅛ 18	11 15 15⅛
— Hamburg (3months)	13 6 6½	13 7⅛ 7⅜	13 7 7⅛	13 8 8⅛	13 7⅛ 7⅜

In the corresponding week of 1855, a proclamation had been issued forbidding the building or furnishing ships of war or provision of other warlike aid to Her Majesty's enemies.

In 1862, the bill for the conversion of the 4 and 4½ per Cent. rentes, and the 30 years' railway bonds into 3 per Cent. stock had passed the Legislative Chambers in Paris. The public comments on the previously proposed loan to the Bank of France, on rentes, had occasioned the breaking off of the negotiations which had been entered into. The money market had become easier.

In 1863, Mr Gladstone had proposed to lower the duties on manufactured tobacco, so as to destroy their protective character and to allow manufacture in bond. The Polish insurrection was extending, and had already assumed a formidable character.

In 1864, Field-Marshal Wrangel had issued a proclamation, declaring the authority of the King of Denmark to be suspended in Schleswig. Altona had been occupied by the Prussians, and Duke Frederick had been proclaimed at Tondern. The allies had commenced attacking the Danish entrenchments at Duppel. The Prussians were concentrating their forces in the district of Sundewill. A severe engagement between Russians and Poles had taken place in the district of Siedlic. The Spanish Budget had been presented to the Cortes. In America the Federals had met with reverses near Knoxville, and had been defeated by Forrest in three engagements. Negotiations for a commercial treaty between France and Switzerland were being carried on. The Bank of Frankfort had reduced its rate of discount to 4 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 4,371,469*l*; in 1862, a deficiency of 2,487,167*l*; in 1863, a deficiency of 4,981,148*l*; and in 1864, a deficiency of 6,550,588*l*. In 1865, the deficiency is 4,917,329*l*.

DISCOUNT AND MONEY MARKET.—There has been a fair demand for money this week, and the general rate has been steadily maintained at 5 per cent. Some transactions, have taken place an eighth lower, but they have been altogether exceptional. The supply in the open market is however ample, and comparatively few bills are offered, but the un-

Digitized by Google

certain position of our relations with America induces caution, and a disinclination to transact any but the most requisite business. The following are the rates for paper with various periods to run :—

30 to 60 days	5 per cent.
3 months	5 per cent.
4 months	5¼ per cent.
6 months—Bank bills	5½ per cent.
6 months—Trade ditto	6 per cent.

On the Stock Exchange, in consequence of the purchases of stock by the Government broker. and also on Scotch banking account, money has become plentiful, and the terms for short loans have fallen to 3½ to 4 per cent.

There were no bullion operations at the Bank either yesterday or to-day.

The following are the rates of interest allowed on deposits :—

Joint Stock Banks	*4 per cent.
Discount houses at call	4 per cent.
Do. with seven days' notice	4¼ per cent.
Do. fourteen days	4½ per cent.

* At the London and Westminster 3 per cent. only on sums below 500*l*.

The biddings for 300,000*l* Government bills on India took place at the Bank of England on Wednesday last, The proportions allowed were—On Calcutta, 153,900*l*; on Bombay, 120,000*l*; and on Madras, 26,100*l*. The minimum price was 1s 11½d on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras at 1s 11¾d will receive about 43 per cent. ; and on Bombay at 1s 11⅞d, about 92 per cent. ; above these prices in full.

The Crown agents for the Colonies have invited tenders for 300,000*l* of Mauritius Government Six per Cent. Debentures, or registered stock, forming part of a balance of 400,000*l* destined for railway purposes. The total cost of the railways in question is estimated at 1,300,000*l*, of which 300,000*l* has been already defrayed from the accumulated surplus revenue of past years, and 600,000*l* raised on debentures. The present loan is secured by a charge on the revenues of the colony, as well as upon the railways themselves.

The return of the Bank of France, this week, is again very favourable, the following being the changes :—

	£
INCREASE.	
Bullion	613,000
DECREASE.	
Bills discounted	1,367,000
Advances	60,000
Circulation	133,000

Madrid	9	...
Hamburg	...	3
St Petersburg	6½ 3 mths' bills. 7 6 —	8 ...

ENGLISH FUNDS.—The changes in Consols this week have been unusually heavy, owing to the conflicting character of the American news. On Wednesday, the arrival of the Cunard mail with the intelligence that peace negotiations were talked of between the Federal and Confederate Governments upon a basis involving the strict enforcement of the Monroe doctrine, and thereby a possibility of a war with this country, caused a decline to 88½ to 88⅝ for the 9th of March, or one per cent. lower than last Friday. On Thursday, the telegrams by the second steamer announcing that the proposals for an arrangement had fallen through, there was a partial recovery, which continued to-day. Consols were finally quoted this afternoon 89⅛ to 89¼ for money, and 89¼ to 89⅜ for the account, showing a reduction on the week of about a quarter per cent. Reduced and New Three per Cents. left off at 88⅝ to 88⅞, and India Five per Cents. at 103½ to 103¾. During the last day or two the Government broker has been purchasing stock on account of the sinking fund, the amount taken to-day being 15,000*l*.

Exchequer bills being also required on Government account, the price has risen to 4s to 8s premium. India bonds are steady at 10s to 15s premium.

FOREIGN STOCKS.—The foreign market has also been flat, especially the more speculative descriptions, such as Greek, Mexican, Spanish Passive and Venezuelan bonds. Spanish Certificates, however, are higher. The Confederate loan advanced on the first mail to 58 to 60, but on the arrival of the second relapsed to 54 to 56, whence a fresh recovery has taken place to 57 to 58. Peruvian Four-and-a-Half per Cents. improved to-day on the announcement that peace has been concluded between Spain and Peru. The indemnity to be paid by the latter country of it is alleged, 4,000,000*l* is considered an exaggeration; probably the sum should be 400,000*l*. Russian and Italian stocks are steady. Turkish descriptions have been inquired for, and the foreign loans are slightly firmer, but the Consolides show no change, leaving off at 51⅞ to 52⅛. After regular hours this afternoon, Spanish Passive and Certificates were rather more offered, the four o'clock prices being 32⅛ to 32⅜, and 14⅝ to 14⅞.

Danubian loan scrip closed at 1 to ½ dis.; Egyptian, ¾ to 1¼ premium; and Italian, 1⅞ to 1⅝ dis.

In consequence of the pacific tone of the Emperor's speech, there has been an improvement on the Paris Bourse. Three per Cent. Rentes were last quoted this evening, 67f 50c, showing an advance of nearly three-eighths per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The fluctuations in the railway market have chiefly followed the movements in Consols, but the general tendency has been rather less flat. Compared with last week, however, most of the leading descriptions are quoted ¼ to ½ per cent. lower. North British, North-Eastern stocks, and Great Western have been exceptionally heavy. Great Northern is comparatively steady after the recent decline. The announcements of the proposed dividends of the South-Eastern and London and North-Western have not effected the prices of these stocks. To-day, there has been a rather better feeling, with little change in the quotations. Metropolitan is now quoted ex the dividend and new issue of stock.

In the colonial department, Canadian descriptions have declined, and some of the Indian guranteed stocks were rather less steady. Foreign shares have been well maintained, Bahia, Great Luxembourg, South Austrian, and Lombardo Venetian especially showing an advance.

International Financial shares left off at 1⅝ to 1⅞ prem.; General Credit, 2⅛ to 2⅜ prem.; Credit Foncier and Mobilier, 3⅝ to 3⅞ prem.; Hudson's Bay, 15 to 15¼; and Egyptian Trading, ⅞ to 1 prem.

The closing prices of new companies are as follows :—Metropolitan District Railways, 2¾ to 3 prem.; Milan Improvements, 3⅝ to 3⅞ prem.; General Irrigation of France, ⅛ to ⅜ prem,; and China Steam, 1⅝ to 1⅞ prem.

FOREIGN EXCHANGES.—The rates this week are generally higher.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Since our circular of the 9th inst., the following arrivals have come to hand:—The M'Gregor Laird, from Africa, with 11,000*l*; the Seine, from the West Indies, with 248,500*l*; and the Canada, from Boston, with 32,500*l*. The demand for export has been so active that the above amounts have been absorbed, together with 125,000*l* withdrawn from the Bank of England; that establishment has, however, received about 100,000*l* in sovereigns, which have come here from Portugal. The Massilia has taken 14,800*l* to Bombay. The shipments of gold from Melbourne to England, for the month ending 24th December, 1864, amount only to 118,500*l*.

Silver.—The Seine has brought 168,500*l* from the West Indies, the Doré portion of which has been sold at 61⅝d per oz standard. Our market for fine bars is very quiet, and the demand for India is comparatively small. A few orders have been executed at 61⅜d per oz standard for shipment via Southampton, and at 61½d per oz standard for shipment at Marseilles. The Massilia took only 37,900*l* to Bombay.

Mexican Dollars.—The demand for this coin has been very small, and prices have declined slightly; transactions to a limited extent have taken place at 60¼d per oz, showing a decline of ⅛d, and it is probable that the large amount in the French steamer Rhone, now about due, will cause a further decline.

Exchange on India for drafts by the Banks at 60 days' sight is 1s 11¾d for Bombay, Calcutta, and Madras. The Council drafts yesterday were disposed of at 1s 11¾d Calcutta and Madras, and 1s 11⅞d Bombay: at these prices the former received 42 per cent. and the latter 92 per cent.

India Government loan notes remain about the same as last week, the quotations being 109 to 110 for 5½ per Cents.; 101 to 102 for 5 per Cents.; and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std; ditto refinable, 78s per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz, nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 4½d per oz, last price. Silver—Bar silver, 5s 1⅝d to 5s 1½d per oz std; bar silver, containing 5 grains gold, 5s 1⅝d per oz std; Mexican dollars, 5s 0¼d per oz, last price; five-franc pieces, 4s 11½d per oz. Quicksilver, 8*l* per bottle; discount 3 per cent.

The Moravian has arrived from Melbourne with 65,000*l*. The French packet from Vera Cruz is also announced at St Nazaire with 80,000*l* in Mexican dollars.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The liquidators of the Adelaide Land and Gold Company have notified they will be prepared to pay a fourth instalment of 6s 6d per share on the 20th inst.

Creditors of the "Scottish and Universal Finance Bank (Limited)" are required to send the particulars of their claims to the official liquidator by the 7th of March, the 21st of March having been appointed by Vice-Chancellor Wood for adjudicating upon them.

Petitions for the winding-up of the Palleg Anthracite Coal and Iron Company (Limited), and the Maresfield Gunpowder Company (Limited), are to be heard before the Master of the Rolls on the 18th inst.

Notice has been given, with reference to the bankruptcy of Peter Morrison, that a second and final dividend "on all debts due from the bankrupt solely," is to be made after the 1st March.

The Master of the Rolls proposes on the 23rd inst. to appoint an official liquidator of the Anglo-French Porcelain Company (Limited).

Letters from Greenock announce the suspension of Messrs M'Kirdy and Steele, trading under the name of the Greenock Sugar Refining Company. It is expected that the realisation of the estate will turn out favourable.

The Master of the Rolls proposes on the 28th inst. to settle the list of contributories of the Agricultural Insurance Company.

Creditors of the Bank of Gibraltar and Malta (Limited) are required to send the particulars of their claims to the liquidators by the 14th March.

A petition for the winding-up of the Brighton Brewery Company (Limited) is to be heard before the Master of the Rolls on the 25th inst.

PUBLIC COMPANIES.—The second ordinary meeting of the shareholders of the Contract Corporation was held on Thursday at the London Tavern, Mr Joseph Robinson in the chair. A dividend was declared at the rate of 10 per cent. per annum, which, with a dividend paid at Midsummer, made 12½ per cent. The report was adopted, and a provisional agreement, dated 2nd February, entered into between John Watson and Co, and the Contract Corporation for the acquisition of the business of John Watson and Co., railway contractors, was also agreed to.

The directors of the South-Eastern Railway Company have resolved to recommend to the proprietors, at the half-yearly meeting on the 23rd inst.. to declare a dividend of 17s 3d on each 30*l* stock, being at the rate of 5*l* 15s per cent. per annum.

At the first ordinary general meeting of the Maritime Credit Company (Limited), held on the 15th inst., a dividend at the rate of 10 per cent. per annum, free of income tax, was declared.

The annual report of the directors of the British Land Company (Limited) has been issued, and shows a balance of profit in favour of the Company of 26,339*l*; out of which the directors propose a dividend of 10 per cent., and a bonus of 5 per cent., free of income tax, leaving 9,683*l* to be carried forward.

The Credit Foncier and Mobilier of England have invited subscriptions for a capital of 500,000*l*, in shares of 20*l* each, for establishing the China Steam Ship and Labuan Coal Company, formerly two separate institutions, the one for supplying the China seas with steam navigation, and the other to work coal mines in Labuan and Borneo.

The directors of the European Bank have made a provisional agreement with those of the London, Birmingham, and South Staffordshire Bank, subject to the confirmation of the shareholders, for the transfer of the business of the latter, to take effect on and after March 16.

The first report of the directors of Mudie's Select Library (Limited) has been issued. The directors recommend the payment out of the net profits of all preliminary expenses, to write off a portion of the outlay for building alterations, and to pay a dividend of 7½ per cent. per annum, free income tax, on the paid-up capital, carrying forward 475*l* 9s 11d to the next account.

At the meeting of the Berlin Waterworks Company the report was adopted, and a dividend of 5s per share free of income tax was agreed to. The general revenue account exhibited a balance of 12,544*l* available, which, after the distribution named, left 929*l* for future appropriation.

The annual report of the directors of the North British Australasian Company (Limited), to be presented on the 21st inst., recommends a dividend of 2½ per cent.

At the sixth half-yearly meeting of the shareholders in the International Hotel Company, the net profit for the half-year ending 30th Dec., 1864, after meeting all liabilities, was stated to be 2,500*l*, and the directors recommended a dividend at the rate of 4 per cent. per annum on the paid-up capital, amounting to 1,613*l* 12s 6d, leaving a balance of 886*l* to be carried over to the next half-year. The report was adopted, and the remuneration of the directors fixed at 400*l* per annum.

At the fifth ordinary general meeting of the shareholders of the Thames and Mersey Marine Insurance Company

Digitized by Google

(Limited), held on the 16th inst., a dividend was declared of 6s per share, free of income tax, being 2s per share dividend, or at the rate of 10 per cent. per annum, and 4s per share bonus—making in all 20 per cent. per annum on the paid-up capital of the company for the year 1864.

The directors of the Commercial Union Assurance Company have decided on recommending to the shareholders a dividend at the rate of 5 per cent. per annum, the payment of a bonus of 2s 6d per share, and the carrying of a sum of 25,000*l* to the reserve fund, after which there will remain a balance on hand of 117,700*l*.

At the first general meeting of the London Bank of Mexico and South America (Limited), an adjournment was moved by the chairman, Mr J. Paterson, on the ground that the accounts from some of the branches had not reached England. The chairman, however, remarked that the directors were in a position to state that a dividend of 10 per cent. might be declared on the operations of eight months. At a special meeting which followed, several alterations were made in the articles of association, increasing the qualification of directors to 50 shares, and empowering the subsequent meetings to be held in April instead of February.

The Committee of the Stock Exchange have passed the following resolution with regard to the International Bank:—"That the directors of the International Bank having on two occasions—viz., the 16th August, 1864, and the 23rd December, 1864—issued public notices that the amalgamation between themselves and the London and Colonial Bank was complete, and having refused to register transfers of shares according to such notices: Resolved, that the name of the International Bank be struck out from the official list."

The report of the directors of the Cadiz, Oporto, and Light Wine Association recommends a dividend at the rate of 10 per cent. per annum, together with a bonus of 4s 6d per share, for the half-year ending the 30th November last.

The dividend on Caledonian Railway stock for the half-year is announced at the rate of 7¼ per cent. per annum, against 6¼ for the corresponding period of 1863; and that of the Scottish North-Eastern at 5⅛ on the Midland section, and 1¾ on the Aberdeen, against 4¾ and 1 per cent. in the previous year.

The report of the directors of the Dunaburg and Witepsk Railway Company states that "the bulk of the earthworks between Dunaburg and Polotsk, a distance of 100 miles, has already been completed, and several miles of the permanent way laid down and ballasted. The necessary arrangements are also being made for commencing operations between Polotsk and Witepsk, a further distance of 61 miles, as soon as the weather will permit."

The London and North-Western Railway Company have declared a dividend at the rate of 7 per cent. per annum against 6 per cent. for the corresponding period of 1863.

A dividend of 4*l* 2s 6d per share has been declared by the directors of the London and Blackwall Railway Company.

The directors of the Midland Railway Company have declared a dividend of 7¾ per cent.

A dividend at the rate of 4½ per cent. per annum has been declared by the directors of the North Staffordshire Railway.

The twenty-seventh annual general meeting of the Scottish Provident Institution was held on Wednesday in Edinburgh. It was reported that during the year 1864, 962 proposals for 493,456*l* had been accepted, the premiums on which amounted to 15,766*l*, and a further sum of 4,758*l* was received as the purchase-money of eleven annuities. The fund accumulated from premiums of the members amounted to 1,023,487*l*. The total receipts of the year were 179,887*l* 5s 10d. The claims, with bonuses, amounted to 57,884*l* 2s, a sum under the average of the last three years. The subsisting assurances amounted to 4,851,693*l*.

The directors of the London Provincial Mortgage Bank of England (Limited) have announced the closing of the share list on Monday next for London, and on the following Wednesday for the country.

The Regent's Park Estate and Pantechnicon Company (Limited) is announced. It is intended to purchase the site, buildings, and contents, of the Colosseum, together with other premises in the immediate neighbourhood for building purposes.

The share list of Reuter's Telegram Company will close tomorrow afternoon.

A prospectus has been issued of the Dagenham (Thames) Dock Company, with a capital of 300,000*l*, in shares of 10*l*, to convert Dagenham lake, near Barking, in Essex, and opposite Woolwich marshes, into a dock. The area of the lake is 60 acres, and it is proposed to purchase about 80 acres of adjoining land. The docks are to be completed within eighteen months, a contract to that effect having been made, and their total cost, including the lake and land, is to be 220,000*l*. The remainder of the capital, together with 50,000*l* to be raised on debentures, will be employed in building warehouses specially adapted to various staples.

MISCELLANEOUS.—Messrs Cavan, Lubbock, and Co. have announced the half-yearly interest due on the 20th inst. on Panama Railroad Seven per Cent. Bonds of 1857-72.

The mail from Guayaquil has brought a remittance of 648*l* 1s 7d, on account of the dividends of the debt of Ecuador.

Messrs Baring Brothers and Co. are informed, by their agents in Venezuela, that the question of the 55 per cent. import duties remains before the High Court, and is still undecided.

Messrs Baring Brothers and Co. have also received by this mail, on account of the New Granada dividends, from the Custom house of San Jose de Cuenta, 369*l* 18s 8d.

The General Credit and Finance Company of London are in receipt of advice from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 25th January, 1865, of duties collected as follows on account of the Venezuela loan, 1864:—Per statement No. 2, from Cuidad Bolivar, 904 dols; per statement No. 15, from La Guayra, 2,451.05 dols; per statement No. 16, from La Guayra, 4,102.38 dols; per statement No. 25, from Puerto Cabello, 2,421.65 dols; per statement No. 26, from Puerto Cabello, 15,111.36 dols; total, 24,990.44 dols.

The Central Railway Company of Venezuela have received advices from their agents, Messrs Lange and Co., dated La Guayra, 25th ultimo, notifying the payment by the Government of the amount of the 9 per cent. guaranteed interest, due Dec. 25, 1864.

Messrs J. Henry Schroder and Co. have announced payment of the half-yearly dividend, due the 1st day of March next, on the Confederate Seven per Cent. Cotton loan. It is at the same time notified that the third half-yearly drawing for the redemption of an amount equal to 2½ per cent. of the loan then unredeemed by cotton will take place in London on the same day.

It is also announced that the second drawing for the redemption of the bonds of the Four-and-a-Half per Cent. Swedish Government loan of 1864 took place at Stockholm on the 2nd January last, when bonds amounting to 10,300*l* were drawn.

Mr Evans, of Gresham House, has advertised the payment of interest due on the 1st Mortgage Coupon Scrip of the Ohio and Mississippi Railroad Company. Regular payment of the interest on these bonds was resumed on the 1st January this year.

Messrs Thomson, Bonar, and Co., the Peruvian financial agents, have published the numbers of 1,181 bonds, representing 287,000*l* of the Peruvian Four-and-a-Half per Cent. loan of 1862, which were cancelled on Tuesday, under the operation of the half-yearly redemption fund.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423 per mark, and the short exchange on London is 13.4½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 2-10ths per cent. dearer in London than in Hamburg.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Very little English produce was received fresh up to Mark lane to-day. Both as regards wheat and spring corn, the trade was firm; but the principal change in prices was confined to oats, which realised 6d per quarter more money than on Monday. There is no arrivals of wheat this week, either from American or Continental ports, and the imports of other grain &c., is restricted to 2,600 quarters of barley; 10,800 oats; and 300 sacks of flour.

At Liverpool, this morning, the wheat trade was very quiet. Choice qualities, however, were firm in price. Flour and maize moved off slowly, at late rates. The wheat trade at Wakefield was tolerably active, at full quotations.

At the beginning of the week the Liverpool cotton market was dull, and prices in buyers' favour, but on Wednesday in consequence of the news from America, a panic seized the market, and prices at once dropped from 1½d to 2½d. Yesterday, however, a better feeling prevailed, and the fall of the day before was almost entirely recovered. To-day, however, the market is again quiet; sales reach 4,000 bales. As there are more sellers than buyers, prices are again lower.

At Calcutta, during the fortnight ending Jan. 7, the arrivals of cotton had been moderate, and the trade had ruled heavy, at lower prices. The export to Great Britain in December was 5,657 bales. It was stated that large quantities of *new* produce were detained at the various stations on the railway, awaiting means of transit.

The cotton trade at Madras, for the fortnight ending Jan. 12, was decidedly more active. Western produce sold at 13¾d; Salem and Coimbatore ditto, 14½d to 14½d per lb. Revenue returns, dated Dec. 20, estimated the quantity of land under cotton cultivation in the Madras Presidency at 1,074,628 acres, against 991,025 acres in 1863. The following statement of shipments is from Messrs Dymes, Cartwright, and Co.'s circular:—

EXPORTS of COTTON from MADRAS, during the last four years.

	Great Britain. cwts.	France. cwts.	Elsewhere. cwts.	Total. cwts.

Total for twelve months	297,235	15,809	2,557	315,601
Against same period 1863	422,101	35,177	6,741	454,019
Ditto ditto 1862	234,745	11,475		246,220
Ditto ditto 1861	122,714	15,044		137,758

Digitized by Google

In the Mincing lane markets, the principal feature to notice this week is an extensive demand for raw sugar, both on the spot and afloat. Holders, however, have not succeeded in establishing any material advance in the quotations, the improvement being chiefly confined to brown qualities, which have, in some instances, realised 6d per cwt more money. The public sales of tea—both as regards Indian and Chinese produce—have passed off heavily, at about previous rates. Coffee, rum, and rice have ruled steady, at stationary prices. The duty paid on tea, last week, was on 1,141,176 lbs, and the export for the week ending Feb. 9, amounted to 380,725 lbs.

From the leading Chinese ports, we learn that the tea trade was in a somewhat inactive state. The total export to Great Britain, from June 1 to latest dates, 96,691,200 lbs, against 97,951,100 lbs; to the United States, 8,869,600 lbs, against 12,428,100 lbs during the corresponding period in the previous season.

The coffee trade at Colombo, for the fortnight ending Jan. 16, was very quiet. Plantation produce was quoted at 12s 6d to 13s per bushel; native ditto, unpicked, 43s; ditto picked and dried, 49s to 50s per cwt. The subjoined table of exports is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS of COFFEE from CEYLON, from Oct. 1 to Jan. 15.

It is announced that the first series of public sales of colonial wool will probably be commenced on the 2nd of March. The arrivals at present amount to about 50,000 bales, about 18,000 of which are from the Cape of Good Hope, the remainder from the Australian colonies. The trade continues inactive, and the tendency of prices, more especially as regards English produce, is still in favour of buyers.

The Liverpool public sales of wool, which were commenced on the 24th ult., were brought to a close on the 10th inst. The quantity offered was 42,089 bales, of which 15,565 bales were from the East Indies. Clean white and yellow East Indian wools, according to Messrs Ronald and Son's circular, realised an advance of 1d per lb, as compared with November; but inferior qualities declined in value 1d to 2d per lb. In other kinds, very little change took place.

Letters from Sydney and Melbourne make favourable mention of the new clip of wool in Australia. At latest date, owing to less satisfactory advices from London, the market was dull, and compared with the opening of the season, prices exhibited a reduction varying from ½d to 2d per lb. The following were the rates current:—At SYDNEY: Scoured, 14d to 24d; fleece, 14d to 23d; grease, 6d to 11½d. At MELBOURNE: Scoured, 17d to 27d; fleece, 16d to 25d; grease, 8d to 13½d. At OTAGO: Greasy fleece, 9½d to 10½d; fine fleece, 13d to 14½d; scoured ditto, 24d per lb. At Sydney, the receipts averaged 500 bales, whilst at Melbourne, 29,937 bales had been catalogued since the commencement of the season.

The shipments of silk from Shanghai, from July 1 to Dec. 22, last year, amounted to 28,236 bales, against 28,873 bales during the same period in 1863. The unsold stock at latest date was estimated at only 2,000 bales; against 6,000 bales in 1863; 5,500 in 1862, and 16,000 bales in 1861. In reference to the state of the market, for the fortnight ending Dec. 24, a report says:—Transactions in the early part of the fortnight were restricted by the dealers continuing firm for previous quotations. After the receipt of 26th October mail, however, they became more anxious to realise, and have since submitted to a reduction of about tls 5 to 10 per picul. The settlements, estimated at 600 bales, have been confined to Tsatlees and Taysaams. The receipts from the interior have amounted to 1,000 bales, our late high prices having induced the growers to hurry forward all available supplies. From Japan about 700 bales have arrived.

Messrs Arles, Dufour, and Co., writing from Lyons, state that the silk trade in that city in January last was much quieter as compared with December. In prices, very little change took place. Last month, 3,857 bales passed the condition house, against 2,564 bales in January, 1864.

The quarterly public sales of indigo were commenced on Tuesday. The total declarations were 11,140 chests, viz., 10,057 chests in the A, and 1,083 chests in the B catalogue. Bengal and Oude produce has sold freely, at the rates of last sales to 2d per lb advance for ordinary and pale sorts, but at an improvement of 3d to 4d for desirable kinds. Fine Kurpahs have advanced 3d; but inferior parcels have fallen, in more instances, 2d per lb. Up to this evening, 4,875 chests have passed the hammer, 3,133 chests having been sold, 582 bought in, and 1,160 chests withdrawn.

Scotch pig iron has ruled firm, and has advanced to 50s 4½d cash, mixed numbers; but in all other metals, including oils and tallow, sales have progressed slowly, and, in some instances, prices have given way.

The state of trade at New York during the week ending Feb. 4, as far as currency prices were concerned, was greatly unsettled by the fluctuations in the premium on gold, which at one period was as low as 107½, but which subsequently advanced to 113, and closed at 111½ per cent. The amount of business transacted in imported goods and merchandise was very moderate, whilst produce for export commanded scarcely any attention. The stock of bullion in the banks on the 26th ult. had fallen to 3,625,000*l*, but this reduction was chiefly caused by the withdrawal of the Bank of Commerce from the Clearing House. The money market was quiet, at 8 to 10 per cent. for first-class commercial paper.

THE COTTON TRADE.

LIVERPOOL—FEBRUARY 17.

The cotton market opened with dulness, and during the early part of the week prices were barely maintained. On Wednesday the advices from New York, per Canada, of important peace negotiations caused an immediate fall, ranging variously from 1d to 3d per lb, and business was almost suspended. Yesterday, upon receipt per Hibernian of accounts of the failure of pacific negotiations, a large proportion of the decline of the previous day was recovered, particularly in long stapled descriptions, but the market still continues rather unsettled, and is freely supplied by holders. American has been in comparatively limited request throughout the week, and after some irregularity closes about 1½d lower. Sea Island has been less sparingly offered, owing to large arrivals, but prices show no material change. For Brazil the demand has been moderate, and freely met by importers; and after considerable fluctuations, prices settle about 1½d under former rates. In Egyptian, great irregularity has prevailed; the decline on Wednesday, in many instances, amounted to 3d per lb, fair open having been sold in quantity at 18d. The recovery yesterday was nearly 2d, but prices remain rather irregular. Smyrna has been in fair request, but closes ½d to 1d below last week's quotations. East India has participated in the general depression, and prices have been very irregular. The decline on Wednesday amounted generally to 2d per lb from last week's rates, but a partial recovery of 1d has since been experienced. Bengal has been in comparatively better request, and has only suffered in value to the extent of ½d per lb. China has been in good demand, and after some depression closes ½d to ½d per lb below last week's rates. The business "to arrive" is almost entirely suspended.

The sales of the week amount to 23,330 bales, including 3,260 on speculation, and 2,940 declared for export, leaving 17,100 bales to the trade. The sales to-day amount to about 4,000 bales.

LONDON—FEB. 17.

The market, which was dull and inactive in the early part of the week, was quite paralysed on Wednesday by the peace news received per Canada on that day; but yesterday, on the announcement of the failure of the peace negociations, there was more inquiry. As compared with last week, prices of Surat have fallen 1d to 1½d, all descriptions of Madras 1½d, Bengal and Scinde 1d, China and Japan ½d to 1d, West India, Brazil, Smyrna and Greek about 1½d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

Only a moderate business has been transacted in goods since our last; nevertheless, very little change has taken place in the quotations. The iron trade may be considered steady. The transactions in coals have been very large, at high rates.

MANCHESTER, Feb. 16.—On Monday and Tuesday this market was drooping, sellers being anxious to sell, but demand and prices being against them. On Wednesday morning the receipt of the Canada's peace news changed this heaviness to a state of panic. Prices went down about 3d per lb, but there were no buyers who would come even near enough to sellers' terms to admit of business. To-day there has been a recovery, with more inquiry, though neither buyers nor sellers are completely reassured. The great interests which would be deeply compromised in the event of peace have received too great a shock to be promptly overcome, and irrespective of this question, the gradual but steady increase of the supply of cotton incline the majority of the trade to the view of lower prices. Under these circumstances, producers will not work to stock, and buyers will not give orders in advance.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The transactions in wool have been very small, and the purchases are limited to short wools. Nothing done in yarns. Neither inquiries nor sales reported. There is not the least improvement in the demand for pieces. Prices are very irregular.

LEEDS.—The cloth halls have not been very well attended by buyers, but the amount of business done was to a fair extent. Colonial wools maintain late prices, but some kinds of English are rather lower than they were last month. The flax trade is quiet, and the prices of the raw material are not quite so high as we lately had to notice. Yarns and threads are without material change.

HUDDERSFIELD.—The market has, on the whole, presented a quiet aspect. In many instances buyers confined themselves to sorting up, so as to keep a good selection in stock, but there has also been a demand for light articles suitable for the approaching season.

ROCHDALE.—The flannel trade keeps very quiet, so far as sales are concerned. The manufacturers keep tolerably well employed, and their stocks are not heavy, although they have slightly increased of late. There is no change in the Yorkshire goods trade, which is quiet, but prices are firm.

BELFAST.—The linen market was dull and irregular. The lighter makes of power-loom keep their price steadily, but in the lower qualities a reduction is submitted to where stocks show symptoms of increase.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 4.—There is no change of importance to notice in the state of the market for breadstuffs. Currency prices exhibit several alterations from last week, owing to the fluctuations in the premium on gold; but the home business is restricted to immediate wants, whilst the export inquiry is still very limited. The following are the rates now current:—Flour—Superfine State and Western, $9.35 to to $9.55; extra State, $9.45 to $9.60; choice State, $9.56 to $9.75; common to medium extra Western, $9.75 to $10.10; extra round hoop Ohio, $10.70 to $11; Western trade brands, $11.5 to $11.75; extra St Louis, $11 to $14.50; common Southern, $10.55 to $11.75; fancy and extra ditto, $11.80 to $14.50; common Canadian, $9.60 to $9.90; good to choice and extra, $9.95 to $11.65 ber barrel. Corn—Western, mixed, $1.85½; and Jersey yellow, $2.75 to $1.79 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat sent up to our market, this week, have been very moderate; but most of the samples have come to hand in good condition. On the whole, the trade may be considered steady, at about stationary prices. The show of foreign wheat, ex granary, has been tolerably extensive. Good and fine qualities have been in improved request, at full quotations. In other descriptions, the transactions have been much restricted, on former terms. The supply of both English and foreign barley has continued reasonably good. Malting parcels have commanded full prices; but grinding and distilling sorts have ruled heavy, at late currencies. The inquiry for malt has been inactive, at the late decline in value. The supply, however, has not increased. Oats have advanced 6d per quarter, with a steady demand. There has been rather more doing in beans than for some time past, at an improvement in value of 1s per quarter. No change has taken place in the value of peas. Both English and foreign flour has sold steadily, at full quotations. Very little sound foreign flour is on offer.

The country markets have been inactive for most kinds of produce; nevertheless, prices have been fairly supported.

Throughout the Continent, wheat has moved off slowly. In prices, however, very little change has taken place. Most descriptions of spring corn have sold to a fair extent, at about previous rates. The shipments of produce from America continue very limited.

In Scotland, fine wheat, barley, and oats have moved off steadily, at full quotations. Otherwise, the trade has ruled heavy.

Digitized by Google

The Irish markets have been but moderately supplied with grain. The trade, however, has been inactive, at late rates.

The annexed return of the yield of produce in 1864, in most of our large agricultural districts, has been published :—

	Wheat.	Barley.	Oats.	Potatoes.
Under Average.				
Half-crop	21	10	30	16
Quarter to one-third	33	62	65	19
Under	116	51	258	182
Over Average.				
Average	259	228	132	269
Over	114	188	29	30
Quarter to one-third	27	13	17	8
Half over	9	14	2	...
Totals	579	566	533	530

The supply of English wheat on sale at Mark lane, to-day, was small. Good and fine qualities sold readily, at fully late rates, and inferior samples fully supported previous quotations. In foreign wheat, a very moderate business was transacted, but at full currencies. Good and fine barley was quite as dear as on Monday. Oats moved off freely, at an advance in prices of 6d per quarter. Beans and peas were in short supply, and the trade for them was firm, at full currencies. Flour was in fair average request, at quite previous quotations.

Mr George Dornbusch reports the arrival off coast of 5 vessels laden with grain, and a limited demand for floating cargoes, at about last week's prices. Cotton seed arrived, is selling at 7*l* 2s 6d per ton.

The London averages announced this day are :—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this day's Markets see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The market has been firmer, and the low prices have attracted some attention. An advance of 6d is established, but yesterday the demand was less animated than previously. The refiners have taken full supplies of West India, about 2,900 casks for the three days, including Barbadoes, by auction, at 30s to 33s 6d. Other descriptions: Jamaica, 31s 6d to 33s; Trinidad, 27s to 29s; crystallised Berbice, 32s 6d to 36s 6d; white (11s 8d duty), 40s. A good business is reported in floating cargoes for the United Kingdom. There were 3,024 tons landed last week, and 4,512 tons delivered; leaving the stock at the close 102,737 tons, against 72,634 tons in 1864 at the same period.

Mauritius.—6,793 bags in the public sales went off steadily as follows: brown, 24s to 29s; grey and yellow, 29s 6d to 31s 6d; grainy and crystallised, 32s to 36s 6d; white (11s 8d duty), 38s 6d. A steady business has been transacted by private contract. A floating cargo has sold for the United Kingdom: No. 11 to 11½, at 23s 6d per cwt.

Bengal.—1,365 bags partly sold, at 32s for yellow Gurpatta date, and 23s 6d to 26s for low to middling brown sorts. 5,000 bags privately, at 29s to 32s per cwt for Gurpatta date.

Natal.—1,069 bags Natal muscovado sorts have realised 25s to 33s.

Manilla.—5,900 bags clayed are reported at 28s per cwt.

Other Foreign.—About 3,600 boxes Havana are reported sold privately: yellow, at 32s 6d to 34s 6d; white, at 41s. 1,250 casks Cuba, at 29s to 31s. 530 casks Porto Rico, at 31s 6d. A floating cargo of Pernambuco has sold at 22s 6d for France. Four cargoes have sold for the United Kingdom: one Rio Grande, at 19s; one Bahia, 18s; and two of Havana, No. 11, at 23s; No. 12, 24s per cwt. By auction, 361 casks 218 barrels Porto Rico chiefly sold at 29s to 35s; 1,163 bags Guatemala, 24s 6d to 32s per cwt.

Refined.—The market is firmer, and sales have been made on better terms than could be obtained last week.

Rum is unaltered, and a moderate inquiry prevails. The total stock is 26,800 puncheons, against 23,920 puncheons in 1864 at the same date.

Cocoa.—West India has realised higher prices, owing partly to the rumoured deficiency of the Trinidad crop. 707 bags of the latter description brought to auction found buyers: the lower qualities at 55s to 63s; mixed to good at 65s to 88s. 110 bags Dominica, at 52s per cwt.

Tea.—The sales of China growth concluded on Tuesday, and passed off heavily to the close. 40,500 packages were offered in the catalogues, and 29,000 packages sold. Several breaks of common dusty and broken leaf congou sold from 7¼d to 8d, and common to fair red leaf congou, of new import, from 1s 0¾d to 1s 1¾d per lb; and common black leaf, 11d to 11½d. A few breaks of fair to good black leaf congou obtained 1s to 1s 5¾d per lb. Several parcels of green teas realised fair rates. Yesterday, 1,333 packages of Indian growth sold steadily. Pekoe went 1d dearer; common broken leaf sorts at a slight decline.

Coffee.—The first of the Netherland Trading Company's sales this year went off well, and at rather higher rates for coloury sorts. This market is firm for plantation Ceylon, but native remains flat. 102 casks 67 barrels and bags of the former obtained extreme prices, especially for the new crop: small berry and low middling to good, 80s to 88s 6d. Of 352 casks 3,831 bags native, the bulk was taken in at 70s 6d to 71s for good ordinary. A few lots fine ordinary sold at 71s 6d. 57 casks 40 barrels 662 bags East India were chiefly bought in, being held for high prices. A small portion of Malabar realised 72s to 73s 6d. 90 frazils Mocha found buyers at 96s to 97s. A floating cargo of good firsts Rio has sold at 61s 6d for Trieste. One of Rio at 58s per cwt for a near port.

Rice.—Most kinds are quiet, but firm. A limited business has been done privately. White Bengal, 11s 3d; low Arracan, 7s 6d. 2,378 bags Bengal offered at auction were taken in above the value, from 13s to 13s 6d. 2,077 bags Madras partly sold at 11s to 11s 6d per cwt for pinky, rather mixed small.

Imports and Deliveries of Rice to Feb. 11, with Stocks on hand.

Stocks	7100	7300	5510	4000

Deliveries last week 303 tons.

Metals.—There has not been any decided improvement in the demand, and the market is now steady. Business of moderate extent has occurred in spelter, at 18*l* 15s to 19*l*. Iron firmer for Scotch pig. The last sale of mixed Nos. was at 50s 3d per ton. Straits tin has sold rather dearer, from 89*l* to 89*l* 10s per ton cash. Other metals are unaltered.

Hemp.—Nothing of interest has transpired in Manilla during the week. The market is firm, but quiet.

Linseed.—The market shows a slight advance on last week's prices. Calcutta, 58s to 59s 6d; 100 tons Bombay sold at 59s 9d; 500 tons have sold at 58s, January to March; and a cargo of Black Sea at 57s 6d per quarter.

Turpentine.—Spirits, 67s to 68s per cwt, and holders asking higher rates.

Petroleum.—American refined Pennsylvanian has sold at 1s 11½d to 2s 0½d per gallon, according to quality: Pennsylvanian crude, 18*l* 10s per tun.

Tallow.—Foreign continues dull, but qnotations are only slightly easier in some cases. 1st sort new Petersburg Y.C., 41s to 41s 3d; February and March, 40s 6d to 40s 9d; for delivery in the last three months, 42s 6d per cwt.

Particulars of Tallow.—Monday, January, 13.

POSTSCRIPT. Friday Evening.

Sugar.—The market closes firmly. Several parcels of West India, by auction, sold at current prices, making a total of 1,075 casks, or 3,971 casks for the week. 12,800 bags Mauritius, 4,280 bags Bengal, and 627 bags Natal, offered in public sale, realised the full value, the greater part being sold. Privately, 5,200 boxes Havana sold: No. 12 to 12½, at 34s 6d to 35s; white, 41s 6d. A floating cargo of Cuba, at 20s 6d per cwt, for the United Kingdom.

Coffee.—111 casks 36 barrels and bags plantation Ceylon offered by auction, sold at previous rates. 182 casks 123 bags native were taken in at 70s. 36 bales 1,305 bags Malabar went at 70s to 72s; very low, 66s. 291 bags African sold at 71s to 75s per cwt.

Rice.—There is more business doing in soft grain descriptions.

Oil.—At auction, 277 casks Cochin sold at 38s 6d to 39s. 162 casks Sydney, at 32s to 36s 9d. 250 casks palm, at 36s 3d to 36s 6d per cwt.

Tallow.—184 casks Australian, by auction, sold at 37s 6d to 41s 6d. 107 casks Odessa, at 40s 6d to 41s 9d.

ADDITIONAL NOTICES.

Refined Sugar.—In the home market for refined sugar there is no alteration as respects dry goods. Fine pieces have been rather more in demand, and in some instances an advance has been paid by the buyers. In Dutch crushed several sales have been made in H.R., No. 1, and B. and H., No. 1, for March and May next at 29s 6d per cwt; also 200 tons of B. and H., No. 1, 29s for April, all in barrels, free on board at Amsterdam.

Green Fruit.—An improvement in the price of oranges may be reported. Some parcels St. Michael, Valencia, and Palermo, sold by Keeling and Hunt at public sale, went at an advance of 1s to 3s per package. Lemons in character, the stock being unusually light for the period of the year, and future shipments will be of a limited character. Owing to cold weather the demand for chesnuts has revived, at an advance of 5s per barrel. Other nuts without alteration.

Dry Fruit.—No alteration in fruit of any description. Prices of last week are supported.

English Wool very quiet.

Colonial Wool.—The market remains without change.

Flax.—Market quiet.

Hemp.—Market very flat, and very little business doing,

Silk.—Market has been very quiet this week, without any alteration in prices.

Tobacco.—The market remains very steady, with a fair demand for home trade descriptions, sales of which have been made at full quotations; a few limited sales of selections were effected for exportation.

Leather and Hides.—The leather trade of the past week has been fairly maintained, almost all goods having participated in the demand. The severity of the weather necessarily diminished the supplies at Leadenhall on Tuesday, the articles chiefly in request being good crop

Digitized by Google

hides, 40 lbs to 45 lbs light English butts, light shoulders, English bellies, particularly those of stout substance, calf-skins of middle weights, and good kips.

METALS.—Everything in metals has been most inactive during this week. Copper has been offered at rather lower rates with little result. Tin held firmly for a day or two on the hope of peace in America, but relaxed on receipt of the latest news. Nothing of note reported done. Iron continues to sell rather too slowly for the manufacturers. Spelter is a trifle less firm. Lead neglected. Tin plates unchanged from last dull report.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	44	3
Fat by ditto	2	2
Yellow Russia	42	6
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good drags	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Feb. 16.—There was about an average supply of beasts here to-day, both as to number and quality. All beasts were in fair request, at full prices. The best Scots and crosses sold at 5s 4d per 8 lbs. The show of sheep was rather limited. Downs and half-breds moved off freely, at full quotations. Other breeds were inactive, but not cheaper. The general top figure was 6s 2d per 8 lbs. The few calves on offer sold steadily, at full currencies, viz., from 4s 4d to 5s 6d per 8 lbs. Pigs were firm in price, but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	8 to	4	2	Prime Southdown sheep	6	0 to	6	2
Second quality ditto	4	4	4	10	Large coarse calves	4	4	5	0
Prime large oxen	5	0	5	2	Prime small ditto	5	2	5	6

HOP MARKET.

BOROUGH, Monday, Jan. 13.—We have no change to notice in our trade, which remains steady, with a limited demand for hops of every description.

HAY MARKETS.—THURSDAY, Feb. 16

SMITHFIELD.—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Trade steady.

CUMBERLAND—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Supply limited.

WHITECHAPEL.—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Trade dull.

COAL MARKET.

FRIDAY, Feb. 17. — Wallsend Haswell, 23s—Hetton, 23s—South Hetton, 23s—Braddyll's Hetton, 22s—Hetton Lyons, 22s—Wallsend Tunstall, 22s—Bower's West Hartley, 15s—Cowpen Hartley, 15s—Davison's West Hartley, 15s. Ships at market, 30; sold, 3; gas contracts, &c., 27—30; ships at sea, 240.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 16.—Since the close of our public sales the market has been rather quiet, as consumers and dealers have supplied themselves for the present, and have only here and there purchased a few lots of wool that were withdrawn at the sales by auction.

GAZETTE OF LAST NIGHT.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 4th of February, on 11,792 miles, to 571,314*l*, and for the corresponding week of last year, on 11,460 miles, to 559,444*l*, showing an increase of 332 miles, and of 11,870 in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,293 miles, to 467,232*l*, and for the corresponding week of 1864, on 8,045 miles, to 455,752*l*, showing an increase of 248 miles, and 11,480*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Feb. 13.—In the share market to-day about half the number of the transactions were for the account, and none of the descriptions showed any material average alteration in the closing prices, except a slight tendency to decline in American and miscellaneous. In English railways, North-Western and North-Eastern (Berwick) recovered ¼ each; Midland and South Devon improved 1 each, Great Eastern ½, and Blackwall a further ½; South-Eastern relapsed ¼, and Metropolitan 1½; and ditto (new) declined ⅛, North British ½, Great Northern (A stock) 1, and Great Western a further ½. In colonial, Delhi stock receded 1, and Great Indian Peninsula ¼. In foreign, Bahia improved ¼. In American, Illinois Central shares advanced ½; and Atlantic and Great Western (New York 2nd Mortgage), and Marietta declined 2 each. In British mines, Stray Park advanced 1, and East Lovell declined ½, and Great South Tolgus and North Wheal Crofty ¼ each. In foreign mines no movement occurred in the closing prices.

TUESDAY, Feb. 14.—In the share market to-day dulness generally prevailed, and English railways were disposed towards depression, but banks, British mines, and miscellaneous shares showed a slight degree of firmness, and the other descriptions were without material alteration. Of the English lines, South Devon further improved 1; Midland relapsed ¾, and North-Western ½; Lancashire and Yorkshire declined ¼, and Great Northern (A stock) a further ½; and Metropolitan are now quoted ex div. and ex n. In colonial railways and American securities no movement occurred in any of the closing quotations. In foreign railways, Paris and Orleans advanced ½; and Mexican declined ¾, and West Flanders (preference) ¼. In British mines, Providence and Stray Park improved 1 each, and East Grenville ½; East Wheal Russell receded ¼, and Wheal Bassett are now quoted ex dividend.

WEDNESDAY, Feb. 15.—In the share market to-day there was no recovery of animation, and the prices of English and foreign railways, banks, and miscellaneous shares closed rather weaker, American alone showing an upward tendency, and the other descriptions being without material alteration. Of the English lines, Blackwall advanced 2½, and Metropolitan receded 2; ditto (new), and North-Eastern (Berwick) ¼ each; ditto (Leeds). Manchester, Sheffield, &c., Shropshire Union, and Great Western (Newport) 1 each; ditto (original) 1¼, Caledonian and Brighton ½ each; North-Western a further 1; Great Northern (A stock) and Midland a further ½ each; and Lancashire and Yorkshire a further ¼. In colonial, Melbourne and Hobson's Bay improved 1 and Punjaub ½; and Great Western of Canada (5½ per cent bonds) declined 1½. In foreign, San Paulo declined 1, and Bahia and Dutch-Rhenish ¼ each. In American, United States (Five-Twenty) advanced 3½, Virginia (6 per cent.) and Illinois Central (shares) 1½ each, and Erie shares (paid up) 1. In British mines, Stray Park further improved 1, East Bassett declined 3¼, and Herodsfoot are quoted ex div.

THURSDAY, Feb. 16.—In the share market to-day dullness was the prevailing feature, and English railways, American, and miscellaneous, tended lower at the close, the other descriptions showing no material average alteration. Of the English lines, Great Western and North-Western recovered ¼ each; and Chatham declined 1, Great Eastern, North British (of both descriptions), and North-Eastern (York), ¼ each, ditto (Berwick) a further ¼, Caledonian a further ½, and South-Eastern ¼. In colonial railways and foreign mines no movement is recorded. In foreign railways, Bahia recovered ¼; Great Luxembourg improved ⅛, and Lombardo-Venetian ⅛; and Turin and Savona (of both descriptions) receded 1 each, Namur and Liége ½, and Dutch Rhenish a further ¼. In American, United States (5-20) relapsed 3, Virginia (6 per cent.), and Erie shares (paid up) 1½ each, and Illinois Central shares 1. In British mines, Great Wheal Vor improved ½, and North Downs declined ½.

FRIDAY, Feb. 17.—The railway market was firmer to-day. South-Western stock improved ⅝ per cent., London and South-Western and Caledonian ½, London and North-Western and Midland ¼, and Metropolitan ⅛. San Paulo Railway shares improved, while Great Western of Canada and Antwerp and Rotterdam were flat. Very few transactions took place in Indian lines.

HOUSE FURNISHING.—

Persons commencing housekeeping, or making additions thereto, are invited to visit the great FURNISHING ESTABLISHMENT of Messrs DRUCE and CO., 58, 59, and 58 Baker street, and 3 and 4 King street, Portman square, the largest showrooms and furnishing galleries in the kingdom, containing a superficial area of 48,000 ft (upwards of an acre in extent), where they can make their own calculations for furnishing a whole house or a single room from the goods before them, which are all marked in plain figures, without the annoyance of being importuned to purchase; or, if preferred, estimates will be given free of charge. From the extent of the premises the immense stock has been arranged in various departments, in the most convenient manner for inspection and selection, and purchasers are invited to view the elegant and extensive assortment of fashionable drawing room, dining room, and chamber furniture, Brussels and other carpets, new fabrics for curtains, &c., particularly a large collection of beautiful buhl and marqueterie cabinets, tables, &c., from Paris, at extremely low prices; also 500 easy chairs, settees, and ottomans, 60 sideboards, 50 sets of dining tables, in fine mahogany, oak, and walnut, manufactured by first-rate workmen of the best seasoned material; capital dining room chairs, covered with real morocco leather, 21s 6d each; 100 bedsteads in various woods and metals, with the superior bedding, 150 wardrobes, and chests of drawers. N.B.—A servant's bedroom well and completely furnished for 84s. List of bedding and bedsteads, and drawings of furniture, sent post free. Messrs Druce and Co. give a written warrantry to all purchasers, and, if required, a reference to persons who have furnished from their establishment. Arrangements made for the delivery of furniture in the country. Down quilts from 5s 6d each.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

AN EMINENT PREACHER

celebrated for the practical nature of his discourses stopped last Sunday in the midst of his sermon, and said that he was "very much disturbed and distressed by the very general coughing of the congregation. He should not have alluded to it, had it not occurred to him to mention that if those who were troubled with a cough were to put one of Dr Locock's Pulmonic Wafers in their mouth, it would at once relieve them, and put an end to their coughing, much to the comfort of themselves and those who sat near them." He added, "It is a simple and agreeable remedy, which I have proved the efficacy of myself." Dr Locock's Pulmonic Wafers give instant relief, and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all Chemists.

THE PHOSPHROISED NERVINE

TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great philosophical and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."

Prices: 11s per bottle, or four 11s bottles in one, 33s; and in cases containing three 33s bottles, £5, which are £1 12s, packed securely and sent to all parts of the world.

LONDON AGENTS:—Newberry, 45 St Paul's churchyard; Sanger, 150 Oxford street; Hooper, 43 King William street, London bridge; Prout, 229 Strand.

FLUTES.—THE NEW MODEL

FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—

At Messrs Keith, Powse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS,

by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES,

by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.

48 Cheapside.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH,

Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

TEETH AND PAINLESS

DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

CONSUMPTION, COUGHS, COLDS, ASTHMA BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

HOLLOWAY'S OINTMENT.—

Agonising Pains.—It is gratifying to hear sufferers recount the ease they derived when first they applied this Ointment to their ulcers, sores, or abscesses, with which they had been afflicted for years. Soon after its application to a bad leg or inflammatory ulcer, it restrains the excitement of blood vessels and nerves, and at once bring coolness and comfort, and furthers the gradual deposits of healthy materials to fill up the ravages caused by violence, debility, or disease. It expels all noxious matters, and heals all sores soundly. It gives ease to varicose veins, bad legs, and swellings of the feet and joints, when the agony is almost unremitting, and the pain too much for a giant's strength.

BANKERS AND MERCHANTS OF

ENGLAND,—When will you believe that no money depository is secure against the present race of modern "cracksmen" but GEORGE PRICE'S Treble Patent Safes, with his Patent CASE-HARDENED DRILL-PROOF DOORS, proved to be proof against gunpowder, picklocks, and all burglars' drills and other tools and implements? Price-lists post free from George Price, Cleveland Safe and Lock Works, Wolverhampton.

KINAHAN'S LL WHISKY

v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whisky

ROYAL POLYTECHNIC.

— Patron H. R. H. the Prince of Wales. — Professor Pepper's Third Ghost Lecture, includes the Indian Widow's Suttee; or, the Hindoo Maiden's Dream, and the exhibition of the Crystals, formed by the Human Breath on the Screen, daily at 2.15, and 7.30. —Magnificent Photographs of the Statuary of the Exhibition of 1862, by the London Stereoscopic Company, and Lecture by Mr King,—Stokes on Memory, and all the other exhibitions as usual.—Admission to the whole, 1s.

ST JAMES'S HALL.—

The World Never Saw the Like.—General Tom Thumb, his little Wife, and infant Daughter, together with Commodore Nutt, and Minnie Warren. The smallest human beings of mature age on the Face of the Globe. They are pronounced by all who see them the greatest wonders of the age. The whole four appear in a great variety of Songs, Dances, Duets, &c., also in a number of Comic Characters. "Perfect Buckstones in miniature." They will give their Levees daily at 11, 3, and half-past 7 o'clock. At the 11 o'clock levee they will appear in the identical Wedding Costume worn by them at Grace Church, New York, on the occasion of their Marriage. Admission to the Day Levees, 1s, 2s, and 3s. To the Evening Levee 1s to all parts of the house, except a few reserved seats at 2s. Children under 10 years of age half-price to reserved seats. Remember the whole party can be seen for One Shilling.

PRIVATE LIFE OF AN EASTERN QUEEN.
Just published, in post 8vo, price 7s 6d cloth,

ELIHU JAN'S STORY; or, the Private Life of an Eastern Queen.
By WILLIAM KNIGHTON, LL.D.,
Assistant-Commissioner in Oudh.
"To say that this book is highly interesting would give a most inadequate conception of its power to enchain and delight the attention. We have not lately taken up a book so successful in this respect. The style is vigorous and fresh, and the events recorded are presented so graphically that the story is almost a poem in prose.....We recommend the work as a faithful picture of a state of society and of a court now passed away."—ENGLISHMAN.
London: Longman, Green, and Co., Paternoster row.

A NEW MONTHLY SCIENTIFIC JOURNAL.
Messrs Cassell, Petter, and Galpin, beg to announce that they will publish, on the First of March, NUMBER ONE of a NEW MONTHLY FIRST-CLASS SERIAL, to be entitled

THE SCIENTIFIC REVIEW, and JOURNAL of "The INVENTORS' INSTITUTE."

The main objects of the SCIENTIFIC REVIEW will be to record lucidly and faithfully, from month to month, the progress of Science both at home and abroad, to point out the bearing of recent discoveries on those previously made, and to keep their practical utility most steadily in view.

It will place before the public not only home inventions, but those of other nations, and will endeavour to throw an interest over these matters, by setting them forth in such a manner that the general public may readily understand them.

Among the boundless variety of subjects which will find a place in its pages, every branch of production, every department of scientific research, having a practical tendency, will be duly noticed.

"The Scientific Review and Journal of the Inventors' Institute" will also form a medium of intercommunication between scientific men throughout the world: and an opportunity will be afforded them of canvassing the merits of rival inventions, provided the public good is the sole object of disputation.

It will, moreover, be the accredited organ of "The Inventors' Institute," the objects of which are:—"To protect Inventors' interests, and defend the privilege of obtaining Her Majesty's Letters Patent"—"To promote improvements in the Patent Laws"—"To facilitate the diffusion of information with reference to inventions, and other subjects beneficial to Inventors and Patentees."

Each number will generally contain one or more reviews of scientific works; descriptions of new or improved machines, processes and apparatus, with illustrations when considered necessary; special articles on scientific topics of current interest; a résumé of the progress of manufactures and practical science in all parts of the world, collected from materials furnished by special correspondents, or from the most recent scientific periodicals, &c., whether at home or abroad; a detail of important patents asked for or secured; the meetings of scientific societies; and answers to correspondents. Inventors and others seeking information may rest assured that their communications will receive early attention, whenever the questions proposed are of public interest.

"The Scientific Review and Journal of the Inventors' Institute" will be edited under the supervision of able and experienced men, and will be published on the first of every month, price 6d, or stamped 7d.

Subscribers desirous of receiving copies each month at their residences, will secure their delivery post free by remitting a year's subscription of seven shillings to the publishers.

All communications intended for the Editors to be addressed as follows:—The Editors of "The Scientific Review," Messrs Cassell, Petter, and Galpin, La Belle Sauvage yard, London, E.C.
La Belle Sauvage yard, London, E.C.,
February, 1865.

N.B.—Advertisements for the First Number must be sent to the office of "The Scientific Review," La Belle Sauvage yard, Ludgate hill, on or before the 20th of February.

Effingham Wilson, 11 Royal Exchange.

GERMAN.—HERR GREINER, Professor of German, Christchurch, Hants, receives a few gentlemen who can devote a few months chiefly to the study of German, to prepare them, by a sound and pleasant mode of teaching, for the examinations, the mercantile business (so far as regards the German language), or for travelling in Germany. First-class references.—Address as above.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton crescent, Tufnell park West, N.W.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

PROPRIETARY SCHOOL, GRAVESEND.
Head Master, Mr M. GUTTERIDGE, B.A.
The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.
Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.
For terms and prospectuses, apply at the School.

TO BANKERS, FINANCIAL COMPANIES and others.—To be disposed of, with possession, the Lease of the Banking Premises at present in the occupation of the London Bank of Scotland, No. 24 Old Jewry, in the immediate vicinity of the Bank of England. The offices are handsomely furnished and fitted with Counters, Desks, and every requisite for a Banking Establishment; all in excellent condition, a very large outlay having recently been made by the present tenants to adapt the premises for the requirements of a first-class bank.—Further particulars at Messrs Debenham and Tewson, 80 Cheapside, E.C.

TO CLUBS, BANKING AND other Public Companies, and first-class Tradesmen. —Nos 70 and 71 Brook street adjoining the London and County Bank, Hanover square. These magnificent Freehold Premises, of noble elevation, built in the best manner, regardless of cost, and peculiarly well adapted for a club or public company or institution, or a first-class tradesman, to be Sold or let. Can be seen on application, and all particulars had at Jackson and Graham's estate agency department, 37 and 38 Oxford street, W.

A GENTLEMAN, WITH considerable experience of general business, some capital, and a first-rate connection, desires to enter a Produce Broker's or Commission House in London connected with the East.—Apply by letter only to A. B.D., care of Messrs Pottle and Sons, 14 and 15 Royal Exchange, E.C.

A GENTLEMAN, AGED 35, educated in France, and for many years engaged in London and Liverpool by two well-known firms in the Russian, Levant, and American trades, as Managing Clerk and Correspondent, subsequently in business as Ship and Insurance Broker, and who has acted as accountant to a financial company, desires a RE-ENGAGEMENT or an Agency. Security to any amount. —Address W., 22 Acton place, Kingsland, N.E.

WANTED, BY THE ADVERTISER, aged 22, a Situation in a Merchant's office. Is well acquainted with the general routine of office work, and has a good knowledge of French. Five years' reference from one of the leading Produce Brokers in the City, as to ability and integrity. Salary not to be under £120.—Address A. B., Mrs Belshaw, 2 London street, Fenchurch street.

A PARTNER WITH CAPITAL OF £8,000 or £10,000 required in the business of a Commission Merchant, the profits from which average £4,000 per annum for the last three years.—Apply, by letter only, to Mr Edmund Harding, Accountant, 1 Basinghall street, E.C., London.

PARTNERSHIP.—A GENTLEMAN, aged 30, who has been accustomed to the Colonial Produce Trade, and who has command of capital, desires to enter into an arrangement for a Partnership in a well-established Mercantile House, either at once, or prospectively.—Apply A. B., Messrs Wrentmore and Sons, Solicitors, 43 Lincoln's Inn Fields.

CAPITALIST PARTNER WANTED (sleeping or active), to supply about £5,000 for the establishment and working of a Commercial House in China, under the management of a mercantile man of Eastern experience and influential business connections. Unexceptionable references given and required.—For further particulars, address (principals or solicitors only) Messrs Beale, Marigold, and Beale, Solicitors, 10 Park street, Westminster.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE."
The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.
Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

BROKERS.
Messrs P. Cazenove and Co., 52 Threadneedle street.
SECRETARY (pro tem.)—Mr Frederick J. Griffiths.
Offices—1 Royal Exchange buildings, London.

This Company is established to provide capital for the purchase and extension of the well-known Telegraphic business of Mr Julius Reuter.
Mr Reuter has, by fifteen years' labour, organised a most extensive system of telegraphic correspondence for obtaining and communicating to his subscribers, the earliest and most reliable political, financial, and commercial intelligence.
A large revenue is now derived from this source, which is capable of considerable extension by the use of additional capital.
The services of Mr Reuter as Managing Director have been secured for a term of years, and in the agreement for the transfer of the business, is a clause by which Mr Reuter is bound in the event of his connection with the Company ceasing, either by the termination of the period of his engagement, or from any other cause, not to assist directly or indirectly in the prosecution of any similar business.
Mr Reuter will continue to have the exclusive management of the telegraphic department, which will be conducted as heretofore, with the utmost secrecy, fidelity, and impartiality.
The whole of the profits from the 1st of January will belong to the Company.
All applications for shares must be made according to the form obtained at the Company's offices, of the Brokers, or of the Bankers.

REUTER'S TELEGRAM COMPANY (Limited).
Notice is hereby given, that no Applications for Shares in this Company will be Received after Two o'clock this day (Saturday), the 18th inst.—By order of the Board,
FRED. J. GRIFFITHS, Sec. (pro tem.)
February 17, 1865.

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy."
Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; each sealed, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

TEMPORARY OFFICES—83 Lombard street.

PROSPECTUS.

This Company has arranged for the purchase, on advantageous terms, of the site, buildings, and valuable contents of the Royal Colosseum, Regent's Park. It is also intended to purchase other property in the same neighbourhood.

The ground included in the present purchase is nearly two acres, held from the Crown on a lease to be extended to 90 years for the purposes of this Company, whilst the ground-rent remains at about one-fifth of its present market value.

After disposing of the valuable contents and materials for the purposes of the Company, it is intended to remove the circular building, and to erect a terrace and other premises hereafter mentioned, which have been sanctioned by the Lords of the Treasury and the Hon. Commissioners of Woods and Forests.

The extensive buildings in Albany street, which are well adapted for the purpose, will be reconstructed and converted into a metropolitan depot for warehousing household furniture, carriages, and miscellaneous property. The basement will afford very extensive cellarage for wines and heavy goods; and there being a great demand for such accommodation in that locality, it can be readily let out, at remunerative rates.

The Company will make advances on property warehoused.

The ground fronting Regent's Park will be appropriated to the erection of first-class residences. An eminent firm has offered to erect the proposed buildings on the usual terms, and to take a considerable portion of the contract price in shares of the Company, thus evincing their entire confidence in the undertaking. The plans may be seen at the temporary offices of the Company, and every information regarding details may be obtained from the Architects.

Any subscriber for one hundred and fifty shares will, according to priority of application, be entitled to lease or purchase any of the houses, several of which have been already applied for. The surplus income of these houses would alone yield about six per cent. per annum upon the amount of capital required for the purchase of the property and the erection of the proposed buildings. Few commercial enterprises have proved more successful than the existing Pantechnicons, and it has been carefully calculated that, having the Pantechnicon only half full, and otherwise in partial operation, nine per cent. additional, per annum, may be expected. The entire capital of the Company being secured upon an estate held from the Crown, at an almost nominal rental, the enterprise is divested of every speculative feature; and the Directors feel the greatest confidence in recommending this investment as thoroughly safe, and certain to yield a handsome return.

Prospectuses and forms of application for shares may be obtained of the Bankers, Brokers, Solicitors, and at the offices of the Company, where the articles of association may be seen, and all necessary information afforded.

In the event of no allotment being made, the deposits will be returned in full. Should a less number of shares be allotted than is applied for, the deposit will be made available towards the payment on allotment, and the balance (if any) returned to the applicant.

A large number of the shares have been already applied for, and the share list will only be kept open for a short period.

Offices—21 Great Saint Helen's, Bishopsgate street, London.

PROSPECTUS.

This Company, incorporated under special Acts of Parliament, with limited liability, has for its objects the purchasing of Dagenham Lake and about 80 acres of land adjoining, and converting the same into docks, wharfs, &c., for the accommodation of all classes of vessels entering the port of London.

Dagenham Lake is situate below Barking (opposite Woolwich Marshes), on the Essex shore of the Thames, from which it is separated only by the river embankment, and has an area of about 60 acres, with great depth of water. The only works necessary to convert it into extensive docks are the partial excavation and embankment of the lake, and the construction of a tidal basin, entrance gates, &c.

The London, Tilbury, and Southend Railway (the lessees of which have promised every facility for both passenger and goods traffic to and from the Docks) passes close to the margin of the Lake, where sidings and a station will be made. The Docks being thus connected with the entire railway system, and only about 23 minutes by rail from, and within a tide of London, will possess all the advantages of the up-river Docks. Vessels resorting to them will not only save time, but will avoid the risk and expense consequent on navigation to and from the existing Docks through the crowded river.

The Dagenham Dock will be one of the largest in the port of London, and be capable of receiving the largest ships afloat. The average width will be 600 feet, and the length about one mile, giving nearly two miles of quay, and affording ample room for berthing ships. The tidal basin will be 450 feet long and 250 feet wide, the gates to which will be 70 feet wide, with 27 feet of water on the sill at ordinary high tide, the minimum depth in the river at the entrance will be 12 feet at low water, and as the lake is naturally much deeper, vessels will be enabled to enter the dock at almost any stage of the tide, the convenience of which can hardly be overrated. Outside there is an excellent anchorage and ample space, the river being at this point about half a mile broad.

Notwithstanding the great extent of the proposed Docks, their superior depth of water and width of entrance, they will be constructed at a comparatively trifling cost. A contract for the completion of the Docks within eighteen months, has been made with Messrs J. and C. Rigby, of Westminster, and this, together with the cost of the freehold of the Lake and the adjoining lands, containing altogether about 140 acres, will amount to £222,000. The remainder of the share capital, with the amount authorised by the Acts to be borrowed, viz. £50,000, will be applied to the building of warehouses, specially adapted to the different trades, at the Docks, and at the Bishopsgate street and Fenchurch street stations, to which latter such goods as are usually sold from bulk will be immediately sent from the ship's side.

The commerce of the metropolis has nearly doubled itself in the last twenty years, but the dock accommodation has not been increased in anything like a corresponding ratio. In 1863, the number of ships entering the Thames from foreign ports was 11,521, with a tonnage of 3,411,480. In addition to this, upwards of 3,000,000 tons of coal are brought to London. The want of a convenient distributing point for the latter vast traffic has long been felt, and will be supplied by the docks of this Company. Coals will be discharged direct into the railway trucks at the dock side, not only for conveyance to the metropolis, but to the various depots at Bow, Hackney, Kingsland, Islington, Hampstead, Hammersmith, and other places, thus preventing the delay of waiting for tide, &c., and enabling the colliers to make at least one more voyage per month.

Upwards of 250,000 head of cattle are annually imported into London. At all times of the tide these can be landed at the quay in connection with the docks, and be placed in the extensive grazing grounds adjoining, and can be conveyed by rail direct to the metropolitan markets in the best possible condition. No up-river docks or wharfs can offer such an arrangement, the advantages of which must be self-evident.

The great extent of wharfage will enable the Company to store timber, guano, petroleum, jute, saltpetre, tallow, and all other goods, at exceedingly moderate rates, besides admitting of their being classified so as to reduce to the minimum the insurance thereon. The Company's lands will be available for the construction of graving docks, patent slips, and other subsidiary works, to promote the general business of the undertaking and the interests of the public; and their small capital will admit of an average reduction in the rates of tonnage, &c., of about 30 per cent., thereby ensuring an extensive use of the docks by all classes of shipping.

Since the opening of the Victoria Dock in 1855-6, the dock charges generally have been largely reduced, and it is a notable fact that the tonnage of shipping entering that dock during 1863, was as 9 to 7 compared with the London and St Katherine's Docks jointly, and 150,000 tons in excess of the East and West India. The Victoria is now amalgamated with the London and St Katherine's Dock Companies, the rates have been greatly increased, and a monopoly created to the detriment of the public; but it is evident that during its independent existence lowness of the charges was the key to its success; and as the Company, which can best afford to take reduced rates, is obviously the one having the smallest capital, the Dagenham Dock Company in this respect will be unrivalled. This must be at once conceded on comparing its capital with those of existing Docks, &c.

Name of Dock.	Water Area in Acres.	Capital, including Loans and Debentures. £	Average cost per Acre, including Warehouses, &c. £ s d
London	40	4,938,310	123,457 15 0
St Katherine	11	2,618,653	238,059 7 3
Victoria	80	1,029,798	12,872 9 6
East and West India	129	2,000,000	15,503 17 6
Surrey and Commercial	88	1,276,271	14,502 2 8
Dagenham	60	350,000	5,833 6 8

It will be seen from the above table that the Dagenham Docks will have a larger water area, and consequently will accommodate more vessels than the London and St Katherine's Docks jointly; that the capital of the Company is less than one-twentieth of those companies, and that the cost per acre is less than one-half of that of the Victoria, which has the smallest capital of the existing dock companies. The Directors, therefore, having already received promises of a large amount of business, feel justified in stating their confident belief that when the Dagenham Docks are in full operation, a highly remunerative dividend will be realised.

Interest at the rate of 6 per cent. per annum will be paid half-yearly on the amount paid on the shares, either as calls or in advance, until the opening of the Docks.

Nearly one-third of the capital has already been applied for, and prospectuses with forms of application for the remaining shares may be had of the bankers, brokers, or the secretary at the offices; but no application will be entertained unless 1*l* per share has been paid on the number applied for. Should no allotment be made the deposits will be returned as early as possible, without any deduction whatever.

SECRETARY.—T. N. Cathrall, Esq.

Temporary Offices—35A Moorgate street, E.C.; and 196 Strand, London, W.C.

ABRIDGED PROSPECTUS.

This Company is established to provide a want long felt, whereby freehold and every description of land and property may be made easily negotiable, and greater facilities given to secure immediate advances on this class of securities.

The Credit Foncier, a Company similar to the London and Provincial Mortgage Bank of England, at their last meeting declared that their net profits for the six months ending August 27, after paying all expenses, amounted to £42,219 5s 11d, or equal to 180 per cent. per annum on the amount of capital called up.

The great delay, difficulty, and heavy charges entailed in the present mode of obtaining an advance by the mortgage of property will by this Company be avoided, and a more simple and expeditious system afforded.

The Company will act as agents to investors and borrowers, and a register will be kept of all sums available for investment and sums wanted to be borrowed. A commission will be charged on each transaction, and from this source considerable profits will be realised.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, 196 Strand, London, W.C., 35A Moorgate street; of the Brokers; of the Solicitor; and of the Bankers.

THE LONDON AND PROVINCIAL MORTGAGE BANK OF ENGLAND (Limited).

Notice is hereby given, that no Application for Shares can be received after Monday next, 20th inst., and Wednesday next, 22nd inst., for the country.

T. N. CATHRALL, Secretary.
Temporary Offices, 35A Moorgate street, London, E.C., Feb. 15, 1865.

THE CONTRACT CORPORATION

(Limited).

At the Second Ordinary General Meeting of the members of the Corporation, held at the London Tavern, on Thursday, the 16th day of February, 1865,

JOSEPH ROBINSON, Esq., in the chair,

The Secretary read the notice convening the meeting.

The Secretary read the report.

Whereupon it was resolved unanimously:—

That the report of the directors now read, with the balance sheet appended thereto, be received and adopted.

That a dividend on the shares of the Corporation for the half-year ended 31st December last, be now declared at the rate of £10 per cent. per annum, free of income tax.

That C. J. H. Allen, Esq., and Messrs Deloitte, Greenwood, and Dever, be re-elected auditors of the Corporation, and that the remuneration to be paid to them be £50 per annum each.

At an Extraordinary General Meeting held immediately after the above business had been transacted,

It was resolved unanimously:—

That the agreement dated 2nd February instant, and entered into between Messrs John Watson and Co. and this Corporation, for the acquisition by the Corporation of the business of the said John Watson and Co. be, and it is hereby confirmed, and the directors are authorised to carry the same into effect.

The following special resolution was also carried unanimously:—

That the amended Articles of Association now submitted be adopted in lieu of the existing Articles of Association of the Corporation.

JOSEPH ROBINSON, Chairman.

The thanks of the meeting were given to the Chairman and directors for their attention to the interests of the Corporation.

J. CHARLES HANDFIELD, Secretary.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

NEWCASTLE STEAM WHARF,

272 Wapping.

NOTICE TO MERCHANTS AND SHIPPERS.

The first section of the above spacious wharf and premises, in the second-class fire risk, having now been rebuilt by Messrs Winckworth and Co., with steam and other cranes attached capable of lifting 7 tons at a time, the same are NOW OPEN for the landing, shipping, and warehousing of goods and merchandise to or from all home and foreign ports, particularly Newcastle and those of the Mediterranean.—For terms apply upon the wharf to the Manager, Mr Charles H. Swann.

IMPERIAL TURKISH SIX PER CENT. LOAN of 1858.—£5,000,000.

Notice is hereby given, that the Half-yearly Dividend, due on the 1st March next, on the outstanding Bonds of the above Loan, negotiated by Messrs Dent, Palmer, and Co., will be Paid at their counting-house on that day on any subsequent day, except Saturday, between the hours of 11 and 3. The coupons, with a list in numerical order, must be left for examination two clear days previously. Coupons are not received on Saturdays. Printed forms of the lists may be had on application.

Notice is also given, that the Bonds of the above Loan drawn (in December last) for redemption on the 1st March next, as advertised by the Turkish Ambassador, amounting to £66,900, will be paid off at par, on that day, or any subsequent day (except Saturday), between the hours of 11 and 3. Bonds must be left for examination one day previous to applying for payment.

London, Feb., 14th 1865.

£400,000.

MAURITIUS GOVERNMENT 6 PER CENT. LOAN.

Authorised by an ordinance passed by the Governor in Council on the 30th May, 1864, and since confirmed by the Crown, for the completion of the Government Railways in the island of Mauritius. To be raised by the issue of debentures or registered stock, at the option of lenders, secured on the general revenues and assets of the colony, of which the railways themselves, now approaching completion, form valuable portions.

Her Majesty's Principal Secretary of State for the Colonies having directed the undersigned to negotiate on behalf of the Government of Mauritius, the loan authorised by the ordinance above cited, they hereby give notice, that they will be prepared to receive tenders until One o'clock p.m., on Thursday, the 23rd instant, for Debentures and Registered Stock, solely or jointly, to the extent of £300,000, being the first instalment thereof.

The debentures will be transferable by delivery, and the stock by deed of transfer, and either will be exchangeable for the other at par, at any time, at the option of the holder, upon conditions which may be known on application to the undersigned.

The Debenture Bonds and the Stock Certificates with half-yearly dividend Coupons, payable to bearer, attached to each, will be issued in sums of £1,000 £500, and £100, to suit purchasers, but no fractional part of £100 will be created, or subsequently dealt with, in either of these securities.

The principal in both cases will be repaid by means of a sinking fund in 30 years from the date of issue, and interest at the rate of six per cent. per annum, on both debentures and stock, will be paid half-yearly, on the 15th day of February and 15th of August in each year, commencing from the 15th instant.

Principal and interest will be made payable either at the offices of the Agents for the loan in London, or at the Public Treasury in Mauritius, as the lender may elect at the time of allotment.

Applications in accordance with the annexed form, addressed "Tender for Mauritius Loan," will be received by the undersigned, until one p.m. on the 23rd instant, and then opened at their offices in the presence if such of the applicants as may be pleased to attend.

The highest tenders will be accepted, whether for Debentures or Stock, provided the rates offered are not below the minimum which will be placed in a sealed paper on the table before the tenders are opened.

Tenders at a price including a fraction of a shilling other than sixpence will not be accepted, and in the event of an equality of tenders beyond the amount to be disposed of, a pro rata distribution on such tenders will be made.

Five per cent. of the purchase money must be paid into the Bank of England on the 24th February instant, and the balance on the 14th March following.

Scrip certificates will be issued to purchasers, on the production of the Bank receipts for the money, and these will, as soon as possible, be exchanged for debenture bonds or stock certificates, in accordance with the allotments that may have been made.

Forms of tender and full particulars respecting the financial condition of the Colony may be had on application to the undersigned Agents for the loan.

PENROSE G. JULYAN,) Crown Agents
W. C. SARGEAUNT, } for the Colonies.

Offices of the Crown Agents for the Colonies,
Spring gardens, London, S.W.
February 13th, 1865.

FORM OF TENDER.

To the Crown Agents for the Colonies,
Spring gardens, London.

Gentlemen,—I hereby tender for the following portion of the Mauritius Government 6 per Cent. Loan, authorised by Ordinance No. 15 of 1864, subject to the conditions contained in your advertisement of the 13th February, 1865, viz.:—

Debentures to the extent of £——— for which I undertake to pay at the rate of £——— for every £100 in Debentures.

Or,

Registered Stock to the extent of £——— for which I undertake to pay at the rate of £——— for every £100 in Registered Stock.

Name .....
Profession or occupation .....
Address .....
Date .....

METROPOLITAN RAILWAY COMPANY.—LOANS on DEBENTURE.

The Directors of this Company are prepared to receive Tenders for Loans on Debenture Bonds, in sums of not less than £1,000, for a term of three or five years, dating from 15th January last, with interest from date of payment, at the rate of 4½ per centum per annum to replace bonds falling due.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster, S.W.

LONDON, CHATHAM, AND DOVER RAILWAY.

LOANS ON DEBENTURES.

The Directors of the above Company are prepared to receive LOANS on DEBENTURES of £100 and upwards, for three or five years, at 6 per cent. per annum.—By order,

W. E. JOHNSON, Secretary.

Victoria Station, Pimlico, S.W.

HATFIELD AND ST ALBAN'S RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors of the above Company are prepared to receive LOANS on DEBENTURE BONDS, to a limited amount, for three or five years, at 5 per cent. per annum. Applications must be made to the undersigned, not later than the 28th inst., at the Company's Offices, King's Cross Station, London.

ALEX. FORBES, Secretary.

London, Feb. 3, 1865.

PETERBOROUGH, WISBEACH, and SUTTON RAILWAY.

The Directors of this Company are prepared to receive Loans on Security of Debentures, for 3, 5, or 7 years, bearing interest at the rate of 5 per cent. per annum, payable half-yearly in London.

The interest on the above debentures will be paid by the Midland Railway Company, in terms of the Act of Parliament, which makes the debenture interest the first charge on the gross receipts of the line prior to deduction of working expenses.

H. DUDLEY COOPER Secretary.

41 Parliament street, London.

FOUR-AND-A-HALF PER CENT. SWEDISH GOVERNMENT LOAN of 1864, for £2,223,000 sterling. SINKING FUND.

Notice is hereby given, that the SECOND DRAWING for the redemption of this loan, in accordance with the tenor of the bond, was held at Stockholm, on the 2nd day of January last, when the following BONDS, amounting to £10,300, were DRAWN by lot, for repayment at par.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1864. *On Saturday, March* 11, *we shall issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of trade, Lists of New Companies, Returns of Prices, Accounts of the Banks of England and France, &c. The object of the Supplement being to place in possession of our readers a Commercial History of* 1864 *worthy of preservation and adapted for reference.*

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The INVESTOR'S MANUAL *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price,* 6*d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

Two contrary, but for the moment almost equal agencies are now contending in the money market: one of them tends to lower the value of money, the other to prevent its being lowered, and it is of great importance to have a distinct view of the exact nature of each of these agencies, and as far as may be (for such estimates are inevitably difficult) of the relative magnitude of each.

The first cause—the cause that tends to diminish trade—is the diminution of the magnitude of our foreign trade. It is much to be regretted that the most recent figures cannot yet be given. The Board of Trade at the end of the year are perhaps needlessly precise, and therefore, needlessly dilatory in their publication of their monthly returns. Ample experience has proved that these returns, as issued from month to month, are quite sufficient in accuracy for the purposes of men of business. The further revision suitable for statistical students may be reasonably delayed till the publication of the quarto blue-book which only such students ever consult. But the last information we have shows our trade to have rapidly diminished in consequence of the crisis of the autumn. People then stopped doing business—stopped *transacting*, and now we feel the effects. Bills are getting scarce, and the surplus money in Lombard street, though not excessively large, is considerable. The figures show the reduction, and its date. Up to October this year the Board of Trade returns showed a steady increase in 1864 over 1863. Take the three months preceding October, our exports were :—

	1863		1864
	£		£
July	13,648,840		14,394,364
August	14,088,814		16,274,269
September	14,542,862		14,687,942

But in October and after, the tale is not one of comparative increase, but comparative diminution :—

	1863		1864
	£		£
October	15,082,332		12,871,491
November	12,758,323		12,065,213
December	14,354,400		12,095,437

After the crisis at the end of the year our exports diminished, but up to the crisis they steadily increased. What happened in January we do not yet know, we only just know what we have set down.

As to our imports we have only very defective information; the only two months, during and after the crisis, with which we are officially acquainted are October and November; but in these there is a diminution too. The figures are :—

	1863		1864
	£		£
October	20,394,503		17,014,070
November	20,309,746		16,164,570

Most probably owing to the great fall in produce the official accounts in February and March, when we receive them, will show a much greater diminution. But up to the present time we are able to say as much as this, that a very considerable reduction in the quantity of our foreign trade, whether of export or of import, is in progress, and that accordingly an almost universal diminution of foreign trade brings about a speedy diminution in the value of money.

If it were not for a new cause, we should expect not only a diminution, but a very great diminution. But we have *taken up a new trade*, the trade of lending. England is now by a machinery more refined and efficient than it ever before had, with a regular magnitude which was never before approached, lending to the industrial organisation and the Governments of foreign countries. If any one wants a large sum of money *at once* he comes to London for it, and if any one wants permanent capital he may expect to find much of it in England if he pays an adequate interest, and gives what will be thought good security for it.

This point was expressed with admirable precision in an important article, called "Seven per Cent.," in the *Edinburgh Review*, to which we have referred before :—"While numerous countries are eagerly competing for our financial assistance, now that assistance has arisen on an adequate scale by which that assistance can be rendered without excessive risk to the lender, it is clear that so long as this new system remains sufficiently popular to command, if not to entrap, the confidence of investors, *the rate of interest cannot possibly, ceteris paribus, fall below a point at which companies trading with foreign countries are willing to take it.*" These are

Digitized by Google

the two antagonistic causes now in operation—the diminution of trade and the increase of lending. What may be the relative magnitude of these it is not possible to say in figures; but three general propositions may be hazarded.

First. *For the moment*, the diminution of trade is likely to get the better. The rate of interest is likely to go down. The returns of the Banks of England and France are both favourable. Good bills are hard to get in Lombard street, and an inevitably tendency depresses the value of money, though the largest holders, from a natural fear of unwise speculation, would, if they could, keep it somewhat dear.

Secondly. The tendency to lend to foreign countries—the cause which augments the value of money—is much less temporary than the present diminution of foreign trade. The check to commercial enterprise was caused by momentary occurrences of the autumn, but the increased wish to lend to foreign countries in good credit, of stable government, and industrial energy, arises from our augmented intelligence, and the improved state of the world. Foreign countries are better worth lending to than they were, and we know that they are better. The rate of interest *tends* to equalise itself throughout the world, because nations which need little borrowing ability have now more, and nations which need to have comparatively little capital that they were willing to lend, have now comparatively more.

Thirdly. The lending propensity is a propensity likely to be accelerated. The value of money is likely to go down, perhaps even to 4 per cent., at any rate to go down somewhat, and the more we reduce money, the value of capital, here, the greater is the bounty we give to those who wish to take it abroad.

The result is, that though the causes depressing the value of money are more powerful for the moment, and the rate of discount likely to be lowered, we must not expect a permanent return to cheap money, because the agency which now reduces the value of money is essentially temporary, and there is a new cause of a lasting character at work in the market which tends, and will tend, as compared with past years, to increase it.

THE DEFENCE OF CANADA.

The discussion on Wednesday in the Lords about the defences of Canada was in many ways a very disagreeable discussion, but we incline to think it was a very necessary one, and ended, on the whole, satisfactorily. All of us, we imagine, feel at heart that we would rather the subject were not talked about, that it is very disobliging of Lord Lyveden to persist in probing the sore, and very ill-tempered of Lord Derby to be so very clear, and very indiscreet of Lord Ellenborough to be so exceedingly emphatic. But still, when a vote for the fortifications of Quebec is put on the estimates, somebody must ask questions, and as for indiscretion, we must accept the little evils of Parliamentary Government with the great advantages which flow from it. It was really time that the Ministry should in some way or other make it clear whether, if Canada were attacked, Canada would be defended; and they did make it clear. "It is certain," said Lord Granville, "that "if the colony is prepared to take its share in the exertions "and expenses which are necessary to its defence, the mother "country is bound to give it every assistance in case of any "wanton aggression by a foreign Power." Lord Russell was at least equally plain. "If Canada," he said, "is ready to "stand by this country, then I think this country is bound in "honour to stand by Canada; and if they are disposed to "grant their resources to defend their soil in connection with "Great Britain, we ought to be ready to expend our resources "in order to defend them. That is a point, not only of "interest but of honour." There is no mistaking expressions like these, and it was right that they should be uttered. They undeceive the American war party as to any hope of a cheap or bloodless conquest, they give the Canadians heart for new and stronger efforts, and they warn the people of England that the present political lull may, almost at any moment, be followed by a crisis of fierce political exigency.

The decision at which the Ministers have arrived is, of course, a very annoying one, but still people must occasionally in life come to annoying decisions. Nobody in this country wants, we suppose, to fight for Canada *qua* Canada, to suspend commerce and interrupt industry and mortgage the future, in order to retain a titular authority over a vast region whose inhabitants will not even give us a low tariff upon our produce. An American war for anything would be, to say the least of it, a severe trial, and a war for a territory the mass of us know and care very little about would be nothing short of a calamity. But an Empire, like an individual, has certain duties to perform, which, if it does not perform, it ceases to be independent, respected, or self-respecting, and one of them is to protect subjects who are anxious to be protected. England could no more suffer Canada to be invaded than an Englishman could suffer his house to be entered without his own consent. If the experiment is made, she must, however unwilling, exert her whole strength in the defence of her territory, just as a man must sometimes place his whole fortune at stake in a litigation necessary to protect his person or property from injury or outrage. To do less would be to proclaim to every colony, the powerless ones as well as the powerful, that Great Britain has lost the strength or the heart to fulfil her imperial function, that they must seek other allies lest they should one day lie at the mercy of the first powerful and greedy claimant. It would be to inform all enemies that this country might be attacked with safety, to invite resistance from all subjects, aggression from all rivals, to lower at least for a generation the tone of the national spirit, the standard of national honour. It could not be safely done even were the subject of dispute a barren rock, and to do it when three millions of Englishmen are stretching their hands for help, arming themselves and taxing themselves in order to bear their part, would be a baseness which no amount of danger to our commerce could excuse.

As to the vote on the estimates, the Ministry have acted sensibly and moderately enough. Having a house to defend, they put a new lock on the door. They sent a good engineer officer to Canada, accepted his advice to fortify three or four places, decided that Quebec fell to them, and asked Parliament for a very moderate vote—200,000*l*—to enable them to do their clear duty. The money will be spent slowly because labour comes in slowly, but the work will be done as fast as may be, and when it is done the British Government will have at least one place in the interior of Canada where it can disembark, collect, and equip troops in safety. Of course it would have been pleasanter and wiser to do as Lord Derby said, and go on fortifying silently and secretly, but that particular act of wisdom would have been performed at a price Lord Derby would not be willing to pay, a breach of the constitution upon its fundamental point.

THE POOR LAW BILL.

Mr Villiers' Bill for abolishing entirely the separate chargeability of the parish for its own poor, and charging *all* the cost of relief on the common fund of the Union, is one of the best measures which we are at all likely to see passed in this session. The tendency of all our recent legislation on this subject has been steadily in this direction,—to diminish the motive for transferring the poor from one parish to another, and for resisting the erection of cottages for the poor in the neighbourhood of their actual work. How much all that has been done in this direction even up to the present time falls short of what is really wanted, Mr Villiers' very striking bit of statistics, that in 821 agricultural parishes in England there has been within ten years a diminution in the number of houses by 3,118, simultaneously with an increase in the number of the population by 16,497, sufficiently show. Still, the recent legislation had already effected very much in the way of reducing the motive for preventing the poor from living near to their field of labour. Before 1857, there were many extra-parochial places which paid no contributions at all to the poor rates. Even the parishes were liable only for their *settled* poor, and contributed to the "common fund" of the Union, from which the "irremoveable poor" were maintained,—the poor who had lived for five consecutive years within a parish of the Union,—*not* in proportion to the rateable value of the property of the parish, but in proportion to the average expenditure of that parish on its poor during the previous seven years. The effect of this, of course, was that every parish which had had but few poor hitherto, was extremely reluctant to admit more, because every new pauper increased not only its own parochial expenses, but also the *proportion* of its contribution to the support of the poor in the neighbouring parishes of the same Union. In 1857, however, extra-parochial places were all parochialised, and since then almost all these places have been annexed to Unions, so incurring a share

Digitized by Google

at least of the common burden. But the most important step was taken in 1861, when Mr Villiers reduced the period necessary for requiring the *status* of irremoveability from five to three years, made any person who had lived in the same *Union*, although not in the same parish, for three years, irremoveable, and—perhaps most important of all—obliged the parishes to contribute to the "common fund," out of which the irremoveable (as distinguished for the "settled" poor) were supported, in proportion to the rateable value of their property, instead of in proportion to their average expenditure during the previous seven years. This diminished greatly the motive for thrusting the poor from one parish into another, because each parish in the Union now contributed just the same to the common fund for all irremoveable poor in the Union, whether within its own limits or outside it. Still the great evil remains that as each parish still pays separately for its own *settled* poor, it has a distinct feeling of self-interest, and looks upon the common fund of the Union with jealousy, as a sort of extraneous addition to its liabilities and obligations. The consequence is that the different guardians in attending the Union still consider themselves as doing so rather in the interest of their own parish, and to protect it from undue additions to its present burden,—*not* as representative officers of the *Union* whose duty it is to consult for the best interests of the whole Union and for the economy of its management as a Union, but for the interests of the separate elements constituting that Union. The guardians coming from parishes with but a small number of settled poor look with great jealousy on any step likely to swell the number of irremoveable poor by subtracting from the number of the settled poor in the more populous parishes. On the other hand, the guardians from the populous parishes look with favour on any step likely to increase the number of irremoveable poor by subtracting from the number of their own settled poor; and thus the Board of Guardians becomes less an executive for the Union than a parliament for the settlement of disputes between the parishes.

This is the evil which Mr Villiers' Bill will remove, as well as the perhaps greater evil of a needless interference with the free circulation of labour. He does not propose to abolish or to change the law of parochial *settlement*, but he does propose to pay *all* the cost of relieving the poor in every Union out of the common fund, and abolish altogether the separate chargeability, and, therefore, the separate exchequers of the parishes. The parishes will still have settled poor, but the common fund will pay for them as well as for the irremoveable poor. Hence it will no longer be the interest of the individual parishes, but rather of the whole Union to remove a poor man to the parish of his settlement, and the rivalry of interests between Unions and their component parishes ceases altogether. As between parish and parish, therefore, there will be perfectly free circulation of labour, and as between Union and Union there will be fewer removals now than formerly for the following reason:—Mr. Villiers' Bill throws for the future the responsibility of removing the "settled poor," who are not "irremoveable," on the Board of Guardians, instead of on the overseers of the parish in which they happen to be residing. The effect of this, it is thought, will be to diminish by one-half the number of removals. For the parish overseers, usually ignorant men and full of parochial jealousy, insist on the removal of a number of poor where the question of the legal settlement is very doubtful, while the Board of Guardians, who are a much more nervous and prudent class of persons with respect to litigation, would much sooner keep a poor family themselves than engage in a troublesome and expensive dispute with another Union.

Still, we do not see why, as a contemporary suggests, Mr Villiers should not have made one great step forward. Even under the new Act, a poor man who has once become "irremoveable" by three years' residence in any Union, and has since left the Union and fallen into want in a different Union, where he has not completed the requisite term, will be liable to be removed to the Union containing the parish of his settlement, with which he may have no relation of any kind whatever, where he may even never have lived, since his settlement may have been acquired through his parents,—instead of to the last Union in which he had acquired the *status* of irremoveability by three years' residence. Thus, a man of Irish parentage, but who had never worked in Ireland in his life, and who six months ago was irremoveable from Birmingham, may be removed by the Union in which he becomes chargeable to the most distant corner of Connemara, where he is an utter stranger and has no prospect of finding work; whereas, if he were only sent back to Birmingham, he might soon cease to be a pauper. The remedy would be easy—simply to give any poor man or family a *settlement* on the last Union in which he had been irremoveable. In this way, instead of being sent to the ends of the earth, he would be sent only to a place with the labour market of which he was well acquainted. The objection is supposed to be that the tendency of all recent legislation has been towards the abolition of the law of settlement, and this would be thought, it is said, a step backwards. This seems to us, we confess, an utterly insignificant objection. The objection to the law of settlement rests on the inhumanity to the poor, and the injury to free trade in labour, in their distant removals, and any step which seriously diminishes that evil, whether it professes to confer a settlement or to take one away, is in the right direction. Besides, the *principle* of removal can never be entirely got rid of. It will never do to relieve all the poor in the Union in which they apply for relief, and independently of their previous residence and labour,—for then, at a moment's notice, at a bad season, or in a hard winter, we might have the agricultural poor all flocking into the large towns, or the Irish poor crossing to Liverpool, and there demanding relief. Some length of residence, if it be only three months, will have to be fixed, and for the present it is obvious how great a diminution of the evil of settlements it would be to send back the poor only to the last place in which they had acquired a *status* of "irremoveability," instead of to places with which they often have no personal connection whatever.

We think that to this intent Mr Villiers might have gone further without provoking any serious opposition, but to all that he does propose to do we are sure that Parliament will give a hearty and immediate assent.

ABANDONMENT OF TRANSPORTATION.

We are pre-eminently a colonising people. We are, beyond all comparison, the most enterprising, the most successful, and in most respects the best, colonists on the face of the Earth. We have the largest Colonial Empire in the World. We have governed it, not always no doubt with foresight and sagacity, but assuredly, during the last three quarters of a century at least, usually with mildness and invariably with liberality. We habitually, for a long series of years, favoured our colonies as well as fostered them, gave them many advantages in our markets, and exacted few from them in return. Of late, since the complete establishment of sound principles of commercial policy, we have incurred great expenses on their behalf, without reaping any pecuniary advantages whatever from the connection. We have gradually conceded to them almost complete self-government, without at the same time imposing upon them the obligation of complete self-protection. We have gone so far in this direction that a considerable and not uninfluential school of politicians are always arguing that our colonies cost us much and yield us nothing, that, whether they want us or not, we do not want them, and that it would be cheaper and wiser to cut them adrift. Still,—though owning the vastest Colonial Empire in the world, and though indisputably the mildest, most generous, most considerate, most conscientiously well-meaning Mother Country in the world,—we yet are always at issue with some one or other of our colonies, and somehow always so manage the controversy as to give ourselves the appearance of being in the wrong, and to ensure having to yield in the end, and generally to yield ungracefully. In most cases, we believe, we are technically and and essentially in the right, but we always contrive that the colonists, however unreasonable and intemperate, shall have "a case" against which it is found practically impossible to make any determined or ultimately successful resistance. We always give in at the end; but we always persist till we have created infinite irritation; and we always push matters so far as to gain credit for never yielding to anything short of actual rebellion or the distinct menace of it,—and of always yielding to that.

We have been singularly unlucky,—generally right in the main, but as constantly wrong in the details, in our manner, and in our time. No one can say that our claim that the American colonies should contribute something to the Imperial Exchequer to reimburse us in our day of need for the enormous expenses to which we had been put in defending them against the French, was a very unreasonable one. But

Digitized by Google

we laid on taxes (very small ones indeed) without asking them; we fixed upon the stamp act and the tea duty, both peculiarly unpalatable; we roused their pride; we were obstinate and supercilious; we drove them to rebellion and were beaten.—In the case of the Canadas, we never fairly grappled with their grievances till they rebelled; but as soon as the rebellion was put down, we grappled with them so effectually that we have had scarcely any difficulty since.—When we were desperately hard pressed, and almost at our wits' end, in consequence of the accumulation of convicts on our hands arising from the necessity of for a while stopping transportation to Australia, Lord Grey, in his extremity, sent a shipload of convicts to the Cape, who were picked men and had undergone the reformatory portion of their discipline at home. We believe they might have been received without any mischief or danger;—we consider the refusal to receive them to have been distinctly a lawless act;—we think the Cape colonists behaved with very unnecessary insolence, and that kind and generous feeling should have made them glad to assist the mother country in her dilemma. But the public mind had been so inflamed by the reckless mismanagement of the entire Transportation scheme for some years back, and by the consequences that had ensued in New South Wales, that passion prevailed over reason and good feeling, and the convicts were not allowed even to land. The Government here was deeply hurt and annoyed, but it was clearly a case in which coercion could not with decency be ventured on. We pocketed the affront, sent no more convicts, and again showed our colonies how, and apparently how only, they could gain their end.—The reiterated representations, the appalling disclosures, the unanswerable arguments, the solemn appeals of philosophers and jurists and men of experience and committees of inquiry, against the whole system of Transportation produced scarcely a perceptible effect upon the Government at home, though persisted in for years. They felt their own difficulties and those alone, and continued to ship off their embarrassing abominations to the Antipodes; till at length the colonists could stand it no longer, and positively refused to continue any more the cess-pool for English crime; and as their refusal was expressed in pretty dogmatic terms, and as the simultaneous discovery of the gold fields afforded a plausible excuse for yielding, the Home authorities gave way, the case being clearly neither arguable nor *fightable* at all.—Finally, our Government, untaught by its many failures and defeats, unable to grasp a principle, or foresee a danger, or abstain from snatching at any temporary relief which offered a prospect of postponing the day when a knotty question would at last have to be grappled with,—commenced its new Penal Colony of Western Australia. It might have known that the irritable dread of the Eastern Australian Colonies would be soon aroused again upon the subject; it ought to have listened to those at home who had long since proved to it that Transportation, as a punishment for crime and a mode of dealing with criminals, was at once iniquitous and ineffectual;—but it caught a glimpse of a few years' respite from its difficulties, and it refused either to listen or forecast. The natural consequences followed; the old story was once more repeated: the older colonies remonstrated first gently, then angrily; they were scarcely heard, and in truth their fears had almost no ground; they encountered no real danger, and their demands were both unreasonable and unjust; but on this subject the colonial mind had become too morbidly excited for either justice or decorum. The Ministry of Victoria took the indecent and unprecedented step, independent of the Governor, of inviting all the other Australian colonies to join in a sort of conspiracy to coerce the mother country, Europe, and Western Australia, into abandoning transportation, by a sort of non-intercourse act,—and an Anti-transportation League was formed for the purpose of collecting and shipping back to England as many convict *expirees* as possible; and one shipload, we believe, actually sailed. Of course when matters reached this point there was nothing for it but either to snub and coerce the refractory and meddling colonists, or to yield to their unwarrantable demand. Mr Cardwell, wisely enough, determined on the latter alternative, and with considerable tact, seized on a happy incident as an an excuse for yielding; and transportation to Western Australia is to cease within three years.

Of course we rejoice at this determination. The only matters for regret are, that it was not arrived at years ago, and that it should now have the appearance of being adopted under menace. It is unfortunately the case that official people in England can scarcely ever be induced to make a start in the right direction till they have been beaten successively off every false scent—a process involving long delay, vast expense, much mischief, and much humiliation. Our readers know that for twenty years we have steadily and even vehemently argued against the practice of transportation. It was long ago proved to demonstration, and the demonstration was repeated almost *ad nauseam*, that as a punishment transportation was utterly ineffective and unequal, that as we administered it, it constantly operated as a reward and often as a positive inducement to crime. If, indeed, we had reserved it for young criminals not yet hardened and still reformable, we might have rescued thousands from a career of crime, and have inflicted no injury upon the settlement to which they were sent. If we had reserved it for the ultimate destination of those who had undergone their full sentence in England, and were sincerely anxious to commence a new course, under new auspices, in a new world,—the practice might, and we have no doubt would, have proved a blessing to all parties, and would never have raised the faintest opposition. But to create a purely penal settlement was to found a Hell; to send and finally turn loose thousands of villains in an already peopled colony was to poison and dishonour it for ever; in a word, transportation, under *any* form yet practised, was a clumsy blunder and a shameful wrong,—and a system that could never come to good. Our last penal colony has now to be abandoned and purified, and in future Great Britain must *deal with* her dreaded problem, and not evade the difficulty by sending it unsolved elsewhere.

So far good. But naturally enough the colonists of Western Australia feel themselves aggrieved at this withdrawal of what for the last fourteen years has been their main supply of labour, and have put forward a claim for compensation:—and we confess we are not satisfied that Mr Frederick Elliot's very clever answer to the memorialists quite disposed of their arguments. It is perfectly true that before 1850, when it was first resolved to send convicts to Western Australia, that colony was reduced to the most deplorable condition; it had proved a complete failure, and was rapidly sinking into ruin. It is equally true that since it became a convict colony the free population has increased fourfold; that the commerce has quintupled, as well as the number of acres brought under cultivation; that nearly a million of Government money has been spent there, and that some roads and a certain amount of public works have been completed, and much more has been begun. Still the facts remain that the colony was wholly unable to maintain itself before convict labour was introduced, and probably cannot now get on without it;—that in 1850 the few remaining capitalists and settlers were about to give up the struggle and abandon the colony, and were only encouraged to struggle on by the prospect of a large supply of convict labour; and that a great proportion of the free emigrants who were sent out were induced to choose that colony rather than any other, partly by the consideration that an abundance of forced labour would be always supplied to them. Both settlers and emigrants relied upon that supply:—the advantages anticipated from it made their inducement to encounter the undesirable stigma of being a convict colony:—the stigma has been incurred and will remain; the forced labour has been withdrawn at the end of a limited term of years.

There can be no question but that transportation ought to be and must be discontinued, and that its discontinuance is absolutely necessary for the future prosperity of the newly-discovered and far more promising though distant portion of the colony itself. But we fear there is almost as little question that this discontinuance will prove fatal to the existing settlement, that is, to the capitalists and emigrants about Perth and Fremantle.

BOARD OF TRADE RETURNS.

THE returns issued by the Board of Trade give the annexed value of the shipments of British goods and produce during the last three years:—

	£
1862	123,992,264
1863	146,604,342
1864	160,436,302

It follows, from the above figures, that the increase in our exports last year compared with 1863 amounted to 13,833,960*l*.

Digitized by Google

and with 1862 to 36,444,038*l*. In December only, the shipments were valued as under :—

	£
1862	10,807,033
1863	14,354,400
1864	12,095,437

Compared with 1862, the account for December, 1864, stands well; but the deficiency in the latter month contrasted with 1863 is 2,258,963*l*.

During the first *eleven* months, the imports of foreign and colonial produce were valued as under :—

	£
1862	159,003,438
1863	173,575,298
1864	197,448,426

In November only, the arrivals were :—

	£
1862	18,688,414
1863	17,014,070
1864	16,164,570

The annexed return shows the increase and decrease in our exports to various countries in 1864, compared with 1863 :—

Countries.	1863. £	1864. £	Increase. £	Decrease. £

THE COMMERCIAL STATE OF AUSTRIA.

(FROM A CORRESPONDENT AT VIENNA.)

VIENNA, January 6, 1865.

YES, another Bruck is required to teach Austrian statesmen that great truth, "enough for them to know," that the material interests of a people play a more prominent part in determining the place it shall hold among the nations of Europe than diplomatists of the old school could hitherto bring themselves to believe. Mr Von Bruck, formerly a merchant of Trieste, was a business man of the first order, capable of great conceptions and vigorous in their execution. With the prophetic eye of genius, he, as Minister of Commerce from 1849 to 1853, amidst the wailings of all the old women in and out of the Cabinet, replaced the prohibitive duties then existing by protective ones, moderate enough to admit of some degree of foreign competition, and which did not fail to expand the trade of the country. He fostered the construction of railways with cheap foreign iron, created financial institutions, and, as Minister of Finance in 1859, restored the value of the currency. The unfortunate campaign of Italy upset all his plans, and he ended his life in despair. Since then the Ministers of Finance and Commerce have been powerless, the military party have held the helm, and landed the Government crew on the threshold of bankruptcy. Is there, then, no hand strong enough to save the noble ship? It is impossible to overrate the influence that one man of genius at this moment might exercise on the fortunes of the Empire. Freiherr Von Hock, the President of the office of indirect taxes, is, undoubtedly, a very able man, an admirable writer on subjects of taxation, and has the reputation of entertaining liberal commercial opinions. When he returns from his present bootless mission to Berlin, we

Digitized by Google

shall see whether he has the stuff in him, without which he may be a very clever Customs House collector, but can never become the regenerator of the commerce of his country. The time for half measures is gone by. Nothing but a large comprehensive system of reforms can put Austria into the place she is destined to hold if wisely governed. In attempting to sketch in a few broad lines the nature of such a system, I should like to eschew all allusions to politics as not coming within my province, but as an absolute faith in the maintenance of peace is the keystone to the edifice of Austrian prosperity, let me whisper a few words on that sore subject.

Italy is the bugbear which keeps 50,000 men more than are otherwise required in armed idleness, and as long as Austria refuses to acknowledge the present *status quo*, and as long as Italy mutters "On to Venice," this state of things will continue. But cannot diplomatists help us out of this dilemma? Venetia must remain in Austrian hands, because, by means of the quadrilateral, she can and will hold it against all odds, and the sooner young Italy, guided by the counsels of England and France, suppresses her sighs for Adria, the better for herself. Austria, on the other hand, ought to acquiesce *in what is*, and may all the more readily do so as the recent vagaries of the Pope insensibly loosen the bonds of the concordat. On the consummation of these wishes depends the saving of five millions sterling p. a. Hungary is troublesome, but can be pacified by moderate and just concessions, and the State will then find a tower of strength in the constitutional spirit and loyalty of her sons. Prussia is offensive in her language, but will not venture to provoke a war in the fatherland. So much for politics. Independent of what might be done in that quarter for the finances of the Empire, measures must be devised to infuse a new spirit into the wealth-producing classes: such is the natural strength and fertility of the soil they till, that, in spite of clogging impediments, the progress of the nation during the last 16 years has been prodigious, but industry and trade are now tottering under accumulated burdens and are ailing in an atmosphere of abuses, poverty, and exclusiveness; they must be relieved from over-taxation, from the everlasting interference of officials, freedom of associations and meetings for business purposes must be granted, the stamp duties must be reduced, the law of hypothecation amended, the labouring classes raised in the scale of society by improved education and a reduction in the number of holidays; the usury laws must be repealed, the railway tariffs reformed, the currency placed on a satisfactory footing, the salt and tobacco monopolies must be remodelled, so as to yield more revenue with less pressure on the consumer, and so as to allow Hungary to work the gold mines she possesses in her cultivation of tobacco; the loans on the lottery principle must be redeemed and the finances of the State regulated so as to obviate the necessity of always competing in the money market with private enterprise, and thereby raising the rates of interest to a point that deters people from investing their money in industrial undertakings, and accustoms them to become mere money-lenders to the State; the means of cheap conveyance call for special attention, more railways must be laid down and the river navigation improved, and, last but not least, all these reforms must go hand in hand with a liberal reduction of the present high import duties, so as to give a fresh impulse to the foreign trade of the country and confer on the people at large the benefits which more freedom of commercial intercourse with foreign nations would inevitably produce. And here let me remark, that many of the leading manufacturers I have conversed with declare that they would be perfectly able to cope with foreign competition under a very moderate degree of protection, with a gradual approach to free trade, if the general prosperity were promoted by some such measures as here indicated.

I am aware that Austria at the present juncture would find it difficult to provide at home the money temporarily required to carry out such a plan of reform, but as she has ample securities to offer, and would, by relinquishing her present system of exorbitant protection and injurious taxation, at once inspire confidence among the capitalists of Western Europe, a large loan on proper conditions would be immediately at her command. Loans certainly are objectionable as a rule, but emergencies such as those that now beset the Empire are exceptional and abnormal, and must be grappled with in a manner that, under Providence, will render their recurrence impossible. Tinkering and patching would be worse than useless.

F. P.

Agriculture.

CHAMBERS OF AGRICULTURE.

FARMERS' INTERESTS, COMMERCIAL AND SOCIAL.

That farmers do not occupy the social position in this country to which the capital they employ in their business, and the intelligence and enterprise they, in many cases, bring to bear upon that business is undeniable. And it is no less true that in all which relates to their material interests they are subordinated to and overborne by the interests, real or imaginary, of their landlords. This is due to several and complex causes. Amongst others may be mentioned the fact that the business of occupying land has never yet emancipated itself from the feudal trammels by which it was originally bound. This operates in various ways against the farmers' interests. But the main causes of the depression of the farming interest, are a want of combination, or something like uniform action, amongst farmers in matters relating to their own special interests, and an ill-regulated competition for farms, which places them at a disadvantage in their individual contracts with their landlords. Hitherto farmers have not acted for themselves. In many of their movements they have given the weight of their numbers and influence to promote the views of the landed proprietors. They have been merged in the "landed interest," but their own special views and interests have never had the slightest influence on legislation. Take as a modern instance the recent Act of Parliament which has converted the rural police into gamekeepers. There is scarcely a farmer throughout England who does not exclaim against that measure as a social and economical wrong to himself. Yet the landed gentry regard it as the crown and completion of their game-protecting legislation.

Lately, however, the farmers—especially the Scotch farmers—have shown a disposition to act for themselves,—to take their own affairs, regarded in a collective sense, into their own hands. They have forced on an inquiry into the law of "hypothec," which is a Scotch aggravation of the English law of distress for rent; and they have established in Edinburgh a Chamber of Agriculture, where, though landowners and their interests are not excluded, the purpose is to promote the special interests of the occupiers of land. It is by such means and action that the other industries of this country have protected themselves from wrong and asserted their just rights, and it is a good sign in the interest of British agriculture that the farmers are taking a like independent course.

The first meeting of the "Chamber of Agriculture and Scottish Farmers' Club" was lately held in Edinburgh, under the appropriate presidency of Mr George Hope, of Fenton-Barns. In one year from the first proposal of a Chamber of Agriculture, more than 300 members had joined, forming a singular instance of an agricultural institution in Scotland meeting with "such immediate and hearty support." Though membership is not confined to farmers, the wise rule has been adopted "that the majority of the acting committee shall be composed of tenant-farmers." Mr Hope remarked that "Chambers of Commerce are numerous throughout Scotland, and every trade and profession is associated for the promotion of its separate interests, and it is only right and fair that farmers should have their Chamber of Agriculture." And he expressed his satisfaction that "the association contains a considerable sprinkling of large and influential landowners;" and he predicted they would "prove most valuable members, if they will only attend our ordinary meetings, and state their views frankly on all topics where it may be supposed the interests of the landlords and the tenants do not run in the same groove." This is entirely just, for it will be found that though the objects of landlords and tenants are at present different, their real and substantial interests are identical. Nothing will be so beneficial to landowners as full and frequent discussion with tenant-farmers of the actual points of difference between the two classes. It might be said, as Mr Hope observed, that they already had the "Highland and Agricultural Society, and kindred societies in England, but those societies are constituted mainly or wholly for improving the breeds of animals, bringing into notice new or improved varieties of grain, new or improved implements of husbandry, testing by experiments the value of different manures when applied to the soil in the production of various crops, or of feeding stuffs in the fattening sheep and cattle." In furtherance of such objects the Highland Society had done much. But something more is now felt to be wanting by the practical farmers of Scotland. There are many subjects which touch the interests of practical agriculture which the societies alluded to do not, and from their constitution cannot, take up. These objects were stated to be "to watch over the interests of practical agriculture, to promote the advancement of agriculture by the discussion of subjects connected with it, to consider questions which may be introduced into Parliament connected with agriculture, to afford frequent opportunities for social intercourse to farmers and others interested in agriculture from different parts of the country." Here there is ample latitude for the consideration of agricultural questions, and, said Mr Hope, "it is distinctly understood that whatever touches or trenches on the interests of practical agriculture is to be fully and freely discussed, and that no subject, if it can legitimately be

Digitized by Google

alleged to do so, is to be *tabooed*. I trust every subject will be discussed dispassionately and with decorum, and with the sole object of eliciting the truth, and whatever may be the opinions or prejudices of others, the honest convictions of speakers will at all times be fearlessly maintained." This indicates a right spirit. It is not that exciting topics will be constantly discussed, practical questions of farm management being likely to form the ordinary topics. But "to show the freedom of range," aspired to, Mr Hope pointed out several subjects "on which there may be a difference of opinion, at least in regard to which the interests of landlords and tenants at first sight may appear to diverge."

First. The law of hypothec, at present exciting universal attention in Scotland, and as to which a Royal commission is taking evidence. And "there are even more ticklish questions than this hypothec law which may come before us. For instance, the game laws and the preservation of game, by which many tenants suffer so injuriously." And on this point Mr Hope said, "I am glad to hear that of late it is difficult to find tenants for farms near preserves, except at very small rents. Again, there are the terms of leases, the rotations of crops frequently prescribed therein, and the conditions generally on which farms are let or taken on lease.....I hope that discussions here may bring out clearly and satisfactorily what is the right and reasonable thing for landlords to ask, so that they will find it to be their interest to bargain only for such terms as clear-headed business men are willing to agree to. I have of late seen some leases so outrageous, that I can only wonder that they were ever offered for signature to sane men. The truth is, a tenant so very *rarely submits a lease to his own lawyer*, that I believe a charge for revising a lease for a tenant of agricultural subjects has no place in a lawyer's table of fees. So much evil has arisen from this, which has lately come under my notice, that I wish to call special attention to it. It is all very well as long as a tenant pays his rent and remains on the farm; but let him leave, or if the landlord or broker take offence at him, on many estates he is wholly in their power, from the impossibility of farming without breaking either one clause or another,—a condition to which no independent man should allow himself to be reduced, or which no right-thinking landlord should desire."

These views were well supported by Mr M'Lagan, a landed proprietor, who said:—"Though I hold that, generally speaking, the interests of landlord and tenant are identical, and that what is good for one is good for the other, still there is a point at which there is sometimes a divergence of these interests,—when, in fact, they become antagonistic, and it will be an advantage to agriculture to have these questions deliberated on and discussed."

The Scotch farmers have thus set an example which ought to be followed by all the farmers of the kingdom.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 23rd inst. The return for the previous week is added:—

	1,263,387,025 50	.....	1,272,417,135 41

The return again shows a decline in the amount of discounts:—It is, compared with last week, of 19,245,000f. The coin and bullion are now very nearly one-half of the notes in circulation—371,630,000f to 785,025,000f; the former being 17,055,000f more and the latter 16,576,000f less than last week. In the deposits there is an augmentation of 18,230,000f.

From Thursday last to Tuesday, the Bourse was not very active, but on the latter day it was in a state of great agitation, in consequence of strange statements respecting the Credit Mobilier being made, and of alarming political reports, chiefly relative to Spain, being spread. The probable dividend of the Credit Mobilier for last year was much discussed; and the assertion was confidently made, though without authority, that it would be one of the smallest ever declared. On that day the Credit Mobilier closed at 28f 75c below the preceding day, and all other quotations were more or less affected. Yesterday the Bourse was again agitated, and the Mobilier made a new fall of 27f 50c; but in several other quotations there was a slight rally. To-day, an improved tone has prevailed, and the Credit Mobilier has regained 10f; most other securities are likewise better. In definitive, quotations stand thus:—

His Excellency M. Fould, although the Corps Legislatif has only been assembled a few days, has already presented to it his Budget for 1866. The following are the principle features in it:—

EXPENSES.	francs.
For the public debt, sinking fund, civil list, &c.	644,196,292
For the Ministerial departments	811,414,119
For collection of taxes and revenues, reimbursements, &c.	245,144,604
Total	1,700,755,015
RECEIPTS.	francs.
Direct taxes	317,180,000
Revenue from domains	11,258,616
Revenue from forests	42,021,500
Indirect taxes and revenues	1,206,476,000
Revenue from University	2,960,000
Revenue and receipts from Algeria	19,451,300
Stoppages, &c. from civil pensions,	14,717,400
Various receipts	50,290,456
From the sinking fund	38,011,565
Total	1,702,366,837

If, however, the items relative to the sinking fund, the operations of which are suspended, be deducted,

	francs.
The receipts will be	1,664,355,272
The expenses (in which the said fund figures for 127,681,576f)	1,573,073,439
And there will be a surplus of	91,281,833

In English money: receipts, 66,574,211*l*; expenses, 62,922,937*l*; surplus, 3,651,274*l*.

The above figures apply exclusively to what is called the Ordinary Budget, that is, the expenses which are compulsory, and the resources for providing for the same. But there is in addition,

	francs.
The Extraordinary Budget, of which the receipts are	144,878,910
And the expenses	144,318,800
Leaving to be disposed of	540,100

In the receipts of the Extraordinary Budget figure 89,670,011f taken from the surplus of the Ordinary Budget, so that in definitive the balance of this last will only be 1,611,822f (not quite 65,500*l*).

There is also what is called "The Budget based on special resources;" that is, expenses of departments and communes paid

Digitized by Google

by the Government, but for which certain portions of the taxes levied therein are set apart:—

	francs.
The receipts are	236,235,318
And the expenses the same sum	236,235,318

Lastly, there are what is called "The services connected for the sake of order with the Budget"—*id est*, receipts and expenses which for regularity in account are included in the Budget, but do not make part of it:—

	francs.
The receipts are	105,530,524
And the expenses	105,530,524

The division of the Budget into so many parts will no doubt, as on previous occasions, produce criticism. But M. Fould's reason for adopting it is evident, and seems to be a wise one:—it prevents the expenditure and receipts of the State from appearing exorbitantly high, and more than in reality they are.

A "Report on the Situation of the Empire" has, in accordance with established custom, been presented to the Legislature. It states that the industrial and commercial situation of the country in 1864, notwithstanding the dearness of money, was, on the whole, satisfactory. It says that, in spite of the perturbation in the cotton trade, new factories for spinning and weaving were built, and that the improvement in machinery became general. The other textile manufactories, with the exception of those of silk, were active. The iron trade was in a situation not less favourable than in 1863, and was not affected by the new reduction in the import duties which took place on the 1st Oct. As to the treaty of commerce with England, the imports into France from England for consumption in 1864 were (grain and cotton excluded) only of the value of 297,122,000f, which was 41,000,000f less than in 1863; whilst the export of French productions to England was, grain also excluded, 740,912,000f,—an increase of 81,232,000f. These figures, remarks the report, prove that the treaty, which at first encountered great hostility, "far from being injurious to the industry of the country, has powerfully contributed to its development."

The Superior Council of Commerce assembled on Friday last to commence the inquiry into banks, currency, the causes of commercial crises, &c, with which the Government has intrusted it. But the dealers in tissues of Paris, who took the lead in petitioning for the inquiry, had not got up the case which they undertook to present against the Bank of France for charging high rates of discount, and a month's delay was on their request accorded to them to prepare it. On that the Council would have had to adjourn, if Mr Bagehot, Editor of the ECONOMIST, who had been invited to give evidence, had not been present. He spoke on Question 1, relative to the cause of the monetary crisis of 1863-4; on Question 25, respecting which he explained the system of provincial banks of issue in England and the services they have rendered; and on Question 36, in which he showed that the raising of the rate of discount is the best, and indeed the only efficacious way of reconstituting the metallic reserve of a bank. A number of questions on these matters were afterwards put to Mr Bagehot by different members of the Council. The postponement of the inquiry for a month has given rise to the belief among a certain portion of the public that it will be allowed to drop; but the Government would cover itself with ridicule if it were to abandon altogether the investigation after proclaiming it with a certain degree of solemnity throughout France and Europe, and after soliciting eminent men of different nations to attend it. Abandonment, moreover, would do a real injury to France, for there are no questions on which so much ignorance prevails in this country as those which concern the currency, the regulation of the rate of interest, and the causes of commercial crises; none in which ignorance is so mischievous in a political as well as in a commercial point of view; and none on which instruction could be so rapidly imparted to the people by a public inquiry.

Judgment has been given by the Imperial Court in the case of M. Emile Pereire and certain shareholders of the Ports of Marseilles Company mentioned last week. It is to the effect that the meeting of shareholders by which the amalgamation of the Ports of Marseilles with the Immobiliere Company of Paris and M. Pereire's Rue Imperiale of Marseilles was pronounced was irregular, inasmuch as persons not being really shareholders were not only present, but were admitted to vote; and that consequently the plaintiffs must be reimbursed the value of the shares they held. But, nevertheless, the fusion, though irregularly declared, is not to be disturbed, because the shares of the amalgamated companies have since, for the most part, passed into the hands of third parties whose interests would be injured by a dissolution, and because it is not possible now to estimate the precise share of each company in the collective capital. On the whole this judgment, in a material point of view, is favourable to M. Pereire, since it leaves standing the amalgamation which he brought about, and in which it is alleged he had great personal interest; but it has been interpreted with much malignity against him, for the reason that it characterises the acts complained of as *pratiques*,—a word which in France has sometimes a very ill sound when falling from the lips of a judge on the bench—and that it says that the *pratiques* having been done by his subordinates, he must be considered responsible for them. It appears, however, to impartial persons that in this harsh interpretation M. Pereire is made to pay the penalty to which eminence is often subjected by envy and mediocrity. Certain it is that if he had been of no note, the case would have created little attention, because there is nothing extraordinary in these parts in an irregular constitution of a meeting of shareholders—at least such is the general belief. And it is fair to bear in mind that though he is declared responsible for the acts of his *employes*, the judgment does not say that he personally had any part in them or was even privy to them.

The report on the operations of the Bank of France in 1864, the principal figures in which were given last week, answers two of the complaints which in the course of last year were clamorously urged against that establishment; the first respecting its augmentations of the rate of discount, the second its refusal of discount accommodation. On the first point, the report affirms that, in the variations of the rate, the Bank only "submitted to the law of the financial and monetary market; but that, nevertheless, it had the good fortune to remain generally below the rate of the principal markets of Europe, and, in particular, to maintain a sensible difference with that of the Bank of England." On the second point, the report declares that, in Paris, out of 2,334,830 bills, amounting to 2 881,402,642f, presented, the Bank rejected only 34,595 of 43,042,000f, and that they consisted of bills irregularly drawn, but which, after being regularised, could be again presented, of bills bearing signatures of doubtful solvency, and of three which, though bearing good names, had the appearance of being mere accommodation paper. In the month of December, when the Bank was represented to be displaying excessive rigour, it only refused 3,014,952f out of a total of 273,103,853f demanded, and in the last three days of the month the refusals were not more than 480,459f out 103,994,510f demanded. In the branches, in the same month of December, the total discounts were 362,837,466f. With respect to the branches, which are 53 in number, the report shows that their total operations were, in 1864, 4,427,928,100f, which were more by 233,114,900f than those of 1863. All the branches were profitable, with the exception of that of Flers, which has been recently established. The branches which did the largest business were those of Marseilles, Lille, Havre, Lyons, and Bordeaux. The gross profits of the Bank and branches in 1864 were, including the revenue from Government stock, 51,977,574f, and in it discounts figured for 37,947,346f; in 1863, the profits were 40,449,635f, and in these the discounts were 25,095,641f. The report refers in these terms to the affairs of the Bank of Savoy:—"As to the Bank of Savoy, a convention was signed on the 19th November last, by which it renounces its privilege of issuing notes in return for a sum of 4,000,000f, and the establishment of two branches, one at Annecy, the other at Chambery. The convention will, however, only come into execution when the Bank of Savoy shall have obtained the anulling of its agreement with Messrs Pereire. The Civil Tribunal of Paris declared void that agreement by a judgment of the 14th Dec. last, but the latter may still be appealed against. Lastly, the Government, from the gravest considerations, has placed the Bank of Savoy under sequestration." On the subject of inquiry into banks, &c., instituted by the Government, the directors of the Bank thus speak:—"An inquiry hostile to the Bank of France was very lately demanded. We also thought right to demand an inquiry, but one more general, more equitable, and more useful: we considered it as the means of instruction for all,—as a serious and complete investigation into the facts which explain the greater frequency of commercial and monetary crises." The Directors then add this sentence, which proves that, whatever be the issue of the investigation, they are convinced that their monopoly will not be disturbed:—"We are ready to appear in the Enquiry in order to expose sincerely to the country our principles and our acts, for there can be no question of attacking or defending the public and inviolable contract, which has established the rights, the duties, and the privileges of the Bank of France."

In connection with this bank question, it may be mentioned that M. Isaac Pereire has brought out a new edition of his pamphlet, and has added to it some new matter and numerous documents. He has also comprised in it his letter to the ECONOMIST.

Mention was made on the 4th instant of the total estimated value of the imports for consumption, and of the exports of French production, of the last and the three preceding years. The following is a detail of the value of the principal imports for 1864, 1863, and 1862:—

	1864. francs.	1863. francs.	1862. francs.
Horses	10543000	10293000	9084000

* This article is here counted as a French production because import duty was paid on it.

The following is the market report:—

FLOUR.—At *Paris*, business is not very active, but prices are fair, and some holders have obtained an advance. Yesterday, choice was 46f to 46f 50c the sack of 157 kilogs; first quality, 44f to 45f; good, 43f; and other sorts, 42f. Six marks disposable were demanded at 46f 50c; March to April, 47f; four months of May, 42f 25c and 49f 50c; three months of June, 50f 25c. Type Paris, current month, the 101 kilogs, 28f 25c; March and April, 28f 78c.

WHEAT.—In most of the provincial markets business is active, and prices have risen. At *Paris*, yesterday, firmness prevailed; choice white, 26f the sack of 120 kilogs; red, 25f to 25f 50c; first qualities, 24f 50c to 25f; ordinary, 24f; other sorts, 23f to 23f 50c.

COTTON.—The market at *Havre*, in the week ending Friday, was much agitated by the contradictory news from America. The sales were 3,097 bales and piculs, and the arrivals 1,226. The stock was estimated at 60,875 bales; at the corresponding date of last year it was 84,750. The closing quotations were 20f lower for United States, Egypt, and Peru, 20f to 25f lower for Brazil and French West India, 5f to 10f Surat, 10f Tinnevelly, 5f to 15f Madras and Bengal, 10f China. Low New Orleans was consequently 285f the 50 kilogs; good ordinary qualities in Broach, 200f; in Tinnevelly, 185f, in Madras, 175f; in China, 145f. The business done this week has not been considerable, and yesterday Ingelghaut was 195f; Madras, 200f and 190f, and for delivery in February 165f; in April, 152f 50c; Bengal, 95f; Kurrachee, 110f and 85f; China, 150f and 145f.

COFFEE.—The demand was calmer at *Havre*, in the week ending Friday. 500 casks Port-au-Prince for delivery, 83f the 50 kilogs in bond; 300 Jacmel, 82f; 200 Gonaives for delivery, 89f; 350 Rio, not washed, disposable, 75f 50c; 525 Bahia, washed, 87f; 729 Malabar, 86f 50c; and some Guadaloupe habitant, 147f 50c duty paid. There were three auctions of different sorts of damaged. The arrivals were 1,100 sacks, and some casks. This week, Hayti, 83f and 83f 50c; Malabar, 90f; Mysore, 90f; Rio, 84f 25c; Rio Nunez, 87f. At *Bordeaux*, last week, the situation of the article was good, although the sales were not large: 315 sacks La Guayra, grage, 109f; 200 ditto, 108f 50c; 90 at 103f; 150 Mysore disposable, 119f 50c; 140 Rio, 80f; a small lot of Caracoly San Jago, 118f. By auction, 282 sacks La Guayra, 103f 50c to 104f 50c—also some damaged. This week, Martinique for delivery, 83f. At *Nantes*, last week, there were no sales, and there have been none this week. At *Marseilles*, last week, prices were firmer: 1,350 sacks Rio at 80f. This week, the only sale has been of some damaged Hayti by auction.

SUGAR.—At *Havre*, in the week ending Friday, 4,188 casks, part from bonding warehouses, were taken for Marseilles refiners at 28f 50c, No. 12 in bond, which was equal to 29f 25c for direct imports—a decline of 1f 25c; 1,080 casks ditto went at 30f 50c and 30f for No. 12 in bond; 50 at 31f 50c; and 100 casks French West India, disposable, 49f, bonne quatrieme, duty paid. Some damaged Havana was also sold by auction. The arrivals were 545 casks Havana. This week, Reunion bonne quatrieme, 51f. At *Nantes*, last week, business was active: 1,900 sacks Reunion, new, 52f 75c, bonne quatrieme; 7,637 old, 51f 75c ditto; afterwards holders having made a little concession, as many as 15,915 sacks were taken at 52f 12½c, bonne quatrieme. Nothing done in other sorts. This week, Reunion, 52f. At *Bordeaux*, 287 casks French West India went at 48f, bonne quatrieme, and afterwards 100 were taken at a reduction of 50c; some nsine went at 58f. In Reunion, 600 sacks at 51f 50c, bonne quatrieme, and 700 at prices kept secret. No sales this week. At *Marseilles*, 240 casks and 400 sacks Bahia, by English ship, at 30f, No. 10; 1,500 bales Reunion, for delivery, 52f 50c, bonne quatrieme of Nantes, duty paid: 3,000 Pernambuco, for delivery, 20f, No. 10; 700 to 800 bales Mauritius for delivery by English ship, at prices kept secret; 100 casks French West India, bonne quatrieme of Havre, 33f. This week, Havana by Spanish ship, 31f 75c, No. 12.

INDIGO.—The demand at *Havre* for Indian was calm in the week ending Friday;—only 7 chests Bengal at 50c above the estimates: 175 serons Guatemala also went at 10c to 50c ditto. The arrivals were 27 serons and 50 chests. This week, Bengal, Madras, Manilla, and Guatemala, at prices not stated, Bengal at a premium of 65c. At *Bordeaux*, last week, only 8 to 10 chests Bengal were sold: prices were the same for all sorts. This week, some Kurpah, at prices not given.

HIDES.—At *Havre*, in the week ending Friday, the sales were 1,860 La Plata, of which 1,200 cow at 77f 50c to 94f the 50 kilogs, the rest ox at 100f to 110f; 658 Buenos Ayres salted mataderos ox 48f. cow 42f; 4,343 Uruquay salted, damaged, 44f 50c cow, 52f 50c ox; 1,128 Rio Grande dry, 87f 50c; 2,200 ditto salted ox, 55f to 56f; 1,672 ditto cow, 46f; 250 Rio Janeiro salted cow, 44f; 1,300 Maraguan drysalted, 62f; 500 Para salted, 45f; 1,643 Nicaragua dry, 67f 50c; 694 Valparaiso drysalted ox, 78f to 79f 50c; 335 ox and cow 71f 50c; 837 ditto, damaged, 70f; 600 horse, dry Buenos Ayres, 5f 50c to 6f 50c each; 468 horse, Monte Video, 41f 25c the 50 kilogs. Some sales of damaged hides, by auction, took place. The arrivals were unimportant. This week, Rio Grande salted, 46f 25c; dry, 65f; Monte Video dry cow, 93f; ditto salted mataderos, 42f; ditto ox, 47f; ox, dry, 110f; calf salted, 80f; dry calf heavy, 80f; Buenos Ayres salted horse, 42f; Calcutta calf, 65f. There has been an auction chiefly of damaged.

WOOL.—The sales at *Havre*, in the week ending Friday, were 22 bales Monte Video, washed, at 2f 80c the kilog; 280 bales sheepskin ditto, unwashed, 1f 42½c; 10 bales sheepskin. Buenos Ayres, unwashed, 1f 40c to 1f 90c. The arrivals were only 5 bales. At auction, this week, Buenos Ayres unwashed new merinos, 197f 50c to 260f the 100 kilogs; prima, 177f 50c to 245f; secunda, 170f to 220f; tertia, 197f 50c to 220f; quarta, 177f 50c to 217f; lamb, 172f to 235f; Buenos Ayres, old merinos, 167f 50c to 202f 50c; prima, 167f 50c to 195f; tertia, 147f 50c; quatre, 135f; various, 185f; lamb, 147f 50c to 187f 50c; Buenos Ayres, washed a dos, 315f to 335f; a chaud, 325f to 515f; Monte Video, unwashed merinos, 220f to 232f; prima, 192f 50c to 227f 50c; secunda, 212f 50c to 220f; tertia, 190f; quarta, 172f 50c to 175f; lamb, 180f to 237f; mixed, 117f to 157f; Monte Video, washed, 242f 50c to 315f; Rio Grande, unwashed, 127f 50c to 202f 50c; washed, 250f; Russia, unwashed, 230f; washed, 470f to 590f. Some small quantities of different sorts were sold. Apart from the auction, Monte Video unwashed went at 208f; Buenos Ayres, unwashed, 207f 50c.

TALLOW.—At *Havre*, in the week ending Friday, 500 casks La Plata disposable, or in the port, 48f the 50 kilogs for inferior quality, and 49f 50c to 50f for the rest; 300 ditto, for delivery, 50f and 200f; also for delivery, 49f 75c; 10 casks New York, 49f. No arrivals. This week, Buenos Ayres, for delivery, 50f 50c, 50f, and 49f 50c. At *Paris*, yesterday, the 100 kilogs were 106f 20c, octroi duty included.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 53f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 73f; 3-6 beetroot, first quality, 90 deg., 61f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Shipping Gazette* reports the state of the freight market as follows:—The tonnage loading on the berth for India, China, and the Cape of Good Hope is 34,400 tons, and for Australia and New Zealand 45,500 tons. High-classed ready ships are scarce, and improved rates are offering for India and China. The Australian and New Zealand trade continues dull. Coal freights to India are steady, but there is

Digitized by Google

little or no inquiry for China. The advices from the East are very discouraging as to homeward frieghts, and there is little disposition to charter on this side.

In reference to the state of the money market at Bombay, Messrs Clason, writing on the 28th ult., state:—The demand for money has become more active, and our supplies are barely sufficient to cover the wants of the moment. Share speculators, embarrassed by the downward tendency of stocks, are soliciting advances on all sides, of which several are said to have been made on shares of new companies at a per centage approaching cent. per cent. per annum. For the purposes of *bonâ fide* trading, money is still obtainable on comparatively easy terms, but the fear that elevated rates of discount are in store for us restricts the amount of credit which would otherwise be granted. On the 26th, the Bank of Bombay raised its rates one per cent. all round, bringing them to 13 per cent. and 11 per cent. for loans and discounts respectively. Shares are excessively dull and drooping, and the market being flooded with stocks of all descriptions it is difficult to say where the decline will stop.

Annexed are the returns of the Bank of Bengal for the weeks ending Jan. 10 and Jan. 17, 1865:—

Liabilities.	Jan. 10.	Jan. 17.
Proprietors' capital, paid up	£2,200,000	£2,200,000
Reserve fund	176,354	176,713
General treasury balance at head office	429,846	504,511

Cash and currency notes at head office and branches	2,302,547	2,298,791
	6,034,614	6,014,329

The report of the Commissioner of Internal Revenue of the United States shows that the receipts from all sources (after deducting sums refunded) for the year ending June 30, 1864, amounted to 116,850,672 dols. The amount of tax collected on incomes (other than those of officers of the Government) was 14,919,279 dols; from manufactures and productions, 75,403,386 dols; from licences for business, exhibitions, &c., 7,178,205 dols; tobacco paid 7,086,684 dols; cigars, 1,255,424 dols; distilled spirits, 28,431,797 dols; fermented liquors, 2,223,719 dols; rock and coal oil, 2,255,328 dols; leather manufactures, 3,697,433 dols; manufactures of wool, 3,007,885 dols; of cotton, 1,835,027 dols; raw cotton, 1,268,412 dols; cotton cloths and all textile fabrics before they are prepared, 1,713,148 dols. It is said that, owing to an improved detective system for the prevention of fraud, the internal revenue is likely, in the year ending June, 1865, to be more than twice the amount obtained in the year ending June, 1864.

An account of the importations and exportations of bullion and specie egisteredin the week ended February 22, 1865:—

The total shipments of gold from Australia, from Nov. 26 to Dec. 20 last year, reached 135,008 ounces, which, added to previous shipments, made the total shipments since Jan. 1, 1,830,529 of which quantity 213,340 were the produce of New Zealand. The shipments made during the corresponding period of 1863 were 1,517,757 oz of Victorian gold, and 331,819 oz of New Zealand gold, giving a total of 1,848,576 oz.

The following are the last monthly returns of the Irish banks of issue for the four weeks ending the 4th February:—

	Circulation authorised by certificate.	Average Circulation during the month. 5*l* and upwards.	Under 5*l*.	Total.
	£	£	£	£
The Bank of Ireland	3,738,428	1,408,475	1,076,050	2,484,525

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,101,978	Securities	29,910,491
Public Deposits	6,665,364	Coin and Bullion	14,600,233
Private Deposits	14,140 885		
	40,908,227		44,510,724

Dated the 23rd February 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,602,497*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£297,785
An INCREASE of Public Deposits of	92,852
An INCREASE of Other Deposits of	171,226
No change in Government Securities.	
A DECREASE of Other Securities of	96 768
An INCREASE of Bullion of	46,362
A DECREASE of Rest of	16,639
An INCREASE of Reserve of	321,947

The above account shows a further satisfactory increase in the reserve. The augmentation in the bullion is consequently small, owing to a withdrawal of 97,000*l* in gold for Spain. The decrease in the other securities is less than might have been anticipated, considering the easier state of the money market.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 19 945,720	£ 20,736,715	£ 19,715,828	£ 20 207,871	£ 20,101,978
Public deposits	4,355,455	5 762,849	7.901.658	8,153,601	6.665,364
Other deposits	10,449,182	14,939 742	13,367,153	12 426 673	14,140,885

Bank rate of discount	5 p. c.	2½ p. c.	4 p. c.	6 p. c.	5 p. c.
Price of Consols	91⅛	90½	92½	91½	89½
Average price of wheat	69s 1d	59s 6d	46s 6d	41s 1d	38s 4d
Exchange on Paris(shrt)	25 10 15	25 12½ 20	25 17½ 22½	25 25 35	25 12½ 20
— Amsterdam ditto	11 15¾ 16¼	11 16 16⅛	11 15½ 16	11 17½ 18	11 16 16¼
— Hamburg(3months)	13 6 6¼	13 7⅞ 8¼	13 7¼ 7½	13 8 8⅛	13 7⅞ 8¼

In the corresponding week of 1855, the secession of Mr Gladstone, Mr S. Herbert, and Sir James Graham had gravely inconvenienced the Government. The death of Mr Hume, M.P., had been announced.

In 1862, a new Italian loan for 1,336,000*l* had been issued in London at 74. for the completion of the Maremmana Railway. The stock markets were quiet. Notice to renew the March Exchequer bills at 3 per cent. per annum had been issued. An advance in the Turkish bonds of the Mirés' loan had occurred, on the supposition that measures for its absorption would be adopted in the arrangements of the Ottoman Government.

In 1863, the emission of a new Italian loan of 28,000,000*l* was looked for. The disposition shown by Prussia to assist the Russian troops near the Polish frontier was unfavourably commented on. Messrs Heyward, Kennard, and Co. had announced the junction of their business to that of the Consolidated Bank. The Bank rate of discount had been reduced from 5 to 4 per cent.

In 1864, an American fleet had been sent to the German Ocean. The razing of the Dannewerke had commenced. An engagement had taken place at Düppel, in which the Prussians had taken the village of Dubboel. The allies had entered Jutland, and the Prussians were fortifying the Bay of Kiel. Prussian troops were being concentrated on the Polish frontier. The Russians had been defeated at Kurzewo, in the government of Radom. The Judge of the Admiralty Court at Halifax had decided on restoring the Chesapeake to her owner, subject to the payment of such expenses as the Attorney-General might exact. In America, Admiral Porter was fitting out a considerable fleet on the Mississippi. The Conscription Bill had passed Congress. The Greek National Assembly had empowered the Minister of Finance to issue credit bonds for 3,000,000*l* drachmas. The Bank of England had reduced the rate of discount from 8 to 7 per cent. A slight advance had taken place in the English funds, in consequence of the proposal of England for a Conference having been accepted by Austria and Prussia. The supply of money in the discount market was abundant.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 4,073,250*l*; in 1862, a deficiency of 2,777,679*l*; in 1863, a deficiency of 5,201,847*l*; and in 1864, a deficiency of 6,806,570*l*. In 1865, the deficiency is 4,649,395*l*.

DISCOUNT AND MONEY MARKET.—The money market this week has again been easy, and some expectation prevailed of a reduction yesterday in the Bank rate. Owing, probably, to a large withdrawal of gold for Spain, and the possibility that further sums will be taken, the court determined upon making no change. In the general market the best short paper is readily discounted at 4¾ to 4⅞ per cent., and for long-dated bills the terms are decidedly lower. At the Bank the applications have been very moderate. The following are the current rates of discount for paper with various periods to run :—

30 to 60 days	4¾ per cent.
3 months	4⅞ per cent.
4 months	5 per cent.
6 months—Bank bills	5¼ per cent.
6 months—Trade ditto	5½ 6 per cent.

On the Stock Exchange the supply of money continues large, and loans on Government securities from day to day are offered at 3½ per cent. About 1,500,000*l* is now being temporarily employed here and in the discount market by the different railway companies; but the greater part of this sum will be required next week for the dividends.

The following are the rates of interest allowed on deposits :—

Joint Stock Banks	*¼ per cent.
Discount houses at call	4 per cent.
Do. with seven days' notice	4½ per cent.
Do. fourteen days	4½ per cent.

* At the London and Westminster 3 per cent. only on sums below 500*l*.

There were no bullion operations at the Bank either yesterday or to-day.

The prospectus has been issued of a new Peruvian 5 per cent. loan for a nominal capital of 10,000,000*l* at the price of 83½ per cent., or, allowing for accrued dividend, 81. Of this sum one million is reserved for the conversion and extinction of the internal debt, and provision is also made for the absorption of the existing foreign bonds. A sinking fund of 4 per cent. is to be applied to the redemption of the new stock by purchases in the market at or below par, and if above par, by regular drawings. The security hypothecated is the guano on the Chincha Islands and elsewhere. The terms of subscription are rather intricate, and appear to have been antagonistic to the success of the loan, the dealers in the Stock Exchange making no quotation.

The Mauritius Government Six per Cent. loan of 300,000*l*, for which the Crown agents for the colonies invited tenders yesterday, was not all taken up. The total amount applied for was 330,100*l*. The minimum was fixed at 103, at and above which price debentures to the extent of 118,800*l*, and registered stock to the extent of 31,600*l* were disposed of at an average price of 4*l* 15s 4d premium. It is understood that the Crown agents will be prepared to receive tenders for the unallotted portion, at prices not less than 103, until 1 p.m. on Tuesday next.

The Stock Exchange Committee have appointed Thursday, March 2, for a special settlement in the certificates of debenture of the Atlantic and Great Western Railway. The committee have also resolved "that the statements in the prospectus being in their opinion both ambiguous and unsatisfactory, a quotation be refused."

The Committee of the Stock Exchange have appointed Thursday, the 2nd of March, a special settling day in the shares of the City of Milan Improvements Company (Limited) for transactions entered into on and after the 26th January. These shares are to be marked as with 5*l* paid, and as fully paid up; also in the shares of Cramer and Company (Limited). In this case no quotation was asked for. The committee have further ordered the shares of the Washoe United Consolidated Gold and Silver Mining Company (Limited) to be quoted in the daily lists, and the shares of the Merchant Shipping Company (Limited), in the twice-a-week lists.

The amount of Government bills on India, for which tenders will be received at the Bank of England on Wednesday next, will be 300,000*l*.

The position of the Bank of France continues steadily to

St Petersburg	6	...
—	...	...

ENGLISH FUNDS.—Consols remain with a heavy tendency, and the recovery from last week's depression has hardly been maintained. To-day, especially, the market has been flat, chiefly from an absence of business.

Compared with last Friday, there has not been any material decline, the final prices being 89⅛ to 89¼ for money, and 89¼ for the account. The growing disposition of the public to embark their money in securities yielding a higher rate of interest than the Government funds, and the constant supply of fresh sources of investment in the shape of new companies and foreign loans, tend to depress the market for Consols. Reduced and New Three per Cents. were quoted 88¾ to 89, and India Five per Cents. 103¾ to 104, being rather better. The Government broker continues to purchase stock for the sinking fund, the amount taken to-day being 15,000*l.*

Exchequer bills have slightly relapsed from the late advance, leaving off at 3s to 7s premium. India bonds closed at 10s to 15s premium, showing no change.

FOREIGN STOCKS.—The transactions, this week, in the foreign market have been unimportant, and the principle fluctuations have been confined to Spanish descriptions, which advanced considerably on purchases by persons supposed to possess peculiar sources of information. A relapse, however, then ensued, but there has since been renewed buoyancy. Peruvian bonds have improved on the issue of the new loan, which offers favourable terms for the transfer of these securities into the consolidated stock. Turkish Six per Cents. are firmer, but the Consolidés closed the same as last Friday, at 51⅞ to 52⅛. The Confederate loan has receded to 55 to 57 on the additional news by the Peruvian. Mexican, New Granada, Venezuelan, and Italian descriptions are also lower.

The Danubian loan is nominally quoted 1 dis. to par ; Italian Scrip, 1¾ to 1¼ dis. ; Egyptian, ½ to 1 prem. ; and Montevidean 3¼ prem.

The closing price of French Three per Cents. on the Paris Bourse, this evening, was 67f 50c, being the same as last week, and a fraction better than yesterday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—In the railway department the chief variation is a decline of no less than 5½ per cent. in Great Western, owing to the disappointment occasioned by the proposed dividend at the rate of 3½ per cent. per annum instead of 4 per cent., the amount expected. Late this afternoon there was a slight tendency to recovery, the price improving from 73½ to 74 ; at the official close to 73¾ to 74¼ at four o'clock. South-Eastern stock has also fallen, but much less considerably, the dividend in this case being also below expectation. The market generally has been dull, especially as regards London and South-Western, and Metropolitan, Caledonian, and Midland have been exceptionally firm.

Most of the Indian guaranteed and Canadian descriptions have slightly receded. In the foreign market, Sambre and Meuse, and South Austrian, and Lombarbo-Venetian shares, were quoted a fraction lower.

The announcement of a proposed amalgamation between the Alliance and Consolidated Banks has caused a rise in the shares of the former company to 12 to ½ prem. At one period the price was even higher. Consolidated Banks have been steady at 6⅜ to 7¼ prem.

Metropolitan District Railways left off at 3⅝ to 3⅞ prem. ; City of Milan Improvements, 3¾ to 4 prem. ; and Varna Railway, ½ to 1½ prem.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day :—

FOREIGN EXCHANGE.—The rates this week have again shown firmness, with, in some cases, a slight advance.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—During the week the demand for gold has been very active, and 97,000*l* has been withdrawn from the Bank and sent away to the Continent, together with the undermentioned arrivals :—66,000*l* from Melbourne, per Moravian ; 17,000*l* from New York, per Glasgow ; 4,500*l* from New York, per Borussia ; 27,000*l* from New York, per Cuba.

Silver.—The Atrato has taken 5,000*l* to the West Indies, and the Delta 10,000*l* to Madras. Our market has been very quiet, and prices remain without alteration—61⅜d and 61½d per oz standard ; the former for silver shipped via Southampton, the latter for shipment at Marseilles.

Mexican Dollars.—The French steamer Tampico has arrived with 80,000*l*, and those on English account are now in London ; our market for this coin is, however, so quiet that prices will have to be lower in order to effect sales. The Delta took about 8,000*l* to China and the Straits.

Digitized by Google

Exchange on India for drafts by the banks at 60 days' sight remains 1s 11¾d for Bombay, Calcutta, and Madras.

India Government loan notes are unchanged in price, and may be quoted 109 to 110 for 5½ per Cents.; 101 to 102 for 5 per Cents.; 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std; ditto refinable, 78s per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz, nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 4½d per oz, last price. Silver—Bar silver, 5s 1⅞d to 5s 1½d per oz std; bar silver, containing 5 grains gold, 5s 1¾d per oz std; Mexican dollars, 5s 0d to 5s 0⅛d per oz, five-franc pieces, 4s 11½d per oz. Quicksilver, 8*l* per bottle; discount 3 per cent.

The Giant's Causeway has arrived from Melbourne with 20,000*l* in gold.

Failures and Mercantile Embarrassments. — Notice has been given that a first dividend of 2s in the pound under the estate of Messrs Early and Smith will be paid at the office of Messrs Coleman, Turquand, Youngs, and Co., on the 23rd and 30th inst.

Contributories of the Union Discount Company (Limited) are required by the Court of Bankruptcy to pay a call of 15s a share to the official liquidator by the 6th March.

The directors of the London and Middlesex Bank have determined to make an immediate return to the shareholders in respect of capital of 1*l* per share. They also state that "they are continuing their best endeavours to realise the remaining assets of the bank, with a view of distributing them among the shareholders as early as possible."

Vice-Chancellor, Sir W. P. Wood has made an order for the winding-up of the Rolling Stock Company of Ireland (Limited), and has appointed Mr Lowell Price, of Gresham street, provisional official liquidator.

Vice-Chancellor Wood proposes on the 8th of March to make a call of 10*l* per share on the contributories of the Life Assurance Treasury.

Public Companies.—The half-yearly meeting of the Submarine Telegraph Company was held on Tuesday, Sir James Carmichael in the chair. From the report presented to the shareholders, it appears that the receipts for the half-year ending Dec. 31 were 26,823*l* 3s 5d, against 25,184*l* 1s 2d in the corresponding period of 1863. After adding 2,682*l* 6s 4d, the usual proportion of the receipts, to the reserve fund, which now amounted to 11,728*l* 7s 11d, there remained a balance of 11,791*l* 15s 11d, which enabled the directors to declare a dividend at the rate of 5 per cent. per annum, and to carry over 603*l* 14s 4d to the next account. The report was adopted, and a dividend declared as recommended.

At the meeting of the North British Australasian Company, held on the 21st inst., a dividend at the rate of 2½ per cent., free of income tax, was declared on the ordinary stock.

A meeting of the Oriental Commercial Company was held on Wednesday last, when it was decided to change the title of the undertaking to that of the Oriental Commercial Bank (Limited), and to increase the capital to 3,000,000*l*.

At the meeting of the Southampton Dock Company, held on the 22nd inst., the accounts showed a net profit of 7,276*l* for the half-year; and a dividend was declared for that period of 4 per cent. per annum.

The dividend on Glasgow and South-Western Railway stock is announced at the rate of 5¾ per cent. per annum, against 5 per cent. the corresponding six months.

The directors of the Great Eastern Railway Company have resolved to declare a dividend at the rate of 2½ per cent. per annum for the half-year ending the 31st of December last.

The dividend on Great Western Railway original stock has been officially announced at the rate of 3¼ per cent. per annum, against 3 for the corresponding period of 1863.

The dividend on South Wales Railway stock will be at the rate of 3¼ per cent. per annum, against 3 for the corresponding six months of 1863: West Midland (Oxford) 2, against 1¾; Newport 1¾, against 1½; and Hereford 5.

The directors of the Salisbury and Yeovil Railway Company have agreed to recommend a dividend on the ordinary shares at the rate of 5½ per cent. per annum for the past half-year.

The directors of the Ottoman Financial Association (Limited), have issued their report, to be presented at the adjourned meeting on the 28th inst, It is recommended that that an interim dividend of 10s per share be paid, and that 2,000*l* be put to the reserve fund, leaving a balance of 6,833*l* to be carried forward.

The directors of the Continental Bank Corporation (Limited) have issued their third half-yearly report. It is stated that after a most careful examination of the accounts at the head office and branches, the total loss is found to amount to 19,000*l*; and, after deducting therefrom the net balance of profits, 5,000*l* 1s 6d, and the reserve fund 1,000*l*, the remaining deficiency is 13,409*l* 18s 6d. This sum the directors recommend should be written off capital account.

The prospectus of the London Cotton Manufacturing Company (Limited), has been issued, the capital required being 15,000*l* in 1,500 shares of 10*l* each. The project is organised to develop the Victoria Works at Walworth, for the manufacture of corded cotton and waddings. A minimum dividend of 10 per cent. is guaranteed for five years.

The prospectus of the Sea and River Marine Insurance Company (Limited) has been issued. The object of the directors is to effect the ordinary business of marine insurance, together with the insurance of lighters and small craft and their cargoes in the leading navigable rivers of the United Kingdom. The proposed capital is 500,000*l* in 20,000 shares of 25*l* each; the first issue 10,000 shares.

The Credit Foncier and Mobilier of England have issued an amended prospectus of the China Steam Ship and Labuan Coal Company, increasing the amount of capital from 500,000*l* to 540,000*l*; the shares are as before 20*l* each. The alteration is stated to have been made in consequence of the Stock Exchange regulation requiring that two-thirds of the total number of shares of new companies shall be issued to the public.

The report of the directors of the Worthing Sea-house Hotel recommends a dividend at the rate of 10 per cent. per annum, leaving a balance of £500 to be carried forward to the next revenue account.

The report of the Lambeth Bridge Company, to be presented at the approaching meeting, proposes a dividend at the rate of 8 per cent. per annum for the half-year ending the 28th inst. The balance to be carried forward to the next account is about £700.

The directors of the Agra and Masterman's Bank (Limited) have declared a dividend at the rate of 10 per cent. per annum for the half-year ended 31st December last, with a bonus of £3 per share, together equal to 22 per cent. per annum, making, with the previous distribntion, 20 per cent. for the year 1864, at which rate a dividend and bonus on the new shares will be paid.

The interest at the rate of 8 per cent. per annum due on the 28th inst., on the shares of the Imperial Mexican Railway Company, will be payable on the 6th of March.

The directors of the Avonside Engine Company (Limited), Bristol, have resolved to recommend to their shareholders a dividend for the past year of 10 per cent., and a bonus of 2½ per cent. upon the called-up capital, reserving 1,000*l*, and carrying forward 887*l*.

The Imperial Mercantile Association (Limited) are authorised to offer 30,000 shares in the Varna Railway Company. Share capital 900,000*l*, in 45,000 shares to bearer at 20*l* each, bearing a minimum interest of 5 per cent. guaranteed by the Turkish Government. The shares are to be issued at 12*l*, which is equivalent to a guarantee of 8⅓. The shareholders have likewise the advantage of the shares being paid off at par at periodical drawings, and of the high rate which it is estimated the company will have the opportunity of making. Owing to the issue of debentures, 1 per cent. surplus profit on the total capital employed will count to 4 per cent. to the shareholder. The concession is for 99 years.

The West London Docks and Warehouses Company, incorporated by Act of Parliament (capital 500,000*l* in 25,000 shares of 20*l* each), is intended to construct a new basin, with wharves and warehouses adjoining, near the Victoria Railway bridge at Battersea. The demolition of the Grosvenor canal and that caused by the the Thames embankment have diminished the supply of wharf accommodation in this district, while the railway facilities recently given have largely increased the demand for it. The works have been let to good contractors, who will pay 7 per cent. till the works are completed, and for 12 months afterwards.

The Rio de Janiero Gas Company (Limited), which is also a Societé Anonyme under the laws of Brazil (share capital 600,000*l*, in 30,000 shares of 20*l* each), has been formed for the purpose of lighting Rio de Janeiro under imperial concessions for that purpose. These concessions were granted in 1851 and 1854; the result, is stated to have been very profitable, and additional capital is imperatively required.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423 per mark, and the short exchange on London is 13.4¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 4-10ths per cent. dearer in London than in Hamburg.

POST OFFICE ANNOUNCEMENTS.—A contract has been entered into by the Postmaster-General with the West India and Pacific Steamship Company for the conveyance of the mails, once a month, from Liverpool to Belize (Honduras), and from Belize to Liverpool. The mails for Honduras will be made up in London on the evening of the 4th of each month, and at Liverpool on the following morning. When, however, the 5th of the month falls on Sunday, the packets will not sail from Liverpool until the 6th, and the mails will not be closed at Liverpool until the morning of that day. Commencing on the 20th March next, additional mails for Port-au-Prince (Hayti), Jamaica, Vera Cruz, and Tampico, will be forwarded under a contract with the West India and Pacific Steam Ship Company, by the steam vessels of that company which sail from Liverpool on the 20th of each month. The mails will be made up in London on the evening of the 19th of each month, and at Liverpool on the morning of the 20th. Any correspondence for Hayti, Jamaica, and Mexico, which may be specially addressed *via* Liverpool, will be forwarded in these additional mails, and the rates of postage on letters, &c., so forwarded, will be the same as chargeable on correspondence sent by the regular British mail packets.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended February 18, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	67,929 2	38 4
Barley	66,089 4	29 2
Oats	9,356 6	19 1

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold. Wheat.	Barley.	Oats.	Average Prices. Wheat.	Barley.	Oats.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of produce on sale at Mark lane to-day, was very moderate. The attendance of buyers was limited, and trade generally presented a quiet appearance, the demand both for wheat and spring corn being much less active than on Monday. As regards prices, however, considerable firmness prevailed, and the transactions concluded were at full quotations. The flour trade was firm, and the lower brands of American commanded more

Digitized by Google

money, the lowest price being 21s per barrel. This week's imports are small, viz., 4,320 quarters of wheat; 19,350 barley; and 1,040 quarters of oats.

The trade for wheat and flour at Liverpool, this morning, was quiet, at late rates. Indian corn supported previous quotations, but with a limited inquiry. The Wakefield market was quiet for wheat, and rather easier for barley; but oats, beans, and peas realised high prices.

The cotton market opened with dulness, but on Wednesday the news by the Peruvian, reporting the renewal of active hostilities in America, has given increased firmness to our market, and although prices are not quotably higher, yet, for those kinds most in demand, the turn is rather against the buyer. To-day the market is steady, and sales 7,000 bales. Holders do not seem willing to concede their cotton at the prices offered by spinners. The total sales of the week reach 36,520 bales, of which 7,160 bales have been taken by speculators, 3,580 bales by the exporters, leaving 25,780 bales to the trade. With the exception of Bengal, which has declined 1d per lb., most descriptions are rather higher than last week.

We have letters from Bombay, reviewing the trade of that port during the fortnight ending Jan. 28. As regards the value of cotton, the fluctuations had been trifling; however, notwithstanding that native buyers had operated less freely, about an average business had been transacted, at, for the most part, previous quotations. The arrivals of *new* Oomrawuttee had been somewhat extensive; but of *new* Hinghenghaut and *new* Broach, the receipts had been very moderate. The quality of the new supplies contrasted favourably with last year's produce. The following tables of prices and exports are from Messrs Nichol and Co.'s circular:—

CURRENT PRICES of COTTON at BOMBAY, Jan. 28.

	Market Value. Per candy, 784 lbs. rs	C.F.I. Exchange 2s 1¼d per R. d

At Tinnevelly, on the 18th ult., the cotton trade was quiet, yet the quotation ruled at 250 rupees per candy.

The cotton trade at Calcutta, for the fortnight ending Jan. 20, was steady, and a fair business was transacted in most descriptions, at, for the most part, full currencies. Bengal produce was quoted at 28 to 30 rupees per bazaar maund.

From Shanghai, we have postal news to Dec. 24. The supplies of cotton on sale at this port during the fortnight prior to that date were small, and, owing to the limited stock, the market was firm, on higher terms. The settlements were estimated at 6,000 bales, the quotation being 15.5 to 16.5 taels per picul.

EXPORTS of COTTON from SHANGHAI, from July 1 to Dec. 23.

Total	157,360	48,104	1,555

The sales of Chinese cotton at Hong Kong, for the fortnight ending Dec. 31, were about 8,000 bales, at $24.50 to $25 for Shanghai, and $25 50 to $26 per bale for Ningpo. Japan produce was quoted at $27 to $28 per bale.

The following were the transactions in cotton at Canton for the fortnight ending Dec. 30:—Japan, 20 to 22 taels per picul; Ningpo, 18 to 20 taels per picul; sales 500 bales: Shanghai, 17 to 19 taels per picul; sales 1,600 bales.

Moderate supplies of cotton were received at Yokohama during the fortnight ending Dec. 17. The trade, however, was in a sluggish state, at $25 to $26 per picul.

The value of cotton at Alexandria fluctuated to some extent during the week ending Feb. 13. At latest date, however, the market was decidedly firm, at steadily advancing prices. According to the Egyptian Commercial and Trading Company's circular, good middling and fair hand-cleaned produce was quoted at 20.50d to 21d; fully fair ditto, 21.25d; fair to fully fair machine-cleaned, 22.75d to 23d; good fair to fully good fair ditto, 24d to 24½d per lb free on board. The arrivals from Jan. 26 to Feb. 11 were 48,780 bales, whilst the sales were estimated at 14,212 bales. From the same authority we extract the following table, showing the exports to all quarters since the commencement of the season:—

EXPORTS of COTTON from ALEXANDRIA from Oct. 3 to Jan. 31.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.
1859—1860	30,205	8,312	3,606	42,123
1860—1861	34,536	10,578	3,101	48,215
1861—1862	34,247	9,741	2,766	46,754

Alexandria	0 0 0 0 0 0	.....	0 0 0½ 0 0 0	

The following calculation has been handed us by a correspondent. It is founded upon our recent estimate of 2,900,000 bales imports in all 1865, an estimate which is generally concurred in by the authorities of the cotton trade. It may be remarked that of the 300,000 bales increase over 1864 reckoned upon, we have already received over 100,000 increase in seven weeks; and as the excess in 1864 over 1863 was nearly 700,000 bales, it cannot be contended that our estimate for the present year is an extravagant one.

		bales.

Stock, Dec. 31		570,000

The trade will be best able to judge what reduction in price will be necessary to increase the demand by 15,000 bales per week over that of 1864. It is clear that prices of raw cotton must now be ruled by the *demand for goods*; as long as they remain over sixpence to ninepence for short staples, and ninepence to twelvepence for long staples, there will be no check to the efforts made in all quarters to supply us with cotton. The returns show that Bombay sent us in 1861 over a million bales of cotton, with an average price in this country of only sixpence per lb for fair Surats. In 1864, Bombay sent us about 60,000 bales *less*, with an average price of twenty pence per lb!

There has been a fair amount of activity in the markets for colonial and foreign grocery produce, this week, and although the transactions have not been to any extensive, most descriptions have changed hands to a moderate extent, and prices have ruled firm. The greatest want of animation appears to have prevailed in the tea trade, the public sales held having passed off slowly, but without leading to any material change in the quotations, whilst in the private contract market, both India and China produce has sold slowly, on former terms. Last week, duty was paid on 1,126,261 lbs of tea, and the export for the week ending Feb. 16 reached 190,950 lbs, making a total of 1,311,211 lbs, against 1,309,746 lbs last year. The rum market has been quiet, although Government have accepted tenders for 65,000 gallons. Small public sales of silk have been held.

The sugar trade at Havana, from Jan. 7 to Feb. 4, was very quiet, and—owing to the high prices demanded by planters—European buyers showed very little disposition to operate. The principal business was for the United States. The following quotations are from Messrs Schmidt and Karck's circular:—No. 7 to 10, 19s 2d to 21s 6d; No. 11 to 12, 22s 1d to 22s 8d; No. 13 to 14, 23s 3d to 23s 10d; No. 15 to 17, 24s 5d to 25s; No. 18 to 20, 25s to 25s 7d; whites, low to prime, 26s 3d to 29s 9d per cwt, free on board. ex freight.

	85,956	42,968	62,433

The public sales of colonial wool are fixed to be commenced on Thursday next. The arrivals amount to 58,385 bales, comprising 9,210 bales from Sydney; 25,391 Victoria; 403 Van Diemen's Land; 4,613 Adelaide; 53 Swan River; 142 New Zealand; and 18,573 bales from the Cape of Good Hope. It is estimated that during the progress of the sales, about 80,000 bales will be offered.

The quarterly public sales of East India indigo, which were commenced on the 14th inst., were brought to a close yesterday. The total declarations reached 10,057 chests in the A, and 1,083 chests in the B catalogue—total, 11,140 chests. Of this quantity, about 6,000 chests were disposed of. The sales opened with firmness, at an advance of 2d to 4d per lb for all desirable kinds of Bengal and plant Oudes, but closed heavily at a reduction on these quotations. The closing prices, as compared with October, were:—Good and fine Bengal and Oude, par to 3d advance; inferior, 2d to 3d decline; Kurpah, good and fine, par; inferior, 2d to 3d decline; dry-leaf Madras, par. Bengal sold at 1s 6d to 8s 8d; Madras, 1s to 6s 7d; Kurpah, 1s 6d to 7s 3d; and Oude, 2s to 6s 6d per lb.

Advices from Calcutta to Jan. 31, state that about 83,000 maunds of the new crop of indigo had been disposed of. The exports, from Nov. 1 to Jan. 20, were 17,389 chests, of which 11,227 chests were to Great Britain, and 4,631 chests to France.

In the following table is exhibited the stock of tobacco at New York on Jan. 1 and Feb. 1, and also the receipts and deliveries during the month of January:—

In metals, oils, and tallow, there is little change to notice. Generally speaking, the markets are flat, and the tendency of prices is in an unfavourable direction.

The market for cotton goods at New York, during the week ending Feb. 11, was decidedly firmer, and although the amount of business transacted was very moderate, a much more healthy tone prevailed, and prices had an upward tendency. In the other departments of trade, the principal feature was an improved market for breadstuffs, not resulting, however, from any increase in the export demand, but from a more active inquiry for home consumption. The premium on gold steadily declined, the opening quotation for the week being 216—the closing 207¾ per cent. The stock of bullion in the banks on the 4th of February was 3,936,500*l*; and the balance in the Sub-treasury, 5,370,000*l*. The shipments of specie, for the week ending Feb. 4, amounted to 57,000*l*, making a total, since Jan. 1, of 650,600*l*, against 1,224,400*l* in 1864; 925,000*l* in 1863; 531,700*l* in 1862; and 10,780*l* in 1861. The foreign imports at New York, from Jan. 1 to Feb. 4, were valued at 2,468,980*l*, against 4,735,120*l* in 1864, and 3,745,000*l* in 1863. At latest date, the money market was quiet, 8 to 8½ being the current rates for discounting prime short-dated commercial paper.

THE COTTON TRADE.

LIVERPOOL—February 24

Cotton has been in limited demand, and freely offered throughout the week, and the quotations show a further considerable decline, though in consequence of confirmation received per Peruvian, from New York, of the failure of peace negociations and renewed hostilities, more steadiness appeared on Wednesday afternoon, and was maintained to the close of business yesterday. In American a moderate business has been done, and quotations are reduced 1d to 1½d per lb. Sea Island has been in limited request, and the increased choice has given to buyers a slight advantage. Brazil has fallen 1d to 1½d per lb, holders showing great anxiety to effect sales, and the demand continues very limited. Egyptian has been very irregular throughout the week; a further reduction in prices attracted the attention of speculators and exporters, as well as the trade, but the market continues over supplied, and a fall from last week of 1d to 2d is quoted. Smyrna has been in fair request from the trade, but is freely offered at irregular rates. The finer kinds, including Greek, are very much reduced in value from last week, and prices are 1½d to 3d per lb down; whilst the lower descriptions have fallen only about ½d to 1d per lb. East India has been very irregular in price, and the middling descriptions, in consequence of the difficulty of realising, have suffered a serious decline, amounting to fully 1d per lb. China is again pressed for sale at a reduction of ½d to 1d, while for Japan the inquiry is very moderate, and a fall of 1d per lb has been submitted to.

The transactions, to arrive, have been confined to a very few purchases of Egyptian; the last quotation was yesterday for fair open at sea 18¾ and 19, and good fair, 19¼.

The sales of the week amount to 36,520 bales, including 7,160 on speculation, and 3,580 declared for export, leaving 25,780 bales to the trade. The sales to-day amount to about 7,000 bales, with a steadier market.

There have not been any sales reported in cotton to arrive.

NEW YORK—FEB. 11.

Rather an extensive business has been transacted in cotton, this week, at enhanced quotations. The sales are estimated at about 6,400 bales. The receipts amount to 2,817 bales, of which 1,039 bales are from Matamoras, 534 New Orleans, and 818 bales by railroad. This additional quantity raises the import since Sept. 1, 1864, to 100,348 bales. The prices now current are as follows:—

MARKETS IN THE MANUFACTURING DISTRICTS.

On the whole, a fair amount of business has been transacted in goods since our last, at full prices. Generally, the stocks are very moderate. The demand for coals has continued very brisk, at high quotations. The iron trade has been far from active. In prices, however, very little change has taken place.

MANCHESTER, Feb. 23.—Sellers have this week shown more disposition to take easier rates, and buyers have accordingly been induced to invest freely for the Eastern markets. Sales have chiefly been of shirtings, jacconets, and mulls, and for immediate delivery. Few orders have been given for future delivery. For markets other than the Eastern, great stagnation has prevailed. Continental merchants have been restrained by the state of the weather preventing their usual advices from coming to hand. As home manufacturers suffer constant loss on all they produce to stock, they are indifferent as to giving out orders for yarn, the prices for which have hence receded from ½d to 1d per lb. Spinners, having such a slow trade, do not anticipate their requirements in the cotton market, so a dulness of tone overspreads all departments.

BRADFORD.—The actual transactions have been confined to some sales of short wools, for which class the demand continues without interruption. The yarn trade continues flat, and only low counts of carded weft are sought after. Pieces—The demand for fancies has been slightly improved; in other respects there is no change, and quotations show little alteration.

LEEDS.—Spring meltons, tweeds, and other goods, both coatings and trouserings, suitable for the coming season, have been purchased to a moderate extent, but the markets were devoid of animation. The manufacturers are scarcely so brisk as we lately had to report them.

NOTTINGHAM.—The demand for hosiery yarns was very flat, and only an exceedingly small amount of business was done at recent rates. For silks, prices were very firm.

ROCHDALE.—There is no material change in the flannel trade since last market day. Buyers operate very cautiously. The Yorkshire goods trade keeps in the same state of quietness as we have lately had to report. Manufacturers still keep moderately well employed, and prices of both goods and wool are steady.

LEICESTER.—There is a further demand for most classes of hosiery goods usually in request at this time of the year. The retail dealers are getting well cleared of winter goods. There is no important alteration in the price of yarns, which are not much in demand.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 11.—Owing to an improved demand for home consumption, trade in breadstuffs, this week, has exhibited more activity, and prices have advanced in a slight degree. The export inquiry, however, is still much restricted, the shipments to England, the West Indies, and South America having been very limited since our last report. The receipts of produce have been very moderate. Annexed are the quotations:—Flour—State, superfine brands, $9.45 to $9.60; State, extra brands, $9.75 to $9.85; State, choice brands, $9.90 to $10; Ohio, common brands, $10.90 to $11.10; Ohio fancy brands, $11.15 to $11.20; Ohio, good and choice extra brands, $11.25 to $11.80; Michigan, Indiana, Wisconsin, &c., $9.50 to $10; Genesee, extra brands, $10.25 to $11.50; Missouri, $10.15 to $15; Canada, common, $9.75 to $10; Canada, good to choice extra, $10.10 to $11.75 per barrel. Wheat—Chicago spring, $2.15 to $2.18; No. 1, Milwaukee Club, $2.20; amber Western, $2.45; white Canada, $2.57½ to $2.63. Corn—Yellow Jersey, $1.72 to $1.75; old Western, mixed, $1.87½ to $1.90 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of wheat up to our market, this week, coastwise and by land-carriage, have been very limited; hence, the show of samples has continued trifling. Both red and white qualities have changed hands steadily, at about stationary prices. Fine foreign wheats have realised extreme rates; but inferior kinds have commanded very little attention, at about previous quotations. Only a limited quantity of English barley has come to hand; but the imports from abroad have been seasonably extensive. On the whole, the trade has ruled firm, and, in some instances, prices have advanced 1s per quarter. There has been only a limited business doing in malt—the receipts of which have not increased—at the late decline in value. The few parcels of oats on the stands have been disposed of at 1s per quarter more money. Beans have sold freely, at an improvement in value of 1s per quarter; but the demand for them has been by no means active. English and foreign flour has commanded full prices. The supply of sound foreign on offer is limited.

In the various local markets, wheat has ruled about stationary; but the value of spring corn has had an upward tendency.

On the continent, both wheat and flour have met a slow sale; but the demand for barley, oats, beans, and peas has ruled tolerably firm. The shipments of produce from America continue on a limited scale.

In Scotland, the supplies of wheat have fallen off, and sales have progressed steadily, at full quotations. Spring corn has been in improved request, on higher terms.

The Irish markets have been rather scantily supplied with most kinds of produce. Generally speaking, the trade has ruled firm, and the currencies have had an upward tendency.

The supply of English wheat on sale at Mark lane to-day was small. The condition of the produce being unsatisfactory, fine samples sold readily, at full prices; whilst damp qualities were difficult of disposal, though not lower in value. The demand for foreign wheat ruled inactive, at late rates. The barley trade was quiet, yet prices ruled stationary. Oats supported Monday's currency; but there was less activity in the demand for all qualities. Beans and peas were very firm. The flour trade was steady, on former terms.

Mr George Dornbusch reports the arrival off coast of 19 cargoes of wheat, 9 maize, 13 barley, 3 rye, 1 millet seed, 6 linseed, and 2 cotton seed. Wheat has moved off heavily, at a further decline in value of from 6d to 1s per quarter. In other produce afloat, very little has been passing, at low rates.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market continues very steady this week, the recent advance being fully maintained, with a moderate inquiry from the home trade and the refiners. About 2,920 casks West India found buyers to yesterday (Thursday), including Barbadoes, at 30s to 34s; grainy and crystallised sorts, 33s to 37s per cwt. The total deliveries show an increase of 10,000 tons over last season's, leaving the stock at the close 100,960 tons, against 70,862 tons in 1864.

Mauritius.—A limited quantity now offers, and 300 bags, by auction, sold at extreme rates: grainy, brown and grey, 32s to 33s 6d. Afloating cargo has sold at 25s per cwt, for Bristol; No. 12½ to 13.

Bengal.—1,001 bags white Benares sold by auction at 35s to 38s per cwt.

Madras.—2,903 bags native brown and yellow sold at 23s 6d to 26s. 3,947 bags dark Jaggery were withdrawn at 23s, and since disposed of at 22s to 22s 6d per cwt.

Penang.—731 bags of old import sold at 28s 6d to 29s 6d per cwt for brown and grey.

Natal.—1,117 bags sold from 26s to 33s per cwt.

Foreign.—393 casks 93 barrels Porto Rico offered by auction sold steadily at 28s to 33s. 900 casks are reported privately, at 33s. 200 casks Cuba, at 31s; and 400 Havana florettes, at 38s to 39s. Two floating cargoes of Cuba sold for the United Kingdom at 20s and 20s 6d, one grainy at 21s 6d per cwt.

Refined.—The supply of dry goods has been much reduced, and the lower qualities have advanced to 42s 6d per cwt. Some contracts have been made in Dutch loaves for this market.

MOLASSES.—185 puncheons Dominica have sold at 13s 6d per cwt.

RUM.—The market is steady and general quotations remain unchanged, with a fair business doing in Jamaica.

COCOA.—Higher prices have been paid for colonial this week, and business is reported by private contract in Trinidad. 208 bags offered by auction, were held above the present market currency.

COFFEE.—There has not been any change in the market this week, and the reduced quantity of plantation Ceylon brought forward found buyers at full rates: 320 casks 518 barrels and bags, selling at 79s 6d to 88s for small berry to good colory. 217 casks 1,040 bags native partly sold at barely the previous value: good ordinary to fine ordinary, 69s to 70s 6d. 1,920 bags Rio partly sold at 66s for ordinary quality, the remainder taken in at 66s to 69s. 563 bags washed part sold at 77s. 961 bags Santos were disposed of at 71s 6d to 74s. A floating cargo of good firsts Rio was sold for Trieste at 60s 6d per cwt.

TEA.—The business of the week by private contract has been limited, and generally at low prices. Of 15,020 packages by auction, 18,000 sold, and the greater part "without reserve." A firmer tone prevailed throughout, and the sales went off at a slight improvement for the lower grades of common red and black leaf congou offered on importer's account. Shanghai greens realised full prices.

SAGO.—1,125 boxes sago found buyers at steady rates; small grain, 18s 6d to 20s 6d per cwt.

SAGO FLOUR.—434 bags offered by auction sold at 14s to 14s 6d per cwt.

SPICES.—The market for black pepper is a shade easier. 2,507 bags Penang part sold at 3⅛d; Trang, 3¼d to 3⅜d. 1,626 bags Singapore sold at 3¼d to 3⅜d for greyish to good quality. 370 bags Zanzibar cloves were bought in at 3½d to 3⅝d per lb. 350 cases cassia lignea sold rather cheaper; coarse to fair, 77s to 82s. 965 bags Bengal rough ginger were chiefly sold at 28s per cwt, being 1s to 2s per cwt lower. White pepper has been in demand by private contract, and higher rates refused by importers, owing to the probability of a reduction in the duty.

RICE.—A steady business has been done in soft grain descriptions during the week at 8s to 9s 9d. 2,500 bags white Bengal at 11s 3d to 12s 9d. 200 tons Ballam are reported at 10s 6d to 10s 9d per cwt over the ship's side.

IMPORTS and DELIVERIES of RICE to Feb. 18, with STOCKS on hand.

Deliveries	8550	5680	8350	7620
Stock	47550	54830	61620	29400

SALTPETRE.—A few parcels have been sold by private contract at rather lower prices: Bengal, refraction 8¾ to 9¾, 28s 6d to 30s 6d, short prompts. 426 bags by auction sold as follows: refraction 7¼, 29s 7d; 6, 30s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Feb. 18, with STOCKS on hand.

	1864	1863	1862	1861
Imports ...tons	1300	2040	3900	4450
Deliveries	1620	1650	1890	3000
Stocks	7100	7550	5910	4580

DRYSTUFFS.—Gambier is quiet, but firm. Cutch 25s to 25s 6d. No alteration can be quoted in safflower.

METALS.—A quiet tone has pervaded the market this week. Straits tin is rather lower, having sold at 88*l* to 88*l* 10s cash. The iron trade does not present any new features of interest. Scotch pig has fluctuated slightly, the last sale of mixed numbers being made at 50s 6d per ton. Spelter is dull and lower, favourite brands selling at 19*l* to 19*l* 2s 6d; usual quality, 18*l* 15s per ton.

JUTE.—The small quantity offered by auction on Wednesday sold at unaltered rates, but sales of fair extent are reported privately.

OIL.—Several cargoes of olive have sold: Malaga, spring shipment, 46*l*; Gioja, 44*l*. Pale seal is scarce on the spot, and worth 47*l* 10s. Colonial and sperm has sold at 81*l* per ton. There has been rather more business done in linseed at 32s 6d for immediate delivery. Rape scarce for brown, at 41s 6d to 42s, but refined is in good supply, at 44s 6d to 45s per cwt. Fine palm is steady, at 36s to 36s 3d. Cochin cocoa-nut firm at 39s to 39s 6d. Ceylon quiet, with sellers at 38s 6d per cwt.

LINSEED.—Quotations are a shade lower. Calcutta, 57s to 58s; Mirzapore Patna, 58s 3d to 59s; and Bombay, 59s 6d. For arrival, 200 tons Calcutta have sold at 58s for January. February shipments, two cargoes of Odessa, off the coast, have been placed at 56s 9d, delivered U. K., and a cargo of Azoff, for summer shipment, at 57s, the latter being 6d cheaper than last week.

PETROLEUM.—At 1s 11d to 2s per gallon a good business has been done for export.

TALLOW.—The market remains inactive, and quotations of foreign are lower at the close. 1st sort Petersburg, Y.C., 40s 3d to 40s 6d; April to June, 40s 9d to 41s; last three months, 42s per cwt.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firm, and some of the low qualities went rather dearer. 3,575 casks West India have sold for the week. 8,315 bags Mauritius were chiefly disposed of at previous rates, including grainy sorts, at 11s 8d duty, at 37s to 40s 6d. 4,435 bags Bengal partly sold at former quotations. 1,400 bags Penang; brown and yellow, 29s to 31s per cwt. 1,000 casks muscovado sorts sold privately at full rates.

COFFEE.—91 cases 1,396 bags East India sold by auction at 66s 6d to 77s. 200 casks 415 barrels and bags plantation Ceylon sold steadily, including fine up to 95s 6d per cwt. A few lots of Jamaica brought full rates. 1,396 bags Rio, sea damaged, sold at fair prices. 392 bags African were taken in at 70s to 74s.

OILS.—1,100 casks cocoa-nut by auction part sold: Cochin, 37s 9d to 39s 3d; Ceylon, 37s 6d; Sydney, 33s to 37s. 374 casks palm sold at 33s to 36s 9d per cwt.

TALLOW.—939 casks Australian sold by auction at 6d decline: sheep, 34s 3d to 41s 3d; beef, 38s 6d to 40s. Town tallow reduced to 43s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for unstoved goods has been well supported this week. Dry goods are quiet; nothing under 42s 6d for grocery titlers. Dutch crushed continues firm. In loaves some sales have been made in A. S. S. R. No 1, 29s 6d, No. 2, 28s 6d, loose in entrepot about 150 tons; also 100 tons B. and H.: superfine, 31s 6d f.o.b. in Amsterdam.

GREEN FRUIT.—A fair market for oranges of all kinds, owing to diminished stock and limited arrivals. Some parcels of St Michael, Valencia, and Palermo, sold by Keeling and Hunt at public sale, went at an advance in price. Lemons in character. More inquiry for Barcelona nuts, the low price inducing purchasers to take stock. Seville sours in moderate demand. A parcel of Almeira grapes landed in bad condition and sold at low prices.

DRY FRUIT.—Currants continue dull, with a tendency to lower prices. Some sales at remarkably low rates have been made. The demand chiefly exists upon lower sorts and sea damaged. Valencia raisins are without alteration. Eleme and red in very limited demand. Sultanas quiet.

SEEDS.—The trade in seed is not brisk, but supplies being very scanty, prices are well sustained.

ENGLISH WOOL.—Downward tendency still continues.

COLONIAL WOOL.—The market is without change.

FLAX.—Market quiet.

HEMP.—Market very dull, and but few sales to report during the week.

TOBACCO.—The trade have supplied themselves more freely with good and fine descriptions of American, both leaf and stemmed. Other growths were in fair demand, and sales of most sorts made to a full average extent. The market has undergone no change. Prices remain firm and steady, at present quotations.

LEATHER AND HIDES.—The leather market remains without alteration. The continuance of frost lessens the supplies of fresh leather, and therefore, with respect to the articles that are the most wanted, restricts the amount of business done; these articles are chiefly good crop hides, about 45 lbs, light English butts, shoulders, bellies, good common dressing hides, about 28 lbs, and good kips.

METALS.—We have had again an inactive time in metals. Copper is little inquired for, but a few transactions have been reported at reduced prices. Iron without change, being still sluggish. Tin, next to nothing done all the week. Spelter rather easier to buy. Lead and tin plates heavy.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	42	0
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 20.—The total imports of foreign stock into London, last week, amounted to 4,507 head. In the corresponding week in 1864 we received 2,865; in 1863, 2,889; in 1862, 1,282; in 1861, 2,059; in 1860, 1,921; and in 1859, 1,829 head.

The show of foreign beasts in to-day's market was moderate, of sheep and calves limited. Sales progressed steadily, and the quotations had an upward tendency. The arrivals of beasts fresh up from our own grazing districts, as well as from Scotland, were tolerably good, and for the most part in prime condition. Nearly all breeds met a slow inquiry, and in some instances, prices were a shade lower than on Monday last; however, the best Scots and crosses produced 5s 4d per 8 lbs. The show of sheep was very limited, but in full average condition. About one-third of the supply was out of the wool. The mutton trade was active, at an advance in the quotations of fully 2d per 8 lbs. Downs in the wool realised 6s 4d per 8 lbs. Some half-bred tegs with prime skins, changed hands at 6s 6d and even 6s 8d per 8 lbs. The top figure for clipped sheep was 5s 2d to, in some cases, 5s 4d per 8 lbs. The few lambs on offer readily produced 7s to 7s 4d per 8 lbs. Calves were in short supply and good request, on higher terms; the top price was 5s 8d per 8 lbs. The pork trade was firm at enhanced quotations.

SUPPLIES.

	Feb. 22, 1864.	Feb. 20, 1865.
Beasts	3970	4210
Sheep	18760	11860
Calves	108	124
Pigs	380	210

THURSDAY, Feb. 23.—Our market to-day was moderately supplied with beasts, in fair average condition. On the whole, the beef trade was inactive, at Monday's currency. The best Scots sold at 5s 4d per 8 lbs. The show of sheep was rather limited, and most breeds moved off slowly, at previous rates. The best Downs, in the wool, realised 6s 4d; out of the wool, 5s 2d per 8 lbs. Lambs were steady at 7s to 7s 4d per 8 lbs. There was a steady sale for calves, at full prices, viz., from 4s 6d to 5s 8d per 8 lbs. Pigs were firm in price; but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	8	to 4	2	Prime Southdown sheep	6	2	to 6	4

Prime small ditto	4	8	4	10	Large pork	3	6	4	4
Veal	4	2	5	2	Small pork	4	6	4	10

HOP MARKET.

BOROUGH, Monday, Jan. 20.—Our market continues dull. The recent large arrivals of American have slightly checked the trade, but the quantity received is small as compared with the two preceding years. The arrivals since the first September, 1864, to the present time have been about 9,300 bales, of which about 4,000 have consisted of yearlings and hops of earlier date, against about 14,000 bales imported within a similar period in 1864, and 35,000 in 1863.

FRIDAY, Feb. 24.—The supply of English hops on sale being small, the trade for all qualities of home-grown produce is very firm, at fully late rates. The best foreign hops continue in demand, at extreme quotations. Inferior foreign hops, however, of which there is a somewhat abundant supply of American on offer, are difficult of sale.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Feb. 20.—The arrivals both coastwise and by rail are small, and prices are fully maintained. The following are the quotations:—Yorkshire Flukes, 120s to 140s; ditto Regents,; 90s to 100s; ditto Rocks, 80s to 85s; Kent and Essex Regents, 90s to 100s Perth, Forfar, and Fife Regents, 80s to 90s; ditto Rocks, 70s to 80s; French and Belgian whites, 55s to 65s per ton.

FRIDAY, Feb. 24.—These markets are but moderately supplied with potatoes, and the trade is firm, at very full prices:—Yorkshire Regents, 90s to 110s; ditto Flukes, 130s to 145s; Kent and Essex Regents, 90s 105s; Scotch Regents, 90s to 100s per ton.

HAY MARKETS.—THURSDAY, Feb. 23.

SMITHFIELD.—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Supply limited.

CUMBERLAND—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. A fair demand.

WHITECHAPEL.—Meadow hay, 4*l* 10s to 5*l* 10s; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 8s to 1*l* 14s per load. Trade steady.

COAL MARKET.

FRIDAY, Feb. 24.—Haswell, 21s—Hetton, 21s—South Hetton, 21s—Hough Hall, 20s—Hotspur, 17s—Hunwick, 16s—Russell's Hetton, 19s 9d—South Kelloe, 20s—Tunstall, 19s 3d—Byass's Bebside West Hartley, 15s—Cowpen Hartley, 15s—Buddle's West Hartley, 15s—Hastings' Hartley, 15s—Davison's West Hartley, 15s—West Hartley, 15s—Lambert's West Hartley, 14s 9d—Tanfield Moor Butes, 14s 6d—Walker Primrose, 13s. Ships at market, 115; sold, 14; gas contracts, &c., 36—50; unsold, 65; ships at sea, 60.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 24.—A fair amount of business has been done this week for home consumption at prices rather in favour of buyers, as holders have shown more disposition to meet the market than they have done for some time past.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 24.—The market moderately attended. Wheat and flour in quiet demand at last week's quotations. Indian corn unchanged. Beans flat. Oats and oatmeal dull.

The Gazette.

TUESDAY, Feb. 21.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 11th of February, on 11,796 miles, to 571,400*l*, and for the corresponding week of last year, on 11,460 miles, to 542,082*l*, showing an increase of 336 miles, and of 29,318*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,293 miles, to 465,970*l*, and for the corresponding week of 1864, on 8,045 miles, to 441,148*l*, showing an increase of 252 miles, and 24,822*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Feb. 20.—In the share market to-day the variations from Saturday's closing prices showed a slight tendency to firmness in English railways and banks, and to weakness in colonial and miscellaneous shares, but no material change of tone in the other descriptions. Of the English lines, Great Western (Newport) improved 1, Manchester, Sheffield, &c. ¾, Caledonian, Great Northern, and Blackwall ½ each, Metropolitan a further 1, and North-Western a further ½; and South-Eastern declined 1½, and North British and North-Eastern (Leeds) ½ each. In colonial, Grand Trunk of Canada (2nd preference deferred) receded 1, and Punjaub ½. In foreign, Great Luxembourg further improved ⅛. In American, Erie shares (paid-up) improved ⅛, and United States (5-20) declined ¼. In British mines, East Caradon improved 1, East Lovell ½, and Grenville 1; and East Bassett declined 2, and Great South Tolgus a further ¼. In foreign mines no movement occurred.

TUESDAY, Feb. 21.—In the share market to-day dulness very generally prevailed, and English, Indian, and American railways were slightly inclined to weakness at the close, but in other descriptions there was no average alteration. Of the English lines, North-Western relapsed ½; and Great Northern (A stock) declined ¼, and Great Western and Midland ¼ each. In colonial, Great Indian Peninsula shares (of both descriptions) were ⅛ lower. In foreign, West Flanders improved ⅛, and Great Luxembourg a further ⅛, and Lombardo-Venetian declined ⅛. In American, Panama Railroad (second mortgage) receded 2, and Atlantic and Great Western (New York second mortgage) 1. In British mines, Devon Great Consols advanced 5, and Clifford Amalgamated declined 1, and East Grenville ¼. In foreign mines, Lusitanian improved ¼, and East del Rey ⅛.

WEDNESDAY, Feb. 22.—In the share market to-day English and Indian railways were again rather flatter, American and banks were generally firm, and in the other descriptions there was no appreciable change of tone. Of the English lines, Midland recovered ½; South-Eastern and Manchester, Sheffield, &c., also improved ¼ each; Great Western, on the announcement of the dividend, were a further 4¼ lower, ditto (Oxford) declined 1½, ditto (Newport), North-Eastern (Leeds), and South Devon 1 each, Great Northern and Metropolitan ⅛ each, and North-Western a further ¼. In colonial, Madras (5 per cent.), Delhi (stock), and Punjaub receded ¼ each, Bombay and Central India (F shares) ⅛, and Great Indian Peninsula shares (of both descriptions) a further ⅛ each. In foreign, Mexican improved ¼, Great Luxembourg relapsed ⅛, and Lombardo-Venetian further receded ⅛. In American, United States (5-20) advanced 1¼, Erie shares (paid-up) 1, and Illinois Central shares ½, and Virginia (6 per cent.) declined ½. In British mines, Great Wheal Vor improved ½, and North Roskear declined 1, and Clifford Amalgamated a further 1. In foreign mines no movement is recorded.

THURSDAY, Feb. 23.—In the share market to-day the closing prices showed a lower tendency in English railways, British mines, banks, and American securities, but no material average change in the other descriptions. Of the English lines, Manchester, Sheffield, &c., relapsed ½; and Great Northern (A stock) declined 1, Blackwall, South-Western, and Metropolitan ½ each, North-Eastern (Berwick) and ditto (York) ¼ each, South Devon a further 1, Great Western further 2, and ditto (Oxford), further 5. In colonial, Great Western of Canada shares (of both descriptions) receded ⅛ each. In foreign, Lombardo-Venetian recovered ⅛. In British mines, Nangiles improved 1, and West Seaton declined 10, Wheal Seton 5, and West Chiverton 4½. In foreign mines, Lusitanian advanced ¼, and Capula Silver ⅛, and Fortuna declined ¼.

FRIDAY, Feb. 24.—The railway market was flat to-day. Great Eastern stock declined 1 per cent., Midland and Caledonian have receded ⅜, and London and North-Western and Caledonian ¼. On the other hand, Great Western improved ⅝ per cent. Foreign and colonial railway securities were inactive. Bombay and Baroda, Grand Trunk of Canada, and Great Indian Peninsula stocks exhibited a drooping tendency.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE."
The public are respectfully cautioned against wortnless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminen. counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.
Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
London: John Churchill; and may be had of all booksellers.

The London and Westminster Bank, Lothbury.

BROKERS.

Messrs P. Cazenove and Co., Threadneedle street.

SECRETARY (pro tem.)—Mr John Du Boulay.

Temporary Offices—No. 1 Gresham house, Old Broad street.

This Company has been formed for the purpose of acquiring two concessions granted by the Imperial Government of Brazil for lighting Rio de Janeiro with gas. The concessions, which are dated respectively the 11th March, 1851, and the 13th October, 1854, grant the monopoly of supplying the City with gas for a period of 25 years from the 25th March, 1854.

In consequence of a provision inserted in the former concession, an assignment was prohibited, except with the consent of the Imperial Government, and consequently it was not competent for the concessionaire to release himself from his individual obligations so as to surrender the concessions absolutely to a company, but a joint stock undertaking, under the sanction of the Government of Brazil, was organised, for giving effect to the concession, the concessionaire remaining liable to the Government.

The result of the working, from the commencement, in 1854, up to the present time, has been highly satisfactory, and the proposal for the sale of the undertaking to an English Company has arisen solely from the necessity which a comparatively new country, like Brazil, is under, of obtaining capital from the European money markets to aid in the development of industrial undertakings. An Imperial decree having been obtained authorising an absolute transfer to a company to be organised in Europe, of the concessions and all the rights, powers, privileges, and profits conferred thereby, all obstacles to the undertaking being absolutely vested in a joint stock company are at an end. Arrangements have accordingly been made with the concessionaire and the Brazilian Company, for a transfer to the present Company of the concessions and the works and property of the existing undertaking, including contracts with the Government (the payments on which are guaranteed to be made in gold) and private individuals, and for maintaining those works, and constructing and maintaining any other works that may be authorised by any further or supplemental concession.

The concession confers the exclusive privilege of furnishing gas to the public authorities as well as to private individuals up to the 25th March, 1879, at the price of 8,000 reis (17s 9d) per 1,000 cubic feet. There are at present in the city of Rio about 21,000 thousand houses, of which only 6,900 are now furnished with gas lights. The increase, however, of houses requiring to be so lighted may be taken at about 30 per month. The public lamps exceed 5,000 in number.

The following extracts from the published reports of the Brazilian Company show the progressive increase in the number of burners since the first introduction of gas in Rio:—

	Houses Supplied.	Public Lamps.
1st January, 1855	950	1,487
— 1856	2,026	2,025
— 1857	3,021	2,846
— 1858	3,607	3,419
— 1859	4,309	4,124
— 1860	4,828	4,849
— 1861	5,468	4,858
— 1862	5,962	4,871
— 1863	6,374	4,907
— 1864	6,694	4,926

The net profits for the year 1863 amounted to £64,500, and for the year 1864 to £65,000, or upwards of 10 per cent. on the proposed purchase money, namely, £600,000.

Under the terms of the concession, the Company will be at liberty to introduce into Rio all machinery and raw material necessary to the manufacture of gas free of duty.

The agreement for the purchase of the concessions, and of all the valuable gas works, connected buildings, and property in Rio, provides that the concessionaire shall bear the preliminary and all other expenses of the Company, up to the time of the undertaking being handed over to them, and an Imperial decree obtained, approving the transfer, and recognising the Company as a Societe Anonyme in Brazil. The purchase money will be paid as follows:—£150,000 out of the deposits on allotment, and the balance, £450,000, on 30th June next, or so soon thereafter as the property is handed over to the Company and the Imperial decree obtained. The Company has the option of paying one-half of the purchase money in fully paid-up shares.

The profits of the undertaking will accrue to the shareholders as from 1st July next.

The subscribers will thus acquire a valuable property and an existing business, the net profits of which (without taking into consideration the progressive increase which past experience shows may be certainly expected) will yield them an immediate return on their capital exceeding 10 per cent. per annum.

Copies of the concession and of the agreement of purchase, together with the Articles of Association, can be inspected at the offices of Messrs Bircham, Dalrymple, Drake, and Co., 46 Parliament street, Westminster.

Prospectuses and forms of application for shares can be obtained of Messrs Maua, Macgregor, and Co., Gresham house, Old Broad street; and of Messrs P. Cazenove and Co., the brokers of the Company, Threadneedle street.

FORM OF APPLICATION FOR SHARES.

To be retained by the Bankers.

No.——

To the Directors of the Rio de Janeiro Gas Company (Limited).

Gentlemen,—Having paid to your Bankers, the London and Westminster Bank (Lothbury), the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot to me, and I also agree to pay on allotment the further sum of £4 per share allotted, and I authorise and require you to insert my name on the register of members for the number of shares allotted to me.

Usual Signature .....
Name in full.....

Profession.....
Date .....

THE RIO DE JANEIRO GAS COMPANY (Limited).

Notice is hereby given, that no further APPLICATIONS for SHARES in this Company will be received from London applicants after this day, Saturday, the 25th Feb., and from country applicants after Monday, the 27th instant.—By order,

JOHN DU BOULAY, Secretary (pro tem.).

Temporary offices, 1 Gresham House, Old Broad street, February 25, 1865.

The IMPERIAL MERCANTILE CREDIT ASSOCIATION (Limited), are authorised to offer 30,000 shares of the VARNA RAILWAY COMPANY, on the terms of the following prospectus:—

THE VARNA RAILWAY COMPANY (RUSTCHUK to VARNA).

Constituted by Statutes under the law of Turkey, with Limited Liability.

Concession 99 years.

Share capital £900,000, in 45,000 shares to bearer of £20 each, bearing a minimum interest of 5 per cent. per annum guaranteed by the Turkish Government.

15,000 shares have been taken, 9,000 of which are under offer in Turkey according to the terms of the concession.

Price of issue of the shares £12.

Deposit on application, £1; ditto on allotment, £2.

Calls not to exceed £2 10s per share, at intervals of not less than three months.

At this price of issue, shareholders will receive 8⅓ per cent. per annum, and interest will be allowed at the same rate on all payments. Shareholders may pay up in full.

The shares will be redeemed at par by a sinking fund guaranteed by the Turkish Government by annual drawings, to commence the year after the opening of the line, viz.:—

12,500 shares during the first 33 years. 20,000 during the second 33 years. 12,500 during the third 33 years. Total, 45,000.

The holder of each share drawn and paid off at £20, will receive a dividend warrant entitling him to participate in all profits earned by the railway in excess of the guaranteed interest during the remaining term of the concession.

To estimate the advantages offered to the shareholders, in addition to the minimum interest of 8⅓ per cent., and the profit derived from the annual drawings at par, it is necessary to state that the railway is estimated to yield from 10 to 12 per cent. per annum on the entire capital expended of £2,000,000; of this amount, £1,100,000 has been provided by means of obligations at the rate of 7½ per cent. interest, and redeemable by the sinking fund, likewise guaranteed by the Turkish Government; the entire profits above the aggregate guarantee will, in consequence, become divisible among the shareholders, representing a capital of £900,000, and taking into account the price at which the shares are issued, each 1 per cent. of surplus profit earned on the total cost would give the shareholder an addition of nearly 4 per cent. on the amount paid by him.

Messrs Peto, Betts, and Crampton have contracted to construct the railway and works, and provide rolling-stock, for a sum which will leave a sufficient margin in the hands of the Company to pay interest during construction, and to meet all contingencies, thereby ensuring that under no circumstances shall the expenditure exceed £2,000,000.

The railway was commenced last June, and great progress has been made in all branches of the works. Fifty miles of earthwork are ready for laying the rails, and the contractors have made arrangements to open the entire line in the autumn, 1866. For this purpose all the rails will be delivered this year.

BANKERS—Messrs Roberts, Lubbock, and Co.

SECRETARY—J. F. Walsh, Esq.

BROKERS—Messrs P. Cazenove and Co.

Offices—15 Angel court, E.C.

This Railway will connect Rustchuk, on the banks of the Danube, with Varna, the principal port in the Black Sea, and will traverse for the entire distance of about 138 English miles most populous districts in the province of Bulgaria. This province remits yearly to the Turkish Government a net revenue of about One Million sterling, and provides Constantinople with cattle, timber, grain, and other produce.

The maps attached to the prospectus will show the route of the proposed railway, and the great saving of time and distance, both by sea and land. It will form the shortest and most convenient route to and from the East. It will also provide the cheapest and most direct means of communication between the Moldo-Wallachian Principalities and the countries of the upper Danube and the Port of Varna. The journey from London to Constantinople will be accomplished in four and a half days.

The Bay of Varna is one of the best natural harbours in the Black Sea, from whence there is a large exportation of grain and other merchandise at all seasons of the year. The Turkish Government are now negotiating with a company for the construction of a breakwater and quays within the bay. When these are completed the harbour of Varna will be one of the finest in Europe.

Already a pier has been constructed, extending into 16 feet depth of water, where vessels of large tonnage may load and deliver in connection with the railway.

By means of the annual payments guaranteed by the Turkish Government, the entire share and debenture capital will be redeemed within the term of the concession.

The Turkish Government have the option of purchasing the railway on terms favourable to the Company, at the expiration of 50 years.

For further details, reference is made to the original firman, convention, cahier des charges, plan for redemption, and other official documents, which, with translations, are open for inspection at the Company's office.

Applications for shares in the annexed form to be left with the bankers upon payment of the deposit of £1 per share. If no allotment is made the deposit will be returned in full, and if a less number be allotted than is applied for, the deposit will, so far as required, be applied towards the payment due on allotment.

Prospectuses and forms of application for shares may be obtained at the office of the Imperial Mercantile Credit Association (Limited), 95 Bishopsgate street, of the Brokers, at No. 52 Threadneedle street, or at the offices of the Company, 15 Angel court.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,500,000; reserved fund, £444,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, and Sydney, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of Remittances between the above-named dependencies.

They also receive Deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates, which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2,
Threadneedle street, London, 1865.

BANK OF NEW SOUTH WALES.

Effingham Wilson, 11 Royal Exchange.

A NEW MONTHLY SCIENTIFIC JOURNAL.

Messrs Cassell, Petter, and Galpin, beg to announce that they will publish, on the First of March, NUMBER ONE of a NEW MONTHLY FIRST-CLASS SERIAL, to be entitled

THE SCIENTIFIC REVIEW, and JOURNAL of "The INVENTORS' INSTITUTE."

The main objects of the SCIENTIFIC REVIEW will be to record lucidly and faithfully, from month to month, the progress of Science both at home and abroad, to point out the bearing of recent discoveries on those previously made, and to keep their practical utility most steadily in view.

It will place before the public not only home inventions, but those of other nations, and will endeavour to throw an interest over these matters, by setting them forth in such a manner that the general public may readily understand them.

Among the boundless variety of subjects which will find a place in its pages, every branch of production, every department of scientific research, having a practical tendency, will be duly noticed.

"The Scientific Review and Journal of the Inventors' Institute" will also form a medium of intercommunication between scientific men throughout the world: and an opportunity will be afforded them of canvassing the merits of rival inventions, provided the public good is the sole object of disputation.

It will, moreover, be the accredited organ of "The Inventors' Institute," the objects of which are:—"To protect Inventors' interests, and defend the privilege of obtaining Her Majesty's Letters Patent"—"To promote improvements in the Patent Laws"—"To facilitate the diffusion of information with reference to inventions, and other subjects beneficial to Inventors and Patentees."

Each number will generally contain one or more reviews of scientific works; descriptions of new or improved machines, processes and apparatus, with illustrations when considered necessary; special articles on scientific topics of current interest; a résumé of the progress of manufactures and practical science in all parts of the world, collected from materials furnished by special correspondents, or from the most recent scientific periodicals, &c., whether at home or abroad; a detail of important patents asked for or secured; the meetings of scientific societies; and answers to correspondents. Inventors and others seeking information may rest assured that their communications will receive early attention, whenever the questions proposed are of public interest.

"The Scientific Review and Journal of the Inventors Institute" will be edited under the supervision of able and experienced men, and will be published on the first of every month, price 6d, or stamped 7d.

Subscribers desirous of receiving copies each month at their residences, will secure their delivery post free by remitting a year's subscription of seven shillings to the publishers.

All communications intended for the Editors to be addressed as follows:—The Editors of "The Scientific Review," Messrs Cassell, Petter, and Galpin, La Belle Sauvage yard, London, E.C.

La Belle Sauvage yard, London, E.C.,
February, 1865.

ROYAL AGRICULTURAL SOCIETY of ENGLAND.

Meeting at Plymouth and Devonport, 1865.

Stock and Implement Prize Sheets are now ready, and will be forwarded on application to

H. HALL DARE, Secretary.

12 Hanover square, London. W.

FINANCIAL AGENCY OF PERU,

57½ Old Broad street.—COUPONS of ECUADOR and NEW GRANADA BONDS, payable in New York, U.S.A.—DUE COUPONS of the above Bonds will be PAID, at the exchange of four shillings per dollar, on application to that effect to J. Thomson, T. Bonar, and Co., 57½ Old Broad street.

The Coupons, with a list in numerical order, must be left for examination three days previously at the office of Lewis H. Haslewood, Founders' court, Lothbury.

CONSOLIDATED PERUVIAN FIVE PER CENT. LOAN.

£10,000,000 of stock bearing interest at the rate of Five per Cent. per annum, from the 1st day of January, 1865, payable half-yearly in London and Paris.

The Legislature of Peru, on the 17th of April, 1864, in virtue of provision 5, article 107 of the constitution, decreed that a loan of the equivalent of fifty millions of dollars should be raised for the service of the State, and his Excellency the President of the Republic, Don Juan Antonio Pezet, under sign manual, on the 7th July, 1864, accredited special commissioners to proceed to London to negotiate such loan to the amount of ten millions sterling.

For this loan, bonds will be issued to bearer of the several sums of £2,000, £1,000, £500, £250, £150, £100, bearing interest at the rate of £5 per cent. per annum from the 1st January, 1865, under the signature of his Excellency the accredited Peruvian Minister at London and Paris, Don F. L. Barreda, and with the countersignature of J. Thomson, T. Bonar, and Co.

To the bonds are attached warrants or coupons for the half-yearly dividends at the rate of £2 10s for each £100, payable on the 1st July and 1st January, at the office of J. Thomson, T. Bonar, and Co., in London; or at the office of J. Homberg and Co., Paris, in francs, at the option of the holder.

A sinking fund of £4 per cent. per annum, say of four pounds sterling for every one hundred pounds of the stock of this loan, is to be applied, half-yearly, on the 1st October and on the 1st April, for its redemption, together with the interest accumulating on the bonds redeemed, from time to time, by purchase in the open market at or below par, and, if above, then by drawing at par. The first redemption will take place on the 1st October, 1865.

The bonds still remaining in circulation of the Peruvian Loan and Consolidation of 1862, as also the Ecuador and New Granada Dollar Bonds, in like manner remaining in circulation, will be accepted in reduction of payments to be made by subscribers to this loan, and for such amount of these bonds as shall not be presented, a corresponding amount of this loan will be set aside, so that the aggregate amount of bonds, ranking as a first charge on guano, shall be limited to £10,000,000.

Further, one million pounds stock are reserved out of the ten millions of this loan for conversion and extinction of the Six per Cent. funded internal debt of Peru.

As security for this loan, besides transferring to it all the securities appertaining to existing bonds, the Peruvian Government specially hypothecates, in addition to all its revenues and resources, such quantity of guano on the Chincha Islands and elsewhere, as shall fully represent in value the capital sum and interest of this loan; and engages that there shall be, at all times, either in Great Britain and its dependencies or on the way, a sufficient supply of guano to ensure the punctual payment of the interest and redemption of this loan for a period of two years in advance, and on the payment of each successive dividend, public notification be made to this effect.

J. Thomson, T. Bonar, and Co., the agents and actual consignees for the sale of guano in Great Britain and its dependencies, hereby declare that the stocks of guano now deposited in this country and on the way, at their present market value, guarantee the punctual payment of the interest and the redemption fund of this loan up to the 1st April, 1867, inclusively.

In virtue of the instructions of his Excellency Don F. L. Barreda, Minister of Peru at London and Paris, J. Thomson, T. Bonar, and Co., are now ready to receive applications for the remaining £9,000,000, say nine millions pounds sterling of the stock of this loan, on the following terms and conditions:—

The subscription price is £88½ per cent. for every £100 of stock, less £2 10s to deduct for dividend coupon falling due 1st July, or say eighty-one pounds for every £100 stock, payable at the option of subscribers, in either of the following modes, viz.:—

Wholly in cash,

Or partly in cash and the remainder in

Bonds of the loan of 1862, or in Ecuador and New Granada Dollar Bonds to the extent of £100 of said bonds for every £200 of stock of this loan allotted:

Bonds of the Loan of 1862, with all undue coupons, now attaching thereto, at and after the rate of ninety pounds sterling cash for every £100 of said bonds, and

Ecuador and Granada Bonds, with all coupons unpaid from the 23rd November, 1862, inclusively, and coupons attaching, at the rate of ninety-one pounds five shillings sterling for every 100 dollars of stock, subject to the deduction of £2 5s per £100 for every coupon detached therefrom, and the amount of such bonds will be received in payment of instalments falling due from 12th April inclusively:

Or, finally, the said bonds will be received on application, as deposit, from subscribers, say £100 in bonds for every £280 of stock of this loan applied for, and such deposit will assure to subscribers the full allotment of their application.

Detailed prospectuses and forms of application may be obtained of Messrs J. Thomson, T. Bonar, and Co., 57½ Old Broad street, London; Messrs J. Homberg and Co., Paris; and of Messrs Mullens, Marshall, and Daniell, 3 London street, London; Lewis H. Haslewood Esq., Founder's court, Lothbury, London.

Powers may be seen at the offices of Messrs W. and H. P. Shaw, 24 Gresham house, Old Broad street, E.C.

No APPLICATIONS will be received after 2 o'clock on Tuesday, the 28th February, 1865.

ESTABLISHED 1845.

THOMAS FORSHAW,

Purchasing Agent and Packer,

5 Marsden street, Manchester.

Of all sorts of Manchester, Scotch and Yorkshire goods—of Steam Engines—Water Wheels—Bullock Gear—Mill Gear—Cotton Gins—Corn Mills—and Cotton Seed.

Perfect safety from fire.
Fire open or not, just as wanted.
Ventilation.
Any fuel can be used.

May be seen daily in occupation, and full particulars obtained, at 17 Great Portland street, Oxford street.

FOR SALE.—THE ECONOMIST

from commencement in 1843 to 1863 (Vol. for 1845 wanting), bound in boards.—A. Z., 18 Exeter street, Strand.

In the heart of the City of London.—Very valuable and important Freehold Building Site, within a few yards of the Bank, and adjoining the proposed New Auction Mart, covering an area of 2,351 square feet.

MESSRS DEBENHAM & TEWSON

have received instructions to SELL by Auction, at the Guildhall Coffee House, in the City of London, on Tuesday, March 7, at One punctually, in One Lot, the very valuable FREEHOLD PROPERTY, land tax redeemed, comprising Nos. 18, 19, and 20 Tokenhouse yard, containing an area of 1,780 square feet, exclusive of the forecourt. The purchaser will also have the option of taking at a given price, the freehold site lately occupied by No. 21 Tokenhouse yard; the whole comprising an area of 2,351 square feet, exclusive of the forecourt, and possessing an imposing frontage of upwards of 84 feet, adjoining the site of the proposed new Auction Mart, the building of which will shortly be commenced. The value of this site for the purpose of one or more banks, insurance, financial, or other public companies, can hardly be over-estimated, and for the erection of first-class offices it offers a fine investment, as the rentals to be obtained in this central and yet quiet position, within a few paces of the Bank of England, the Royal Exchange, Lloyd's, and the Stock Exchange, would probably be equal to any in the City of London. Immediate possession could be given, and the erection of any new buildings could proceed simultaneously with the new Auction Mart, the designs for which can be inspected at the office of G. Somers Clarke, Esq., Architect, 20 Cockspur street. Two-thirds of the purchase-money can, if desired, remain on mortgage for a term of years.—Particulars, with plans, may now be obtained of H. Fletcher Vallance, Esq., Solicitor, 12 Tokenhouse yard; and of the Auctioneers, 80 Cheapside.

PREVENTION OF FRAUD.—SLOPER'S PATENT.

TO BANKERS and TRADING FIRMS.—For Crossing Cheques—Dating, numbering, and marking documents—and for TRADE MARKS—by perforation—Simple, instantaneous, and not to be tampered with.

Offices—Walbrook House, E.C., London.

BANKERS AND MERCHANTS OF ENGLAND,

—When will you believe that no money depository is secure against the present race of modern "cracksmen" but GEORGE PRICE'S Treble Patent Safes, with his Patent CASE-HARDENED DRILL-PROOF DOORS, proved to be proof against gunpowder, picklocks, and all burglars' drills and other tools and implements? Price-lists post free from George Price, Cleveland Safe and Lock Works, Wolverhampton.

W. S. LAWTON, WINE

Merchant, 35 Trinity square, Tower hill, E.C., begs to offer BRUCE'S best old VIDONIA at 30s per dozen; also best Marsala, 24s; old Canary Sack, (pints) 28s; fine old Bucellas, 36s; Sound Sparkling Champagne, 30s; Clarets, from 14s; Ports and Sherries, 30s to 72s; fine old Cognac Brandy, 54s to 66s per dozen; (bottles included). Detailed Price Lists post free.

WHERE SHALL WE DINE?

THE LONDON AND CHINA TELEGRAPH,

published on arrival of the Mails, via Marseilles, about the 4th, 13th, and 27th; and the LONDON and CHINA EXPRESS, on the departure of ditto, on the 10th, 17th, and 26th of each month.

Office—12 George yard, Lombard street, E.C.

THE CAPE AND NATAL NEWS,

published fortnightly on arrival of the Mails; and ENGLISH NEWS on the departure of the Mails, on the 9th and 26th.

Office—12 George yard, Lombard street, City.

FLUTES.—THE NEW MODEL

FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—

At Messrs Keith, Powse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS,

by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES,

by Nicole Freres.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.

48 Cheapside.

AUDITORS—Messrs Carttar and Harper, Skinner's place, Size lane.

SECRETARY—T. R. Comyn, Esq.

Offices—21 Great Saint Helen's, Bishopsgate street, London, E.C.

ABRIDGED PROSPECTUS.

This Company, incorporated under special Acts of Parliament, with limited liability, has for its objects the purchasing of Dagenham Lake and about 80 acres of land adjoining, and converting the same into docks, wharfs, &c., for the accommodation of all classes of vessels entering the port of London.

Dagenham Lake is situate below Barking (opposite Woolwich Marshes), on the Essex shore of the Thames, from which it is separated only by the river embankment, and has an area of about 60 acres, with great depth of water. The only works necessary to convert it into extensive docks are the partial excavation and embankment of the lake, and the construction of a tidal basin, entrance gates, &c.

The London, Tilbury, and Southend Railway (the lessees of which have promised every facility for both passenger and goods traffic to and from the Docks) passes close to the margin of the Lake, where sidings and a station will be made. The Docks being thus connected with the entire railway system, and only about 23 minutes by rail from, and within a tide of London, will possess all the advantages of the up-river Docks.

Notwithstanding the great extent of the proposed Docks, their superior depth of water and width of entrance, they will be constructed at a comparatively trifling cost. A contract for the completion within eighteen months, has been made with Messrs J. and C. Rigby, of Westminster, and this, together with the cost of the freehold of the Lake and the adjoining lands, containing altogether about 140 acres, will amount to £222,000. The remainder of the share capital, with the amount authorised by the Acts to be borrowed, viz. £50,000, will be applied to the building of warehouses, specially adapted to the different trades, at the Docks, and at the Bishopsgate street or Fenchurch street stations, to which latter such goods as are usually sold from bulk will be immediately sent from the ship's side.

The great extent of wharfage will enable the Company to store timber, guano, petroleum, jute, saltpetre, tallow, and all other goods, at exceedingly moderate rates, besides admitting of their being classified so as to reduce to the minimum the insurance thereon. The Company's lands will be available for the construction of graving docks, patent slips, and other subsidiary works, to promote the general business of the undertaking and the interests of the public; and their small capital will admit of an average reduction in the rates of tonnage, &c., of about 30 per cent., thereby ensuring an extensive use of the docks by all classes of shipping.

As the Company, which can best afford to take reduced rates, is obviously the one having the smallest capital, the Dagenham Dock Company in this respect will be unrivalled. This must be at once conceded on comparing its capital with those of existing Docks, viz:—

Name of Dock.	Water Area in Acres.	Capital, including Loans and Debentures. £	Average cost per Acre, including Warehouses, &c. £ s d
London	40	4,938,310	123,457 15 0
St Katherine	11	2,618,653	238,059 7 3
Victoria	80	1,029,798	12,872 9 6
East and West India	129	2,000,000	15,503 17 6
Surrey and Commercial	88	1,276,271	14,502 2 8
Dagenham	60	350,000	5,833 6 8

Nearly one-third of the capital has already been applied for, and prospectuses with forms of application for the remaining shares may be had of the bankers, brokers, or the secretary at the offices; but no application will be entertained unless 1*l* per share has been paid on the number applied for. Should no allotment be made the deposits will be returned as early as possible, without any deduction whatever.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whisky.

HOUSE FURNISHING.—Persons commencing housekeeping, or making additions thereto, are invited to visit the great FURNISHING ESTABLISHMENT of Messrs DRUCE and CO., 68, 69, and 58 Baker street, and 3 and 4 King street, Portman square, the largest showrooms and furnishing galleries in the kingdom, containing a superficial area of 48,000 ft (upwards of an acre in extent), where they can make their own calculations for furnishing a whole house or a single room from the goods before them, which are all marked in plain figures, without the annoyance of being importuned to purchase; or, if preferred, estimates will be given free of charge. From the extent of the premises the immense stock has been arranged in various departments, in the most convenient manner for inspection and selection, and purchasers are invited to view the elegant and extensive assortment of fashionable drawing room, dining room, and chamber furniture, Brussels and other carpets, new fabrics for curtains, &c., particularly a large collection of beautiful buhl and marqueterie cabinets, tables, &c., from Paris, at extremely low prices; also 500 easy chairs, settees, and ottomans, 60 sideboards, 50 sets of dining tables, in fine mahogany, oak, and walnut, manufactured by first-rate workmen of the best seasoned material; capital dining room chairs, covered with real morocco leather, 21s 6d each; 100 bedsteads in various woods and metals, with the superior bedding, 150 wardrobes, and chests of drawers. N.B.—A servant's bedroom well and completely furnished for 84s. List of bedding and bedsteads, and drawings of furniture, sent post free. Messrs Druce and Co. give a written warrantry to all purchasers, and, if required, a reference to persons who have furnished from their establishment. Arrangements made for the delivery of furniture in the country. Down quilts from 5s 6d each.

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments.—

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY.
WOTHERSPOON and CO., Glasgow and London.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly London.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1864.

On Saturday, March 11, *we shall issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of trade, Lists of New Companies, Returns of Prices, Accounts of the Banks of England and France, &c. The object of the Supplement being to place in possession of our readers a Commercial History of* 1864 *worthy of preservation and adapted for reference.*

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

CÆSAREANISM AS IT NOW EXISTS.

That the French Emperor should have spare leisure and unoccupied reflection sufficient to write a biography is astonishing, but if he wished to write a biography his choice of a subject is very natural. Julius Cæsar was the first who tried on an imperial scale the characteristic principles of the French Empire,—as the first Napoleon revived them, as the third Napoleon has consolidated them. The notion of a demagogue ruler, both of a fighting demagogue and a talking demagogue, was indeed familiar to the Greek Republics, but their size was small, and their history unemphatic. On the big page of universal history, Julius Cæsar is the first instance of a democratic despot. He overthrew an aristocracy—a corrupt and perhaps effete aristocracy it is true, but still an aristocracy—by the help of the people, of the unorganised people. He said to the numerical majority of Roman citizens, "I am your advocate and your leader: "make me supreme, and I will govern for your good "and in your name." This is exactly the principle of the French Empire. No one will ever make an approach to understanding it who does not separate it altogether, and on principle, from the despotisms of feudal origin and legitimate pretensions. The old monarchies claim the obedience of the people upon grounds of duty. They say they have consecrated claims to the loyalty of mankind. They appeal to conscience, and even to religion. But Louis Napoleon is a Benthamite despot. He is for the "greatest happiness of the greatest "number." He says, "I am where I am, because I know better "than any one else what is good for the French people, and "they know that I know better." He is not the Lord's anointed; he is the people's agent.

We cannot here discuss what the effect of this system was in ancient times. These columns are not the best place for an historical dissertation; but we may set down very briefly the results of some close and recent observation of the system as it now exists, as it is at work in France. Part of its effects are well understood in England, but a part of them are, we think, but mistily seen and imperfectly apprehended.

In the first place, the French Empire is really the *best finished* democracy which the world has ever seen. What the many at the moment desire is embodied with a readiness, an efficiency, and a completeness which has no parallel either in past history or present experience. An absolute Government with a popular instinct has the unimpeded command of a people renowned for orderly dexterity. A Frenchman will have arranged an administrative organisation really and effectually, while an Englishman is still bungling and a German still reflecting. An American is certainly as rapid, and, in some measure, as efficient, but his speed is a little headlong and his execution is very rough; he tumbles through much, but he only tumbles. A Frenchman will not hurry; he has a deliberate perfection in detail, which may be always relied on, for it is never delayed. The French Emperor knows well how to use these powers. His bureaucracy is not only endurable but pleasant. An idle man who wants his politics done for him, has them done for him. The welfare of the masses—the present good of the present multitude—is felt to be the object of the Government and the law of the polity. The Empire gives to the French the full gratification of their main wishes, and the almost artistic culture of an admirable workmanship, of an Administration finished as only Frenchman can finish it, and as it never was finished before.

It belongs to such a Government to care much for material prosperity, and it does care. It makes the people as comfortable as they will permit. If they are not more comfortable, it is their own fault. The Government would give them free trade and consequent diffused comfort if it could.

No former French Government has done as much for free trade as this Government. No Government has striven to promote railways, and roads, and industry, like this Government. France is much changed in twelve years. Not exactly by the mere merit of the Empire, for it entered into a great inheritance; it succeeded to the silent work of the free monarchy which revolution had destroyed and impeded. There were fruitful and vigorous germs of improvement ready to be elicited—ready to start forth—but, under an unintelligent Government, they would not have started forth; they would

Digitized by Google

have lain idle and dead, but under the adroit culture of the present Government, they have grown so as to amaze Europe and France itself.

If, indeed, as is often laid down, the *present happiness* of the greatest number was the characteristic object of Government, it would be difficult to make out that any probable French Government would be better, or indeed nearly so good, as the present. The intelligence of the Emperor on economical subjects—on the bread and meat of the people—is really better than that of the classes opposed to him. He gives the present race of Frenchmen more that is good than any one else would give them, and he gives it them in their own name. They have as much as they like of all that is good for them. But if not the present happiness of the greatest number but *their future elevation* be, as it is, the true aim and end of Government, an estimate of the Empire will be strangely altered. It is an admirable Government for present and coarse purposes, but a detestable Government for future and refined purposes.

In the first place, it stops the *teaching apparatus*; it stops the effectual inculcation of important thought upon the mass of mankind. All other mental effort but this the Empire not only permits but encourages. The high intellect of Paris is as active, as well represented, as that of London, and it is even more keen. Intellect still gives there, and has always given, a distinctive position. To be a *membre de l'Institut* is a recognised place in France; but in London, it is an ambiguous distinction to be a "clever fellow." The higher kinds of thought are perhaps better discussed in Parisian society than in London society, and better argued in the *Revue des deux Mondes* than in any English periodical. The speculative thought of France has not been killed by the Empire. It is as quick, as rigorous, as keen, as ever. But though still alive, it is no longer powerful; it cannot teach the mass. The *Revue* is permitted, but newspapers—effectual newspapers—are forbidden. A real course of free lectures on popular subjects would be impossible in Paris. *Agitation* is forbidden, and it is agitation, and agitation alone, which teaches. The crude mass of men bear easily philosophical treatises, refined articles, elegant literature; there are but two instruments penetrative enough to reach their opaque minds—the newspaper article and the popular speech, and both of these are forbidden.

In London the reverse is true. We may say that only the loudest sort of expression is permitted to attain its due effect. The popular organs of literature so fill men's minds with incomplete thoughts, that deliberate treatment, that careful inquiry, that quiet thoughts have no hearing. People are so deafened with the loud reiteration of many half-truths, that they have neither curiosity nor energy for elaborate investigation. The very word "elaborate" is become a reproach: it produces something which the mass of men do not like because it is above them,—which is tiresome because it needs industry,—difficult because it wants attention,—complicated because it is true. On the whole, perhaps, English thought has rarely been so unfinished, so piecemeal, so *ragged* as it is now. We have so many little discussions that we get no full discussion; we eat so many sandwiches that we spoil our dinner. And on the Continent, accordingly, the speculative thought of England is despised. It is believed to be meagre, uncultivated, and immature. We have only a single compensation. Our thought may be poor and rough and fragmentary, but it is effectual. With our newspapers and our speeches—with our clamorous multitudes of indifferent tongues, we beat the ideas of the few into the minds of the many. The head of France is a better head than ours, but it does not move her limbs, the head of England is in comparison a coarse and crude thing, but rules her various frame and regulates her whole life.

France, *as it is*, may be happier because of the Empire, but France *in the future* will be more ignorant because of the Empire. The daily play of the higher mind upon the lower mind is arrested. The present Government has given an instalment of free trade, but it could not endure an agitation for free trade. A democratic despotism is like a theocracy; it assumes its own correctness. It says, "I am the representative "of the people; I am here because I know what they wish, "because I know what they should have." As Cavaignac once said, "A Government which permits its principles to be ques- "tioned is a lost Government." All popular discussion whatever which aspires to *teach* the Government is radically at issue with the hypothesis of the Empire. It says that the Cæsar, the omniscient representative, is a mistaken representative, that he is not fit to be Cæsar.

The deterioration of the future is one inseparable defect of the imperial organisation, but it is not the only one,—for the moment, it is not the greatest. The greatest is the corruption of the present. A greater burden is imposed by it upon human nature than human nature will bear. Everything requires the support, aid, countenance of the Central Government, and yet that Government is expected to keep itself pure. Concessions of railways, concessions of the privilege of limited liability,—on a hundred subjects, legal permission, administrative help are necessary to money-making. You concentrate upon a small body of leading official men the power of making men's fortunes, and it is simple to believe they will not make their own fortunes. The very principle of the system is to concentrate power, and power is money. Sir Robert Walpole used to say, "No honest man could be a "Minister;" and in France the temptations would conquer almost all men's honesty. The system requires angels to work it, and perhaps it has not been so fortunate as to find angels. The nod of a Minister on the Bourse is a fortune, and somehow or other Ministers make fortunes. The Bourse of Paris is still so small that a leading capitalist may produce a great impression on it, and a leading capitalist, working with a great Minister, a vast impression. Accordingly, all that goes with sudden wealth; all that follows from the misuse of the *two* temptations of civilisation, money and women, is concentrated round the Imperial Court. The Emperor would cure much of it if he could, but what can he do? They say he has said "that he will not change his men. He will not substitute fleas "that are hungry for fleas which at least are partially satisfied." He is right. The defect belongs to the system, to these men; an enormous concentration of power in an industrial system ensures an accumulation of pecuniary temptation.

These are the two main disadvantages which France suffers from her present Government; the greater part of the price which she has to pay for her present happiness. She endures the daily presence of an efficient immorality; she sacrifices the educating apparatus which would elevate Frenchmen yet to be born. But these two disadvantages are not the only ones.

France gains the material present, but she does not gain the material future. All that gives present industry her Government confers, in whatever needs confidence in future she is powerless. *Credit* in France, to an Englishman's eye, has almost to be created. The *country* deposits in the Bank of France are only 1,000,000*l* sterling; that bank has fifty-nine branches, is immeasurably the greatest country bank in France. All discussions on the currency come back to the *cours forcé*, to the inevitable necessity of making inconvertible notes an irrefusable tender during a revolution. If you propose the simplest operations of credit to a French banker, he says, "You do not remember 1848; *I* do." And what is the answer? The present Government avowedly depends, is ostentatiously concentrated, in the existing Cæsar. Its existence depends on the permanent occupation of the Tuileries by an extraordinary man. The democratic despot—the representative despot—must have the sagacity to divine the people's will, and the sagacity to execute it. What is the likelihood that these will be hereditary? Can they be expected in the next heirs, a child for Emperor, and a woman for a Regent? The present happiness of France is happiness on a short life lease; it may end with the life of a man who is not young, who has not spared himself, who has always thought, who has always *lived*.

Such are the characteristics of the Empire as it is. Such is the nature of Cæsar's Government as we know it at the present. We scarcely expect even the singular ability of Napoleon III. will be able to modify, by an historical retrospect, the painful impressions left by actual contact with a living reality.

THE IRISH DEBATE.

THE debate on Monday night was one of good augury for Ireland. On no previous occasion that we can remember have Irish members been so little irrational and intemperate, or has the House generally shown such a sound and thorough appreciation of the real facts and bearings of the question. Mr Roebuck spoke out some salutary truths, as is his wont,

Digitized by Google

in a not very palatable fashion. His pills are often very wholesome, but he never condescends to gild them. Indeed, we are not sure that he does not like adding a little unnecessary aloes for the sake of pungency. But Mr Lowe's speech was the admirable one of the evening: it was perfect in tone, in principle, and in temper. He placed in the clearest and strongest light the doctrines and the facts in relation to Irish difficulties and distress which have long been familiar to the readers of the ECONOMIST. The originator of the discussion, Mr Hennessy, and most of his countrymen who followed him, wished to pledge the House of Commons to an expression of regret at the extent and continuance of Irish Emigration, and to some vain endeavours to check it by setting on foot artificial public works, in order to keep the people at home,—in other words, to deplore the sole means and the sure means for the restoration of prosperity to Ireland, and to promise to do what in them lay to counteract it. Mr Lowe showed, what we have repeatedly expounded in these columns, that emigration is a matter for congratulation and not for regret: that in comparison with other countries, similarly situated as to soil and climate, with as few great cities and as few extensive manufactories, Ireland is still greatly overpeopled,—the fact being that she numbers considerably more human beings to the available acre than either France or the agricultural portions of England or Scotland;—that the main portion of her chronic distress arises partly from this redundant population, and partly from the attempt to grow cereals where only pasture should be ventured on, because the ripening even of oats is always problematical; that our old Corn Laws helped to stimulate this unsuitable style of agriculture, and that it is the return to a sounder system consequent upon the abolition of those laws that will ultimately rectify the mischief, but must cause a considerable amount of misery and inconvenience in the process.

He then proceeded to explain that, though the decline of population through mortality is, economically considered, an unquestionable evil and an ominous sign, yet such decline, where it arises simply from the transfer of human beings to a more fertile country and a more prosperous labour market, is anything rather than a misfortune;—that to people situated as the Irish are, emigration is a positive and an inestimable good;—a benefit to those who go, inasmuch as they carry their industry from a land where it yields little to a land where it yields much;—a benefit to those who remain, inasmuch as it raises the wages of labour, and is in fact almost the only means by which those wages can be raised. He showed that you ought not to check emigration if you could, and that you could not if you tried, since by no contrivance, by no establishment of public works, how lavish soever were your grant, could you rival the attractions of the labour market of America. The most that an Irishman can hope for in his own country, even if the Shannon were to have a new bed and if all the bogs in Ireland were to be drained, and if England were willing and were profligate enough to advance five millions out of the public purse for the insane attempt, would be that his wages might rise to eighteenpence a day, and that employment might be constant for some years; whereas, by crossing the Atlantic, he earns from half a dollar to a dollar a day, and is sure, if he deserves it, to become a landholder in a few years, and a capitalist in one generation or in less. Is he a wise man who, in the face of these contrasted prospects, expects to keep the intelligent Irishman at home? or is he a kind or a good man who would try?

Mr Lowe next dealt with the cry that the misery of Ireland is traceable to over-taxation, and showed as plainly as possible that this solution of the matter has not one atom of real groundwork for its plea. It is true that Ireland is now *more* equally taxed, in comparison with England, than she used to be,—that is, that she has fewer exemptions than she used to have. But she has several exemptions still. England still pays taxes which Ireland does not;—assessed taxes, taxes on locomotion, the rate and the valuation for the income tax, are appreciably lighter in Ireland than with us. But there, as here, the rich man only pays on his income and his property, and the poor man only pays on his expenditure. There is no tax on his cabin, there is no tax on his clothes, there is no tax on his food; and if he consumes tea, and sugar, and whiskey, and tobacco, he pays just what the English labourer pays, and not one farthing more. The *Hibernicism* of the idea that a poor country ought to be more lightly taxed—taxed according to a different tariff—than a rich one, Mr Lowe thus lucidly clears up:—

"The argument was that the taxation of Ireland was equal "to the taxation of England; that Ireland was poor and "England was rich, and that Ireland could not bear the same "taxation that England could bear. *That argument would be "very good if taxation were adjusted geographically*—imposed "on the two countries in the same proportion per mile. But "our taxation is regulated on a very different principle; every "man in Ireland, like every man in England, is taxed accord-"ing to his ability. He either pays a certain per centage on "his income, or if the tax be on commodities, it depended "entirely on his expenditure what he paid; and therefore the "taxation was adjusted to *individuals*. When we speak of "Ireland, therefore, as a poor conntry, we must remember that "it is not Ireland that pays the taxes, but the people of "Ireland; and the argument then comes to this—that when "a rich man lives in a poor country he ought to be more "lightly taxed than when he lives in a rich country, although "in the former case his money probably goes further."

Lastly. Mr Lowe reminded the Irish members of one great cardinal truth, which, if it could be once fairly ingrained into the understandings of the nation, would assure us that the day of Ireland's regeneration is indeed at hand. Two operations are needed to bring prosperity to the sister island—the efflux of redundant hands, and the influx of needed capital. The two together would suffice, in half a generation, to change the whole face of the country, and render it in truth a green and smiling land. The surplus population *is* flowing out; the requisite capital is not flowing in. And why not? British capital is abundant and is enterprising. It goes everywhere else, why is it so shy of going to Ireland? Simply because it loves peace and dreads disturbance; and because Irishmen—not in Ireland only, as Mr Lowe reminded us, where English misgovernment and animosity towards England are often pleaded as a cause, but in Australia and Canada likewise, where the idle excuse cannot be set up—are prone to riots, to turbulence, to outrage. "Here is Ireland," said he, "divided from "us only by an arm of the sea, to be crossed in four hours, "hungering and thirsting for money, yet money will not go "there. Well, sir, honourable gentlemen may be very elo-"quent, but capital cannot be cajoled. They may menace, "but capital cannot be coerced. She is a very coy, discreet, "retiring nymph. She flings herself into the arms of the in-"dustrious citizen, but she shuns the embrace of the fiery and "brilliant agitator. In this case Ireland must minister unto "herself. *It is the fault of the Irish nation* that those who "have the disposal of English capital do not feel secure in in-"vesting it in Ireland."

A somewhat curious return has just been laid before Parliament, showing the taxation per head in Great Britain and Ireland respectively at different specified dates since the commencement of the century, showing that though the contributions of individual Irishmen have greatly increased of late years, they are still less than half those of Englishmen:—

TAXATION PER HEAD OF POPULATION.

	Great Britain.			Ireland.		
	£	s	d	£	s	d

MR GLADSTONE'S ASSURANCE AND ANNUITY TABLES.

MR GLADSTONE has just presented to Parliament his tables for selling small deferred annuities or assurances to the poor. They are worth a little study. The day will certainly come—may possibly come while Mr Gladstone is alive—when the greatest of undeveloped economic forces the principle of insurance, backed by the State guarantee—*i. e.* of insurance which really insures—may be applied upon a somewhat extensive scale. There are thinkers, we know, who believe—we are not sure that Mr Gladstone does not believe—that the great campaign against pauperism which it will be the work of the next generation to wage, can best be fought out with this weapon; that it is stronger and more applicable than any yet formed—than, for instance, peasant proprietorship; that it offers the link which is to bind together the two necessities

Digitized by Google

of civilisation, the unlimited right of individuals to accumulate, and the claim of the masses to a high degree of physical comfort and ease. Those thinkers may be in the wrong, probably are, for, after all, the world is governed by moral laws as powerful, though not as definable, as economic principles, but they have one considerable fact in their favour—assurance can do a good deal more than it does do. It is conceivable, though it may not be probable, that a system of assurance could be so worked as to supersede all existing forms of taxation, and combine the direct taxation for which theorists sigh with the indirect taxation practical men accept as indispensable *and* the voluntary taxation of which dreamers have dreamed dreams. It is conceivable, and very much more possible, that assurance may be so used as to meet almost all those contingencies which we call casualties, and which so very greatly baffle men's efforts to regulate their affairs by an unchangeable law. The success of a company which insures against accidents gives light on that point, for if accident can be compensated, why not sickness—the benefit clubs do that—or loss of tools—there are societies trying that—or defects of character—the Guarantee Society thinks of that—or even sudden absorptions of capital—against which, in one department of life, Lloyds succeed in providing? It is, in short, conceivable—and we only say conceivable, for thinkers have never yet had to deal with the datum of a race *all* of whom were of full developed intelligence—that insurance might be made to realise that assistance given by the whole to the individual, and by the individual to the whole, that brotherhood in action though not in sentiment of which the only *original* French economists, the dreamy persons called Socialists, St Simonians, Fourierists, Icarians, and what not, have dreamed somewhat silly but still wide and novel dreams. Mr Gladstone has applied the principle in a limited, it may seem a small way, but yet in one which covers a very extensive area.

We are not quite sure that the extent to which his plan may be developed is yet quite appreciated. It is a real blow at pauperism. The fundamental idea of his scheme for small annuities is that, if perfect, or nearly perfect, security can be obtained for the savings of thrift, *and* if the poor can be induced to mortgage the period of full work against the period of forced idleness, much of the misery of proletaire life —of trade based upon no capital but the muscles—may be prevented. The State can grant the first datum, a security which is nearly perfect, and which is not limited in time, though it cannot grant the second, the willingness to postpone the present to the future. To grant the first, however, efficiently and permanently, it must grant it without injuring its own resources, and Mr Gladstone has therefore had tables prepared, showing to all men what they can secure by economy, without asking anything from anybody except the certainty of implicit faith. He may, indeed, in his anxiety for permanence, have overdone the thing a little. The Treasury, we perceive, in selling low assurances and small annuities—in bringing science that is to bear upon the savings of the masses—has guarded itself at least sufficiently well. The first rule laid down by Sir A. Spearman, was that interest should be calculated at three per cent., which, as Consols are not likely to rise soon above ninety, is a profitable rate to Government. Then the table taken for basis is the Registrar-General's life return of the whole population, which includes the well-off classes, and is, therefore, as far as regards deferred annuities, a very safe table to calculate from, while, as regards life insurance, the dangerous trades and all visibly bad lives are summarily struck out. Then ten per cent. has been added to all premiums for the cost of collection, and, whenever they are paid oftener than once a year, twenty per cent., which, as the State is not supposed to be seeking profit, is, to say the least, a decidedly prudent form of calculation. The error, if there be one, however, is on the right side, and we may examine with safe consciences the results which, under these strict limitations, may be secured by thrift. We say with safe consciences, because it is quite clear that the advantages purchaseable under these tables are the least to be secured for the money; that the taxpayers are not giving anything; that the Annuity Bill, so far as it may hereafter take the place of the Poor Law, has at least the advantage of being entirely self-supporting.

There are a good many tables in the book laid before Parliament, but all of them are reducible to two. The assurance tables enable a man to provide for his family by securing a sum at death (*not* an income—that improvement would have been a complication), and the deferred annuities to guard himself against old age. The former will not be the most popular now, though the better class of artisans begin to be very anxious about the fate of their families, but it may be treated first. To a workman's family £50 in cash at death means a good deal, means, in fact, nearly two years' maintenance, time to "turn round" and see what is best to be done, without sacrificing furniture, or turning out of doors. Well, if a workman resolves, as a middle-class man usually does, to begin payment at marriage, say 25, the demand on him will be less than sixpence a week. Weekly payments are not favoured by the tables, though they are, as we gather, to be allowed; but, according to table 5, a monthly sum of two shillings, beginning at 25, will secure at death, £52 11s 10d. Taking sixpence a week as the payment, the rates are :—

Age	Sum at Death. £	s	d
20	59	8	5
25	52	11	10
30	46	1	10
35	39	17	10
40	34	1	10

The young man who at 25 cannot afford sixpence a week, had better not marry, and Mr Gladstone therefore offers him a means, beyond all risk of failure, or fraud, or people's votes, of placing his family as far out of pecuniary risk as an average professional man's family is—that is of securing a certain income for two years. He may do it in many other different ways, may pay down a sum at once—it is 19*l* 19s 4d at 25 for 50*l*—or may pay a sum *and* weekly allowance, but at the worst he can pay the sixpence, and death is *pro tanto* struck out of the list of the causes of pauperism.

The rates are higher for deferred annuities. They are not high for men even apparently, but "old women never die" in the opinion of insurance offices, and the rates for the two sexes run to a high average. We take it that the working man reasoning about things usually expects to find himself declining somewhere about sixty. At all events, if he is not, he will be very glad of a help to wages, and it must be remembered that throughout these tables the annuity is a purchased right recoverable at law, and not dependent on medical certificates, or superannuation, or anything else except the contract. Taking the age of marriage, 25, as the time when a man settles himself, the workman will have to pay a shilling a week in order to secure himself a life annuity of 8s 6d a week after sixty. If he can spare only that he will be but just off the Union, but if he can spare 8s a month he gets 17s 4d a week or 40*l* 1s a year, which is comparative competence. The rates, always accepting sixty as the age at which a man will want his pension, and eight shillings a month as his payment, are :—

Age	Monthly Government Pension at Sixty. £	s	d
15	5	8	11
20	4	3	9
25	3	3	5
30	2	7	3
35	1	14	4
40	1	4	0

Women get for the same payment, and at the same time, as nearly as possible, *one clear third less*, as they are expected to live longer.

The drift of the tables is therefore this. A man who marries at 25, and will invest half-a-crown a week with Mr Gladstone, will at sixty have a life annuity of 40*l* a year, and at death 52*l* bequeathable to anybody he likes, will in fact be with his family pretty fairly beyond want. Any master, moreover, or employer, can by that payment of half-a-crown secure to his foreman, or clerk, or other servant, 50*l* a year, and can, for what we see, sell the policy if his servant leaves him or is discharged—a point which wants more particulars. The saving of half-a-crown a week supersedes the Union. We do not expect, of course, that it *will* supersede the Union, that men will grow wise all at once, or learn to distrust benefit clubs—which moreover pay for sickness—or even avoid the gin shop, but the State can wait a long while very patiently indeed, education is advancing, there is the machinery ready to be used, and there has been no such stroke levelled at involuntary pauperism in our time.

SIR GEORGE GREY'S PRISON BILL.

We hope we are beginning to see light on the weary subject of Criminal Management and Prison Discipline. Sir George Grey has at last taken a step, and a decided step, in the right direction. From what is now proposed to be done the public may now gather what needed doing, and will probably be not a little amazed that it was not done long years ago. Perhaps it is not too much to assume that the discontinuance of transportation to Western Australia, our last convict colony, which has just been forced upon the Government, has awakened them to the necessity of grappling with the whole question. Now that we shall be obliged not only to provide prison accommodation for three or four thousand more ruffians of the worst class, but to face the fact that *all* our ruffians—all at least whom we do not hang or imprison for life—will in future sooner or later have to be turned loose among ourselves, it becomes a matter of prime and pressing necessity, a matter which concerns our own peace and safety, a matter which comes home to our own business and bosoms, to try if we cannot contrive to check their multiplication, to drive them from their ruffianism, or in some way or other secure ourselves against their outrages and depredations.

The first step is to see that imprisonment shall be a real punishment; that prisons shall neither be comfortable refuges for such criminals as are unlucky enough to be caught, nor schools where they may be perfected in crime. Hitherto they have been too often one or the other, and not unfrequently both. It is notorious to all who have attended to the subject, and was made public by the Report of the Lords' Committee on Gaols in 1863, that in many of our borough and county prisons there was no separation—so that every new inmate, however young or comparatively innocent on entering, was certain to be hardened in iniquity and a master of his craft before leaving;—that there was nothing that could be called hard labour—and therefore nothing beyond the mere confinement, and this made comfortable enough, which could truly be called penal;—and that the dietary was not only ample, but was improved precisely in proportion to the length of the sentence,—*i. e.* to the heinousness of the offence. Yet these prisons were duly inspected and reported upon, and animadverted upon sometimes severely enough; but still the evils continued, the anomalies were uncorrected, and the Government went on paying one-fifth of the cost of these nurseries of crime to the amount of 100,000*l* a year.

But another great mischief prevailed. There was no uniformity of system whatever in the different gaols of the Kingdom. Each set of Magistrates and Visiting Justices did just what was right in their own eyes. In one gaol a prisoner was allowed to follow his own trade; in another, employment or labour was regarded not as a punishment but as an indulgence; in one prison "the crank" meant 7 lbs, in another 12 lbs. Dietaries, of which criminals think much, varied yet more extensively;—some gaols allowed 36 ounces of meat a week, others allowed none at all;—some allowed 30 ounces of bread; others 224 ounces and so on. The result of all this was that professional offenders grew to have their own favourite winter residences, and committed their crimes, if they did not manage their detections, in those districts where prison discipline was most relaxed and prison fare most generous.

The purpose of Sir George Grey's Bill is to remedy the more glaring and mischievous of these anomalies. We have given some notion of the degree to which Reform is needed; we may further state the numbers whom this reform will affect. The average number of prisoners confined in the gaols of England and Wales (other than convict or military prisons) in 1863 was 18,806; the largest number at any one time was 23,293; but as the great majority are sentenced for short periods, this gives no adequate conception of the number passed through our prisons every year:—the total committals in 1863 were 144,519. How this enormous number are dealt with in prison, therefore, obviously becomes a matter of the greatest possible moment.

The first point to secure is of course *separation*. This is the indispensable basis of any decent system of prison discipline. Without it prisons are seldom places of punishment, never of reformation, always places of demoralisation, and direct fosterers of crime. The Bill provides that provision shall be made to secure to every prisoner a separate sleeping cell at night, complete severance from all communication with other inmates by day, and fit quarters for "solitary" confinement, when that is ordered as a distinct punishment, or as part of the ordinary sentence. Of all parts of prison discipline, criminals dread solitude and separation most, as well as profit by it most, where not so hardened as to render all amendment hopeless.

The next point is to secure that prisoners generally, and particularly those specially so sentenced, shall undergo what really is "hard labour." And labour, therefore, is *defined*, we believe for the first time; and is made to comprise the Treadwheel, Shot-drill, Crank, Crank Pump, Stone-breaking, &c. Moreover, the Bill fixes not only a daily *maximum* but a daily *minimum* of hard labour for each prisoner, during the earlier portion of his sentence, to be proportioned to the length of such sentence; and it is only after this has been undergone for the specified time that the prisoner, as a reward for good conduct, is to be *promoted* to the comparative ease and dignity of "industrial occupation,"—at the discretion of the Visiting Justices.

In reference to the third point, that of diet, the Home Secretary does not propose the *enforcement* of any specific rules; but he has forwarded to the different Quarter Sessions a "progressive scale," recommended by a medical committee of experienced persons, which it is hoped will be generally adopted. Much, however, in reference to all details is wisely left to the local authorities; but the outlines of an excellent system are sketched out and made obligatory; they are such as were strongly urged by the Lords' Committee above alluded to; and have the additional recommendation of having been already practically introduced and fully tested at Winchester and elsewhere, under the direct supervision of Lord Carnarvon and Sir Walter Crofton; so that no one can object to the scheme as merely theoretical.

If we had any unfavourable criticism to make upon the Bill, it would be that its provisions are perhaps scarcely adequate to produce the effect required. The means for enforcing the requisitions of the Bill, are redolent of what appears almost excessive patience and timidity. But no doubt County and Borough Magistrates are difficult parties to deal with, and Quarter Sessions are powerful bodies, singularly jealous of dictation, and not always amenable to advice. They need no doubt to be handled with deference and caution; and public opinion may perhaps do what positive law might be unable to effect. By clause 32, it is enacted that the Government allowance shall be withheld from all prisons which fail to comply with the requisitions of the Act; and clause 33 gives power to the Secretary of State, but only after *four* successive years of obstinate default, to close such prisons as are unfit and inadequate, and charge upon the county or borough rates of the defaulting district the cost of transferring and providing for its prisoners elsewhere.

We trust, however, that the Bill, with some modifications and additions, will be allowed to pass and to come into operation as speedily as may be. It is, as we have said, a decided step in advance; and in connection with the amended Penal Servitude Bill of last session, shows what may in time be effected, even against official prejudice and inertia, by a few earnest reformers, resolute in temper, pertinacious in purpose, and right in principle.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 2nd inst. The return for the previous week is added:—

DEBTOR.	March 2, 1865. f c		Feb. 23, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0

The return of the Bank will be proclaimed favourable, since it presents a new augmentation within the past week of 9,825,000f in the stock of coin and bullion; but in reality it ought to be considered unsatisfactory, since the accumulation of cash and metal has now exceeded what may be regarded as reasonable limits, and since in the discounts there is a falling off of 15,083,000f—a sad proof of stagnation in business. The note circulation has declined 11,648,000f. In the deposits there is an augmentation of 12,531,000f.

The Bank, notwithstanding the largeness of its metallic reserve, has not made to-day any reduction in its rate of discount. As, however, there has been one at London, the expectation is that it will lower the rate.

After the commotion caused last week by the heavy fall in the Crédit Mobilier shares, the Bourse became somewhat more tranquil, without, however, displaying that confidence which alone renders business active, and a marked improvement in quotations possible. But to-day it has been profoundly agitated by another heavy fall in the Mobilier—45f compared with the closing price of yesterday. The enemies of this establishment never displayed greater hostility to it than they do now, and their attempts to injure it are aided by the readiness with which the public accepts all alarming reports. Whilst the Credit Mobilier, which formerly led the market, is thus assailed, it is worthy of note that the *rente* is rising. Subjoined are the quotations of the week:—

The Minister of Finance, in his report to the Emperor in the early part of January, estimated that the "rectified budget" of 1865—that is the expenses and receipts not foreseen in the regular budget—would necessitate an outlay of some 46,000,000f, and produce resources of 64,000,000f; leaving a surplus of 18,000,000f. It appears, however, from documents just presented to the Corps Legislatif, that the surplus will really be 18,878,899f.

The amended bill on cheques which the Government has proposed does away with the small stamp duty that at first there was an intention of imposing. But it contains stipulations which are considered severe: one, for example, that the holder can have no recourse against endorsers, nor even against the drawer, if he does not present the cheque within three days if drawn in the town in which it is made payable, and five days if drawn elsewhere:—another, that for a false date or undated cheque, both the drawer and the person to whom it is made payable shall be fined 6 per cent. of the amount; and another that the issue of a cheque without provision, or the withdrawal of the provision after the issue, if made with bad faith, shall be punished with fine and imprisonment. The bill on Commercial Companies mentioned in a previous letter, will, it appears, not only free them from all Government surveillance, which, though really illusory, is vexatious, but will allow them to be formed on the limited liability principle, without, as at present, the sanction of the Council of State and of an Imperial decree.

One of the most interesting but of the least noticed chapters in the "Report on the Situation of the Empire" is on the commercial negotiations undertaken by the department of Foreign Affairs. It is true that for the most part it is only a recapitulation of facts that are known already; but it is remarkable for a display of liberal spirit in commercial affairs which no one ten years back could have thought possible in a Government of France. "The commercial policy inaugurated by the Emperor in 1860," it says, "has been strengthened by important adhesions and consecrated by new successes. The year 1864 will certainly mark as one of the most fecund in results after that in which took place our great economic reform. On all the northern and eastern frontiers of the Empire, customs barriers are successively lowered, and moderate conventional tariffs are substituted for prohibitions. It is therefore permitted to foresee the moment at which the benefits of a system uniformly liberal will be developed in all Europe." In speaking of the United States, the report says:—"The Emperor's Legation at Washington has hitherto not been able, in spite of all its efforts, to dissuade the Federal Government from seeking, in the elevation of customs duties, new financial resources. That expedient of doubtful efficacy has been employed *a outrance*, and a diminution of receipts has justified our previsions. Our diplomatic and consular agents have consequently been obliged to confine themselves to protecting, as far as possible, French imports against a too rigorous application of taxes in vigour."

Your readers may remember that the Civil Tribunal, in December last, declared null and void the agreement between M. Emile Pereire and the Bank of Savoy, by which he undertook to increase its capital tenfold, in the belief that he could extend to all France the power of issuing notes which it possessed in Savoy. Up to the 22nd February last, he had the right of appealing against this decision to a superior Court; but the *Semaine Financiere* announces that he has not exercised it. In consequence, the agreement is definitively set aside, and a new one, which the Bank of Savoy has made with the Bank of France, to be amalgamated with it, and accordingly to sacrifice its privilege of issue, on payment of an indemnity of 4,000,000f (160,000*l*), comes into force.

The non-publication by the Credit Mobilier of a weekly or monthly account of its situation, similar to those of the Bank of France, the Credit Industriel, the Credit Foncier, and the Comptoir d'Escompte, has long been a subject of complaint in the financial world; and latterly the complaints have been urged with greater vehemence than before, and have even been repeated in certain newspapers. It is alleged that there is no justice in permitting the Credit Mobilier to shroud its transactions in secrecy, when publicity is imposed on the other great public establishments, and that, in the great speculation which generally takes place in its shares, secrecy gives an undue advantage to it in its collective capacity, and to its directors individually (supposing them to speculate), also to the few favoured persons whom it may admit to its confidence. All this is well and good; but, on the other hand, it is not easy to see how the Credit Mobilier, as a speculating institution, can admit the public to its confidence, without embarrassing its operations, and even, in certain cases, rendering them impossible.

French Courts of Justice are showing a disposition to act severely towards directors of companies. What has just taken place at Paris with respect to the Ports of Marseilles Company your readers know. M. Lyons, the director of the Rive de Gier Coal Pit Company, has just been condemned personally to pay an indemnity of 30f per share to the persons who purchased shares after the 22nd of September, 1863; the ground of the condemnation being that on that date they advertised that a dividend of 12f per share would be paid in 1864, whereas only one of 5f was really distributed. At Paris the Imperial Court has decided that a stock-broker, notwithstanding the secrecy which, as a rule, he is bound to observe in his operations, must produce his books in order to show what transactions he did for the Credit Mobilier in certain Immobiliere shares, given to it by one of its customers in payment of advances, but of which it is alleged that customer had obtained illegal possession. This decision is regarded as of great importance; and it has obtained special notice in consequence of its having been given after the pleadings in which the Credit Mobilier was severely attacked.

The Financial Commission of Mexico advertises from the 1st April the payment of the coupons of the definitive securities of the 6 per cent. loan of 1864; and it invites the holders of provisional scrip to exchange it as quickly as possible for these in order to prevent delay in payment.

The last despatches that have reached the Government from Mexico state that commercial operations are every day assuming greater importance at Vera Cruz; and that the railway hardly suffices to convey all the merchandise destined for towns in the interior.

A Telegraphic Conference, consisting of representatives of sixteen European States, in which, however, England does not figure, assembled yesterday, at the Ministry of Foreign Affairs in Paris, to prepare an international convention for working the

Digitized by Google

modifications and improvements in telegraphic communication which experience has shown to be desirable.

The Western Railway Company is to hold its annual meeting of shareholders on the 29th of this month.

An official return shows that the fabrication and importation of alcohols from the 1st of October (the beginning of the season) to the end of January, were 825,001 hectolitres, and that there were in hand at the former date 205,015,—total to be disposed of 1,030,016 hectolitres. Of the last quantity, 599,713 were taken for consumption, and there remained 430,303.

In consequence of difficulties having occurred between the captains of French ships carrying grain to Glasgow and the merchants of that port, from the quantities being recorded both by measure and weight, the Minister of Commerce has written to the Chamber of Commerce to recommend that only one mode of expressing the quantity shall be adopted, and that that which is most advantageous to French captains shall be taken.

The *Finance* of Brussels says:—"We are assured that the English company which was formed last year under the auspices of Messrs Fruhling and Göschen, of London, for establishing a Credit Foncier Mobilier in Russia, are on the eve of abandoning the execution of the project, in consequence of a new law in Russia on companies in shares rendering impossible the placing of the shares out of that country. Messrs Fruhling and Göschen have already had to abandon the concession of a railway from Sebastopol to Moscow, on account of the difficulties excited against them."

In Belgium the Chamber of Representatives has passed a bill which says, that in all transactions contracting parties may fix the rate of interest they please, but which, nevertheless, declares that the legal rate of interest is to be 5 per cent in civil matters and 6 in commercial, and that the profits which the National Bank may derive by charging more than the latter sum are to go to the Public Treasury. The first of these two enactments can only be meant to take effect when parties do not happen to settle a rate of interest in their dealings:—the latter appears altogether unreasonable.

The market report is as follows:—

Flour.—At *Paris*, business is very calm, but prices are firm. Yesterday, choice was 47f the sack of 157 kilogs: first marks, 45f to 46f; good, 44f; and other sorts, 42f and 43f. Six marks, current month, were 46f 50c; April, 47f; May and June, 48f to 48f 25c. Type Paris, the 101 kilogs, 28f 25c, current month; four months of May, 30f to 30f 25c.

Wheat.—The appearance of the growing crops is generally speaking satisfactory. In the provincial markets business has been somewhat animated, and English and Belgian buyers have appeared in some of them. At *Paris*, yesterday, offers were not abundant, but were sufficient to meet the demand. Choice white was 26f the sack of 120 kilogs, some lots at 25f 50c to 25f 75c; choice old, 25f to 25f 50c; first quality, 24f 50c to 25f; current sorts 24f.

Cotton.—The market at *Havre*, in the week ending Friday, was less agitated, but very lanquishing. The sales were 3,772 bales and piculs, and the arrivals 1,485. The stock was estimated at 60,500 bales. The closing quotations were 5f lower for United States, Brazil, West India, Madras, China, and Jumel; 10f lower for Tinnevelly and certain sorts of Surat. Low New Orleans was consequently 280f the 50 kilogs; good ordinary qualities in Broach, 190f; in Tinnevelly and Madras, 175f; in China, 150f; Jumel, 245f. This week, the market has not been very active. Yesterday, the quotations of Madras, disposable, were 185f, 177f 50c, and 157f 50c, and for delivery 170f to 155f, according to dates: Coconada, 180f; Bengal, 105f; Kurrachee, 110f; Tinnevelly, 165f; Oomrawattee, 195f; China, 150f down to 114f.

Coffee.—At *Havre*, in the week ending Friday, the demand was regular at established prices. 400 sacks Port-au-Prince, disposable, 83f to 83f 50c the 50 kilogs in bond; 160 ditto, for delivery, 83f; 198 Gonaives, disposable, 90f; 1,435 Rio, not washed, disposable, 79f to 84f 25c; 189 ditto, washed, for delivery, 104f; 36 Santos, 86f 50c; 66 Malabar and Mysore, 90f; 244 Rio Nunez, for delivery, 87f. There were also three auctions of different sorts of damaged. The arrivals were about 2,000 sacks. This week, Rio, 72f to 79f 50c in bond; Gonaives, 89f. At *Nantes*, last week, no sales, but this week some damaged Port-au-Prince, Gonaives, and Saint Marc, has been sold. At *Bordeaux*, last week, the sales were not active: 200 sacks Rio, not washed, disposable, 81f; 573 ditto, washed, 108f; 28 ditto, old, 96f; 428 Mysore, 118f. This week, Bahia, 88f; Mysore, 118f; Martinique, 150f. At *Marseilles*, last week, 2,800 sacks; Mocha of Zanzibar, 125f. No sales this week.

Sugar.—Sales were more active at *Havre*, in the week ending Friday, owing to concessions made by holders. 566 casks French West India, 48f 50c the 50 kilogs, bonne quatrieme, duty paid; 90 in the port, 48f; 1,000 bales Reunion, 51f, bonne quatrieme, duty paid; 352 casks Havana, 30f, No. 12 in bond. The arrivals were about 1,500 sacks and some casks. This week, Havana, 30f and 31f, No. 12 in bond; and by English ship, 29f 50c; Reunion, bonne quatrieme, 50f 75c; French West India ditto, 48f. At *Nantes*, last week, sales were large, but prices fell:—10,335 sacks Reunion, 52f, bonne quatrieme; 400 at 53f 2½c; 695 gros grains, 56f 35c; 83 at prices not stated; 350 Mayotte, 55f; 5,704 sacks Mauritius, 52f 25c, bonne quatrieme; a small lot of French West India usine, 60f. This week, Reunion, 52f, bonne quatrieme; French West India usine, 53f 50c on sample; Java at established prices. At *Bordeaux*, last week, a small quantity of French West India, 47f 50c, bonne quatrieme; some usine, 49f, 50f, and 60f to 60f 75c; 4,400 sacks Reunion, 51f 50c, bonne quatrieme; 497 on sample, 52f 75c. This week, Martinique usine, 60f and 75f; Reunion, 52f, bonne quatrieme. At *Marseilles*, last week, 485 casks Havana by Spanish ship, 31f 75c, No. 12; 410 casks French West India for delivery, 31f, bonne quatrieme of Havre. This week, Pernambuco, 30f, No. 10 in bond; Reunion, 52f 50c, bonne quatrieme of Nantes; French West India, 32f, bonne quatrieme of Havre.

Indigo.—The demand at *Havre*, in the weak ending Friday, was more regular: 25 chests Bengal, at 40c to 65c above the estimates; 1 chest Madras, 1 Manilla, 14 serons Guatemala, at prices kept secret. The arrivals were only 6 serons. This week, Guatemala at prices not stated; Bengal at a premium of 75c, and at prices not given. At *Bordeaux*, last week, the market was attended by strangers, and the sales were 48 chests Kurpah, 26 Bengal, 15 Madras; but there was no improvement in prices. This week, Kurpah at prices not stated.

Tallow.—At *Havre*, in the week ending Friday, 208 casks La Plata disposable or in the port, 49f 50c to 50f 50c the 50 kilogs; 125 for delivery, 50f 50c; 28 New York, 51f 75c to 52f. The arrivals were 500 casks. No sales this week. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 106f 70c.

Wool.—The sales at *Havre*, in the week in Friday, apart from the auction mentioned last week, were 23 bales Buenos Ayres, unwashed, 1f 67½c to 2f 20c the kilog; 93 Monte Video washed, 2f 80c; 38 Peru white, 2f 90c to 2f 95c; 8 Portugal, unwashed, 1f 70c. The arrivals exceeded 270 bales. This week, Buenos Ayres unwashed, 1f 35c and 1f 55c, and Monte Video unwashed, 80f the 100 kilogs.

Spirits.—At *Paris*, yesterday, 3-6 first quality, disposable, was 51f 50c the hectolitre (rather more than 22 gallons). At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 73f; 3-6 beetroot, first quality, 90 deg., 61f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Shipping Gazette* thus reports the state of the freight market:—The tonnage loading on the berth for India, China, and the Cape of Good Hope is 34,900 tons, and that for Australia and New Zealand 41,200 tons. There is not much animation in shipments, and outward freights are very moderate, especially to Australia and New Zealand. There is not much doing in coal charters. A few charters have been made from Ceylon at 72s 6d to 75s per ton. 67s 6d per ton is offered from Madras and the Coast for general cargoes, and 87s 6d to 90s per load teak for Moulmein.

The International and Electric Telegraph Company have published their tariff for messages by the Indo-European line, To Bushire the charge for 20 words, including address adn signature, is 2*l* 10s 6d; to Kurrachee, 4*l* 10s 6d; to Ceylon, 5*l* 8s; to British Burmah, 5*l* 5s; and to the three Presidencies, Bombay, Calcutta, and Madras, 5*l* 1s. For each additional 10 words or fraction of 10 words one-half of these rates must be added.

The imports of the precious metals during the week ending the 1st inst., were:—gold, 129,381*l*; silver, 513,054*l*. The exports were:—gold, 302,322*l*; silver, 93,801*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the Gazette.)

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 1st day of March, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,661,300	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,011,300
		Silver Bullion	...
	28,661,300		28,661,300

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3 831,653	Other Securities	19,303,898
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,874 409	Notes	8,728,015
		Gold and Silver Coin	790,967
Other Deposits	14,158 331		
Seven Day and other Bills	447,795		
	39,845.191		39,845,191

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,381.090	Securities	30,424,109
Public Deposits	6.854,409	Coin and Bullion	14,801,367
Private Deposits	14,158,331		
	41,393,820		45,225,476

Dated the 2nd March 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,831,656*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An increase of Circulation of	£279,102
An increase of Public Deposits of	189 045
An increase of Other Deposits of	17,446
No change in Government Securities.	
An increase of Other Securities of	513,618
An increase of Bullion of	201,134
An increase of Rest of	229,159
A decrease of Reserve of	72,631

Although the demand for money has proved sufficiently considerable to cause a large augmentation to the other securities, the reflux of coin from the country has produced a fair addition to the bullion. The alteration in the reserve is unimportant. Altogether the changes are less favourable

Digitized by Google

than might have been expected from the reduction in the Bank rate.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20 001,314	£ 21,217,246	£ 20,322,055	£ 20,880,874	£ 20,381,080
Public depcsits	5,043,184	6 755,287	8 036 003	7,893,633	6.854,409
Other deposits	10,607,057	13,787,507	13,368,086	15,541 278	14.158,331
Government securities	12,626,463	11,210,541	11,144,771	11,174,584	11,023,211
Other securities	15,012,782	18,384 900	19,639,034	20,708,852	19,303,898
Reserve of notes & coin	8,091,579	9,792,948	9,464,332	8,440 822	9,518,0 2
Coin and bullion	13,189,834	15.673,898	14,504,517	14,034,222	14.801,367
Bank rate of discount	5 p. c.	2½ p. c.	4 p. c.	6 p. c.	4½ p. c.
Price of Consols	93⅛	93⅝	92⅜	91⅛	89
Average price of wheat	68s 6d	59s 8d	46s 7d	40s 6d	38s 2d
Exchange on Paris(shrt)	25 10 15	25 15 22½	25 17½ 25	25 25 30	25 10 20
— Amsterdam ditto	11 16 16½	11 16 16⅜	11 15½ 16	11 17 17⅛	11 15½ 16
— Hamburg(3months)	13 6½ 6¾	13 7⅞ 8¼	13 7½ 8	13 7⅞ 8¼	13 7⅞ 8¼

In the corresponding week of 1855 the death of the Czar Nicholas of Russia had been announced.

In 1862, the demand for discounts had rather increased. The general tendency of the stock market was favourable.

In 1863, a change of ministry had taken place at Madrid. A Danish 4 per cent. loan for 500,000*l*, part of an authorised emission of 2,000,000*l*, had been introduced at 91 by Messrs C. J. Hambro and Son. It was expected that the Prussian troops would interfere in Poland. The bullion movement was progressing.

In 1864, General de Meza had been definitively dismissed from the command of the Danish army, and his place supplied by General Gerlach. France had given in her adhesion to the proposal of England for a Conference. Prussia had consented to send a representative to the Conference, on condition only of the complete evacuation of Schleswig by the Danes. The Poles had inflicted a heavy loss on the Russians at Opatow, in the Government of Radom. Galicia had been proclaimed in a state of siege. Advices from Mexico had announced the capitulation of Campeachy, and the ruin of the Juarez party. The Channel fleet had returned to England. In America, General Grant was moving towards Dalton. The Confederates were retreating across Pearl River, and Sherman was advancing to Brandon. The Bank of England had reduced its rate of discount from 7 to 6 per cent. The tendency of the stock market was unfavourable.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 4,405,725*l*; in 1862, a deficiency of 4,647,393*l*; in 1863, a deficiency of 6,270,948*l*; and in 1864, a deficiency of 7,167,574*l*. In 1865, the deficiency is 5,145,567*l*.

Discount and Money Market.—The Directors of the Bank of England yesterday reduced their rate of discount from 5 to 4½ per cent.

This change had been generally anticipated, and therefore exercised no effect on the markets. Still, however, some surprise has been expressed that it was not adopted a week previously, since the improvement in the Bank accounts published this morning appears hardly sufficient to justify any alteration. In the open maket the terms have been equal to the Bank minimum, and this morning especially an active demand has prevailed in all quarters, partly in anticipation of the 4th of the month, and partly in consequence of a heavy amount of China bills falling due to-day. The latter have been very well met,—a satisfactory circumstance, considering the late reports of difficulties in the China trade. Annexed are the current charges of discount for paper of various dates :—

30 to 60 days	4½ per cent.
3 months	4½ per cent.
4 months	4¾ per cent
6 months—Bank bills	5 per cent.
6 months—Trade ditto	5½ 6 per cent.

On the Stock Exchange loans have been more in demand, and the rate from day to day has risen to 4 to 4½ per cent.

The joint stock banks and discount establishments have reduced their rate of interest on deposits ½ per cent., the following being the terms :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.
Do. with seven days' notice	3¾ per cent.
Do. fourteen days	4 per cent.

* At the London and Westminster 2½ per cent. only on sums below 500*l*.

There have been no bullion operations at the Bank throughout the week.

A return to the House of Commons shows that the exchange of Government stock for certificates to bearer has been but little adopted, the total thus converted in the year 1864 being only 1,039,700*l*.

The biddings for 3,000,000*l* Government bills on India took place at the Bank of England on Wednesday last. The proportions allotted were—To Calcutta 172,600*l*, to Bombay 120,000*l*, and to Madras 7,400*l*. The minimum price was as before—1s 11½d on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras at 1s 11¾d will receive about 17 per cent., and on Bombay at 1s 11⅞d about 41 per cent.; above these prices in full.

On Tuesday, the Crown Agents for the Colonies disposed of a further portion of the Mauritius Government Six per Cent. loan to the extent of 104,700*l*, at an average rate of 103*l* 6s 1d per cent., leaving a balance still undisposed of amounting to 44,900*l*, to complete the 300,000*l* originally advertised.

The Committee of the Stock Exchange have appointed Friday, the 10th instant, as a special settling day in the shares of the Metropolitan District Railway Company, for transactions entered into on and after Feb. 21st, to be marked as 10*l* paid and fully paid; and Tuesday, the 7th, for the Gas Products Utilising Company, for transactions entered into on and after Aug. 13, 1864. No quotation was asked for.

The return of the Bank of France continues to show a steady improvement. The following are the alterations :—

	£
Increase.	
Bullion	392,000
Current accounts	504,000
Decrease.	
Bills discounted	600,000
Advances	26,000
Circulation	466,000
Treasury balance	7,000

The following are the rates of discount on the Continent, showing a redncticn at Paris, Berlin, Frankfort, and Hamburg :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	4	3½
Vienna	5	5½
Berlin	4	3½
Frankfort	4	3½
Amsterdam	4	4
Turin	6	6
Brussels	4	4
Madrid	9	...
Hamburg	...	2½
St Petersburg	6	...
—	...	...

English Funds.—Notwithstanding the continued purchases of stock by the Government broker—the amount taken to-day being 35,000*l*—the funds continue heavy. Some little improvement took place yesterday on the reduction of the Bank rate, but it was speedily lost, and to-day there has been a renewed decline on the news from America. Consols, which closed last Friday at 89¼ for the account, were quoted at four o'clock this afternoon at 89 to 89⅛. At a later hour there were sellers at 89. The price for money was the same as for the 9th inst. Reduced and New Three per Cents. left off at 87⅛ to 87⅜; and Indian Five per Cents., 103⅝ to 103⅞, being a fraction lower.

Exchequer bills have been steady at 4s to 7s premium, and Indian bonds at 10s to 15s premium.

Foreign Stocks.—Important changes have taken place in the foreign market this week, especially in Confederate 7 per Cents., which have fallen to 42 to 44 on the announcement of the capture of Charleston and approaching fall of Wilmington. Venezuelan bonds have also experienced a severe decline on the adverse decision of the Supreme Court of that Republic to the rights of a portion of the holders of the foreign debt. On the other hand, the telegram that Mr Laing's project for the consolidation of the national debt of Turkey has been accepted in principle, has caused a rise in Consolidés to 53 to 53¼, other Turkish descriptions participating in the improvement. Mexican has been flat. Spanish Passive and Certificates, after being at one period lower, rallied, and show an advance on last week. After official hours they were quoted as high as 32⅜ to 32⅝, and 15⅝ to 15⅞. Italian bonds have slightly declined,

Egyptian scrip is quoted 1¼ to 1⅜ premium, and Italian, 1¼ to 1¼ discount. No price is made for Peruvian.

The closing quotation of French Three per Cent. Rentes on

Digitized by Google

the Paris Bourse this evening was 67f 90c for the new account, showing a slight improvement.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

Railways and other Shares.—Business in the railway market has been generally quiet, and the tone has been rather adverse, especially this afternoon, railway securities being prejudiced by the American news in common with other descriptions. The principal exception has been a rise in Caledonian. Metropolitan is also firmer. Most of the leading stocks are now quoted ex the half-yearly dividend.

Colonial securities have been rather firmer, especially Great Western of Canada and Bombay, Baroda, and Central India. In foreign shares, the only material changes have been a reduction in Bahia and Recife and San Francisco (Pernambuco).

City of Milan Improvements shares were last quoted 4⅛ to 4⅜ prem., being firm, and Metropolitan District Railway 4 to 4¼ premium. Varna Railway have advanced to 2 to 2¼ premium.

The announcement that the negotiations for an amalgamation of the Alliance and Consolidated Banks have fallen through, has caused the shares of the former company to recede to 8¾ to 9¼ prem.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day :—

Foreign Exchanges.—The rates this week have been without material change.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—The arrivals of gold, mentioned below, are comparatively unimportant, but the demand for export, although still active, has not been sufficiently so to cause any withdrawal from the Bank. The Giant's Causeway has brought 20,000*l* from Melbourne; the Africa, 1,500*l* from Boston; the City of London, 12,000*l* from New York; the Shannon, 40,000*l* from West Indies. The Nyanza has taken 18,000*l* to Bombay, and the La Plata 19,000*l* to the West Indies.

Silver.—The market for silver remains rather quiet, and although, during yesterday and to-day, a few purchases were made, the price continues about the same. The Shannon has brought about 204,000*l* from the West Indies, but this has not yet been dealt with. The Nyanza has taken 78,800*l* to Bombay.

Mexican Dollars.—The dollars brought by the French steamer Tampico have been sold at 60d per oz. The Shannon has brought about 160,000*l* from the West Indies, but these will not be delivered in time for the outgoing mail to China of this day; we are, however, in hopes that we may be able to realise the same price for these that was obtained for those out of the French packet.

Exchange on India for banks' drafts at 60 days' sight remains as per our last circular,—viz., 1s 11⅜d on Bombay, Calcutta, and Madras.

India Government loan notes were without alteration. We quote the 5½ per Cents. 109 to 110, the 5 per Cents. 101 to 102, and the 4 per Cents. 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std; ditto refinable, 78s 0½d per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz, nominal; South American ditto, 73s 6d to 73s 9d per oz; United States gold coin, 76s 4½d per oz, last price. Silver—Bar silver, 5s 1⅞d per oz std; bar silver, containing 5 grains gold, 5s 1⅞d per oz std, last price; Mexican dollars, 5s 0d per oz; five-franc pieces, 4s 11½d per oz. Quicksilver, 8*l* per bottle; discount 3 per cent.

The shipments of specie to the East by the outgoing mail are 139,562*l*, chiefly silver, for China.

Failures and Mercantile Embarrassments. — Messrs Rizo, Son, and Co., have stopped payment, owing to insurmountable difficulties. Their books have been placed in the hands of Messrs Coleman, Turquand, Youngs, and Co.

Creditors of the Strand Music Hall Company (Limited) are required to send the particulars of their claims to Mr William Turquand, the official liquidator, by the 16th of March, the 23rd of that month having been appointed by the Master of the Rolls for adjudicating upon them.

A petition for the winding up of the Universal Mercantile Association (Limited) is to be heard before Vice-Chancellor Kindersley on the 10th March.

In the matter of the Cappagh Mining Company (Limited), Vice-Chancellor Wood has fixed the 15th inst. for the appointment of an official liquidator.

The Master of the Rolls has appointed Mr Frederick Whinney official liquidator of the "West Central Horse and Carriage Repository Company (Limited)," creditors of which are required to send in particulars of their claims, the 25th of April having been appointed for adjudicating upon them.

Colonel Waugh passed his examination at the Bankruptcy Court on Thursday last. It is said that an arrangement has been come to between the assignees and the managers of the London and Eastern Bank. The amount of dividend to be declared will probably be less than 1s in the pound.

Mr Duncan Fletcher, of London, who retired from the firm of Fletcher and Co., of China, in June last, but who is still interested in the business, has called upon the house to wind up their affairs. The firm is understood to have made heavy losses of late, both in tea consigned to this country, and in cotton goods sent to China. The liabilities are computed at about 500,000*l*, but it is expected that the liquidation will prove favourable.

Some rather large failures have taken place lately in the manufacturing districts, the principal being that of Messrs P. Arrowsmith and Co., of Bolton, cotton spinners, with liabilities amounting to about 160,000*l*.

Public Companies.—At a meeting of the shareholders of the London, Birmingham, and South Staffordshire Bank, held on Wednesday last, the accounts were passed, and the formal resolution for the transfer of the business to the European Bank was unanimously agreed to.

The half-yearly meeting of the General Steam Navigation Company was held on Wednesday, when the directors' report was adopted, and a dividend of 10 per cent. per annum, together with a bonus of 2s 6d per share, were declared.

At the meeting of the Ottoman Financial Association, held on Wednesday last, the directors' report was adopted, after

Digitized by Google

some discussion, and an interim dividend of 10s per share declared.

he first annual meeting of the Estates Bank was held on the 1st inst., Mr Thomas Hattersley presiding. The report stated that the whole of the first capital of the bank, 100,000*l*, was subscribed in a few months. A second issue of 100,000*l*, and part of a third issue of the same amount, have been applied for. The accounts for the year show a balance to credit of profit and loss account of 7,614*l* 13s 11d, which, as recommended by the directors, is to be appropriated as follows :—20 per cent. of the preliminary expenses, 15 per cent. of amount paid for Alliance Building Society, and a dividend at the rate of 7*l* 10s per cent. per annum, free of income tax, leaving 2,000*l* to be placed to a reserve fund, and 78*l* 1s 6d to carry to next account. A resolution adopting the report, and declaring a dividend as stated, was passed.

In the report to be presented to the shareholders of the North British and Mercantile Insurance Company, on the 6th instant, the directors express their satisfaction at the increased amount of business transacted during the past year. The net fire premiums received were 219,235*l* 10s, being 54,043*l* 2s 5d in excess of the preceding year. In the life department, 1,240 policies were issued, assuring 1,034,578*l*, the premiums on which amount to 31,895*l*. In the annuity department, 31 bonds were issued, securing yearly 1,646*l* 16s 2d, for which the Company received 19,858*l* 14s 5d, while 34 annuities, amounting to 854*l* 14s 6d annually, fell in. The total revenue from all sources is 565,458*l* 16s 2d. The losses by fire were heavy, amounting to 183,506*l* 18s 6d, the past year having proved unusually disastrous in the experience of all fire insurance companies. The claims on life policies were considerably below the Company's expectations. The total amount of funds in reserve to meet contingencies is 256,762*l* 15s 9d ; and the Company's assets now amount to 2,304,512*l* 7s 10d. The payment of the usual dividend of 10 per cent. is recommended.

At the half-yearly meeting of the Bristol and South Wales Railway Waggon Company (Limited), held at Bristol on the 22nd inst., the usual dividend at the rate of 10 per cent. per annum, free of income tax, was declared, and 1,800*l* carried to the reserve fund, which now amounts to 13,600*l*.

The seventh ordinary general meeting of the shareholders of the Crown Preserved Coal Company (Limited) was held at their office in Liverpool, on the 24th ult., when the directors' report was adopted, and a dividend at the rate of 7 per cent. per annum was declared.

At the meeting on Monday last of the Continental Bank Corporation, the directors'. report was adopted. It stated the total loss on the operations of the six months at 19,500*l*, which is reduced to 13,409*l*, after deducting the net balance of profits and the reserve fund. The directors recommended that the deficiency should be written off the capital account.

The meeting of the British Steam-ship Company (Limited) was also held on Monday last, Mr R. Gillespie presiding. The profit and loss account showed that the net profit was 2,089*l* 17s 11d, of which sum it was not deemed desirable to make any appropriation for dividend.

At the half-yearly meeting of the Railway Passengers' Assurance Company, held on the 1st inst., Mr Clay, M.P., in the chair, the report was adopted. It stated that the total income from premiums during 1864 was 74,428*l* 11s 10d against 61,849*l* 10s 3d in the preceding year, being an increase at the rate of 20.33 per cent. The total income from all sources amounted to 75,741*l* 8s 8d. The balance to the credit of the revenue account of the 31st Dec. last was 27,929*l* 10s 9d, out of which the directors proposed a bonus at the rate of 2s per share, of which one-half will be paid to the proprietors, and the remaining half added to their share in terms of the deed of settlement. Interest at the rate of four per cent. per annum on the capital paid up will also be paid, and the balance reserved to meet the outstanding risks on policies in force.

At the meeting of the Land and Emigration Company, held on Wednesday last, the directors' report, which was adopted, stated that the negotiations with the Government were concluded, and announced the payment of interest for the year 1864 at the rate of 3 per cent.

At a meeting of the Humber Iron Works and Shipbuilding Company it was stated, in regard to the valuation which has been so long pending, that Mr Hawkshaw has appointed the 10th inst. for a final meeting of the parties interested.

The directors of the Panama, New Zealand, and Australian Royal Mail Company have notified that, according to advices just received, an Act of the General Assembly has been passed, empowering the Governor of New Zealand to confirm the contract for the Panama mail service, entered into with the Hon. Crosbie Ward, subject to modifications to be arrrnged hereafter.

The annual report of the directors of the London General Omnibus Company, to be submitted at the meeting of the 21st instant, states that the balance of 5,000*l* to the debit of the loan account has been paid off, and the capital account has been closed. Under the profit and loss account it is stated that there remained, after making all deductions, a balance of 25,767*l* 6s 7d, leaving 2,970*l* to be carried forward.

The Bombay Gas Company have notified that a further portion of the original capital of this company, viz., 10,000 shares of 5*l* each, will be issued at par to the shareholders whose names shall be on the register on the 8th instant, in the proportion of one share to every three shares held by them, and that a deposit of 1*l* per share will be required on allotment.

Venezuela Six per Cent. Loan, 1864.—The General Credit and Financial Company of London have received advices from their agents (Messrs H. L. Boulton and Co.), dated La Guayra, February 2, 1865, of duties collected as follows on account of the above loan :—Per statement No. 27, from Puerto Cabello, 2,746.14 dols; ditto No. 28, from ditto, 4,558.44 dols; ditto No. 17, from La Guayra, 5,063.48 dols; total, 12,368.06 dols.

The following is part of a letter received by Messrs Baring Brothers and Co., from the Venezuelan Consul :—

Consulate of Venezuela, London, March 2, 1865.

GENTLEMEN,—I now beg to send you a copy of the resolution of the High Federal Court at Caracas, dated Feb. 8. In forwarding the same to me, General Guzman Blanco instructs me to bring it to your notice and that of the bondholders, and states that he would at once call together the interior creditors with a view to seeking their consent to certain measures which the Government suggests for making a settlement upon a just basis that would reconcile all interests, and that he hopes by the next mail to be able to present this affair, which now alarms them, under a different face from that which it presents at this moment. He expresses the hope also that this announcement will calm the agitation of bondholders, and induce them to refrain from all extreme measures in the meantime.

I have conveyed this wish to the numerous bondholders who, during the last two days, have called on me, and I am happy to say that a large majority concur in its propriety, in which I trust also that you will add your valuable concurrence.

I am, Gentlemen, your obedient servant,

FREDERICK H. HEMMING, Consul.

Messrs Baring Brothers and Co.

New Granada Debt.—Messrs Baring Brothers and Co. have received by this mail on account of New Granada dividends from Custom House, Santa Marta, 4,230*l*; Rio Hacha, 162*l* 6s 3d ; Tarnac, 5*l*; Saturnilla, 293*l* 2s 7d ; total, 4,690 8s 10d.

The mail from Guayaquil has brought a remittance of 236*l* 12s 1d on account of the dividends on the debt of Ecuador.

The interest due the 1st inst. on Northern Railway of Bueynos Ayres Seven per Cent. debenture bonds is announced for payment.

The report of the annual general meeting of the Liverpool and London and Globe Insurance Company shows that the fire premiums of the past year have attained the immense amount of 742,674*l*, and also an increase in two years of 290,000*l*. The new premiums on the life business of the past year amounted to 23,808*l* 9s 2d. The invested and reserved funds now amount to 3,212,343*l*, and the number of proposals have been 1,690. The usual dividend of 40 per cent. was declared.

In consequence of representations having been made to the directors of the Varna Railway Company that the time for receiving applications for shares was too limited, the last day for receiving applications is extended to Tuesday, the 7th March, for London, and Wednesday, the 8th March, at 12 o'clock, for the country.

The Bombay City Banking Company have opened a branch in London.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 423 per mark, and the short exchange on London is 13.5 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 5-10ths per cent. dearer in London than in Hamburg.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was small. For fine dry samples the trade was firm, at full currencies, but damp produce sold heavily on former terms. Foreign wheat changed hands to a very moderate extent, millers having shown but little disposition to operate, notwithstanding that no import has taken place into London this week. The barley trade was quiet on former terms. Oats were dull, and prices had a drooping tendency. Beans and peas moved off steadily, at full quotations. The flour trade was steady, and prices ruled firm. This week's import is 14,700 quarters of barley; 150 sacks, and 1,000 barrels of flour.

At Liverpool, this morning, wheat, flour, and maize met a slow sale, at late rates. The wheat trade at Wakefield ruled inactive, at previous quotations. Barley was dull; but oats, beans, and peas were steady in price.

The Liverpool cotton market opened this week with a good demand at advancing rates, and the sales on Monday reached 12,000 bales, but on Tuesday there was a sudden reaction, and all the previous advance was lost. On Wednesday and Thursday the markets continued very dull, and prices were again in buyers' favour. To-day there is a slightly increased demand, but prices are flat. Smyrna, which has been much pressed for sale, has irregularly declined from 1½d to 2d. Surats are ½d to 1½d lower, and long-stapled qualities may be quoted 1d to 1½d below the prices of last week.

Advices from Calcutta are to Jan. 23. The cotton trade since the 9th had ruled firm, wholly in consequence of more favourable accounts from England. Large supplies were daily expected. Export from Jan. 1 to Jan. 19, 12,946 bales to England, and 250 bales to France.

Digitized by Google

Messrs Dymes and Co., writing from Madras on Jan. 27, thus allude to the state of the cotton trade :—Owing to the favourable telegrams from home, prices of cotton advanced early in the fortnight to 245 rs per candy for Westerns and Salems. Latterly there has not been so much demand, and rates are somewhat easier at 240 rs per candy, equal to 13¾d per lb.

The cotton trade at Yokohama in December was quiet in the extreme. Prices were nominal, at $24 to $26. The export since July 1 had been—To Europe, 8,862 bales; to Hong Kong, 5,786 bales; total, 14,648 bales, against 24,881 bales in 1863.

The following table, from Messrs Ellison and Haywood's circular, shows the estimated stocks of cotton in Europe at the close of February, 1863, 1864, and 1865, as well as at the commencement of the present year :—

	28th February.			1st Jan.,
	1865.	1864.	1863.	1865.
	bales.	bales.	bales.	bales.
Liverpool	577,660	231,290	412,700	466,800
London	135,850	71,000	80,000	109,060
Havre	55,400	31,000	55,000	48,540
Rest of Continent	32,000	23,710	21,300	23,600
Total	800,910	357,000	569,000	648,000

Scarcely any change has taken place in the value of colonial and foreign grocery produce at Mincing lane this week. The amount of business doing is still very moderate ; nevertheless, as regards sugar, coffee, and cocoa, prices are decidedly firm ; indeed, some descriptions of the last-mentioned article have commanded enhanced rates. In the tea trade there has been a great want of activity, yet the quotations have ruled stationary.

Advices from the leading Chinese ports state that the tea trade was in a most inactive state, and that in many cases, prices had given way. The export to Great Britain from June 1 to latest dates had amounted to 103,604,500 lbs, against 99,154,500 lbs ; to the United States, 8,896,600 lbs, against 14,036,000 lbs in 1863-4. Last week, duty was paid in London on 1,135,231 lbs, whilst the export from London amounted to 192,522 lbs, making a total of 1,327,753 lbs, against 1,341,845 lbs last year.

The subjoined table is from Messrs Trueman and Rouse's circular :—

The coffee trade at Colombo, during the fortnight ending Jan. 31, was very quiet. Prices, however, were firm, fine plantation produce being somewhat dearer. The quotations were as follows :—Plantation, 12s 6d to 13s per bushel; native, unpicked, 43s ; picked and dried, 49s to 50s per cwt. The following table of exports is from Messrs Fryer, Schultze, and Co.'s circular :—

The first series of public sales of colonial wool for the present year were commenced yesterday. There was a good attendance of home and foreign buyers ; nevertheless, the biddings for nearly all descriptions of wool ruled inactive. As regards prices, the leading change was confined to Port Philip produce, which—owing to the large arrival, viz., 32,000 bales, against 10,780 bales last year—declined in value ½d to 1d per lb from the close of last series. In Cape and other Australian qualities, no quotable change took place. From Messrs' Hazard and Caldecott's circular, we extract the following table, showing the arrivals to the present sales, as well as to the corresponding sales last year :—

From	1865. bales		1864. bales
Sydney and Queensland	10,963		9,570
Port Philip	32,058		10,780
Adelaide	10,041		11,063
Swan River	53		...
Van Diemen's Land	531		396
New Zealand	371		1,080
Cape of Good Hope—Eastern province	15,529		16,341
Western province	3,791		
Total	73,337		49,230

Hemp and flax have continued inactive. Jute moves off slowly, at late rates. In indigo, very little has been done since the close of the public sales : 3,800 serons of Guatemala indigo will be offered at public sale on the 6th inst.

In reference to the state of the tobacco trade last month, Messrs Grant, Hodgson, and Co. write as follows :—The market has presented no new feature, prices for all home trade descriptions having been steadily maintained, but more especially fine leaf and stripe, sales of which have been effected to a full average extent, at outside quotations. 80 hhds of Western leaf were taken for the navy. We estimate sales at 1,500 to 1,600 hhds Large shipments continue to be made from America to this and other European markets, in anticipation of an export duty being imposed. Imports, 1,287 hhds. Deliveries, 804 hhds, against 1,267 hhds in the corresponding month of last year. Stock, 19,921 hhds, against 18,416 hhds in 1864, 19,658 hhds in 1863, 25,797 hhds in 1862, 20 556 hhds in 1861, and 17,389 hhds in 1860.

The following table, from Messrs Keeling and Son's circular, shows the home consumption of each description of wine in the last two years, as well as the proportionate consumption per cent.:—

In Imperial Gallons. From the Cape and other	Home Consumption. 1863.		1864.	Proportionate Consumption per cent. 1863.	1864.
British Possessions	116,500		76,983	1.11	0.67

Scotch pig iron is firmer, at 50s 9d cash, mixed numbers ; but all other metals have changed hands to a limited extent, at about previous rates. The oil trade continues very quiet. Tallow is dull, at 40s 9d for P.Y.C., on the spot. The annexed statement relates to Banca tin in Holland :—

	1865. Slabs.	1864. Slabs.	1863. Slabs.
The stock on warrants on Jan. 31 amounted to	62677	70373	60405
Deliveries in Feb.	4987	9190	8665
Stock on warrants, Feb. 28	57690	61183	51740
Arrived towards next sale	132246	87543	86234

There was a better feeling in the market for cotton goods at New York, during the week ending Feb. 18, and all descriptions changed hands at fully late rates. The announcement that nearly 20,000 bales of the raw material had been shipped from Savannah depressed the trade for cotton in the early part of the week, and middling upland produce sold as low as 81c per lb. The subsequent statement that the fleet had been dispersed by a gale, and that some of the vessels had been lost, produced a firmer market, and the quotations left off at an improvement of 4c per lb from the previous low point. In other departments of trade, nothing of interest transpired. Financially, the announcement of Mr Fessenden that he would require loans to the extent of $600,000,000 in the ensuing fiscal year was the leading feature. The National Debt was estimated at $2,153,735,444. In gold, the bulk of the sales had been at 203 to 204½ per cent., whilst the demand for money was limited, at about previous rates, prime short-dated commercial paper being quoted at 8 to 8½ per cent.

Digitized by Google

The stock of bullion in the banks on the 11th ult. was 4,059,500*l*, and the balance in the Sub-Treasury, 6,110,300*l*. The export of specie, for the week ending Feb. 11, amounted to 74,000*l*, making a total, since Jan. 1, of 763,500*l*; against 1,468,300*l* last year; 1,108,100*l* in 1863; 816,000*l* in 1862; and 35,500*l* in 1861. The foreign imports, from Jan. 1 to Feb. 4, were valued at 2,773,000*l*; against 5,281,000*l* in 1864; and 4,311,400*l* in 1863. On the 22nd ult., gold fell to 201½ per cent.

THE COTTON TRADE.

LIVERPOOL—March 3

The Cotton Market opened with an increase of the steadiness noticed on Friday last, and in the early part of the week became animated, and a large business was done, particularly by the trade, accompanied by an advance in prices; but on Tuesday, the demand fell off, and the sales have since been extremely limited, all the advance has been lost, and the week closed yesterday at a decline from last week's quotations generally, notwithstanding the reduction of the Bank rate to 4½.

American has been in fair demand and advanced ½d, but has since fallen back, and closes ½d to 1d below last week. The demand for Sea Island is limited, and with free arrivals, prices have declined about 2d per lb. In Brazil a large business was done early in the week, and prices advanced 1d to 1½d per lb, but since Tuesday the anxiety of holders to realise has caused a decline to be submitted to of fully ½d per lb from last Friday's rates. Egyptian has been subject to violent fluctuations, and after having advanced 1½d per lb, closes about ¾d below last week's quotations. Smyrna has declined about ½d per lb, but the finer qualities continue rather scarce, good stabled lots being fairly sustained at the quotations. Light stapled cotton is irregular in price, and difficult of sale. Surat has been uniformly dull throughout the week and irregular, showing a decline of 1d to 1½d in the better qualities, and about 1d in the lower kinds, closing very heavily. China and Japan are in fair request, but have declined about ½d per lb, and are very freely offered.

To arrive a few sales were made in Egyptian in the early part of the week for open, fair, at sea 19½d to 20d, and yesterday, at sea 18e (light canvas), and April delivery 18d.

The sales of the week amount to 47,650 bales, including 9,110 on speculation, and 5,780 declared for export, leaving 32,760 bales to the trade.

The sales to-day amount to about 4,000 bales.

LONDON—March 3.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market this week opened with a good demand, at advancing prices, but on Tuesday there was a sudden reaction, and the advance previously obtained was almost entirely lost; on Wednesday and Thursday, the market was very dull, and prices of all short-stapled kinds declined ½d to 1d per lb. As compared with last week, prices of Surat and Madras are 1d, China ½d, and Smyrna 2d per lb lower; Bengal, Japan, Brazil, and West India are unchanged.

NEW YORK—Feb. 18.

The cotton trade, in the early part of the week, was greatly depressed, and prices declined 3c to 4c per lb. The fleet from Savannah, however, having been dispersed by a gale,—some of the vessels being reported lost,—the market closes with a decidedly better tone, at a decline in prices from Saturday last of 3c per lb. At one period of the week, middling upland produce sold at 81c per lb. This week's arrivals amount to 4,657 bales, of which 1,349 bales are from Savannah, 2,620 New Orleans, 987 West Indies, and 649 bales by railroad. This additional import raises the quantity received since Sept. 1 to 104,973 bales. The export, from Feb. 1 to Feb. 14, was 4,192 bales, against 115 bales last year. Annexed are the prices now current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

New York, Feb. 22.—The cotton trade is flat, at 83 cents for middling Upland produce.

MARKETS IN THE MANUFACTURING DISTRICTS

There has been a fair average business doing in goods in most of the leading markets, and prices may be considered firm. The iron trade has ruled steady. Coals have moved off briskly at high quotations.

Manchester, March 2.—At the end of last week, and on Monday, there were increased transactions in yarn at about ½d per lb advance, caused by the desire partly to cover some of the recent sales of cloth for India. On Tuesday, this demand had spent itself, and the market relapsed into dullness and old rates. On Wednesday, the dullness was suddenly broken by a quickened downward tendency, the opening of the Indo-European telegraph line having startled the market with reports from India down to

Digitized by Google

a few days prior, announcing a fall there in three weeks of 1½ to 2 rupees per piece, or of three to four shillings. This morning a message was said to have been received which only left Calcutta last night, and speculators abound as to the changes which daily communication with the East will effect in our mode of doing business. Meantime, all business in this and other departments may be said to be at a stand, and prices nominal, but if buyers were disposed to offer for quantities, there is no doubt that the market would be greatly in their favour.

BRADFORD.—Wether wool is more in request than hogs, and many sorts of it keep comparatively firm; but the trade, generally speaking, is dull. Purchases of yarns are much restricted. Though business in pieces in the warehouses of our home merchants has slightly improved, their operations are only small. Continental firms are increasingly cautious.

LEEDS.—The general condition of trade remains in the same quiet state which we have lately had to report. The demand for both home and export houses is rather below an average for the season of the year, which is in some degree owing to the rather severe and protracted winter. Manufacturers keep tolerably well employed.

ROCHDALE.—The general character of the flannel trade is, as it has been for some time, rather flat. Light goods for spring and summer were in most request, and that mostly for home consumption. In Yorkshire goods there was a little more business done than last week. The manufacturers of these goods, as well as those of flannel, maintain late prices. Wools are firmly held by the dealers, and a fair business is doing in small lots.

LEICESTER.—The demand for hosiery goods is gradually improving, and manufacturers are better engaged in the warehouses. In the rural districts there is also a shade of improvement, and the operatives are quite well engaged, as they usually are at this time of the year. Yarns are unaltered in value, with a rather quiet market. There is no important change in wool, business being on the whole dull. There are no stocks of hosiery on hand.

NOTTINGHAM.—The home branch of the lace trade remains quiet for the season of the year. The depression extends more or less to every article. Silk mechlins are in request. The hosiery trade is active.

HUDDERSFIELD.—There has been a brisk demand for piece-dyed black doeskins at from 3s to 4s per yard. There have also been inquiries for light goods. The demand for regular market goods of all kinds at medium price is quiet.

CARDIFF.—The iron trade is in a moderately satisfactory state, and the works are in pretty regular employ. A larger quantity of pig and puddled iron is being sent to Staffordshire, consequent upon the turn-out in the northern part of that county. Rails are quoted £6 10s 6d to £7 5s, f.o.b., and bars £6 5s to £6 10s.

BARNSLEY.—The whole of the collieries in South Yorkshire are now fully employed, and prices for hard and house coal in the metropolis and the provinces continue steady.

DUNDEE.—Our flax market continues without any special change to notice. An increased business has lately been doing on contract. Jute continues very quiet; fine qualities move off readily at previous rates, but common and inferior sorts are very dull, and prices are in favour of buyers. The demand for linens continues weak, and manufacturers begin to feel the want of fresh orders.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 18.—Owing to limited receipts, the market, both for flour and wheat, has ruled firm since our last, and prices have improved. The principal buyers, however, are for home consumption, the export demand being still much restricted. Flour shows the leading changes as far as the quotations are concerned; but the chief advance is in common extra State and Western produce, which shows an improvement in value from last week of 60c per barrel. The prices current are as follows:—Flour—State, superfine brands, $10.70 to $9.85; State, extra brands, $10 to $10.15; State, choice brands, $10.20 to $10.25; Ohio, common brands, $11.10 to $11.25; Ohio fancy brands, $11.30 to $11.35; Ohio, good and choice extra brands, $11.40 to $11.80; Michigan, Indiana, Wisconsin, &c., $9.75 to $10.30; Genesee, extra brands, $10.35 to $11.50; Missouri, $10.25 to $15; Canada, common, $10.10 to $10.20; Canada, good to choice extra, $10.25 to $11.75 per barrel. Wheat—Common red Racine and spring, $2.11; winter red Western, $2.40. Corn—New yellow Jersey, $1.73 to $1.75; old Western, mixed, $1.88 to $1.89 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market this week, coastwise and by land carriage, have been very moderate. The show of samples has consequently been limited. On the whole, the trade has ruled steady, and the quotations have been well supported. The supply of foreign wheat has not increased. Really fine parcels have realised full prices without difficulty. In other kinds, next to nothing has been doing, on former terms. Foreign barley has been in fair average supply; but the receipts of English have not increased. Malting and grinding sorts have moved off steadily at full currencies; but distilling sorts have met a dull inquiry, at late rates. The transactions in malt have been on a moderate scale; nevertheless, prices have been supported. The transactions in oats have been somewhat restricted, at about last week's quotations. In beans, very little has been passing, and, in some instances, the rates have ruled a shade lower. Peas have maintained their previous values. Both English and foreign flour has sold at full currencies. Inferior American is the turn dearer.

Most of the continental markets have been well supplied with wheat, in which only a moderate business has been passing, on former terms. Most kinds of spring corn have moved off freely, at extreme rates. The shipments of bread stuffs from America continue on a limited scale.

The country markets, almost generally, have been steady for nearly all kinds of grain.

In Scotland, wheat has supported former terms; but the demand for it has been by no means active. Barley and all other articles moved off steadily.

The Irish markets have been fairly supplied with produce. Fine wheat, barley, and oats have changed hands freely, at full quotations. Otherwise, the trade has ruled inactive, on former terms.

The arrivals of English wheat fresh up to Mark lane, to-day, were small. Fine dry samples moved off steadily, at full currencies; ortherwise, the trade was dull, at late rates. The demand for fresh wheat was in a sluggish state, yet prices ruled stationary. All descriptions of barley met a slow sale, but without leading to any material change in Monday's quotations. Oats were dull, and prices were the turn lower. Beans and peas were firm, at late currencies. Flour changed hands to a moderate extent, on firmer terms.

A meeting of shippers, &c., has been held at Dantzic this week to settle the weight of the standard quarter, which in future is to regulate all grain charters from that port. "It was resolved," says the *Shipping Gazette*, "that in future all charters for grain shall be stipulated at per quarter of 496 lbs for wheat, other grain in proportion, according the Dantzic Customs, namely, that tares, peas, and beans pay the same rate as wheat, while rye pays 2½ per cent. more, barley and seed 10 per cent. more, and oats 25 per cent. more. This resolution will meet, doubtless, with the approbation of the Committee of Merchants, and henceforth become the basis of all freight transactions. The above rates are somewhat different from those adopted by Konigsberg, and differ greatly from the Stettin rates; and, considering that it is a very rare case that wheat of less weight than 62 lbs per bushel is shipped from Dantzic, and that all our other grain is heavier than that shipped from any other Baltic port, we must allow that the Dantzic proportions are favourable for the shipping in the Baltic."

Mr George Dornbusch reports the arrival off coast of 36 cargoes of wheat, 18 maize, 24 barley, 3 rye, 1 millet-seed, 6 linseed, 5 cotton-seed, and 1 oil-cake. Wheat has given way 1s per quarter, other produce has moved off slowly, at late rates.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—A steady business has been transacted this week at full prices, and a partial slight advance is quoted on some kinds. Gurpatta date Bengal continues in demand for exportation, and Madras Jaggery

Digitized by Google

has sold readily. West India commands extreme rates, 2,080 casks selling in three days. 245 casks Barbadoes, by auction, sold at 30s to 32s 6d; brown and yellow Jamaica realised 28s to 33s per cwt. The Netherland Trading Company's sale on the 22nd March will contain 70,000 baskets Java. With continued good deliveries here the stock is gradually decreasing, but it still exceeds those of former years, being 98,329 tons. The average of the three preceding years was 62,000 tons.

MAURITIUS.—Two floating cargoes have been sold for the United Kingdom at 25s 3d and 24s 3d. By auction 6,337 bags chiefly found buyers: soft brown and yellow, 26s to 31s 6d; grainy and crystallised. 33s to 37s 6d, 11s 8d duty; fine yellow and grainy white, 37s to 39s per cwt.

BENGAL.—2,807 bags chiefly sold at and after the sales; grainy bright yellow, 36s to 36s 6d; low brown sorts, 23s to 26s; brown to good yellow Gurpatta date, 28s to 32s 6d per cwt. Several parcels of the latter have sold by private contract up to 34s per cwt.

MADRAS.—2,525 bags sold by auction, and realised the full valuations: grocery sorts, 33s 6d to 35s 6d; grainy white 39s to 41s 6d; soft brown and grey, 25s 6d to 29s. 8,000 bags Jaggery chiefly sold at 22s to 23s 6d per cwt.

NATAL.—436 bags muscovado sorts by auction sold at 28s to 32s per cwt.

Foreign.—At auction, 223 casks 50 barrels Porto Rico part sold from 31s to 34s. 129 casks Surinam, at 28s to 31s. 230 casks Cuba were withdrawn above the market value. Privately, about 1,200 casks Cuba have sold chiefly at 30s to 31s, a cargo close at hand at 31s, and a floating cargo of Havana for the United Kingdom, No. 10 to 10½, at 22s 6d per cwt.

Refined.—Dry goods remain firm, with a moderate inquiry at the advance of last week.

RUM.—The market is dull, and quotations remain unaltered since last week.

MOLASSES.—170 puncheons Trinidad are reported at 14s to 14s 6d per cwt.

COCOA.—A further advance is demanded for colonial descriptions, and the market is very firm. 635 bags Trinidad, by auction, partly sold: ordinary to good, 62s 6d to 78s 6d; fine, up to 100s. 523 bags Grenada were bought in at 54s. 259 bags Dominica at 53s per cwt.

COFFEE.—The moderate supplies brought forward have principally met with buyers. 59 casks 36 barrels and bags plantation Ceylon, by auction, went at 79s 6d to 89s 6d for small berry to fine. 46 casks 80 barrels 1,916 bags native sold at full prices, from 69s 6d to 71s 6d good ordinary to fine ordinary. 140 cases 286 bags East India: pale Cochin, 71s to 74s 6d. Manilla part sold at 73s to 74s per cwt. A floating cargo of Rio has sold at 57s 3d, and two of St Domingo at 64s and 64s 6d per cwt, for near ports.

RICE.—Most descriptions are inactive. There have been some parcels of soft grain sold, including Rangoon, at 9s 3d to 9s 7½d; Necrancie Arracan at 9s 1½d. 5,215 bags Rangoon by auction were chiefly bought in at 8s 9d to 9s. 4,069 bags Bengal offered by auction, partly sold at 3d decline: low middling to good white, 11s 6d to 12s 6d per cwt.

SAGO.—264 cases 199 bags chiefly sold: small, 18s 6d to 19s. Bold taken in at 23s per cwt.

SAGO FLOUR.—916 bags partly sold at 14s per cwt.

TEA.—The market continues depressed, most kinds being difficult to sell, and there are large supplies offering. Further public sales will be held next week, to commence on the 7th inst.

SALTPETRE.—Rather more inquiry prevails for Bengal, and there are not further sellers at recent low quotations. 100 tons have sold, to arrive, at 30s 6d, distant sailing, refraction 5; 60 tons, to arrive, at 28s 6d, no allowance being made for the refraction. On the spot, a few parcels are reported: refraction 8½ to 7, 28s 6d, short prompt; 3½, 30s 6d per cwt, cash.

COCHINEAL.—The public sales on Wednesday passed off flatly, and 521 bags about one-third part sold, at previous rates to 1d decline: Honduras silver, 3s to 3s 3d; black, 3s 2d to 3s 8d; Teneriffe silver, 3s to 3s 3d; black, 3s 1d to 3s 6d; Mexican black held at 3s 2d to 3s 3d; silver taken in at 3s 1d per lb.

OTHER DRYSALTERY GOODS.—119 bales safflower offered by auction sold at very full rates, from 4*l* 15s to 6*l* 12s 6d for ordinary to good. 433 bags Cutch of good quality sold at 24s 6d, and the market is firm. Gambier remains quiet.

MOTHER-O'-PEARL SHELLS.—A parcel of Manilla brought to auction part sold at 5*l* 7s 6d to 5*l* 10s per cwt.

JUTE.—The moderate supply brought forward on Wednesday partly sold at unaltered rates, and the market is now steady. 2,852 bales went at 10*l* to 22*l* 10s per ton for low to very good quality.

METALS.—The demand for some kinds is rather more active. Sales have been made in spelter at higher rates, owing to the large reduction in the stock, and holders now require a further advance: 19*l* 10s to 19*l* 17s 6d. Tin is firmer, at 88*l* to 88*l* 10s per ton. Scotch pig iron has sold at 50s 6d to 50s 9d per ton cash. No change has occurred in manufactured descriptions. Copper quiet.

OILS.—Sperm has been in demand at 81*l*. Olive is lower on the spot. For spring shipment Malaga has sold at 45*l* 10s; Gallipoli at 46*l* 10s per ton. Rape continues scarce for brown: foreign, 41s 6d to 42s; refined dull at 44s 6d. Linseed oil has been quiet, at 32s 6d per cwt on the spot. Cocoa-nut remains rather quiet. Palm steady: fine, 36s 3d to 36s 9d per cwt.

TALLOW.—The market has become firmer. New Y.C. 40s 6d to 40s 9d; April to June, 40s 9d; October to December, 42s 3d to 42s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, February 27.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes without further alteration. Various parcels of West India offered by auction sold steadily, and the week's business amounts to 3,030 casks. 1,915 bags Mauritius part sold at previous quotations. 1,561 bags Penang at 28s to 31s 6d. 1,285 bags Bengal were chiefly bought in at extreme prices for white Benares. 6,314 bags Jaggery Madras part sold at 24s 6d to 25s for grainy. 276 bags native bought in at 33s 6d. By private contract, 1,800 casks Cuba are reported at 30s 6d to 31s. 450 casks Porto Rico at 32s to 33s. 600 boxes Cuba at 33s per cwt.

COFFEE.—544 cases 1,448 bags East India brought to auction; a large proportion sold at 76s 6d to 85s; pale, at 66s 6d to 68s 6d per cwt.

RICE.—Of 5,700 bags Bengal brought to auction, about 3,000 bags good Moonghy sold at 11s; good middling white, 11s 6d per cwt. The latter was cheaper.

BLACK PEPPER.—Several parcels sold privately at extreme rates. 6¼d per lb has been paid for white Penang to arrive.

SAFFLOWER.—273 bales Bengal part sold at 6*l* 2s 6d to 7*l* 2s 6d per cwt.

CUTCH.—A parcel of old import sold at 24s 6d to 25s per cwt

SHELLAC.—703 chests partly sold; D.C. orange 6*l* 10s; livery orange, 6*l* to 6*l* 2s 6d: good garnet, 5*l* 15s to 5*l* 17s 6d per cwt.

OIL.—501 casks palm, by auction, sold at 31s to 36s 9d. 67 pipes fine Cochin at 39s 6d to 39s 9d per cwt.

TALLOW.—201 casks Australian, by auction, sold at 39s 6d to 41s 3d. 161 casks, &c., South American, at 39s 9d to 41s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been well supported this week; prices nominally the same for export; nothing worth noting. In Holland, about 700 tons loaves, loose, have been sold for April delivery, also 300 tons of crushed, in barrels, for this and next month, f.o.b. in Holland.

GREEN FRUIT.—Market continues good for oranges. Some parcels St Michael and Valencia, sold by Keeling and Hunt at public sale, went at a further improvement in price. The stock of Palermo being large, prices are without alteration. Lemons continue at the advance obtained of late, and prices likely to be maintained. Seville sours in moderate demand.

DRY FRUIT.—A little inquiry exists for currants at lowest quotations, also for any sea damaged. Buyers, however, hold off from anything above these descriptions, though fruit at 23s to 24s is proportionately cheaper. A few parcels of old have been realised at 28s to 26s; some as much as four years old. Good new is offering at 24s to 26s, but without any success. Raisins, in face of short stocks, continue to fall every week, and Elemes of fine quality are passed even at 35s to 36s. Valencias are unsaleable. Figs much higher in value, and daily getting scarcer.

FLAX.—Market steady.

HEMP.—Market very dull, scarcely any operations during the week.

SILK.—The market extremely quiet, prices unchanged.

TOBACCO.—The market has presented no change in character, and business in most descriptions has been effected to a full average extent. Prices remain firm, and good and fine qualities were taken at full quotations.

LEATHER.—The transactions in leather during the past week have been somewhat limited, and at Leadenhall, on Tuesday, there was not much activity. The supplies of fresh goods were small, and the chief demand continued to be for the articles which have recently been most wanted, especially for English shoulders and bellies.

METALS.—A small business continues to be the rule in most branches of our market. Copper is being a little more bought at the low price. Tin continues most inactive. Spelter has been in request, and has rallied materially in prices—say 10s to 15s per ton—stocks here on 1st inst., 8,575 tons. Lead goes off slowly. Tin plates continue inactive.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	42	0
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, March 2.—There was about an average supply of beasts on offer here to-day, and most kinds moved of slowly at Monday's currency. The extreme figure for the best Scots was 5s 4d per 8 lbs. We were fairly supplied with sheep. On the whole the mutton trade was inactive, at barely late rates. The best Downs, in the wool, sold at 6s 6d; out of the wool, 5s 2d to 5s 4d per 8 lbs. Lambs were inactive, at from 6s 8d to 7s per 8 lbs. Calves were in short supply and fair request at full quotations—viz., from 4s 6d to 5s 8d per 8 lbs. The pork trade was steady. In milch cows very little was doing.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Monday, Feb. 27.—Our market continues heavy, with a dribbling demand for fine and average qualities, which, from their scarcity, command recent rates. Middling and low qualities receive but little notice. Mid and East Kents, 130s, 160s, 200s; Weald of Kents, 120s, 140, 155s; Sussex, 116s, 135s, 145s; Yearlings, 110s, 126s, 140s.

FRIDAY, March 3.—The hop trade is devoid of animation. Good and fine hops, however, the supply of which on sale is small, are decidedly firm in price. Inferior produce moves off slowly, at former terms. Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 140s; yearlings, 100s to 140s; Belgian and Bavarian, 90s to 180s; American, 80s to 130s per cwt.

POTATO MARKET.

FRIDAY, March 3.—Moderate supplies of potatoes are on sale at the markets. For selected qualities the trade is firm, at fully late rates, otherwise the demand rules heavy. Annexed are the quotations:—Yorkshire Regents, 90s to 110s: ditto flukes, 130s to 145s; Kent and Essex Regents, 90s to 105s; Scotch Regents, 90s to 100s; ditto Rocks, 70s to 85s; Dunbar Regents, 90s to 110s; foreign, 60s to 70s per ton.

HAY MARKETS.—THURSDAY, March 2.

SMITHFIELD.—Meadow hay, 4*l* 6s to 5*l* 7s 6d; clover, 5*l* 8s to 6*l* 7s 6d; and straw, 1*l* 7s to 1*l* 14s per load. Trade dull.

CUMBERLAND—Meadow hay, 4*l* 8s to 5*l* 10s; clover, 5*l* 8s to 6*l* 8s; and straw, 1*l* 8s to 1*l* 12s per load. A slow demand.

WHITECHAPEL.—Meadow hay, 4*l* 6s to 5*l* 7s 6d; clover, 5*l* 10s to 6*l* 10s; and straw, 1*l* 7s to 1*l* 14s per load. A moderate supply.

COAL MARKET.

FRIDAY, March 3.—Wallsend Haswell 19s—Hetton 13s—South Hetton 19s—Hartlepool 18s 6d—East Hartlepool 18s 6d—Braddyll's Hetton 17s 9d—Caradoc 17s 6d—Cassop 17s 3d—Harton 16s 3d—Heugh Hall 17s—Kelloe 17s 6d—Eden Main 17s 6d—Kepier Grange 17s 3d—Russell's Hetton 17s 6d—South Hartlepool 17s 6d—South Kelloe 17s—Tunstall 16s 3d—Cowpen Hartley 15s—Davison's W. Hartley 15s—Lambert's W. Hartley 14s 9d—Tanfield Moor Butes 13s 9d—Wylam Moor 15s 9d. Ships at market, 164; sold, 70; gas contracts, &c., 50—120; unsold, 44; ships at sea, 50.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 3.—There is not much activity to report in our market, still consumers continue to purchase in fair quantities wherever holders are prepared to yield a little in their demands, and as stocks of some kinds are on the increase they show more disposition to do so than has hitherto been the case.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 3.—There was a moderate attendance to-day. Wheat, flour, Indian corn, oats, and oatmeal move slowly.

GAZETTE OF LAST NIGHT.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 18th of February, on 11,800 miles, to 557,212*l*, and for the corresponding week of last year, on 11,460 miles, to 540,299*l*, showing an increase of 340 miles, and of 16,913*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,297 miles, to 453,799*l*, and for the corresponding week of 1864, on 8,045 miles, to 437,828*l*, showing an increase of 252 miles, and 15,971*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Feb. 27.—In the share market to-day the majority of the few transactions were for the account, and the banks show several instances of improvement, but the other descriptions closed without any average change. In English railways, Caledonian and Blackwall improved ¼ each, North-Eastern (Berwick) and ditto (Leeds) ¼ each, and North-Western a further ¼; Lancashire and Yorkshire relapsed ¼, and Great Western 1; and ditto (Oxford) declined 1, Metropolitan ⅛, and ditto (new) ⅛. In colonial, Eastern Bengal receded ½. In foreign, Bahia declined ¼. In American, Erie shares (paid up) were finally quoted ¼ better, and Pennsylvanian Railroad (2nd mortgage) 1 lower. In British mines, East Grenville advanced ¼, and Great Wheal Vor and Marke Valley declined ½ each, and East Wheal Russell ¼. In foreign mines, United Mexican declined ¼.

TUESDAY, Feb. 28.—In the share market to-day dulness was the prevailing feature, and some of the Indian railways alone showed a tendency to improve, a shade of weakness generally affecting the other descriptions. In English railways, South Devon advanced 1, Metropolitan further declined ½, and nearly all the other principal stocks are marked at lower quotations, being ex dividend. In colonial, Eastern Bengal recovered ⅛, Bombay and Central India, East Indian, and Great Indian Peninsula improved ¼ each, and Buffalo and Goderich (1873) and Melbourne and Hobson's Bay are now quoted ex dividend. In foreign, Great Luxembourg receded ¼, and Lombardo-Venetian ⅛. In American, United States (5-20) declined ¼. In British mines, East Grenville relapsed ¼, North Roskear declined 1, and East Carn Brea ¼, and Providence are now quoted ex dividend. In foreign mines, no alteration occurred in the closing prices.

WEDNESDAY, March 1.—In the share market to-day the amount of business was again little more than nominal, and there was generally a slight tendency to depreciation. In English railways, Blackwall and Chatham improved ¼ each, and Great Northern 1; and ditto (A stock), Bristol and Exeter, Great Western (Oxford), ditto (Newport), and North-Eastern (Leeds) receded 1 each; ditto (Berwick), ditto (York), Great Eastern, and Midland, ½ each; ditto (Birmingham and Derby), 1½; Lancashire and Yorkshire and North-Western, ¼ each; and Metropolitan, a further ⅛. In colonial, Grand Trunk of Canada (1st preference) and ditto (deferred) declined 1 each. In foreign, Sambre and Meuse (preference) were finally quoted ¼ higher, West Flanders ⅛ higher, and Lombardo-Venetian a further ⅛ lower. In American securities and foreign mines no alteration occurred. In British mines there was not a single actual transaction, but East Bassett were finally quoted 7 lower.

THURSDAY, March 2.—In the share market to-day the transactions were again few, but English railways closed with a decided upward tendency; American securities were slightly weaker, and the other descriptions showed no material average change. Of the English lines, Great Northern (A stock), Metropolitan, and Midland (Birmingham and Derby) recovered 1 each, ditto (original), and Lancashire and Yorkshire ¼ each, and North-Western ½; Great Western and South-Eastern improved ⅛ each, and Chatham a further 1. In colonial, Great Western of Canada (shares) declined ¼ each. In foreign, Lombardo-Venetian improved ⅛. In American, United States (5-20) and Illinois Central (shares) receded ¼ each. In British mines, Great Laxey advanced ½; and East Lovell declined 2, and East Caradon ½. In foreign mines, Capula Silver improved ⅛; and Copiapo declined 1, and East del Rey ⅛.

FRIDAY, March 3.—The railway market was decidedly firmer. Metropolitan and Midland stocks were in especial request, and improved ¾ and ⅝ per cent. respectively. Great Western also advanced ⅝ per cent., London and North-Western and Great Eastern ¼, and Lancashire and Yorkshire ⅛. Foreign and colonial railway securities were inactive. Grand Trunk of Canada and Bahia exhibited a drooping tendency.

Subjoined are the traffic returns of some of the American railways for January:—

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whisky

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

BORWICK'S BAKING POWDER, recommended by the Analyst to the LANCET and Author of "Adulterations Detected," for making DIGESTIVE BREAD without yeast, and for rendering Puddings and Pastry light and wholesome. Sold everywhere.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

FIRE IN GRESHAM STREET, E.C. —Messrs THOMAS TAPLING and CO., Carpet Warehousemen, &c., will, until further notice, carry on their Business in Premises all communicating at 44A Gresham street, and 74 Aldermanbury, opposite those of Messrs Bradbury, Greatorex, and Beall.

PREVENTION OF FRAUD.—SLOPER'S PATENT.

TO BANKERS and TRADING FIRMS. — For Crossing Cheques—Dating, numbering, and marking documents—and for TRADE MARKS—by perforation—Simple, instantaneous, and not to be tampered with.

Offices—Walbrook House, E.C., London.

BANKERS AND MERCHANTS OF ENGLAND,—When will you believe that no money depository is secure against the present race of modern "cracksmen" but GEORGE PRICE'S Treble Patent Safes, with his Patent CASE-HARDENED DRILL-PROOF DOORS, proved to be proof against gunpowder, picklocks, and all burglars' drills and other tools and implements? Price-lists post free from George Price, Cleveland Safe and Lock Works, Wolverhampton.

LAWTON, WINE Merchant, 35 Trinity square, Tower hill, E.C., begs to offer BRUCE'S best old VIDONIA at 30s per dozen; also best Marsala, 24s; old Canary Sack, (pints) 28s; fine old Bucellas, 36s; Sound Sparkling Champagne, 30s; Clarets, from 14s; Ports and Sherries, 30s to 72s; fine old Cognac Brandy, 54s to 66s per dozen; (bottles included). Detailed Price Lists post free.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.

"THE ONLY GOOD SAUCE."

The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.

Ask for LEA AND PERRINS' SAUCE.

*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C.

HOLLOWAY'S PILLS are the most gentle and yet the most effective aperients, and therefore better calculated for a family medicine than any any other drug. They always set the stomach right, rouse the liver, stimulate the kidneys, and thoroughly cleanse the whole system. Holloway's Pills are most useful in chronic weakness of the stomach induced by luxurious living, sedentary habits, or other causes. They have restored the emaciated to health, after every other means had failed. While they are purifying they are strengthening, while regulating they are increasing nervous and muscular power. These Pills do not excite any violent action in the body, hence they are specially suited to the young and feeble whose contitutions may be be irretrievably injured by more powerful medicines.

CURES OF ASTHMA, COUGHS, &c., by DR LOCOCK'S PULMONIC WAFERS. —From Mr Oldham, Chemist, Market place, Wisbeach. —"From the great quantity of your wafers I have sold, I have had an excellent opportunity of witnessing their effects, and I have much pleasure in being able to inform you that several obstinate cases of asthma and coughs have been completely cured by their use; and, indeed, their efficacy is general in diseases of the lungs." To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

Digitized by Google

The IMPERIAL MERCANTILE CREDIT ASSOCIATION (Limited), are authorised to offer 30,000 shares of the VARNA RAILWAY COMPANY, on the terms of the following prospectus:—

THE VARNA RAILWAY COMPANY (RUSTCHUK to VARNA).

Constituted by Statutes under the law of Turkey, with Limited Liability.

Concession 99 years.

Share capital £900,000, in 45,000 shares to bearer of £20 each, bearing a minimum interest of 5 per cent. per annum guaranteed by the Turkish Government.

15,000 shares have been taken, 9,000 of which are under offer in Turkey according to the terms of the concession.

Price of issue of the shares £12.

Deposit on application, £1; ditto on allotment, £2.

Calls not to exceed £2 10s per share, at intervals of not less than three months.

At this price of issue, shareholders will receive 8½ per cent. per annum, and interest will be allowed at the same rate on all payments. Shareholders may pay up in full.

The shares will be redeemed at par by a sinking fund guaranteed by the Turkish Government by annual drawings, to commence the year after the opening of the line, viz.:—

12,500 shares during the first 33 years. 20,000 during the second 33 years. 12,500 during the third 33 years. Total, 45,000.

The holder of each share drawn and paid off at £20, will receive a dividend warrant entitling him to participate in all profits earned by the railway in excess of the guaranteed interest during the remaining term of the concession.

To estimate the advantages offered to the shareholders, in addition to the minimum interest of 8½ per cent., and the profit derived from the annual drawings at par, it is necessary to state that the railway is estimated to yield from 10 to 12 per cent. per annum on the entire capital expended of £2,000,000; of this amount, £1,100,000 has been provided by means of obligations at the rate of 7½ per cent. interest, and redeemable by the sinking fund, likewise guaranteed by the Turkish Government; the entire profits above the aggregate guarantee will, in consequence, become divisible among the shareholders, representing a capital of £900,000, and taking into account the price at which the shares are issued, each 1 per cent. of surplus profit earned on the total cost would give the shareholder an addition of nearly 4 per cent. on the amount paid by him.

Messrs Peto, Betts, and Crampton have contracted to construct the railway and works, and provide rolling-stock, for a sum which will leave a sufficient margin in the hands of the Company to pay interest during construction, and to meet all contingencies, thereby ensuring that under no circumstances shall the expenditure exceed £2,000,000.

The railway was commenced last June, and great progress has been made in all branches of the works. Fifty miles of earthwork are ready for laying the rails, and the contractors have made arrangements to open the entire line in the autumn, 1866. For this purpose all the rails will be delivered this year.

BROKERS—Messrs P. Cazenove and Co.
Offices—15 Angel court, E.C.

This Railway will connect Rustchuk, on the banks of the Danube, with Varna, the principal port in the Black Sea, and will traverse for the entire distance of about 138 English miles most populous districts in the province of Bulgaria. This province remits yearly to the Turkish Government a net revenue of about One Million sterling, and provides Constantinople with cattle, timber, grain, and other produce.

The maps attached to the prospectus will show the route of the proposed railway, and the great saving of time and distance, both by sea and land. It will form the shortest and most convenient route to and from the East. It will also provide the cheapest and most direct means of communication between the Moldo-Wallachian Principalities and the countries of the upper Danube and the Port of Varna. The journey from London to Constantinople will be accomplished in four and a half days.

The Bay of Varna is one of the best natural harbours in the Black Sea, from whence there is a large exportation of grain and other merchandise at all seasons of the year. The Turkish Government are now negotiating with a company for the construction of a breakwater and quays within the bay. When these are completed the harbour of Varna will be one of the finest in Europe.

Already a pier has been constructed, extending into 14 feet depth of water, where vessels of large tonnage may load and deliver in connection with the railway.

By means of the annual payments guaranteed by the Turkish Government, the entire share and debenture capital will be redeemed within the term of the concession.

The Turkish Government have the option of purchasing the railway on terms favourable to the Company, at the expiration of 50 years.

For further details, reference is made to the original firmas, convention, cahier des charges, plan for redemption, and other official documents, which, with translations, are open for inspection at the Company's office.

Applications for shares in the annexed form to be left with the bankers or on payment of the deposit of £1 per share. If no allotment is made the deposit will be returned in full, and if a less number be allotted than is applied for, the deposit will, so far as required, be applied towards the payment due on allotment.

Prospectuses and forms of application or shares may be obtained of the Secretary of the Imperial Mercantile Credit Association (Limited), 95 Bishopsgate street, of the Brokers, at No. 52 Threadneedle street, or at the offices of the Company, 15 Angel court.

FORM OF APPLICATION FOR SHARES.
(To be retained by the bankers.)

No.——

To the Directors of the Varna Railway Company.

Gentlemen,—Having paid to your bankers, Messrs Robarts, Lubbock, and Co., the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot to me on the terms of the prospectus, and I agree to pay the deposit due on allotment.

Usual Signature .....
Name in full .....
Residence .....
Profession .....
Date .....

THE VARNA RAILWAY COMPANY.

Notice is hereby given, that in consequence of representations having been made to the Directors that the time announced for receiving applications for shares was too limited, the last day for applications is extended to TUESDAY, the 7th March next, at 4 o'clock, for London, and WEDNESDAY, the 8th March, at 12 o'clock, for the country.—By order,

J. F. WALSH, Secretary.

London, Feb. 23, 1865.

FORD'S COLOURED EUREKA SHIRTS, 6 for 39s.

Superior quality, and made expressly to measure; the new patterns sent to select from on receipt of three stamps.

R. Ford and Co., 38 Poultry, E.C.

FORD'S ILLUSTRATED PRICE LIST, Post Free.

Intending purchasers who cannot favour us with a call, will find it of great assistance; it contains over forty drawings of shirts, shirt collars, &c., All the new fashions are to be found in it.

R. Ford and Co., 38 Poultry, E.C.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

TEETH AND PAINLESS DENTISTRY.

—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c.

They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly London.

M. Anthony Plitaco.
M. George Constantinidi.

First Report of the Directors, submitted to the Ordinary General Meeting of Proprietors, at the London Tavern, on Tuesday, the 28th February inst..

GEORGE P. KITSON, Esq., in the Chair.

The Directors have the pleasure to submit to the shareholders a balance sheet and statement of accounts, duly audited, to the 31st December, 1864.

The business of the Association commenced in London on the 1st June. The Smyrna branch was opened in August, and the Constantinople branch in September.

The Directors propose that the financial year shall terminate on the 30th June in each year. They now furnish, for the information of the shareholders, accounts and balance sheet to the 31st December last, and they recommend that an interim dividend of 10s per share be paid, that £2,000 be put to the reserve fund, leaving a balance of £6,833 1s 6d to be carried forward.

The Directors feel that, notwithstanding the recent critical state of commercial affairs, and the opposition of competitive establishments, they have good cause to congratulate the shareholders upon the success which has been hitherto achieved by the Association, and they have the fullest confidence in its future prosperity.

Mr Mavrogordato, Director General of the Constantinople Administration, has arrived in England to represent the shareholders of Constantinople at the general meeting, to confer with the London Board as to the organisation of new branches and agencies in Turkey, and to devise measures for the future extension of operations.

The auditors appointed by the Board, pursuant to the Articles, are Mr James Cooper, of the firm of Messrs Johnstone, Cooper, Wintle, and Evans, and Mr Edwin H. Galsworthy. These gentlemen retire, and, being eligible, offer themselves for re-election.

THE OTTOMAN FINANCIAL ASSOCIATION (Limited).

JAMES COOPER, }
EDWIN H. GALSWORTHY, } Auditors.

London, 31st February, 1865.

It was resolved unanimously—

That the Report and Accounts now read be received, adopted, and entered upon the minutes.

That an interim dividend of 10s per share be declared for the half-year ending 31st December, 1864, free of income tax, payable on and after the 10th proximo.

That the remuneration of the auditors be 25 guineas each for their services during the past year.

That Messrs Johnstone, Cooper, Wintle, and Co., and Mr E. H. Galsworthy, be elected auditors this year.

That the best thanks of the meeting be tendered to Stefano Mavrogordato, Esq., the Director-General at Constantinople, for his exertions on behalf of the Association in that capital.

That the cordial thanks of the meeting be given to the Chairman and Directors for their able and efficient management of the affairs of the Association.

GEORGE P. KITSON, Chairman.
(Extracted from the Minutes.)
J. W. LAMBERT SMITH, Secretary.

WM. MARSHALL, Secretary.
24 Gresham street, E.C., London, March 1, 1865.

CONSOLIDATED PERUVIAN FIVE PER CENT. LOAN.

£10,000,000 of stock bearing interest at the rate of Five per Cent. per annum, from the 1st day of January, 1865, payable half-yearly in London and Paris.

In virtue of the instructions of his Excellency Don F. L. Barreda, Minister of Peru at London and Paris, the undersigned, J. Thomson, T. Bonar, and Co., are now ready to receive applications for the remaining £9,000,000, say nine million pounds sterling of the stock of this loan on the following terms and conditions:—

The subscription price is £83½ per cent., say £83 10s sterling for every £100 of stock to be paid.

£	s		£
4	0	per £100 (account deposit) prior to application.	
3	0	per £100 (to complete deposit) on allotment.	
7	0	per £100 deposit, or.....	70 for every £1,000 allotted, against which scrip receipts will be issued.
12	10	per £100 on the 20th March, or	125 for every £1,000 allotted.
15	0	per £100 on the 12th April, or	150 for every £1,000, when bonds at the rate of £200 will be deliverable for every £1,000 200
10	10	per £100 on the 10th May, or..	105 for every £1,000, when bonds at the rate of £200 will be deliverable for every £1,000 200
10	0	per £100 on the 7th June, or...	100 for every £1,000, when one bond for £100 will be deliverable for every £1,000..... 100
17	10	per £100 on the 12th July, less £2 10s for the Dividend Coupon due 1st July, or.....	175 for every £1,000, when bonds at the rate of £300 will be deliverable for every £1,000 300
11	0	per £100 on the 2d August, or	110 for every £1,000, when bonds at the rate of £200 will be deliverable for every £1,000 200
83	10	per £100 stock, or	835 per 1,000
2	10	to deduct for Dividend Coupon falling due 1st July.	
81	0	per £100, or say £81 for every £100 of stock, payable at the option of subscribers.	

Bonds of the loan of 1862, or in Ecuador and New Granada Dollar Bonds to the extent of £100 of said bonds for every £260 of stock of this loan allotted:

Bonds of the Loan of 1862, with all undue coupons, now attaching thereto, at and after the rate of ninety pounds sterling cash for every £100 of said bonds, and

Ecuador and Granada Bonds, with all coupons unpaid from the 23rd November, 1862, inclusively, and coupons still undue, at the rate of ninety-one pounds five shillings sterling for every 500 dollars of stock, subject to the deduction of £2 5s per £100 for every coupon detached therefrom.

The deposit of £100 in bonds for every £200 of stock of this Loan applied for will assure to subscribers the full allotment of their application, with the instalment paid to the 10th May inclusive.

Scrip receipts will be issued to the subscribers, which must be presented on the occasion of the payment of each instalment, and the failure to make any payment before the expiration of the final day appointed for it will forfeit the previous payments, and render the scrip void.

Subscribers may, at all times, pay up all undue cash instalments under discount of the respective maturities at the rate of £5 per cent. per annum, and receive the bonds.

The payments in deposit, whether in cash or in bonds, will be received by the following bankers:—Messrs Roberts, Lubbock and Co.; the Consolidated Bank; Agra and Masterman's Bank, who will grant receipts for the same.

J. THOMSON, T. BONAR, and CO.

London, Feb. 21, 1865.

Forms of application may be obtained of Messrs J. Thomson, T. Bonar, and Co., 57½ Old Broad street London; Messrs J. Hombergand Co., Paris; and of Messrs Mullens, Marshall, and Daniel, 3 Lombard street, London; Lewis H. Haslewood, Esq., Founders court, Lothbury, London.

Powers may be seen at the offices of Messrs W. and H. P. Sharp, 92 Gresham House, Old Broad street, E.C.

No Application will be received after Monday, the 6th instant, at Two o'clock.

PETERBOROUGH, WISBEACH, and SUTTON RAILWAY.

The Directors of this Company are prepared to receive Loans on Security of Debentures, for 3, 5, or 7 years, bearing interest at the rate of 5 per cent. per annum, payable half-yearly in London.

The interest on the above debentures will be paid by the Midland Railway Company, in terms of the Act of Parliament, which makes the debenture interest the first charge on the gross receipts of the line prior to deduction of working expenses.

H. DUDLEY COOPER Secretary.

41 Parliament street, London.

SIX PER CENT. DEBENTURES.

RECIFE AND SAN FRANCISCO PERNAMBUCO RAILWAY COMPANY (Limited).

—The Directors are prepared to receive applications for a limited amount of Debentures, in sums of not less than £100 each, bearing interest at the rate of 6 per cent. per annum, payable half-yearly.

Full particulars may be obtained at the Company's offices.—By order of the Board,

W. H. BELLAMY, Secretary.

15 Old Jewry chambers, London, Feb. 28, 1865.

THE CONTRACT CORPORATION (Limited).

At an extraordinary general meeting of the members of this Corporation, held at the London Tavern, Bishopsgate street, on Friday, the 3rd day of March, 1865,

Captain JERVIS, M.P., in the Chair,

The Secretary read the notice convening the meeting.

On the motion of the Chairman, seconded by Mr Alderman and Sheriff Dakin,

It was resolved unanimously,

That the following resolution passed at an extraordinary general meeting of the members of this Corporation, held at the London Tavern, on Thursday, the 16th day of February, 1865, viz.:—

"That the amended Articles of Association now submitted be adopted in lieu of the existing Articles of Association of the Corporation be," and it is hereby, confirmed.

H. J. W. JERVIS, Chairman.

The thanks of the meeting were given to the Chairman for his able conduct in the chair.

J. CHARLES HANDFIELD, Secretary

SEVEN PER CENT. DEBENTURES.

QUEENSLAND, CITY OF BRISBANE, CORPORATION TOWN HALL.

SEVEN PER CENT DEBENTURES, "SERIES A" AND "SERIES B."

The Directors of the Bank of Queensland (Limited) beg to announce that they have received, by last mail, for negotiation, the fourth and last portion of the above Debentures, which completes the amount of £20,000, authorised to be issued by the Corporation of the City of Brisbane, under an act of the Queensland Legislature, 27th Victoria.

The Debentures now offered for sale consist of £4,300, "Series A," redeemable on 31st March, 1871, with interest bearing date from 1st October, 1864; and £7,700, "Series B," redeemable on 30th June, 1874, with interest bearing date from 1st January, 1865.

Notice is hereby given, that the Board of Directors are prepared to receive Tenders for any portion of the above £4,300 and £7,700, such Tenders to be in writing, addressed "Tender for Corporation of Brisbane Debentures," "Series A" or "Series B," and to be left at the Bank at or before 1 o'clock on Wednesday, 8th March, 1865, when the minimum price will be declared.

The Debentures are for sums of £100 each, and bear interest at the rate of 7 per cent. per annum, payable half-yearly on coupons, which are attached thereto, the principal and interest being made payable in London or Brisbane, at the option of the holder.

Ten per cent. of the purchase money will be required on the purchaser being declared, and the balance within fourteen days thereafter.—By order of the Board,

HUGH MUIR, Secretary.

26 Old Broad street, London, Feb. 22, 1865.

BARRACK CONTRACTS FOR THE

supply of Coals, Coke, Kindling Wood, and Candles in Great Britain; and Coals, Coke, Turf, and Candles in Ireland.

War Office, Pall Mall, London, S.W., 25th February, 1865.

Notice is hereby given, that the Secretary of State for War is prepared to receive tenders for the supply of the following articles at the various barrack stations in Great Britain and Ireland, for a period of One Year, from 1st April, 1865, viz.:—

COALS, COKE, KINDLING WOOD, and CANDLES in Great Britain; and

COALS, COKE, TURF, and CANDLES in Ireland.

Tenders will not be entertained unless made upon the proper printed form, which may be obtained, with every requisite information, upon application at this office, or to the various barrack masters, between the hours of 10 and 4 o'clock each day, Sundays excepted.

The tenders must be sent to this office, addressed to the Director of Contracts, marked on the outside "Tender for Coals or Candles," as the case may be, on or before Monday, 13th March next, after which day no tender will be received.

The Secretary of State for War reserves the right of rejecting any or all of the tenders.

THOMAS HOWELL, Director of Contracts.

A NEW MONTHLY SCIENTIFIC JOURNAL.

Now ready, price 6d, NUMBER ONE of a NEW MONTHLY FIRST-CLASS SERIAL, to be entitled

THE SCIENTIFIC REVIEW, and JOURNAL of "The INVENTORS' INSTITUTE."

The main objects of the SCIENTIFIC REVIEW will be to record lucidly and faithfully, from month to month, the progress of Science both at home and abroad, to point out the bearing of recent discoveries on those previously made, and to keep their practical utility most steadily in view.

It will place before the public not only home inventions, but those of other nations, and will endeavour to throw an interest over these matters, by setting them forth in such a manner that the general public may readily understand them.

Among the boundless variety of subjects which will find a place in its pages, every branch of production, every department of scientific research, having a practical tendency, will be duly noticed.

"The Scientific Review and Journal of the Inventors' Institute" will also form a medium of intercommunication between scientific men throughout the world: and an opportunity will be afforded them of canvassing the merits of rival inventions, provided the public good is the sole object of disputation.

It will, moreover, be the accredited organ of "The Inventors' Institute," the objects of which are:—"To protect Inventors' interests, and defend the privilege of obtaining Her Majesty's Letters Patent"—"To promote improvements in the Patent Laws"—"To facilitate the diffusion of information with reference to inventions, and other subjects beneficial to Inventors and Patentees."

Each number will generally contain one or more reviews of scientific works; descriptions of new or improved machines, processes and apparatus, with illustrations when considered necessary; special articles on scientific topics of current interest; a résumé of the progress of manufactures and practical science in all parts of the world, collected from materials furnished by special correspondents, or from the most recent scientific periodicals, &c., whether at home or abroad; a detail of important patents asked for or secured; the meetings of scientific societies; and answers to correspondents. Inventors and others seeking information may rest assured that their communications will receive early attention, whenever the questions proposed are of public interest.

"The Scientific Review and Journal of the Inventors' Institute" will be edited under the supervision of able and experienced men, and will be published on the first of every month, price 6d, or stamped 7d.

Subscribers desirous of receiving copies each month at their residences, will secure their delivery post free by remitting a year's subscription of seven shillings to the publishers.

All communications intended for the Editors to be addressed as follows:—The Editors of "The Scientific Review," Messrs Cassell, Petter, and Galpin, La Belle Sauvage yard, London, E.C.

La Belle Sauvage yard, London, E.C.,
February, 1865.

N.B.—Advertisements must be sent to the office of "The Scientific Review," La Belle Sauvage yard, Ludgate hill, on or before the 20th of each month.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY. WOTHERSPOON and CO., Glasgow and London.

HOUSE FURNISHING.—Persons commencing housekeeping, or making additions thereto, are invited to visit the great FURNISHING ESTABLISHMENT of Messrs DRUCE and CO., 68, 69, and 58 Baker street, and 3 and 4 King street, Portman square, the largest showrooms and furnishing galleries in the kingdom, containing a superficial area of 48,000 ft (upwards of an acre in extent), where they can make their own calculations for furnishing a whole house or a single room from the goods before them, which are all marked in plain figures, without the annoyance of being importuned to purchase; or, if preferred, estimates will be given free of charge. From the extent of the premises the immense stock has been arranged in various departments, in the most convenient manner for inspection and selection, and purchasers are invited to view the elegant and extensive assortment of fashionable drawing room, dining room, and chamber furniture, Brussels and other carpets, new fabrics for curtains, &c., particularly a large collection of beautiful buhl and marqueterie cabinets, tables, &c., from Paris, at extremely low prices; also 500 easy chairs, settees, and ottomans, 60 sideboards, 50 sets of dining tables, in fine mahogany, oak, and walnut, manufactured by first-rate workmen of the best seasoned material; capital dining room chairs, covered with real morocco leather, 21s 6d each; 100 bedsteads in various woods and metals, with the superior bedding, 150 wardrobes, and chests of drawers. N.B.—A servant's bedroom well and completely furnished for 84s. List of bedding and bedsteads, and drawings of furniture, sent post free. Messrs Druce and Co. give a written warrantry to all purchasers, and, if required, a reference to persons who have furnished from their establishment. Arrangements made for the delivery of furniture in the country. Down quilts from 5s 6d each.

THE PHOSPHROISED NERVINE TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great philosophical and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."

Prices: 11s per bottle, or four 11s bottles in one, 33s; and in cases containing three 33s bottles, £5, which saves £1 12s, packed securely and sent to all parts of the world.

LONDON AGENTS:—Newberry, 45 St Paul's churchyard; Sanger, 150 Oxford street; Hooper, 43 King William street, London bridge; Prout, 229 Strand.

CONSUMPTION, COUGHS, COLDS, ASTHMA BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

MR EDMUNDS' TEMPTATIONS.

Mr Edmunds' case will be discussed—has ere this been discussed—almost everywhere in England. It is certainly no light matter that such charges as has been made against the present Lord Chancellor and a past Lord Chancellor should have a sufficient appearance of validity and plausibility as to warrant their reference to a select committee. During the investigation of that committee it would be premature and foolish to pronounce an opinion. But there is a most important preliminary matter upon which no one says any thing. The beginning of the story is that Mr Edmunds, a subordinate clerk in certain offices, *may* have purloined certain moneys. We want to know why had Mr Edmunds the power to steal these moneys? Whether he did so or no, is for this purpose almost immaterial. We say confidently that he ought not to have been able to take twenty thousand *pence*, much less, as is alleged, twenty thousand *pounds*.

The case is not single. Only the other day there were large alleged frauds in a provincial bankruptcy court, and a commission was appointed to inquire into them, and considerable sums were found to be "due;"—that is, to have been delayed or misappropriated. It is currently said, and we believe with truth, that the accounts of Mr Edmunds, of which the correctness is impeached, extend over thirty years. But we do not accuse an individual; we are content to assume the innocence of Mr Edmunds,—the present innocence of every one who has been tempted as he was. We say that the system is essentially and radically vicious; that no man ought to be trusted with public money which he may not have to account for, to *effectually* account for, during twenty years. It is a proverb that no man ought to be trusted with untold gold; we add, no man ought to be trusted with national gold which he has not to tell out and pay over to the nation immediately.

A foreigner would hardly understand how such a case as that of Mr Edmunds would be possible. He would say all money paid to the nation must *in fact* be paid to the finance department, and that finance department should look to the application of that money, and if it does not look to it, should be punished and held responsible. Most Englishmen, who have not studied the curious history of all legal and many other institutions in this country would say the same. They would say, the finance department—the Treasury—ought to have looked after Mr Edmunds; and they should be made to explain how he has had the power of abstracting this money, even if he has not done so.

The truth is, that the Treasury had no more power in the matter than the County Court of Cornwall, and that it is just as much without power in a very great number of similar cases. The explanation is simple. A considerable number of English institutions are almost *self*-created,—that is, very small germs were centuries ago created by the Royal prerogative, and out of these minute germs huge growths have gradually sprouted. The courts of common law are entirely of this nature;—the Court of Queen's Bench, of the Common Pleas, and of the Exchequer had each of them at their original creation but a petty and subordinate sphere. Each of these now rules the whole domain of common law; but originally, it ruled only a little fraction of that domain. They competed for jurisdiction and obtained jurisdiction, but at their commencement the power of each was contracted and partial. It may be asked, why did they thus compete? It is an old legal saying in England, "It is "the part of a good judge to increase the jurisdiction." Why is it his part? Because, on our old system, the more business the more fees,—the more legislation, the greater pay, the larger the income of the judge himself and of every one under him and about him.

The sole feeling of the English Treasury in what we may loosely call the mediæval period,—the period at which the seeds of most English institutions were planted,—about these institutions was very simple. It was, "Don't come to *me* "for any money." King Edward the Fourth, and the Lord High Treasurer of that day would have stared at the Lord Chief Justice if he had asked for an "augmentation of salary." But neither the King nor the Treasurer knew or cared if by an increase of jurisdiction, the Court of Queen's Bench tripled its business, and with its business the receipts—the income of all concerned in it. The English law courts *speculated* in jurisdiction, and earned great profits according as they could attract the public.

Many consequences of this mediæval system have been removed, but the essence remains. We have many subordinate receiving officers. We have minor hoards of public money. The courts of law receive their own fees, and the officers of the court are accountable to the court and the court only. Thus, in the case of Mr Edmunds, the Patent Office is a branch of the Court of Chancery. Mr Edmunds was bound to account once in three months to the Master, and the Master was in theory accountable to the Lord Chancellor. But the *money* department of the State—the Treasury—had no control in

Digitized by Google

the matter, had no official intelligence, no official authority. A great judge like the Lord Chancellor—a small judge like the Master—might neglect to watch over these moneys; a judge is not trained to finance, is occupied in other duties, and perhaps is as likely to neglect the painful verification of accounts and vouchers as any one whatever. But the special department charged with that verification—the Finance department—is unable to interfere, has no legal information as to the receipt or non-receipt of these moneys; in many cases is wholly without official and legal knowledge that such moneys exist and are received. This ignorance of the Treasury is very explicable by a reference to history. As the courts of law and other bodies were allowed by the Treasury to grow up on the understanding "Do not you trouble us;" of course the sufferance was correlative. The Treasury could not and did not trouble them. In those rude and troubled times, the Treasury had to find money for war and for Court displays, and was fully employed in those functions. But though the impotence of the Treasury is explicable, it is not the less mischievous. If Mr Edmunds had been a collector of moneys under a good finance department, he could not have had his accounts in arrears for three months; now it is quite certain that they have not been effectually tested for very many *years*.

We venture to say that the system on which we now proceed is one calculated to encourage fraud—that it gives a bounty on fraud. We have an immense number of stores of fees, of *outlying public moneys*, and the receivers of these are only bound to account to some old judge—some subordinate officer who may go shares in a fraud—to some non-financial authority—to some authority distinct from the Executive Government. Parliament ought to have *before it* some one to call to account for *all* moneys. The House of Commons ought to be able to say to the Finance Minister—to the Chancellor of the Exchequer—19*l* 3s 4d was paid on such a day to such a person, what are your arrangements for seeing that this 19*l* 3s 4d gets to its destination. There ought never to be public moneys *in transitu* for any time. The proper place of custody for all public moneys is the Bank of England; and in common sense some one authority—the highest administrative financial authority, the Treasury—ought to be required to see, and to have the power of seeing, that all moneys paid on any pretence to the nation arrive with due speed to their legitimate head of account at the Bank of England.

There is no difficulty about the matter; in some cases already, legal fees are paid by stamps. Extend this principle universally. Let all payments to courts of law be made in stamps. Let them have no money at all. Let them have no temptation. Do not give Mr A., Mr B., and Mr C., whom we never heard of, the custody of moneys which are the nation's, —which are *ours*.

It may be said, "The stamp distributor may cheat, and "you will be no better after all." We say he shall not cheat *long;* we will look after him. All over England, the local station-masters are trusted with railway tickets in great numbers for which they have to account, and which are examined at brief intervals. The payment to a legal officer is simply a *ticket for law*. It is just as possible to examine the tickets which enable a man to travel through the Queen's Bench as the tickets which enable him to travel from Liverpool to London. Let each stamp distributor have so many legal stamps, and make the Inland Revenue responsible for seeing that the stamps are right. If that only be done, if that single step be taken, there will be an instant stoppage to delayed accounts, —a protracted purloining of forgotten public moneys.

A most striking example of the corrupting power of immemorial malpractice is to be found in Lord Derby's speech on this very matter. He says,—"I am told that there are "extenuating circumstances with regard to the defalcations "which occurred in the accounts of the Patent Office. No "doubt there were irregularities, and I am informed—it may "be mere rumour—that the charge against Mr Edmunds was, "that instead of having handed over a sum of money which he "had received on behalf of the Government, he had placed it "in a deposit bank, and that he had received the interest upon "it until called for. I am further informed that since the case "was brought forward—since this complaint was made—the "whole sum in which Mr Leonard Edmunds was indebted to "the public, and certainly a larger sum than that in which he "had been accounted a defaulter, has been paid in, and that, "as far as he is aware, he is no longer indebted to the public. "Now, my lords, it was extremely imprudent, extremely improper, that the money coming into his hands should have "been so invested for a time, and that he should have derived "an advantage from the accruing interest; but if that were "the whole case—and I know nothing about it; I am in "entire ignorance of this matter myself—it falls far short of "that which was imputed to him, and which would have "been a criminal act."

But it does not strike Lord Derby that no subordinate official ought to be trusted with these accumulating moneys, —that a system is radically vicious which entrusts many persons of miscellaneons antecedents with *unwatched* hoards. What Lord Derby thinks so venial, is exactly the beginning of most great frauds. Where verification is tardy, fraud is imminent. There is no better evidence of the pressing necessity for a great reform than the fact that our present system has so warped the judgment of one of our most experienced and most honourable statesmen.

M. PEREIRE'S SCHEMES FOR OBTAINING GOLD WHEN IT IS WANTED.

M. PEREIRE has published a new edition of his pamphlet—a book it should be called—for, though the price is that of a *brochure*, the magnitude is that of a volume. He has accompanied it with a most imposing array of careful tables. He has done us the honour to preserve here his full reply to our former comments, This new edition may therefore be taken as his final manifesto, as the finished exposition of the views of the party who object to raising the rate of interest when the Bank till runs low, and who wish to substitute other schemes. As the inquiry into the late policy of the Bank of France is still pending, as the true policy of that Bank is of European importance—for its erroneous operation may convulse European money markets—it is necessary to consider what new policy M. Pereire, after full meditation and elaborate care, proposes. He says that when the coffers of the Bank of France are drained low, they ought not to raise the rate of interest. What, then, are they to do?

M. Pereire's answer is given in a chapter, the title of which we may be permitted to call *naif*. It is headed "The facility "with which we can always obtain gold, and the mode of "obtaining it." Perhaps it is only a man of M. Pereire's great monetary experience who could venture to call easy a task at which the Banks of France and England have been variously labouring for a century—at which, in truth, all bankers have been labouring, and until this plan of raising the rate of interest was suggested, with very indifferent success. M. Pereire says in substance, "I have a new plan which is to "supersede both the old schemes in which bankers failed, and "the new policy by which they succeed,"—and he says that this plan is easy and obvious.

When we examine the chapter we cannot, however, say that the plan now suggested is either effectual or novel. We do not think it would succeed, and we do think we have seen it before.

M. Pereire says we must buy gold, but he justly reproves the mistaken manner in which the Bank of France formerly bought gold. They simply gave notes for gold, and in the end had to pay those notes in gold. By paying a great premium, they secured a better-looking account, a momentary transit of gold through their coffers; but they secured no permanent, no reliable reserve, because it was clear that the extra gold so gained would at once go out in place of the extra notes so issued. M. Pereire wisely says we must pay for the gold, not with representative paper, with notes payable in gold, but with actual value, with real wealth.

What, then, is that real wealth? He tells us, "The realisation of the capital subscribed by the shareholders of the "Bank, and if it be insufficient, the augmentation of that "capital would furnish the REAL CAPITALS of which we speak, "those of which no one could claim the repayment." More simply at least to English comprehension, M. Pereire means this:—The Bank of France, when its till runs low, is always to sell what *rentes*, what invested capital, it has; and if this be not enough, it is to call up more capital, buy *rentes*, and then sell them in the market. But the insufficiency of these expedients as a means of obtaining gold is clear. First, you sell the *rentes* in all likelihood for notes; at least no bank can refuse to take its own notes when tendered, and large transactions in Paris and elsewhere always have to be in paper rather than in gold. Even

Digitized by Google

if the Bank stipulated for gold in place of notes, they could not keep the gold. The operation would give gold a fictitious advantage as compared with notes convertible into gold, and noteholders would ask for gold immediately. As a fact and in reality, the Bank of France would sell its *rentes* for notes as other people sell them, and then it would not get gold at all.

The case, we should remember, is this: the gold of the Bank of France is rapidly ebbing away under the influence of a foreign exchange, and the remedy recommended is that they are to sell stock and get notes in exchange. But the immediate effect—and we are dealing with an urgent matter—is a reduction of the liabilities of the Bank, but not an augmentation of its reserve. Even if the Bank have the stock on hand to sell, the object sought to be gained by selling it would not be realised.

But how is the Bank always to have *rentes* at hand to sell? Every drain of gold will take away some, and how are they to be replenished? M. Pereire says by the increase of capital. But it is difficult to comprehend how so experienced a man of business can for such a disease propose such a remedy. It would come in practice to this. In a great drain of gold, and just when the Bank had sold off its last available shilling of stock, it would make a call on its shareholders. At such a time, a time of utter calamity, many shareholders would not be prepared to pay that call: money is not very plentiful just in the middle of a crisis; and even of the shareholders who could pay, some would be too frightened to pay. They would wish to go out of banking altogether. They would say it was a risky concern, and had better be let alone. Partly from poverty and partly from fright, a great number of shares would be thrown on the market; the price of shares would fall, even more rapidly than other things, just when everything else was falling rapidly. It would be a great chance if the credit of the country and the Bank survived this desperate remedy. Just when all credit was suffering, the Central Bank,—the *reserve* of credit in the country—is recommended to weaken its credit by a demand on its shareholders, and a vast depreciation of its shares.

But even if, what is doubtful, the credit of the Bank survived the remedy, the remedy would not be effectual. It might very likely bring on a disorganisation of credit, and a suspension of cash payments, but it is most unlikely that it would bring in cash. It might, and would, while human nature remains human nature, alarm the public, but while economical conditions are what they are, it would not fill the Bank. The shareholders who paid the call would not pay it in gold, they would pay it in notes; and notes, as has been said, and as in a heavy drain the Bank knows full well, are quite another thing than gold. And if the Bank buys *rentes* with the notes received from its shareholders, it only get notes again. It does not at *once* gain the article essential to its condition.

On a former occasion, M. Pereire was hurt at our saying that he did not attach due importance to a reserve of gold, and, therefore, we will not say so again; but we may say, and do say, that his schemes, if tried at a really critical occasion, would bring on the *cours forcé*, as they call it, in the market of which he is speaking. The rate of interest, it is true, would not be raised, but notes will be made legal tender. There will be no reserve in the till, and discounts will be cheap, because paper can be easily printed.

France is the last country which can afford to play tricks with her currency. The deficiency of her credit is her weak economical point, and when the currency is in confusion, credit diminishes. The memory of Law's bank haunted Paris for a century, and forbade the foundation of a sound bank. The revolution in property, the vast injury to lenders, the unjust gratuity to borrowers, caused by the assignats, are well known. The pain of a high rate of interest is temporary, though sharp; the evils of deranged prices and annihilated credit are prolonged as well as severe.

THE PREMATURE EXPECTATIONS OF AN AMERICAN WAR.

Of all our national peculiarities there is not one more perplexing, or to sensible business men more annoying, than the national liability to panic. It disturbs everything, and it is as difficult to account for it as to foresee its occurrence. If we were a timorous people, or a weak people, or a people without organisation, there might be some reason for overwatchfulness, for that imaginative depression which every now and then seizes upon the whole community. But that one of the most powerful nations in the world, which always rises to war with a kind of heavy readiness, which is at this moment strongly organised, with a great fleet and a full treasury, should be suddenly penetrated with the sense of an invisible danger, so penetrated as to buy and sell under the influence of alarm, is certainly a curious phenomenon. It recurs, however, periodically, and almost always produces mischief. The wild fear of Russian designs cost us the war in Afghanistan and the disaster which first shook our hold over the Sepoy army; the alarm created by the military strength of the French Empire almost broke up the alliance which for twelve years has kept the world in order; the senseless dread of Roman aggression undid the work of thirty years by reviving the suspicions which keep the English and Irish creeds so incessantly jarring; the alarm of 1861 has cost us millions, and the present one may precipitate a war which, of all wars, would be the most injurious to commerce and civilisation. It is high time to ask the middle class of this country upon what ground it expects an immediate attack from the United States.

We say immediate attack, because the gist of the absurdity lies in this matter of time. It is, of course, quite possible that the United States may at some future period see fit to attack us, France may see fit, or Russia, and it is quite wise to take all reasonable precautions. The American people speaking unfortunately the same language as ourselves, can understand all our criticisms and can reply by boasts, equally intelligible to ourselves; and criticisms and boasts together produce much exasperation of feeling. Our frontiers too march together for many hundreds of miles, and the Government of Washington is therefore exposed to one of the most powerful of all temptations to war, the chance of acquiring large and valuable territories which would greatly increase its naval power. It is probable too that at no very distant time the American Government will find itself an extremely strong one, possessed of a great fleet, levying a great taxation, disposing of armies large and numerous as those of every democratic State have throughout all history become. These are ample reasons for precaution, for looking to our arms, scrutinising our resources, and mending any visibly weak points in the fence. But what is there in these reasons to make us imagine that the crisis is coming now?

At this moment the American Government is engaged in the prosecution of a very great, very costly, and peculiarly dangerous civil war. That war has been raging for four years, has cost 500,000,000*l*, and has by no means reached its termination. So far as English observers can perceive, the course of events is running steadily in favour of the older and more regular Government, but the work is not yet accomplished, or the "rebellion" even in appearance subdued. The South has still to yield, will probably not yield without another campaign, and when it has officially yielded there will still be left work to do from which the greatest statesmen even might shrink with a sense of incompetence. There is a vast territory to pacify and clear of the brigandage which, though little noticed in England, is probably the very worst legacy of the war; there is a great subject race to emancipate and organise, so that it shall be free, yet not cease to labour, be independent, yet not provoking to races stronger than itself; there is a grand financial crisis to be met in some way or other, some revolutionary or regular, but at all events difficult way; and above all there is that collapse to be faced which follows always on the success of any very great or very persistent effort. Finally, there is the constitution to be amended, so as to reconcile the two leading ideas of the nation which lives under it, their respect for a Federation and their desire for a great and permanent Republic, "one and indivisible." All these are pressing necessities which will be felt more and more strongly as the war now raging draws nearer to its close, and all require a concentration of purpose and of strength fatal to the idea of a voluntary foreign war.

Why do we expect that all these objects will be laid aside in order to enjoy the luxury of punishing England for allowing two or three steamers to reach the Confederates, or conquering Canada, and so adding to a vast and disaffected territory at the South another vast and disaffected territory at the North? Because the American journals threaten it? So did the French journals immediately after the Bernard trial, but without producing a war. Because Mr Adams almost declared

Digitized by Google

it in order to prevent the departure of the rams built for the Confederates? The war at that moment would hardly have added to American difficulties, for a number of the rams could have broken the blockade almost as easily as if they had been part of Her Majesty's fleet, and we had no means of invading the States by land. Because inadmissible demands are to be made about the losses caused by the Alabama? That is merely a pretext for war to be put forward if the Government of Washington on general grounds desires it, but not otherwise, and, as Mr Layard assures us, has been for many months laid aside. Because the Americans covet Canada? They do not covet it more than they have always done; indeed, they covet it rather less, for they have less evidence that the Canadians will like the change, and the first difficulty of their Government is, that, to exist as it stands, each separate State must yield to the Central Power at least a quiescent obedience. American politicians are not very deep thinkers, but they are at least aware how much more easy and pleasant it would be to buy Canada,—that is to offer to its people commercial and other advantages to induce them to come in, than to sow the seeds of permanent irritation by a war of conquest. At all events, they will scarcely seek to undertake a task very large, very dangerous, and very doubtful; which if it fails will cost them half a century of prosperity, *and if it succeeds will upset all existing party calculations, and add three millions of people to the party hostile to the predominant one*, while engaged on other work so absorbing as the pacification of the South.

But may not American statesmen be tempted to *avoid* all the complexities they foresee by a great foreign war. Possibly, if they could thereby avoid them, but they could not. War with Great Britain would not help to pacify the South, but rather to give new life to half-smothered elements of resistance; it would not enable them to reduce their armies, but compel them to increase them both North and South; it would not enable them to settle their serf question, but rather increase the difficult element in that question, the need for arming the blacks; it would not increase the Federal authority over States, but add six or seven States to the number disposed to look with suspicion on Federal prerogative; above all, it would not remove but enhance their financial difficulties; for, even assuming the war to be used as an excuse for repudiation, repudiation could not be attempted during the war, because, if it were, the consequent distrust would paralyse the supply of men and materials to the armies. Armies can be maintained after a fashion by requisitions, but not in a country like Canada; and fleets cannot be so maintained at all. Even, therefore, assuming what is not proved, that Mr Lincoln is capable of the colossal wickedness of covering the world with war to escape internal perplexities, it is not the visible or immediate interest of his administration as it stands, will be still less its interest when that administration begins to feel the pressure of the restored Southerners, who will be by no means too anxious to give to the Northern section of the Republic a permanent, a visible, and an irresistible preponderance of force. Americans, when not excited by threats, or interruptions to their great dream of covering a continent, look pretty keenly to their interests, and it is not the interests of the seventeen millions of farmers who go to make up the bulk of the Northern population to avoid payment of the scrip which they hold, and the currency they are relying on, by plunging into a second war while the first one is barely over, to stop emigration just when it is wanted most, and arrest the sale of oil, cotton, and wheat just when they begin to bring in the profits which are to recoup the expenditure of the struggle. National irritation may be too strong for any of these considerations, but they are permanent, while irritation is temporary; and, at all events till the South has yielded, there is no reason for the alarm now so visible, and which, with Englishmen, is so apt to result in ill-advised or passionate action. Our trade may have to sustain the terrible calamity of an American war, but that is no reason for prematurely accepting the next greatest calamity,—a long suspense under the conviction.

THE GOVERNOR OF NEW ZEALAND.

The debate on Mr A. Mills's motion in the House of Commons can scarcely receive any adequate comment from us. But there is one point in the documents recently presented to Parliament on which there can scarcely fail to have been some discussion, and on which we think all parties ought to be able to come to a distinct conclusion,—we mean the vacillating and unworthy conduct and policy of the Governor of New Zealand. Upon any one who will follow honestly the innumerable misunderstandings and tortuous paths through which the Governor leads his so-called "responsible advisers," one inference, if no more, will at least be forced,—that the Governor of New Zealand ought to be recalled. It is obvious that he commands the confidence of no party in New Zealand, neither the Peace party in Canterbury headed by Mr Fitzgerald, nor of the war party in the Northern island, nor of the natives, whether at peace or in rebellion, nor of any one. Whoever may be able to settle these perplexities, Sir George Grey can never do so, because to make a durable peace demands a confidence in the Executive, first, on the part of the settlers, then on the part of the natives, and, lastly, on the part of the Home Government. What confidence Mr Cardwell may feel in Sir George Grey we cannot tell, but we should think that any impartial man who has read the last little controversy between him and his Cabinet on the subject of the confiscation policy would find it difficult to feel any considerable confidence in the straightforwardness of his actions or the candour of his language. But whatever inferences (if any) Mr Cardwell may have drawn from the huge mass of uninviting and ill-digested evidence that has been laid before him, we know very well the opinion entertained of the Governor by the Maories and the settlers of all classes, and we know that it is one of deeply-rooted distrust. Even the new Minister, Mr Weld, had to extract from the Governor in *writing* a promise to support a definite policy before he would attempt the task of forming a Cabinet. The old Ministry have expressed their opinion of Sir George Grey's unhappy forgetfulness of the view to which he had pledged himself in various emphatic ways. And the natives in their quaint language explain that Sir George Grey burrows "like a rat," or moves in a circle, or is in other ways a slippery man to deal with, though they can trust the lieutenant-general and even the Ministers.

We might give many illustrations of this, but they would be too technical and *involve* too many unpronounceable names and mysterious matters to carry conviction to our readers. But there is one little matter which lies within a small compass. There can be no doubt that the late Duke of Newcastle was more favourable on the whole to the policy of the settlers than his successor Mr Cardwell. Mr Cardwell explains the difference by saying that the policy approved when only a few of Her Majesty's troops were in the colony, is rightly disapproved and changed when we become responsible for a much larger portion of the expense of war. However that may be, it seems pretty certain that during the Duke of Newcastle's illness in the spring of last year, while the Government were getting seriously alarmed about the war, the tone of the instructions from home suddenly changed,—a change which is as suddenly marked in Sir George Grey's tone to his Ministers on native land questions in May 1864. On Mr Cardwell's accession to office in April 1864, the change was still more emphasised, and we find a corresponding veer in Sir George Grey's attitude in June, when he first received Mr Cardwell's instructions, and addresses his replies to him in place of the late Duke of Newcastle. Of course it is not of this that any reasonable person will complain. If a Colonial Governor does not obey his instructions from home, he is not doing his duty. Mr Cardwell instructed Sir George Grey very explicitly to limit as closely as possible the needful confiscation of the native wild lands, and it is clear that for a month or two before Mr Cardwell's accession he had been pressed from home in like manner, to soothe the natives and conciliate them into peace. For obeying these instructions he certainly deserves no blame. But what does seem to us utterly discreditable in his conduct is that having been, as is clearly shown, up to the spring of 1864 one of the most zealous for the confiscation policy which he had formerly carried out in the Cape of Good Hope, he now turned round upon his Ministers, strove to represent himself as having always endeavoured to curb their zeal for confiscation, and to gain the credit with the Home Government of having stood between the policy of the settlers and the interests of the natives.

The crisis on this question (which had been preparing throughout May) came on the 28th of June, no doubt on the reception of Mr Cardwell's first despatches. Sir George Grey, in a minute on the 28th of June, expressly charged his Ministers with having refused to carry out the more moderate

Digitized by Google

policy which he had advocated from the first of confiscating only a little bit of the Waikato lands in the interior for the military settlers, instead of giving them a frontier to protect extending from Raglan to Tauranga, as had been agreed upon. The Governor suddenly discovered that he had all along wished the military settlers to be located in the interior, and had frequently urged it on his Ministers. "The first time," he concludes his memorandum, "the Governor was made aware that *no part of his plan would be acted upon*, was by the Minister for Colonial Defence, at Pukerimu, on the 15th of April last."

This was, in effect, to charge the Ministers with having distinctly thwarted the Governor's plans (sanctioned by them) for the pacification of the colony, and this Sir George Grey reiterates in a more or less indistinct form throughout the subsequent quarrel. The particular question at issue was one between giving the military settlers a more advanced or less advanced line to defend—the less advanced line (the Governor's) being, in fact, quite inadequate to settle more than about 1,300 of them, while the plans agreed upon had invited 20,000 to the colony for this purpose. The Ministers were naturally both surprised and aggrieved, and replied to Sir George Grey, that so far from not intending to act upon his plans at all, they supposed till that moment they had been carried out in every detail; the smaller plan referred to by the Governor was not and never had been one for the military *settlers*, but was a plan of *campaign*, the posts in which were to be held by regular soldiers only as a *base* for further operations. The plan to which the Governor now referred as his own plan for a permanent military settlement had been stated by the Ministers and accepted by him a year before in the following words, as the plan "which he (the "Governor) would recommend for the defence of the Southern "frontier of the settled districts of the province of Auckland "*and the establishment of a basis for further military operations* "*in the interior of the enemy's country.*" And as such it had been carried out, the military posts had been occupied by soldiers, the further operations had been successfully pursued, and now when the Governor was asked to establish the permanent frontier of military settlements, he refers back to his old plan for the campaign, and tries to persuade his Ministers that he had never intended to go further.

Mr Reader Wood, the Colonial Treasurer, who came to England last year expressly to explain the plans of the Colonial Government, and to negotiate our guarantee of the loan, reminds His Excellency that, upon leaving New Zealand in December, 1863, he expressly asked if Sir George Grey was quite in harmony with the colonial administration on the point of confiscation and military settlements, and that Sir George Grey replied, "If anything, he went further than" his Ministers. Mr Wood asked, "In what direction?" and Sir George said in reply, "You would give them (the rebel "natives) back some of their land, but I would not." Mr Wood said, in that case, the natives would be driven to despair. The Governor replied, "No, that would not be the case, as "other tribes in different parts of the country would give "them land enough for their wants." Of course, Sir George Grey "is unable to recall to his recollection "this conversation in the form in which it is stated," but he cannot either deny it, or say it was absolutely irreconcileable with his views. The Colonial Ministers show by the most explicit and numerous extracts from their own manifestoes, that there was no manner of doubt about their policy, and that the Governor had expressly acquiesced in it. Instead of adhering to a scheme which would settle only about 1,300 military settlers, the Ministers had on the 31st July, 1863, received the assent of the Governor to a plan for settling 5,000; and when the Assembly met the number 5,000 was increased to 20,000,—the Governor still assenting to all the measures, the 3,000,000*l* Loan Bill amongst the number, rendered requisite by that enlargement of policy, and which would have been absurd without some such policy to back it. The Colonial Treasurer had traced with his own hand before leaving for England, in an interview with the Governor, a line for the proposed military frontier far beyond that now asserted by the Governor as his own, and the Governor himself produces the tracing. In a speech of the Colonial Treasurer, from which the Governor quotes as a proof of the indeterminate nature of the Colonial Minister's schemes, Mr Wood had said:—"The interest and sink-"ing fund of this loan will be in the first instance, of course "charged upon the general revenue of the whole colony, but "when the lands in rebel districts are taken and sold, the "loan itself will be a first charge upon the proceeds of the "sale thereof. Exactly what amount of land will be avail-"able it is difficult to say, but if we take all the land that "belongs to the rebel natives in the Thames and Waikato, at "Turanaki and at Wanganui, I think there will be nearly, "after locating the settlers upon it, a balance of something "closely approaching to 2,000,000 acres. And we consider "that though it will be impossible to realise upon that all at "once, yet before very long the proceeds of these sales will "repay the whole of the expenditure that we now ask the "House to grant." In his speech in the House of Representatives, on the second reading of the Loan Bill, as reported in the *Southern Cross* newspaper, and substantially correctly, the Colonial Treasurer said:—"If we take the whole area "of land in the rebel districts it will be found that it amounts "to eight and a half million acres, and we have obtained in-"formation from persons well acquainted with the districts and "the quality of the land, that one-half of it will be available "for settlement; therefore we have for settlement 4,250,000 "acres. If we deduct from the quantity required for the "location of European settlers and natives, there will be a "balance of 3,000,000 for sale, reserves, and for the preser-"vation of the territory of those loyal natives who may not "be desirous of disposing of their lands. I said there was a "balance of 3,000,000 of acres, and supposing we set apart "500,000 acres for roads and reserves, and 1,000,000 for "land that may be retained by loyal natives, it will still leave "1,500,000 acres for sale. Of course it would not be desir-"able, if it were even possible, to dispose of this land at "once, but by bringing it into market judiciously, it appears "to us that 1,500,000 acres economically dealt with and pro-"perly sold, will realise at the very least 2*l* per acre, and "3,000,000*l* will be obtained at the time these arrangements "are completed."

This surely was explicit enough to show that the Government never dreamt of proposing a scheme of confiscation which would support at most some 1,300 or 1,500 settlers, and at this time Sir George Grey had never once intimated any doubts as to the desirability of carrying out these measures. Indeed he had formerly written his approval of a plan far larger than the one on which he now falls back as his own,—and which was his own, but never meant as a plan for defending the permanent frontier, but only a plan establishing a base for a campaign. We can scarcely believe that the Colonial Office can itself trust a Governor capable of taking credit for a policy which was not only not his own, but utterly inconsistent with all his steps and measures. It is not Sir George Grey's changes of policy, it is his attempt to throw discredit on a policy demonstrably his own a short time ago, which renders all genuine trust in him on the part of either settlers or natives impossible. No correspondence more discrediting, more crushing to a Colonial Governor, than this little correspondence with the late Ministers on his startling, but unconfessed change of view, has ever come under our notice. The first condition of any permanent solution of these perplexities is his recall.

BOARD OF TRADE RETURNS.

THE returns issued by the Board of Trade gives the annexed value of the shipments of British goods and produce during January in the present and two previous years:—

	£
1863	8,045,155
1864	10,413,586
1865	10,489,339

During the last three years, the computed value of the principal articles imported was:—

	£
1862	185,301,321
1863	204,533,512
1864	226,057,691

The increase in the value of our imports in 1864 compared with 1863, was 21,524,179*l*; and with 1862, 40,756,370*l*.

The following table shows the increase and decrease of the principal articles of export in January current year, compared with the corresponding month in 1864:—

Articles.	1864. £	1865. £	Increase. £	Decrease. £
Alkali	51,496	62,492	10,996	...
Apparel, &c.	177,723	188,590	11,867	...
Arms (small fire)	13,402	17,036	3,634	...
Beer and ale	159,004	166,331	7 327	...
Coals, &c.	270,160	267,763	...	2,397

Literature.

THE JOINT STOCK COMPANIES' DIRECTORY FOR 1865.
London: Charles Barker and Sons, 8 Birchin lane.

THE "Joint Stock Companies' Directory" is a most curious and most useful volume. It contains, under alphabetical letters, the full particulars of every company now carrying on business in England. And it contains also an index of names showing *who* is a director of *what?* Then in it we find that X Y is a director of the A B C Company and C D E Company, and of the I J K Company, and so on half through the alphabet; and there *are* people in this position: we are able to draw our inferences as to the trustworthiness of X Y, and on the goodness of the railway companies to which he belongs. A half hour spent over this book will give much curious insight into the present state of the joint stock enterprise of this country, and a banker will often be able to pick up hints from it as to the people he has to deal with. No questions in the present day are so critically instructive about a commercial man as whether he is connected with any companies, and if he is, what sort of companies they are.

Foreign Correspondence

[FROM OUR OWN CORRESPONDENT.]

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 9th inst. The return for the previous week is added :—

DEBTOR.	March 9, 1865. f c	March 2, 1865. f c
Capital of the bank	182,500,000 0	182,500,000 0
Profits, in addition to capital	7,025,949 37	7,019,191 80
Reserve of the bank and branches	22,105,750 14	22,105,750 14

	1,269,110,561	92	1,264,350,146	52

A new augmentation in the stock of coin and bullion of not less than 28,219,000f, compared with last week, and a new decline of 25,445,000f in the discounts, are the principal features in the Bank return of to-day. They testify to a depression in commerce which is really painful to contemplate. The stock of bullion and coin in hand now exceeds one-half of the notes in circulation. In consequence of this plethora, the Bank has done what it might have done last week or the week before: it has reduced the rate of discount for bills from 4 to 3½ per cent., and the interest on advances from 5 to 4.

On Monday and Tuesday, there was a marked rally in the quotations of the Credit Mobilier, which had previously fallen heavily; but yesterday there was a fall, and to-day there has been another. In definitive the quotations to-day stand below those of last Thursday. The companies dependent on the great establishment have shared its oscillations—rising when it rose, and falling when it fell. The defenders of the Credit Mobilier explain the decline in its shares by representing that it is assailed by a "conspiracy" of bankers and speculators; and the assailants affirm that those shares are at a higher figure than they are worth, seeing that the dividend which had been expected will not be obtained. In other securities, with one exception, operations have not been very active, and fluctuations in price are inconsiderable. The exception is the Credit Industriel Bank, in which there has been a heavy fall. The following are the week's quotations:—

There has been, and still is, much discussion on the Bourse as the dividend of the Credit Mobilier for 1864; and some persons have taken on themselves to affirm that it will be only 50f, others as low as 25f. I have reason to believe that up the present moment the amount of it has not been ascertained. The probability, however, is that it will not be large, as 1864 was a peculiarly unfavourable year for the operations of Finance Companies in this country.

The Immobiliere Company which, from various circumstances, has not for some time past enjoyed the degree of public favour which it once possessed, is I hear engaged in negotiations for the sale of a considerable portion of the building ground it possesses at Marseilles. The terms it proposes, and which it is said are likely to be accepted, are very advantageous to it. Some English capitalists, it appears, are engaged in the affair, though not ostensibly.

No great importance appears to be attached here in Government circles to the last accounts from Mexico of the difficulties of different kinds which the new Emperor has to encounter, of his conflict with the clergy, of the disturbances in sundry places, and of the check which a detachment of French troops has sustained. Such incidents, it is said, are inevitable in a country in the agitated state of Mexico, and it is not thought that they will long retard the consolidation of the Imperial Government. Neither do official people trouble themselves respecting the conflict with the United States about Mexico, which many persons predict. They say that the States have not yet put down the Confederates, and that if they should succeed in doing so, they will not be able, even if they should be disposed, to assail France. On the other hand, the greatest attention continues to be paid here to all that concerns the commercial development of the new empire. The official *Moniteur* has published at full length the convention between the English Company represented in Mexico by Mr Saunders, and the Government of that country, for the extension of the railway from Vera Cruz to Mexico, by way of Orizaba and Cordova, with an embranchment on Puebla. It stipulates, among other things, that no other railway shall be constructed between the same places for sixty-five years, dating from the 1st day of January, 1863; that the lands required by the company belonging to the State shall be ceded to it gratis, and that it may, if it pleases, pay in shares those belonging to municipalities and departments; that all materials necessary for the construction or use of the railway for ten years shall be admitted free of duty, and that it shall be free from taxes for the same period; that all mines found in the execution of the works shall belong to it; and that the subvention of 8,000,000 piastres originally promised shall be paid by quarterly instalments, in twenty-five years, together with interest on the same. The line is to be terminated by the 1st of January, 1870. The *Moniteur* also makes known the principal conditions of the concession of lines of steamers in the Gulf of Mexico, and on the coasts of the Pacific, the former to a company headed by M. Gautherin, the latter to one represented by Mr Holladay.

The Bill on Cheques now before the Corps Legislatif is exciting much interest in the commercial world. The objections to it mentioned in my last are found to be the more weighty the more they are considered. The enactment that the holder of a cheque shall have no recourse against the drawer or endorsers, if he does not present it within three days from the date, if it be payable in the town in which it is drawn, or within five days if payable elsewhere, is regarded as certain to be productive of great practical inconvenience; and longer delays are accordingly demanded. But why impose any time at all on the holder? In nine cases out of ten, we may be sure that he will employ due diligence in presenting the cheque: if in the tenth it suits him to be negligent, let him be so, as he alone will have to fear the consequences of his negligence, such as the exhaustion of the funds of the drawer, or the failure of the banker or the endorsers. The utility of imposing a fine on the drawer and first holder of an undated or wrongly dated cheque is not very apparent. The first holder, being entitled to the sum mentioned in the cheque, will certainly not accept any little irregularity about the dating unless he has good reason for so doing; and when he has such reason, what interest has society or anybody in preventing him from acting on it? The enactment that the drawing of a cheque on a banker who has no funds to pay it, or the withdrawal of the funds after the issue of the cheque, shall be punished with fine or imprisonment, is harsh or unnecessary;—harsh in the case of a small trader or other respectable person who may venture to assume that his banker will give him credit for the amount of a draft which there are no effects to meet; unnecessary in the case of a man capable of swindling, as he is not likely to find any one willing to take his cheque. And, besides, it should not be forgotten that the nonpayment of a cheque leaves the holder with precisely the same legal claims on the drawer or endorser as he had before. From the objections, it will be seen that the Bill exhibits the vices with which all French legislation is justly reproached; it contains stipulations which are of no use whatever to the Government or society, and are vexatious to individuals; and it ostentatiously protects the public in a matter in which protection is not required. These vices will naturally have the effect of retarding considerably the adoption, on a large scale, of the cheque system in this country;—a system which, by facilitating commercial transactions, economising capital, and bringing into employment large sums which now lie dormant and profitless, would render as great services in France as it has done in England.

The report on the situation of the Empire presented to the two Chambers states that the total length of railways conceded up to the end of 1864 was 20,881 kilometres (13,050 miles), and of them 13,057 (7,160) miles) were worked. The money disbursed in railways up to the end of 1864 was 5,530,000,000f by companies, and 970,000,000f by the Government;—total, 6,500,000,000f (260,000,000*l*); and the sum remaining to be spent is 2,130,000,00f by companies, and 470,790,000f by the Government—total 2,600,790,000f (rather more than 104,000,000*l*.) As, however, the Government has stipulated that 395,590,000f of its portion of the expense to be incurred shall only be paid in ninety two annuities, commencing from 1863, the companies will have to raise the whole of the money needed. The difference between the 395,590,000f and the total of 470,790,000f consists in subventions which will have to be paid in a brief period. The figures here given do not apply to the guarantees of interest which the Government has given to companies.

A bill has been presented to the Corps Legislatif for carrying into effect a convention between the Government and the Messageries Imperiales Company, which was concluded some time back. Under it the Company is authorised to suppress the branch line from Saigon to Manilla, and the station of Penang, which necessitated voyages of 8,016 leagues; but it is from the 22nd of January, 1866, to establish a branch line from Shanghai to Yokohama, in Japan, which will require voyages of 8,280 leagues, and for which it is to receive an annual subvention of 341,301f; and it is to maintain to 1871 the line from Suez to La Reunion and Mauritius for a subvention of 256,681f. The Company has, however, consented to modifications in its Mediterranean and Black Sea lines, and to reductions in the subventions accorded to them.

The annual meeting of the Orleans Railway Company is to take place on the 28th March; that of Sous Comptoir du Commerce et de l'Industrie on the 30th.

The shareholders of the Societe Generale de Belgique pour favoriser l'Industrie et le Commerce held their annual meeting a few days ago. The report presented by the Directors stated that the profits of 1864 were 4,816,855f, and that they would allow 80f per share to be distributed. In 1863 the shareholders received 79f 50c per share.

Although historical works do not fall within the peculiar domain of the ECONOMIST, the great importance of the Emperor's *Historie de Jules Cæsar* will render acceptable to a considerable number of readers the announcement that M. Plon, His Majesty's printer and publisher, has just issued the French edition of the work. As the original text, it is of course preferable in every respect to the English translation. The book is beautifully printed, and the paper is infinitely better than is generally employed in this country. The title-page does not bear the Emperor's name as author; but the preface is signed "Napoleon."

In a case just decided by the Civil Tribunal of Paris, sad revelations respecting a company were made. The company referred to is that of the Universal Permanent Exhibition, which was very extensively advertised at London two or three years ago—and the revelations were that one Viboux, the principal founder of it, in order to make a part payment for the ground on which the Exhibition building was to be raised, appropriated bills of exchange and shares of the value of about 1,000,000f (44,000*l*) belonging to a bank of which he was the manager; also, that the person to whom the ground belonged, M. Erlanger, a well-known capitalist and banker, received the bills and shares knowing that they were improperly come by; that one of the conditions of the foundation of the Company was that before the commencement of operations 50,000 square metres of space should be subscribed for by intending exhibitors, but that in reality not more than 5,000 were taken; that the said M. Erlanger ostensibly subscribed for 10,000 metres, at 30f for the metre, but with the secret understanding that he should only pay 20f in the event of his sub-letting them, and nothing at all if he did not do so; that on the strength of the false announcement of the subscriptions, the public were induced to take shares, and that additional money was raised by the issue of 1,500 bonds for 500f and by other means; and that the upshot of the whole was the bankruptcy of the company. The plaintiffs in the case wanted to have the sale of the building ground by M. Erlanger declared invalid, for the reason that, shortly before his transactions with Viboux, he had bought it for 10f the metre, and had sold it to the company for 30f. But the Court held that this was a perfectly legitimate operation, the banker being justified in getting as much for his land as he could.

In the last letter, a misprint made me say that "*M.* Lyons, the director of the Rive de Gier Coal Pits Company, had been condemned," &c. I wrote:—"*At* Lyons, the directors," &c.

The market report is as follows:—

FLOUR.—At *Paris*, the quotations yesterday varied from 42f to 47 the sack of 157 kilogrammes. Six marks were 47f current month; April, 47f 25c; May and June, 48f 50c. Type Paris disposable 28f 50c the 101 kilogs.

WHEAT.—At *Paris*, yesterday, choice white was quoted at 26f 50c; choice red, 25f 75c to 26f; first qualities, 25f; other sorts, 24f to 24f 50c.

COTTON.—The market at *Havre*, in the week ending Friday, was calm, the sales being only 3,730 bales and piculs. The arrivals were 4,600 bales, of which more than 3,000 were from India, and 1,225 from England. The stock was estimated at 61,500 bales. The closing quotations were 15f lower for United States and Egypt; 5f to 10f lower for Brazil and West India; 10f to 15f for Surat, Madras, and Tinnevelly, and 5f Bengal, Kurrachee, and China. Low New Orleans was consequently 265f the 50 kilogs, and good ordinary qualities in Broach, 175f; in Tinnevelly, 160f; Madras, 165f; China, 145f; Jumel, 230f. This week the market has not been active, and yesterday, Madras disposable was 165f, and for delivery, 147f 50c and 140f; Coconada disposable. 160f; Tinnevelly, 135f; Oomrawattee, 175f and 145f; Dhollerah, 150; China, 110f to 135f; Japan, 150f.

COFFEE.—The sales at *Havre*, in the week ending Friday, were 1,440 sacks Port-au-Prince and Jeremie disposable, 82f to 83f the kilog in bond; 171 St Marc, 91f; 80 Gonaïves, 89f; 3,000 Rio, not washed, disposable 72f 50c; 200 Capitania, for delivery, 77f 50c; 300 ditto, washed, at prices kept secret; 3,921 Santos, 79f to 91f ditto; and a small quantity of Guadaloupe habitant, 147f 50c duty paid. By auction, river-damaged Hayti was sold. The arrivals were about 21,000 sacks. This week, Rio, by foreign ship, 77f in bond; Capitania, 76f 50c; Hayti, 82f 50c to85f; Jeremie, 82f; Guadaloupe, 155f. At *Bordeaux*, last week, 1,400 sacks Mysore, 118f to 118f 50c; 500 Bahia, 88f; 300 Rio, not washed, 72f, and one for delivery, 160f. This week, Mysore, disposable, 118f. At *Marseilles*, where the stock is low, 150 sacks Rio, sound, were last week sold by auction at 72f to 73f; and some damaged Hayti was also disposed of. This week, Maracaibo 85f, indifferent quality.

SUGAR.—At *Havre*, in the week ending Friday, nearly 500 casks French West India were taken, part at 48f 50c the 50 kilogs, bonne quatrieme, part at 48f; 1,700 bales Reunion, 50f 75c bonne quatrieme; 1,500 Havana, disposable, 30f, No. 12 in bond; 308 ditto, by English ship, 29f 50c, No. 12. The arrivals were 1,800 sacks. This week, Mauritius, 51f; Havana, 31f; Reunion, bonne quatrieme, 51f; Rio, 28f 50c; French West, India bonne quatrieme, 48f; ditto usine, 58f 50c. At *Nantes*, last week, 12,460 sacks Reunion, 52f, bonne quatrieme; 5,291 Mayotte, 51f ditto; and 1,000 at 46f on sample; a small lot of French West India usine, 53f 50c; 1,726 baskets Java and 8,032 sacks Mauritius, at established prices, the latter expected at Falmouth for orders. This week, Reunion, bonne quatrieme, 52f and 51f 75c; on sample, 52f to 52f 62½c; Mayotte, 49f 75c bonne quatrieme. At *Bordeaux*, last week, some French West India usine, at prices varying from 59f to 63f 50c; 1,500 sacks Reunion, 52f bonne quatrieme; 800, 52f 50c; 423 casks Havana, 30f. This week, Reunion, half *gros grains*, 52f 50c bonne quatrieme; Martinique, low quality, at prices not stated. At *Marseilles*, last week, 700 casks French West India, 32f, conditions of Marseilles, bonne quatrieme; of Havre, 1,000 for delivery, 32f 25c; 5,000 bales Reunion expected, 52f 50c bonne quatrieme; of Nantes, 1,000 sacks Brazil, disposable, 30f No. 10; 9,600 bales Mauritius, 1,000 ditto, for delivery, 38f 50c, same number, by English ship, 33f 50c, No. 12; 140 casks Ceinfuegos, for delivery by Spanish ship, 30f 75c bonne quatrieme. This week, French West India, conditions of Marseilles, 32f 50c bonne quatrieme of Havre; Havana, by Spanish ship, 83f; Reunion, 53f, bonne quatrieme of Nantes.

COMMERCIAL AND MISCELLANEOUS NEWS.

On the 4th inst. the Minister of Portugal, the Count de Lavradio, and Mr. Gerard Ralston the Consul General of Liberia, signed on behalf of their respective Governments a treaty of amity, commerce, and navigation, at the Legation of Portugal in London. It is noteworthy that one of the articles of this treaty assimilates slave trade to piracy, and condemns its guilty perpetrators to the same severe punishment as would be inflicted on pirates.

Annexed is Messrs Sharp and Co.'s circular, dated Hong Kong Jan. 15, in reference to bullion movements for the fortnight ending as above:—Gold—The total receipts of the fortnight, mostly from California, have been $610,000 value; and the amounts exported during the same period, inclusive of the Ganges on the 1st instant and exclusive of the Carnatic to-morrow, are $760,000. Notwithstanding the considerable arrivals there has not been the slightest fluctuation noticeable; and prices are almost unchanged. Silver—The imports of bar silver and Sycee have been about $320,000 dollars in value, and there has been sent away up to noon of the 14th in bar silver about $170,000. The price has improved upon demand for Shanghai remittance. Dollar Currency—Including 25,000*l* worth of Mexicans for the commissariat, there have arrived in coin $790,000; the sum sent away is only $90,000. Shipments of coin to Shanghai have now almost entirely ceased. Clean Mexicans therefore are in small demand. Discounts and Mortgages—Money continues easy. Mortgages have been effected at ten per cent., and discounts at eight per cent. There has been a very steady and quiet market for both sterling and rupees, and we close without alteration. The amount of business transacted has not been large. Banks—The shares of the Hong Kong and Shanghai Banking Company have been very well received, and on account of many more having been applied for than could be allotted they have borne a considerable premium. Closing quotations:—On London, 6 months' sight, 4s 9d; Calcutta, 3 days' sight, 224 rs; Bombay, 3 days' sight, 224½ rs; Shanghai, 3 days' sight, 72 tls; ditto, 30 days' sight, 73 tls; Singapore, 30 days' sight, par. Bar silver, 9 per cent. premium; Sycee, 7½ per cent. prem. Gold leaf, $22.40 per tael; sovereigns, $4.39 each; American double eagles, $18.00 each; discount, 8 per cent.; Hong Kong and Shanghai Banking Company shares, 20 per cent. prem.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending Feb. 4, 1865, compared with the previous month:—

	Jan. 7, 1865.	Feb. 4, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	19571118	20467763	896645	...
Private Banks	2959367	3074159	114792	...
Joint Stock Banks	2737440	2788089	50649	...
Total in England	25267925	26 30011	1062086	...
Scotland	4325591	4157576	...	168015
Ireland	5661026	5713708	52682	...
United Kingdom	35254542	36201295	946753	...

And as compared with the month ending the 6th of Feb., 1864, the above returns show a decrease of 381,616*l* in the circulation of notes in England, and a decrease of 261,985*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,138,627*l*, the English joint stock banks are below their fixed issue 438,268*l*,—total below fixed issue in England 1,576,895*l*: the Scotch banks are above their fixed issue 1,408,305*l*; the Irish banks are below their fixed issue 640,786*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 1st Feb. was 14,261,014*l*, being an increase of 144,755*l* as compared with the previous month, and an increase of 1,008,972*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the

Digitized by Google

month:—Gold and silver held by the Scotch banks, 2,385,119*l*; gold and silver held by the Irish banks, 2,132,490*l*; total 4,517,609*l*; being a decrease of 76,923*l* as compared with the previous return, and an increase of 204,558*l* when compared with the corresponding period of last year.

During the week ending March 8, the imports of the precious metals were:—Gold, 70,177*l*; silver, 38,944*l*. The exports were:—Gold, 42,503*l*; silver, 166,551*l*.

The quantity of coal entered at the Coal Exchange, and registered by Mr James R. Scott, the clerk, as coming into London by sea, canal, and rail, for the month of February last, was 453,736 tons 14 cwt, against 512,900 tons 300 cwt for the corresponding month of 1864,—the decline, therefore, being 59,143 tons 9 cwt, of which the sea-borne takes rather more than 50,000 tons. The supply for February of the present year has been in the following proportions, as relates to the sea-borne, viz.:—Newcastle, 105,945 tons, in 210 ships; Seaham, 9,345 tons, in 38 ships; Sunderland, 65,407 tons, in 152 ships; Middlesborough, 7,658 tons, in 23 ships; Hartlepool and West Hartlepool, 32,813 tons, in 113 ships; Blyth, 813 tons, in 3 ships; Scotland, 1,795 tons, in 7 ships; Wales, 9,811 tons, in 21 ships; Yorkshire, &c., 747 tons, in 11 ships, 3,907 tons of small coals, in 7 ships, and 692 tons of cinders, in 5 ships. The railway supply has been as under:—London and North-Western, 83,908 tons 6 cwt.; Great Northern, 73,925 tons; Great Western, 26,034 tons; Great Eastern, 16,224 tons; Midland, 13,252 tons 13 cwt to St Pancras depot, and 1,113 tons 10 cwt to King's-cross,—total, 14,373 tons; South-Western, 51 tons 8 cwt;—total, 214,535 tons 14 cwt. The tonnage for the two months of the present year has been—per sea, 633,899 tons, in 1,621 ships, as against 576,830 tons, in 1,538 ships, for the first two months of 1864, being an increase in favour of the present year of 83 ships and 57,069 tons. The railway tonnage for January and February, 1865, was 468,830 tons 15 cwt, as against 409,827 tons 17 cwt in January and February, 1864, being an increase of 59,002 tons 18 cwt. The canal receipts have declined from 1,527 tons 5 cwt for the first two months of 1864 to 1,363 tons for the same period of 1865. The tonnage from these three sources has advanced from 988,185 tons 2 cwt for January and February, 1864, to 1,004,093 tons 5 cwt for the corresponding period of 1865, so that the actual tonnage so far of this year exceeds that of last year (deducting the canal decrease) 115,908 tons 3 cwt.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 8th day of March, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,560,590	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,910,590
		Silver Bullion	...
	28,560,590		28,560,590

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3,843,818	Other Securities	19,828,885
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,677,728	Notes	8,729,660
Other Deposits	13,904,702	Gold and Silver Coin	848,017
Seven Day and other Bills	450,525		
	40,429,773		40,429,773

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,281,455	Securities	30,949,096
Public Deposits	7,677,728	Coin and Bullion	14,758,607
Private Deposits	13,904,702		
	41,863,885		45,707,703

Dated the 9th March 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,843,818*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£99,625
An INCREASE of Public Deposits of	823,319
A DECREASE of Other Deposits of	253,629
No change in Government Securities.	
An INCREASE of Other Securities of	524,987
A DECREASE of Bullion of	42,760
An INCREASE of Rest of	12,162
An INCREASE of Reserve of	59,595

The mercantile demand for money has occasioned the withdrawal of 253,629*l* from the private deposits, and the addition of 524,987*l* to the private securities lodged at the Bank. The influx of Government deposits has, however, served to maintain the reserve, which stands at 59,595*l* over the amount held last week. The decrease in the coin and bullion is 42,760*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	19,874,560	20,662,816	19,891,665	20,563,825	20,281,455
Public deposits	4,828,237	7,527,911	8,673,899	8,863,364	7,677,728
Other deposits	11,149,103	13,764,718	13,282,605	12,434,975	13,904,702
Government securities	11,542,385	11,209,241	11,193,588	11,174,584	11,023,211
Other securities	14,880,844	18,280,554	19,805,739	20,497,727	19,828,885
Reserve of notes & coin	8,653,690	10,653,426	9,749,973	8,507,249	9,577,677
Coin and bullion	13,621,520	16,072,111	14,528,178	13,884,389	14,758,607
Bank rate of discount	5 p. c.	2½ p. c.	4 p. c.	6 p. c.	4½ p. c.
Price of Consols	93¾	90¾	92½	91½	88⅝
Average price of wheat	68s 0d	59s 2d	46s 2d	40s 2d	38s 6d
Exchange on Paris (short)	25 10 20	25 22½ 27½	25 10 17½	25 25 30	25 17½ 22½
— Amsterdam ditto	11 16½ 17	11 16 16⅓	11 15½ 16	11 17 17½	11 16 16½
— Hamburg (3 months)	13 6⅞ 7½	13 7½ 8	13 7½ 8	13 7⅞ 8	13 8 8⅛

In the corresponding week of 1855 the manifesto of Alexander II. on his accession to the Russian throne had been published. A conspiracy against the Government of the Havana had been discovered in time to frustrate the proposed attack.

In 1862, Baron Ricasoli had retired from the Presidency of the Ministry at Turin. The demand for money in London was very inactive. Several new foreign loans were expected.

In 1863, the issue of a Confederate States loan was expected. The money market was rather quiet, but numerous introductions of new companies on the Stock Exchange were taking place.

In 1864, two engagements had taken place in Jutland. The Danes, after severe fighting, had been driven back towards Horsens. At the elections to the "Folksthing" of the Rigsraad, all the national candidates in Copenhagen favourable to an energetic prosecution of the war had been elected. A popular demonstration in favour of Denmark had taken place at Stockholm. Negotiations for the Conference had been suspended. News had arrived of the death of the King of Bavaria, and the succession of his eldest son to the throne, under the title of King Ludwig II. An Imperial manifesto, announcing the emancipation of the peasants, had been solemnly proclaimed in the public squares of Warsaw. A ministerial crisis had taken place at Athens. The construction of a railway from Athens to the Piræus had been commenced. In America, the Federals had defeated the Confederates between Jackson and Meridian, General Sherman had reached Quitman, after having destroyed the railroads and bridges in his rear. An attack on Mobile was expected. The committee of ways and means in Congress had reported unfavourably on the resolution authorising Mr Chase to sell gold. The Bank of Russia had reduced its rate of discount to 6 per cent. for bills of exchange at three months, and to 6½ on those at two months. The stock markets were firmer than in the preceding week, and considerable activity prevailed in the discount market.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,731,741*l*; in 1862, a deficiency of 4,516,836*l*; in 1863, a deficiency of 6,523,134*l*; and in 1864, a deficiency of 8,062,752*l*. In 1865, the deficiency is 5,924,183*l*.

DISCOUNT AND MONEY MARKET.—A slight additional demand for money has been experienced during the week, but rather in consequence of the payments to revenue account. Money is abundant, and, at short dates, easily obtainable; but there is an apparent indisposition on the part of the public to invest in government stocks and securities, which remain, notwithstanding the low value of money, at quotations inferior to those current when the Bank rate was between 3 and 4 per cent. higher than at the present time. Some small amounts of gold are stated to have been taken for America, and further sums are expected to be forwarded thither. The Bank of France rate has been reduced to 3½ per cent., and the return published in the *Moniteur* this morning indicates the improving condition of the resources of the Bank.

Annexed are the current discount charges on paper of various dates.

30 to 60 days	4½ per cent.
3 months	4½ per cent.
4 months	4¾ per cent
6 months—Bank bills	4¾ per cent.
6 months—Trade ditto	5 ½ per cent.

The abundance of stock maintains the value of money in the Stock Exchange. Short loans on Government securities command about 4 per cent.

Digitized by Google

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.

BULLION.—64,000 in gold has been sent into the Bank, but some amounts are stated to have been sold yesterday and to-day for transmission to North America.

The amount of Government bills on India, for which tenders will be received at the Bank of England on Wednesday next, is 300,000*l*.

The return published this week gives the following results compared with that previously issued by the Bank of France :—

	£
INCREASE.	
Cash in hand	1,173,330
Advances	13,330
Current accounts	165,000
DECREASE.	
Bills discounted	1,016,000
Treasury balance	5,000

ENGLISH FUNDS.—The dulness of the market continues unrelieved. Sales of stock by the general public predominate, and, although in the earlier part of the day the market opened rather more firmly, a decline took place towards the close, when Consols quoted 88⅝ to 88¾. The reduction in price is, perhaps, to be attributed to rumoured purchases of gold for America, which tell with greater force at the present moment, as we have for so long a period received constant remittances from that quarter. The official quotations at 3 p.m. are as follows :—3 per Cent. Consols, 88¾ to 88⅞ ; New 3 per Cents. and Reduced, 86⅝ to 86⅞. India 5 per Cents., 103½ to 103¾.

The Exchequer market is perfectly quiet at the quotation of 4s to 7s prem. India bonds, 10s to 15s premium.

FOREIGN STOCKS.—Except in Spanish securities, which have been rather firmly maintained during the day, the prices of foreign securities have declined, and close flat. Speculation in Turkish Consolidés is less active ; and, even in the Confederate loan, subject to heavy fluctuations on account of the adverse intelligence received from America, there is, comparatively, a small amount of business doing. Italian stocks are all heavy. The closing prices of stocks dealt in to-day are subjoined :—4½ per Cent. Brazilian, 82 to 84. 7 per Cent. Egyptian, 93½ to 94½ ex div. ; ditto, 1864, 95 to 96 ; ditto, scrip, 1¼ to 1¾ prem. Italian scrip, 2½ to 2 dis. 3 per Cent. Mexican, 25⅞ to 26⅛. 5 per Cent. Moorish, 94 to 96. 3 per Portuguese, 47 to 47⅛. 5 per Cent. Russian, 1822, 88½ to 89½ ex div. ; 4½ per Cent. ditto, 1860, 86½ to 87½ ; 5 per Cent. ditto, 1862, 88½ to 89½ ; 5 per Cent. ditto, 1864, 90½ to 91½. Spanish Passive, 32½ to 32¾ ; ditto, Certificates, 16½ to 16¾. 6 per Cent. Turkish, 1854, 93 to to 94 ; ditto, 1858, 69¾ to 70¼ ex div. ; ditto, 1862, 72 to 72½ ; ditto, 1863, 69 to 71.

The closing quotations of French 3 per Cent. Rentes this evening from Paris is 67.70.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—There is still little doing in the railway market, but prices are dull, notwithstanding the traffic receipts published, and are more or less affected by the heaviness of English Government stocks, and by the competition of so many new securities. The large amount of shares created within the past two or three years has evidently been in excess of the requirements of the public, and although the holders of some have received very large dividends, the returns on the greater number are of an unsatisfactory nature. It is, indeed, scarcely possible that so many joint stock companies should all find a profitable business within so short a space of time ; and the fear of impending calls on the one hand, with the indisposition that on the other results from fear as to the proximate issue of events in America, and anxiety as to the probable changes on the suppression of the war or the complete occupation of the sea coast by the Federals, impedes speculation and close up all the approaches to a more active condition of the markets. With regard to actual prices, most railway stocks have fallen ½ to 1 per cent. during the day. Metropolitan stock has been exceptionally firm.

There is little change in colonial securities. In American, 5-20's are firmer, and Confederate loan, after opening heavy, was closed at an improvement.

In miscellaneous shares, the newer issues are maintained in value. The Financial Societies' shares are mostly flat, and show a downward tendency,

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day :—

FOREIGN EXCHANGES.—The rates quoted are rather firmer, and there is a scarcity of foreign paper upon the market.

The Stock Exchange Committee have appointed Thursday next a special settling day in the shares of the Imperial Austrian Gas Company (Limited), for bargains entered into on and after the 31st December, 1864. The shares are to be marked in the twice a week list.

Digitized by Google

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—During the past week the demand for gold has slackened, and the arrivals have been more than sufficient to supply all existing orders. Although only about 4,000*l* have been sent into the Bank, it is more than likely that in the event of any arrivals, further amounts will be sent in.

Silver.—The bar silver, ex Shannon, has been sold at 61½d per oz standard, and the Doré at 61⅝d per oz standard. The market is very quiet, and but little demand exists at present for India. The price remains as above quoted, for shipment both from Southampton and Marseilles. The Oneida has taken 8,500*l* to the Brazils.

Mexican Dollars.—The dollars ex Shannon have been sold at 60d per oz, being at the same rate as those brought by the French packet. The market is now almost cleared of this coin, and is quiet.

Exchange on India for drafts by the banks at 60 days' sight remains at 1s 11¾d for Bombay, Calcutta, and Madras, with rather a weak tendency.

Indian Government loan notes remain unchanged in price, which may still be quoted 108 to 110 for 5½ per Cents., 100 to 102 for 5 per Cents., 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std, last price; ditto refinable, 78s 0½d per oz std, last price; Spanish doubloons, 74s 6d to 75s per oz, nominal; South American ditto, 73s 9d to 74s per oz; United States gold coin, 76s 4d per oz, last price. Silver—Bar silver, 5s 1½d per oz std; bar silver, containing 5 grains gold, 5s 1⅝d per oz std, last price; Mexican dollars, 5s 0d per oz; five-franc pieces, 4s 11⅜d per oz. Quicksilver, 8*l* per bottle; discount 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS. — The Master of the Rolls has fixed the 13th instant for the appointment of an official liquidator of the Alexandra Park Company (Limited).

The Court of Bankruptcy has appointed a final meeting for the 25th instant, in the matter of the Taranaki Steel Iron Company (Limited).

Letters from Bradford announce the failure of two firms—one is said to be in the foreign branch of the yarn trade, with liabilities estimated at about 40,000*l*.

At a meeting of the creditors of Messrs P. R. Arrowsmith and Co., of Bolton, held on Wednesday last, the net liabilities were stated at 106,700*l*. The assets are estimated at 63,932*l*.

The failure of Messrs J. S. Moore and Co., of Birmingham, has been announced, with liabilities estimated at about 70,000*l*.

PUBLIC COMPANIES.—The report of the Agra and Masterman's Bank (Limited), to be presented at the meeting of the shareholders to-day, has been issued. It is stated that after making provisions for bad and doubtful debts, the available surplus amounts to 263,120*l* 8s 6d. Out of this sum, the directors have made a distribution of dividends and bonuses, at the rate of 20 per cent. per annum, for the past year, on the original capital of 1,000,000*l*. A dividend and bonus equal to 20 per cent. per annum, has also been paid on the new capital of 500,000*l*, for the half-year just ended. The balance of 16,321*l* 11s is carried forward to credit of profit and loss account for the current year.

The interest on the shares of the Freemasons' Tavern Company, at the guaranteed rate of 8 per cent. per annum, is now in course of payment.

The ordinary general meeting of the Brighton Hotel Company took place on Wednesday last. The net profit for five months was stated at 2,685*l*. A dividend of 15 per cent. per annum was declared, and 1,000*l* carried forward.

The directors of the East Indian Railway Company have announced that they are prepared to receive applications at par for 1,200,000*l*, Five per Cent. debentures, for five years.

At the meeting of the European Bank a dividend at the rate of 7 per cent. per annum was declared.

The annual meeting of the Commercial Union Assurance Company took place on Tuesday. A dividend of 5 per cent. per annum and a bonus of 2s 6d per share were declared.

At the annual meeting of the Star Life Assurance Society it was stated that the income of the Society, from all sources, now amounts to 120,494*l* 4s 11d, and the accumulated fund to 590,245*l* 19s.

The dividend on Edinburgh and Glasgow Railway stock for the half-year is at the rate of 5 per cent. annum, against 4 in 1863; and that on Scottish Central Railway stock at 7 per cent. per annum against 6¼ in 1863.

The directors of the Bank of Australasia have notified that a dividend and bonus at the rate of 14 per cent. per annum free of income tax, will be paid on the old capital of 900,000*l*.

At the meeting of the Merchant Banking Company of London, the report stated that, after the payment of current expenses and making provision for bad and doubtful debts, there remained an available balance of 44,556*l* 7s 7d. A dividend at the rate of 12 per cent. per annum was declared.

The annual meeting of the New Brunswick and Nova Scotia Land Company was held on the 9th inst., and a dividend of 10s per 100*l* nominal share declared.

The report of the directors of the Company of African Merchants recommends the payment of a dividend of 10 per cent. per annum for the half-year ended 31st December last.

The directors' report of the London Bank of Mexico and South America recommends a dividend equal to 10 per cent. per annum.

The Wallachian Petroleum Company was formed in February, 1864, and has since got into efficient working order several of the valuable oil springs of which it has received the concession. It is proposed to establish a refinery on the plan adopted in similar undertakings in America, which has there produced very satisfactory results to the shareholders. On the 4,000 A shares now offered a preferential dividend of 7½ per cent. will be guaranteed out of the first profits, with a rateable participation in further profits.

The South African Land and Finance Company (Limited)—capital 550,000*l*: first issue 250,000*l*, in 10,000 shares of 25*l* each—is established to aid the development of the resources of South Africa. As a beginning the directors have provisionally agreed to purchase certain lands in Cape Colony and the Orange River Free State, which they consider possess remarkable advantages. The rate of profit and interest in South Africa to well-managed undertakings is very high. A minimum dividend of 7 per cent. for the first year, and 10 per cent. for the second and third year, is guaranteed to the shareholders, to the satisfaction of the directors.

At the annual general meeting of the National Union Life Assurance Company, the report stated the number of new policies to have been 591, assuring 115,450*l*, and yielding a yearly premium income of 3,617*l* 10s 8d.

Mr J. D. Carnegie, late of the National Bank, Cork, has been appointed general manager of the National and Provincial Bank.

The first report of the Directors of the Millwall Iron Works Company, with the balance sheet to be presented at the general meeting on the 20th inst., shows that after providing for all contingencies, there remains a net balance of 27,794*l* 6s 7d, which the directors intend applying to the payment of a dividend of 6s per share, being at the rate of 12 per cent. per annum.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 3-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.5½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 2-10ths per cent. dearer in London than in Hamburg.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Very little English produce was exhibted for sale at Mark lane to-day. Attention was chiefly directed to fine dry samples of wheat, which realised full prices; otherwise the trade was dull, yet the quotations were without material alteration from Monday. In foreign wheat, a limited business was transacted, at late prices. This week's imports amounted to 120 quarters of wheat; 10,930 barley; and 1,030 sacks of flour.

At Liverpool this morning, the demand for wheat, flour, and maize, ruled inactive on former terms. The wheat trade at Wakefield was quiet, at late rates. Barley sold heavily at previous quotations.

There has again been a depressed cotton market at Liverpool this week; and although on Monday and Tuesday there was a somewhat increased demand from spinners, yet all sales effected were made at a concession in price. Wednesday and yesterday the market relapsed into a state of dullness, at a decline of ⅛d ¾d. To-day, the news of the fall of Wilmington and the almost unchecked progress of Sherman through the Carolinas, has further checked business, and the market closes very flatly, at a decline of 1½d to 2¼d from last week.

We have letters from Bombay to the 13th ult. For the fortnight preceding that date the cotton trade was very dull, and a general fall took place in prices. The arrivals of *new* produce were tolerably large. The following tables of prices and exports are from Messrs Nicol and Co.s' circular:—

CURRENT PRICES of COTTON at BOMBAY, Feb. 13.

	Market Value. Per candy, 784 lbs.	C.F.I. Exchange 2s 1d per R.
	rs	d

EXPORTS of COTTON from BOMBAY from Jan. 1 to Feb. 13.

Destination.	1864. bales	1865. bales
London	2,917	145
Liverpool	92,690	74,650
Total, Great Britain	95,607	74,795
Continent	5,226	...
America	...	...
Grand total	100,833	74,795

In the state of the colonial and foreign grocery produce markets, very little change can be noticed, and the fluctuations in the value of all articles have been trifling. The raw sugar trade has been decidedly quieter, and in some instances prices have slightly

Digitized by Google

declined. Coffee, tea, and rice have ruled stationary in price. Cocoa is very firm. The quantity of tea now afloat is estimated at 26,650,000 lbs, against 34,862,000 lbs of tea last year.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Feb. 28, 1864 and 1865, with STOCK on hand on March 1, 1864 and 1865.

The public sales of colonial wool have, on the whole, passed off steadily during the week. With the exception of a slight improvement in the value of Cape produce, prices to-day are without quotable change from those current at the opening sale. The demand for export to the Continent is moderate.

Hemp continues flat, at 30*l* to 32*l* 10s for clean Russian qualities. Flax is a slow sale. Jute is rather cheaper.

COMPARATIVE STATEMENT of HEMP, FLAX, and JUTE on hand in London, on March 1, 1863, 1864, and 1865, Dealers' Stock included.

Large public sales—comprising 4,067 serons—of Spanish indigo have been held, and inferior qualities declined in value 3d per lb. Fine parcels, however, which were in demand for export to Germany and Italy, have changed hands at an advance of 3d to 6d per lb. Prices ranged from 1s 10d to 7s 8d per lb.

In the early part of the week, the metal trade was firm; but the demand has since fallen off. Oils and tallow continue to rule inactive.

The state of trade at New York, during the week ending Feb. 22, exhibited no signs of activity; indeed, in most articles of grocery produce, considerable heaviness prevailed, and prices somewhat declined. The arrivals of cotton from Savannah were somewhat extensive, and fair shipments had been made to Europe. Breadstuffs were very dull, and the exports during the first three weeks of last month showed a heavy decrease as compared with the same period last year. Gold, in consequence of the favourable military news, declined to 198½ per cent. The stock of bullion in the Banks on the 18th ult. was 4,136,460*l*; and the balance in the Sub-Treasury, 5,258,800*l*. The exports of specie, from Jan. 1 to Feb. 18, were 783,600*l*, against 1,535,830*l* in the same period last year; 1,338,640*l* in 1863; 1,045,380*l* in 1862; and 40,500*l* in 1861. The imports of dry goods and merchandise for the same period were valued at 3,506,800*l*, against 6,530,180*l* in 1864; and 4,938,350*l* in 1863. There was very little demand for money from the 20th to the 25th ult., and the current rates for prime short-dated commercial paper were 8 to 8½ per cent.

THE COTTON TRADE.

LIVERPOOL—MARCH 10.

The telegraphic reports announcing the evacuation of Charleston caused on Saturday great agitation and a serious decline in the cotton market, which became very irregular; and though, from time to time, during the last few days more disposition has been manifested both by the trade and speculators to buy, at some decline from the current rates, the week closed heavily yesterday at prices considerably below former quotations. American has been in limited demand, and has fallen fully 2d per lb. Sea Island is

Digitized by Google

much neglected, with a downward tendency in value. Brazil has declined 2d per lb, and continues very freely offered. Egyptian has been in fair request, but is much pressed for sale, and has fallen about 2d per lb. In Smyrna prices show considerable irregularity, closing at a decline of 2d to 2½d, the larger reduction being on the finer qualities. East India has participated in the general depression, and being pressed for sale, a reduction of 2d to 2½d per lb in value has been established. China has been in fair request, but a decline has been submitted to of about 2d per lb. The sales of Egyptian this week are increased by about 8,000 bales, forwarded from the ship's side during the last two months.

No transactions "to arrive" have been reported during the week.

The sales of the week amount to 40,860 bales, including 4,790 on speculation, and 5,130 declared for export, leaving 30,940 bales to the trade. The sales to-day amount to about 5,000 bales.

LONDON—MARCH 10.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—The market this week has been characterised by great flatness, and much depression has been experienced throughout. The late Confederate reverses, coupled with the excessive stock, have mainly conduced to this state of things. So far as prices are concerned we have to notice a decline of 1d to 2d per lb. the market closing very quietly, but with, perhaps, a shade better feeling.

Sales to arrive :—100 bales Tinnevelly 10½, January shipment, guaranteed good fair; 200 Western, 12d to 13¼, January shipment, guaranteed fair.

NEW YORK—FEB. 22.

During the last three days about 1,600 bales of cotton have changed hands, at slightly reduced rates. Midland upland is quoted at 83c per lb. The arrivals are 9,571 bales, viz. :—318 bales from Matamoros; 200 Havana; 1,461 New Orleans; 7,569 Savannah; and 403 bales by rail. This additional quantity raises the import since Sept. 1, to 114,724 bales. The export from Feb. 1 to Feb. 22, was 5,192 bales, against 175 bales last year.

NEW YORK, Feb. 25.—The cotton market is without change, middling upland produce being quoted at 83c per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

For the time of year, a fair average business has been transacted in goods, and the quotations have been well supported. The demand for iron has been far from active, at late rates. Coals, however, are far from active, at extreme currencies.

MANCHESTER, March 9.—On Saturday of last week, the evacuation of Charleston increased the previous depression, and caused a sudden descent in prices, from which there can hardly be said to have been a rally any day this week. On the contrary, sellers have daily appeared more anxious and buyers more cautious. In plain goods for India and China, a few forced sales to a fair amount have been made, and even these now contrast favourably with the generally reduced quotations. The Bolton class of yarns, made from Egyptian cotton, have again been specially affected, sales having been made at 3d per lb less than last week. In other classes, great irregularity prevails, along with a good deal of distrust. A common fear of the consequences of present losses seems to possess spinners, manufacturers, agents, and exporters, leading to contraction in all but a few quarters.

BRADFORD.—The great and rapid fall of cotton is the cause of almost complete stagnation in the wool market. Strong wether wool is chiefly inquired for. The trade in yarns is of the most restricted character, both for home and foreign account. Prices are still drooping. Transactions in plain goods have become extremely limited, and the call for fancies is by no means brisk. Quotations in general are lower, especially for Cobourgs and plain Orleans.

Digitized by Google

LEEDS.—There is rather more doing by the large wholesale houses in the home trade, and the export trade is quite as good as we have lately had to report. There is no improvement, however, as to the Canadian or American trade. The manufacturers from the neighbouring towns and villages report themselves to be in moderate employment.

ROCHDALE.—Some large buyers have been here and bought a considerable amount of goods, which has imparted a little more animation to the trade than we have lately had to report. In addition to this, some of our manufacturers have obtained a Government contract for 10,000 pieces of 42 yards each, which will keep hands busy for some time. The Yorkshire goods trade keeps quiet, but prices are steady. The local wool trade remains much the same as last week.

LEICESTER.—The hosiery trade in most departments is steadily improving, and the operatives are finding increased employment.

NOTTINGHAM.—The lace trade still remains quiet, and though orders are coming in they are only small, and more for assorting up than for ordinary stock. Silk Mechlins are rather more in demand, and black silk laces and edgings are likely to be more used, the fashions being in their favour. The plain cotton net branch is very depressed, and until there is more steadiness in the cotton market it is probable it will remain so. The continental trade, as a whole, remains very quiet. The hosiery trade continues active, and a fair amount of business is being transacted. Buyers, however, act with caution, and decline to place orders in advance, owing to the unsettled state of the cotton market, in which there is an unsteady feeling, and yarns are expected to decline in price.

SHEFFIELD.—Trade here continues very quiet in most branches. The home market is unproductive, except that from the north of England and Scotland. Moderate orders are received for steel and tools. The slight improvement noticed in the demand from the Federal States of America for cutlery and other goods continues, but there is no approach to activity.

WOLVERHAMPTON.—The demand for iron keeps moderately good, but, as a rule, the orders are of small amount. The continental demand is better, and the French trade is recovering a little, but no improvement is felt in the demand for the United States.

BARNSLEY.—The orders that come to hand from the London coal merchants are large, and Silkstones are in good request, at fully late rates; Barnsley, hards, and other descriptions of South Yorkshire coal are also well inquired for.

BIRMINGHAM.—The trade of this town continues steady. In the foreign department more animation is experienced than is usual at this period of the year. There are good orders on hand from the West Indies, and a fair sprinkling on account of Canada; orders for the Eastern markets have increased of late; there is also a good business being done with the north of Europe.

HUDDERSFIELD.—The demand has been of a general character, but there is not so much doing in light goods as might be expected at this season. The local wool trade is without much alteration.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 22.—The market for breadstuffs has ruled heavy during the last few days. Flour has fallen 25 to 40 cents per barrel; and wheat, 3 to 5 cents per bushel. The exports of wheat and flour since the commencement of the present month show a large falling off as compared with the same period last year. The prices now current are as follows:—Flour—State, superfine brands, $9.80 to $10; State, extra brands, $10.20 to $10.30; State, choice brands, $10.35 to $10.40; Ohio, common brands, $11 to $11.10; Ohio fancy brands, $11.15 to $11.20; Ohio, good and choice extra brands, $11.25 to $12; Michigan, Indiana, Wisconsin, &c., $9.90 to $10.50; Genesee, extra brands, $10.50 to $11.50; Missouri, $10.50 to $15; Canada, common, $10.40 to $10.50; Canada, good to choice extra, $10.55 to $11.90 per barrel. Wheat—Quite nominal. Corn—Western $1.85 to $1.87 per bushel.

EXPORTS of GRAIN, &c., from NEW YORK from Feb. 1 to Feb. 22.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat fresh up to our market, this week, have been very moderate, and in but middling condition. Selected samples have moved off steadily, at full quotations; but other kinds have met a dull inquiry, at late rates. Scarcely any foreign wheat has come to hand. The supply ex granary, however, has continued moderately extensive. Good and fine qualities have realised extreme currencies, with a fair sale. Inferior kinds have sold heavily, at late quotations. Malting barley has ruled a shade lower, and other kinds have moved off heavily. The imports from abroad have been again extensive. We have no change to notice in the value of any kind of malt, the receipts of which have been seasonably large. In oats, very few sales have been effected, at late rates. Both beans and peas have moved off slowly. The demand for both English and foreign flour has been steady.

There has been rather more firmness for wheat in some of the continental markets; whilst most kinds of spring corn have realised full prices. The shipments of produce from America are still very limited.

In Scotland, the corn trade generally has been steady, but without change in prices.

The Irish markets have been slow for most kinds of grain, at about previous quotations.

Mr George Dornbusch reports the arrival of 27 cargoes of grain off coast. Wheat has been in improved request, and prices have had an upward tendency. Maize has advanced 6d to 1s per quarter, and most other articles have ruled firm.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been steady, and the weeks' business is of full extent, at extreme rates. The deliveries maintain the improvement already referred to, being 12,400 tons above those in 1864, and the present stock is 27,600 tons in excess.

Mauritius.—7,037 bags offered by auction were sold at steady prices; brown, 26s to 28s 6d; soft middling grey, 30s 6d to 31s; grainy and crystallised, 33s to 37s; white, 11s 8d duty, taken in at 38s 6d. A floating cargo has sold for the United Kingdom, No. 12½ to 13, at 25s. One at 25s per cwt for France. A few parcels are reported on the spot.

Penang.—Of 5,174 bags in the sales, the chief part sold at 28s to 33s per cwt for brown and yellow.

Digitized by Google

Bengal.—3,298 bags went off at about last week's rates, a fair proportion being sold: Gurpatta date, 28s to 31s; soft brown, 24s to 27s; white Benares, 34s to 35s per cwt.

Madras.—Of 13,920 bags submitted to public sale, a large proportion sold: Jaggery, 22s to 23s; pale grey date sort, 24s to 25s. Several parcels have sold by private contract, including grainy, at 25s per cwt.

COFFEE.—Plantation Ceylon commands steady rates owing chiefly to the small supply offering, while the common qualities generally remain dull, and prices rather tend downwards. Of the former, 101 casks 351 barrels and bags chiefly sold at 80s 6d to 85s 6d for palish and small berry to good middling quality. 210 casks 1,022 bags native were principally withdrawn, a few lots good ordinary selling cheaply at 69s. 23 casks 1,225 barrels and bags Jamaica mostly sold at 74s 6d to 78s 6d; good ordinary to fine ordinary, 69s to 71s 6d.

TEA.—The market is still inactive by private contract, and the public sales have gone off flatly, at rather lower rates in some cases. Common and medium greens show a fall of 1d to 2d per lb. There were 36,000 packages in the catalogues, and 16,600 packages sold.

RICE.—An active inquiry has sprung up for soft grain sorts and large quantities have changed hands: low to fine Rangoon, at 8s 7½d to 9s 9d; Necrancie Arracan, 9s 3d. By auction, 15,151 bags Rangoon were taken in at 9s. 5,085 bags pinky Madras were mostly bought in, but afterwards sold at 11s 3d per cwt.

SPICES.—Black pepper is rather dearer, and white has further advanced.

SALTPETRE continues firm, but not active, about 1,000 bags Bengal finding buyers: refraction, 9½ to 6¾, at 28s 9d to 29s 6d per cwt.

METALS.—The markets have been without activity. Spelter has sold more freely on the spot at 19*l* 10s to 19*l* 17s 6d; June delivery 19*l* 12s 6d per ton. Foreign tin remains quiet. Scotch pig iron has not fluctuated in price. Mixed was quoted 50s 3d to 50s 6d per ton cash.

JUTE remains rather dull.

TALLOW.—The market has been flat. This morning first sort new Petersburg Y. C. is worth 40s 3d; June 40s 9d to 41s; October to December, 42s per cwt.

PARTICULARS OF TALLOW.—Monday, March 6.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market remains steady. At auction, to-day, a fair proportion of 9,395 bags Mauritius sold at extreme prices to a slight advance. 935 bags middling Cossipore sold at 34s to 34s 6d. 416 bags Natal and 170 casks West India realised previous quotations. The week's business in West India reaches 2,107 casks. A floating cargo of Mauritius sold for the United Kingdom, No. 12½, 24s 9d; one of Cuba at 21s. 3,600 bags Mauritius on the spot, at 36s 6d per cwt.

COFFEE.—A few lots of plantation Ceylon offered by auction realised the full valuations. 457 cases 275 bags East India were chiefly damaged.

ADDITIONAL NOTICES.

REFINED SUGAR.—In the home market for refined sugar there has been a very steady demand for most descriptions of goods. Dutch crushed is held for higher prices.

GREEN FRUIT.—Market tending to improvement. Oranges improving in value. Some parcels St Michael and Valencia sold by Keeling and Hunt at public sale, went at an advance in price. Lemons firm, stock being light. More inquiry for Barcelona nuts, the low figure being favourable for dealers taking stock. Para wanted; none at present in the market. Walnuts dull. Seville sours in moderate demand.

DRY FRUIT.—At public sales during the week low-priced currants have shown signs of further depression. Raisins neglected. A good demand exists for sound-conditioned figs, of which the market is nearly bare.

COLONIAL WOOL.—The sales progress at opening rates.

FLAX without any alteration.

HEMP.—Market very flat. Rather lower prices would be accepted for forward delivery.

TOBACCO.—A steady and regular demand has existed for good and fine descriptions of American for home trade, and some small lots were taken for exportation. Prices remain unchanged. In other growths, a fair extent of sales at full rates.

METALS.—Business has been again quiet all the week. Copper has not changed hands to any extent, nothing being pressing on the market. Iron is brought to a standstill by the disastrous contest between the masters and the men. Tin keeps very quiet, as do also lead and tin plates. Spelter finds a middling inquiry.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	42	0
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, March 6.—The total imports of foreign stock into London, last week, amounted to 5,465 head. In the corresponding week in 1864 we received 6,539; in 1863, 3,961; in 1862, 1,398; in 1861, 1,964; in 1860, 3,570; and in 1859, 1,704 head.

There was a large supply of foreign beasts on offer here to-day. A portion of it was derived from Belgium, Hungary, Switzerland, Holstein, and Normandy. Some of the French beasts were in prime condition, and disposed of at high rates. The show of foreign sheep and calves was only moderate. The arrvials of beasts fresh up from our own grazing districts were by no means extensive, and the quality of most breeds was only middling. From Scotland the receipts were remarkably good. The show from Ireland was inferior. The beef trade was somewhat heavy at a decline in the quotations compared with Monday last of 2d per 8 lbs. A few very superior Scots and crosses sold at 5s 4d; but the general top figure did not exceed 5s 2d per 8 lbs. The supply of English sheep was on the increase. About a moiety of it was out of the wool. Good and prime Downs and half-breds moved off freely, at very full prices, the top quotations being 6s 4d to 6s 6d per 8 lbs, otherwise the mutton trade was heavy, at 2d per 8 lbs less money. Clipped Downs realised 5s 2d to 5s 4d and Lincoln 4s 8d to 5s per 8 lbs. Lambs were in fair average supply and sluggish request, at from 6s to 6s 8d per 8 lbs. Calves moved of slowly, at late rates, viz., from 4s 6d to 5s 8d per 8 lbs. The demand for pigs was steady, at full currencies.

SUPPLIES.

	March 7, 1864.	March 6, 1865.
Beasts	4210	4250
Sheep	16890	15790
Calves	138	174
Pigs	290	370

THURSDAY, March 9.—The supply of beasts here to-day was moderate and most breeds moved off slowly, at Monday's currency. The general top figure for Scots was 5s 2d per 8 lbs. The show of sheep was tolerably good. Downs and half-breds sold steadily, at full quotations; otherwise the mutton trade was heavy, at late rates. Downs, in the wool, sold at 6s 4d to 6s 6d; out of the wool, 5s 2d to 5s 4d per 8 lbs. Lambs ruled heavy, at from 6s to 6s 8d per 8 lbs. The inquiry for calves was steady, at previous quotations,—viz., from 4s 6d to 5s 8d per 8 lbs. There was a fair demand for pigs, at full prices. In milch cows, very little was doing.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Monday, March 6.—Our market continues very inactive, the sales effected being small, and at prices which barely maintain our recent currency.

FRIDAY, March 10.—The supply of English hops on sale being small, all descriptions continued to be held at full prices. The demand, however, is chiefly confined to good and fine samples, which command a steady sale, at fully late rates. For inferior produce, both English and foreign, the trade is slow, at previous quotations. Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 140s; Yearlings, 100s to 140s; American, 80s to 130s per cwt.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, March 6.—The arrivals both coastwise and by rail have been much larger than the demand, and a fall in price of 10s per ton has been the consequence. The following are this day's quotations:—Yorkshire Flukes, 120s to 140s; ditto Regents, 90s to 100s; ditto Rocks, 75s to 80s; Kent and Essex Regents, 90s to 100s; Perth, Forfar, and Fife Regents, 75s to 80s; ditto Rocks, 65s to 70s; French and Belgian whites, 55s to 60s per ton.

FRIDAY, March 10.—The market is moderately supplied with potatoes. Most descriptions command a steady sale, at about previous rates. Yorkshire Regents, 90s to 110s; ditto Flukes, 130s to 145s; Kent and Essex Regents, 90s to 105s; Scotch Regents, 90s to 100s; ditto Rocks, 70s to 85s; Dunbar Regents, 90s to 110s; Foreign, 60s to 70s per ton.

HAY MARKETS.—THURSDAY, March 9.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 5s 0d; clover, 5*l* 5s to 6*l* 6s 0d; and straw, 1*l* 7s to 1*l* 14s per load. Trade dull.

CUMBERLAND—Meadow hay, 4*l* 4s to 5*l* 7s 6d; clover, 5*l* 5s to 6*l* 6s; and straw, 1*l* 7s to 1*l* 14s per load. A slow inquiry

COAL MARKET.

FRIDAY, March 10.—Wallsend Haswell 19s 9d—South Hetton 19s 6d—Hartlepool 19s—Byron 17s—Harton 16s 9d—Heugh Hall 18s—Kelloe 17s 3d—W. Lambton 17s 9d—South Kelloe 18s—Tunstall 17s—Cowpen Hartley 15s—Davison's W. Hartley 15s—Hastings' Hartley 14s 6d. Ships at market, 80: sold, 23; gas contracts, &c., 28—51; unsold, 29; ships at sea, 45.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, MARCH 10.—The market has been very quiet this week, and the transactions are of quite a retail character; prices, however, show no material alteration, though the tendency is in favour of buyers.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 25th of February, on 11,821 miles, to 564,951*l*, and for the corresponding week of last year, on 11,476 miles, to 539,150*l*, showing an increase of 345 miles, and of 25,801*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,314 miles, to 460,761*l*, and for the corresponding week of 1864, on 8,057 miles, to 438,141*l*, showing an increase of 257 miles, and 22,620*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, March 6.—In the share market to-day considerable dulness prevailed, and English and Canadian railways again showed a downward tendency. American securities were firm, and in the other descriptions there was no material change of tone. Of the English lines, Manchester, Sheffield, &c. declined ½, North-Eastern (Berwick) ¼, Great Western a further ½, and South-Eastern a further ¼. In colonial, Atlantic and St. Lawrence declined 3½, Grand Trunk of Canada 1st preference (of both descriptions), 2d preference, and 4th preference (of both descriptions) 1 each, ditto (2d preference deferred) 2, and ditto (3d preference of both descriptions) 1½ each, Eastern Bengal, and Bombay and Central India ½ each, Buffalo and Lake Huron ¼, and Great Western of Canada (shares of both descriptions) ¼ each. In foreign railways and mines no movement is recorded. In American securities, Atlantic and Great Western (New York section, of both descriptions) improved 1 each, and ditto (Pennsylvania section, of both descriptions) ½ each; and United States (5-20) relapsed ¼. In British mines, East Carn Brea and Great South Tolgus improved ¼ each, and East Lovell a further ½; Grambler and Margaret declined 1 each, and Great Wheal Vor ½.

TUESDAY, March 7.—In the share market to-day there was no recovery from former dulness, and, with the exception of American securities, which were firm, and miscellaneous shares, in which little change occurred, all the descriptions were more or less affected with a tendency to flatness. In English railways, Edinburgh and Glasgow improved 1, and Great Eastern ½; and ditto (East Anglian), Great Northern (A stock), and Midland (Birmingham and Derby) declined 1 each, ditto (original) and Lancashire and Yorkshire ¼ each, Chatham and Metropolitan ⅜ each, Manchester, Sheffield, &c. a further ½, and Great Western and South-Eastern a further ¼ each. In colonial, Scinde and Delhi (stock) receded 1 each, ditto (shares) ⅛, Punjab ½, Great Indian Peninsula (new) ¼, Grand Trunk of Canada ½, and ditto (second preference) a further 1. In foreign, Dutch Rhenish and Lombardo-Venetian declined ⅛ each. In American, United States (5-20) recovered ¼, Pennsylvania Railroad (second mortgage) advanced 1, Erie shares (paid-up) and Illinois Central (shares) ¼ each, and Atlantic and Great Western (Pennsylvania first mortgage) a further ½. In British mines, Tin Croft declined ½. In foreign mines, Fortuna receded ¼, and Alamillos ⅛.

WEDNESDAY, March 8.—In the share market to-day the transactions were again very few, and a downward tendency appeared at the close in nearly all the descriptions, American alone showing buoyancy. Of the English railways, South Devon advanced 1, and Great Northern (B stock) 2½; ditto (A stock) declined a further 1½, Chatham, Midland, and South-Eastern a further ½ each, Metropolitan a further ¼, Caledonian 1, North-Eastern (Berwick), ditto (Leeds), and North Staffordshire ½ each, and North-Western ¼; and Edinburgh and Glasgow relapsed ½. In colonial, Atlantic and St Lawrence improved 1; Calcutta and South-Eastern and Great Southern of India declined 1 each, and and Eastern Bengal and East India ½ each. In foreign, Dutch Rhenish further receded ¼. In British mines, Great Laxey improved 1½, and North Wheal Bassett and West Caradon declined ¼ and 1 respectively. In foreign mines, no movement occurred in the closing prices.

THURSDAY, March 9.—In the share market to-day the business was of limited amount, but colonial railways and American securities showed a slight tendency to improvement, while the banks rather generally and some of the miscellaneous shares tended lower, and the other descriptions were unaltered in tone. In English railways, Metropolitan recovered ½; Great Western improved ¼; Great Northern (B stock) relapsed 1; and ditto (original) receded ½, Bristol and Exeter 1, and North-Western a further ¼. In colonial, Eastern Bengal, East Indian, and Great Southern of Indian recovered ½ each; Scinde and Delhi stocks also improved ½ each. In British mines, East Grenville improved ¼, and Stray Park receded 2. In foreign mines, Montes Aureos and Scottish Australian receded ⅛ each.

FRIDAY March 10.—The railway market was inactive to-day, the principals stocks exhibited no alteration with the exception of a rise of ¼ per cent. in South-Eastern. Very few transactions occurred in Indian, Canadian, and foreign railway securities. Scinde and Great Luxembourg, however, were inquired for.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE's Two-Hole Black Pens, 46 King William street, London bridge."

Preparing for Publication,

THE YOUNG MAN'S LIBRARY

OF

USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE:

SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

London: Tweedie, 337 Strand.

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

GENERAL CREDIT COMPANY OF SPAIN.

GAS WORKS FOR SALE.

By virtue of the decision of the Council of Management of the above Company, it has been resolved to offer to public competition the Six Works possessed by them in the undermentioned cities, viz.:—Alicante, Burgos, Carthagena, Xerès, Pampeluna, and Valladolid. This auction will take place at the offices of the Company at Madrid, March 20, 1865, at 1 p.m.

The plans, title deeds of the landed estates belonging thereto, and every other document, as well as conditions of sale, can be inspected at the Company's offices in Madrid. A copy of the same conditions, and the general plan of the gas works will also remain on view at Messrs les Fils de Guilhou Jeune, Rue de Provence, Paris.

For further particulars apply at the Company's offices, 25 Caballero de Gracia street, Madrid, of T. Beau, Esq., Resident Engineer.—By order,

L. GUILHOU, Director.

Madrid, Feb. 13, 1865.

DEBENTURES AT 6¼, 6½, AND 6¾ PER CENT. EAST INDIA FINANCIAL ASSOCIATION (Limited).

Capital (fully-subscribed) £1,000,000, in 20,000 shares of £50 each. Paid-up £150,000.

DIRECTORS.

L. Balfour, Esq.	J. C. Palmer, Esq.
H. D. Cartwright, Esq.	T. M. Robinson, Esq.
J. Layton, Esq.	Sir J. S. D. Scott, Bart.
Lieut-Col. W. MacGeorge.	H. D. Seymour, Esq., M.P.
W. Moran, Esq.	F. C. Sandes, Esq.

G. F. Rimington, Esq., Manager.

Established Agencies and Committees in Bombay and Calcutta.

BANKERS.

Agra and Masterman's Bank (Limited).

SOLICITORS,

Messrs Uptons, Johnson, and, and Upton.

The Directors of this Association, the principal operations of which are those of a Land Credit Company for India, are prepared to receive subscriptions for an issue of debentures for £150,000, bearing interest as follows:—

Debentures for one year .....at 6¼ per cent.
Ditto — two years..... 6½ —
Ditto — three years and upwards... 6¾ —

These debentures are secured by all the Property and Assets of the Company, including more especially first-class Land and House Mortgages in India, in which securities the Association have large investments.

The accruing interest will be paid half-yearly at the Company's Bankers', by Coupons attached to the debentures. Applications for debentures and other information to be made at the offices of the Company, 7 East India avenue, Leadenhall street, where all further information may be obtained.

On Feb. 18, was published,

THE

INVESTORS' MONTHLY MANUAL.

The Proprietors of the INVESTOR'S MONTHLY MANUAL, in order to render it thoroughly efficient, have decided upon giving a careful Summary of the Half-Yearly REPORTS of the Companies mentioned in the MANUAL, commencing with this number, and to be continued in the succeeding ones.

They have also decided upon receiving for it a few pages of Advertisements: and, at the same time, beg to observe that it now commands a very extensive sale, and is a peculiarly valuable medium for Financial and Commercial Advertisements, because it differs from ordinary daily and weekly newspapers in being A WORK OF CONSTANT REFERENCE FOR A WHOLE MONTH, and is used exclusively by all MONIED CLASSES.

Sold as a Supplement to the ECONOMIST, price 6d; separately, 8d and 9d.

Advertisements for the next number must be sent on or before the 14th of March.

OFFICE, 340 STRAND.

TO BANKERS.—A GENTLEMAN with fifteen years' Branch Bank experience, first-class references, and ample guarantee, is open for a Branch Managership.—Address M., 10 Paradise terrace, Hackney.

A GENTLEMAN IN MANCHESTER engaged in the China shipping trade, wishes to represent a London firm to buy goods and yarn for the China and India markets.—Address "Manchester," care of J. J. Imray, Esq., 102 Minories, London.

A GENTLEMAN IS DESIROUS OF obtaining an Engagement abroad. He is well connected, and practically experienced in the trade as well as the counting house, having been employed for a series of years in well-known houses of some of the principal European seaports.—Address S. S., care of Mr W. Hopecraft, 1 Mincing lane.

TO MERCHANTS.—WANTED, BY a Youth, age 18, a situation as Junior Clerk. Good City references can be given. Salary no object.—Apply by letter, "A.B.," 60 Moorgate street, E.C.

TO NEWSPAPER PROPRIETORS. —The advertiser (age 38), who has had many years' experience as Publisher of one of the most successful London weekly newspapers, is open for an Engagement in a similar capacity. The most satisfactory references as to character and ability.—Address "Publisher," care of Miss Watlin, 409 Strand, London.

TO BANKERS, MERCHANTS, PUBLIC COMPANIES, &c.—A Gentleman, with many years' experience in Branch Banking, Assurance, and General Business, accurate knowledge of accounts, undoubted references, and ample security, is desirous for a responsible appointment as Manager, Secretary, or Accountant.—Address B., Mr Drake, Solicitor, 19 Basinghall street, London.

PARTNERSHIP.—TO BANKERS, Solicitors, and Others.—A Mercantile house, of first-class connections, principally engaged in the Shipping trade, and in which there is at present only one in the business, is open to receive a Partner with not less than £15,000 capital. First-class references given and required.—Address, in the first instance, to A.B.C., care of Charles Barker and Sons, 8 Birchin lane.

PARTNERSHIP.—TO BANKERS and Others.—A house of some years' standing, principally engaged in business as shippers and shipowners, and having first-class connections, is open to receive a Gentleman as a Partner, with a capital of not less than £25,000 to £30,000. The incoming partner's share would be considerable, as there is at present but one in the house.—Apply, in first instance, to X Y. Z., care of W. A. Plunkett, Esq., Solicitor, 24 Milk street, Cheapside.

PARTNERSHIP.—WANTED, a Gentleman with a capital of about £10,000, in a well-established mercantile house, whose chief trade lies with the Continent. Satisfactory reasons given for the retiring partner leaving. The business is sound and profitable, and the fullest information will be given relative to the trading and other accounts of the firm: also references to some of the most eminent houses in the City.—Apply to Lovering and Minton, Accountants, 13 King street, Cheapside.

PARTNERSHIP, DORMANT OR ACTIVE.—£5,000 Required.—A Firm connected with India, generally enjoying a sound and remunerative commission business, with all the elements of expansion, is open to the above infusion of capital, with the view to its more effectual working. None but principals can be treated with.—Address "Civis," Jerusalem Coffee House, Cornhill.

*** This would be found an eligible opportunity for Parents or Guardians intending to place a liberally educated youth in a highly advantageous position.

A SELECTION OF ETCHINGS BY the ETCHING CLUB.
These works are more important in size than any hitherto issued by the Club, and are well worthy the attention of connoisseurs and lovers of art. The series includes pictures by John E. Millais, R.A., Thomas Creswick, R.A., Frederick Taylor, Samuel Palmer, Richard Ansdell, A.R.A., W. Holman Hunt, Richard Redgrave, A.R.A., John C. Horsley, A.R.A., George B. O'Neill, C. W. Cope, R.A., James C. Hook, R.A., and F. Seymour Haden, F.R.C.S. These etchings, which are drawn on copper by the artists themselves, and are untouched by the engraver, are printed most carefully on India paper. The number of impressions is strictly limited to 350, and these already are nearly all sold. Orders will be received as long as copies remain.
London: Thomas Bosworth, 215 Regent street, W.

Third Edition, fcap 8vo, cloth, 4s 6d, post-free,

NORTH BRITISH AND MERCANTILE INSURANCE COMPANY.

(Incorporated by Royal Charter and Special Acts of Parliament.)

The Annual General Meeting of the North British and Mercantile Insurance Company was held in the Company's Office, 64 Prince's street, Edinburgh, on Monday, 6th March, 1865 in terms of the Constitution of the Company.

On the motion of the Right Hon. Viscount Melville, K.C.B., John Stirling, Esq., of Kippendale, Senior Extraordinary Director present, was called to the chair.

A report by the Directors was read, showing the following results for the year 1864:—

FIRE DEPARTMENT.

The premiums received during the year 1864 amounted to.....	£248,567	19	7
Deduct re-insurances.....	29,332	8	11
	£219,235	10	8
During the year 1863 the premiums, less re-insurances, were	165,192	8	3
Thus exhibiting a net increase of	£54,043	2	5
The total losses by fire, which during the past year were unusually heavy, amounted to	£183,506	18	6

LIFE DEPARTMENT.

1,240 new policies were issued, insuring	£1,034,578	0	0
and adding to the revenue the sum of of annual premiums.	£31,895	1	2
The deaths during the year were 109 in number, assuring, with bonus additions.....	£89,119	9	3
which was considerably under the expectation by the Company's tables.			
In the annuity department 31 bonds had been granted, for which was received the sum of	£19,858	14	5
The reserved fund and suspense account amounted to	£256,762	15	9
The accumulated fund to.....	£2,304,512	7	10
And the annual revenue to.....	£565,458	16	2

On the motion of Robert Blair Maconochie, Esq., seconded by John White Cater, Esq., the report was unanimously approved of, and a dividend was declared of 12s 6d per share, or 10 per cent. on the paid-up capital stock of the Company, payable on 20th March current, free of income tax.

On the motion of Sir James Gardiner Baird, Bart., seconded by John Brown Innes, Esq.—Sir Walter James, Bart., John Cookson, Esq., of Meldon Park, and the Right Hon. Viscount Melville, K.C.B., were re-elected as Extraordinary Directors; James Campbell Tait, Esq., Laurence Davidson, Esq., and David Baird Wauchope, Esq., as Ordinary Directors of the Edinburgh Board; and Pascoe du Pre Grenfell, Esq., Adolphus Klockmann, Esq., and James du Buisson, Esq., as Ordinary Directors of the London Board.

On the motion of the Chairman, seconded by Dr Alexander Wood, the thanks of the meeting were, with acclamation, voted to the Directors of the Company.

The special thanks of the meeting were then, on the motion of George Auldjo Jamieson, Esq., seconded by David Baird Wauchope, Esq., voted to the Local Boards and Agents.

On the motion of John White Cater, Esq., seconded by Dr Burt, a special vote of thanks was given to John Ogilvie, Esq., the Secretary in Edinburgh, who has been for the long period of fifty years in the service of the Company, and the meeting recommended the Directors to testify their sense of his attention to the interests of the Company by some substantial mark of their confidence.

On the motion of the Right Hon. Viscount Melville, the thanks of the meeting were voted to the Chairman.

BONUS YEAR.

On the close of the books on 31st December next, the Sixth Septennial Investigation, with the view to a Division of Profits in the Life Business, will be made. All participating Policies opened on or before that date will share.

ESTABLISHMENT.—1865.

Office-Bearers.

PRESIDENT.

His Grace the Duke of Roxburghe, K.T.

VICE-PRESIDENTS.

SUBMARINE TELEGRAPH COMPANY.

(In connection with the British and Irish Magnetic Telegraph Company).

DIRECT TELEGRAPHIC COMMUNICATION WITH INDIA.

Messages can now be forwarded from the Central Station of the Submarine Telegraph Company, 58 Threadneedle street, City, or from any of the Magnetic Telegraph Company's Stations throughout the United Kingdom, via Constantinople and the Persian Gulf, at the following rates:—

For 20 words, including address and signature:—

	£	s	d
From London to Calcutta, Bombay, Madras, and Indian stations, excluding "Docca Circle"	5	1	0
From London to stations in "Docca Circle," including Rangoon, Moulmein, &c	5	5	0
From London to Colombo, Point de Galle, Kandy, and Mannaar, Island of Ceylon	5	8	0

From any other station in the United Kingdom 1s must be added to the above rates.

For every additional 10 words or fraction thereof, one-half the above rates must be added.

Messages addressed to Singapore, China, and Australia are forwarded by post from Point de Galle, or any other station indicated by the sender, upon payment of 1s extra.

Further information and detailed tariff lists may be obtained on application at the above Companies' Offices.

S. M. CLARE, Secretary.

58 Threadneedle street, City, E.C., March 1, 1865.

ISSUE OF 4,000 SEVEN-AND-A-HALF PER CENT. MINIMUM GUARANTEED PREFERENCE SHARES OF £10 EACH.

WALLACHIAN PETROLEUM COMPANY (Limited).

Capital, £200,000.

In 4,000 A Shares of £10 each, now offered, entitled to a Preferential Dividend of £7½ per cent. guaranteed out of first profits, with rateable participation in further profits.

£1 per share payable on application.
£2 — — allotment.
£2 — — 1st June.

Or the entire £5 per share may be paid up at once, and receive the guaranteed £7½ per cent. Preference Dividend thereon.

Future Calls, if required, not to exceed £2 per share, and at intervals of not less than three months.

DIRECTORS.

Robert Pulling, Esq. (Messrs R. and W. Pulling), 18 Philpot lane, Chairman.
Alfred Bryant, Esq., 3 Catherine court, Tower Hill.
Joseph Fry, Esq. (Messrs Trueman and Fry), Gresham house.
Augusto Soares, Esq. (Messrs M. and A. Soares), 40 Seething lane.
Edward Tewart, Esq., 16 York place, Portman square.
G. S. Trower, Esq. (Messrs Trowers and Lawson), St Mary-at-hill.
J. E. Vance, Esq., 37 Westbourne terrace, Hyde park.

BANKERS.

The Agra and Masterman's Bank (Limited).

SOLICITORS.

Messrs Courtenay and Croome, 9 Gracechurch street.

BROKER.

John Inchbald, Esq., 2 Copthall court, and Stock Exchange.

AUDITORS.

Alexander Beattie, Esq.; George Hall, Esq.

Offices—66 Bishopsgate street within.

This Company was formed in February, 1864, and during the last twelve months has succeeded in providing the necessary plant, and getting into efficient working order many of its valuable oil springs situated in the important concessions it has obtained in Wallachia.

Prosessor Capellini, the eminent Italian geologist, who has made a special study of the petroleum districts of America and elsewhere, and has recently visited and surveyed those of Wallachia, states that the principalities furnish a vast field for petroleum enterprise, and adds—"I am of opinion however, that no other company can compete with the Wallachian Petroleum Company, as they decidedly possess the richest and most accessible localities."

Upwards of 3,000 tons of oil have already been obtained from the Company's wells and from contractors; the yield at present from the wells of the Company is about 30 tons weekly.

The Directors propose to erect a refinery establishment at or near Ibraila; they estimate that when it is completed a weekly net profit of about £400 can be realised on the present limited rate of yield from the Company's wells; as these increase it is confidently expected that sixty tons or more of oil will be produced weekly, by which means it is fully anticipated that profits will be realised equal to similar enterprises in America, some of which are dividing from the profits of refined oil between 10 and 20 per cent. per month amongst their shareholders.

With the view of establishing such refinery, and to keep in reserve the uncalled ordinary capital of the Company, it has been decided to issue the above-mentioned preference shares.

Prospectuses and report above referred to of Professor Capellini, of Bologna, can be had at the offices of the Company, or from the Company's Solicitors or Broker.

EGYPTIAN GOVERNMENT LOAN of 1864.

Notice is hereby given, that BONDS will be issued in EXCHANGE for fully PAID-UP SCRIP on and after Tuesday, the 21st inst. Scrip must be left three clear days previously, commencing on the 17th inst.

Lists may be had on application.

Office hours, Eleven to Three o'clock.

FRUHLING and GOSCHEN, Agents.

Egyptian Loan Office, 12 Austinfriars March, 1865.

EGYPTIAN GOVERNMENT LOAN of 1864.

The COUPONS due on the 1st of April, and the BONDS DRAWN for REDEMPTION, will be Paid at the Office of Messrs Fruhling and Goschen, 12 Austinfriars, Old Broad street, on that date, and on any Monday, Tuesday, Thursday, or Friday afterwards. The Coupons and the Bonds drawn must be left three days previously for examination, and will be received any Monday, Tuesday, Thursday, or Friday, on or after the 27th of March.

Lists may be had on application.

Office hours, Eleven to Three o'clock.

FRUHLING and GOSCHEN, Agents.

Egyptian Loan Office, March, 1865.

LOAN HALIM PASHA OF THE 31st March, 1863, for £310,000,

secured by mortgages upon several valuable estates in Egypt, and reimbursable by fifteen annual drawings on the 31st of March. Interest at the rate of 8 per cent. per annum, payable half-yearly on the 31st March and 30th September, at Alexandria, at the offices of the Egyptian Commercial and Trading Company (Limited), European bondholders are informed that for their convenience arrangements have been made whereby the above may be encashed in London or Paris on the 15th April and 15th October; in London, at the offices of the EGYPTIAN COMMERCIAL and TRADING COMPANY (Limited), and in Paris, by application to MESSRS MARCUARD ANDRE and Co.

The drawn bonds and coupons, or a specification of numbers and amounts, to be sent in at least one month previous to above dates.

METROPOLITAN DISTRICT RAILWAY COMPANY.

Notice is hereby given, that the SCRIP CERTIFICATES will be delivered in exchange for the banker's receipts on and after Wednesday next, the 8th instant, at the temporary offices of the Company, No. 41 Threadneedle street.

Receipts presented for exchange must be endorsed by the allottees. R. EARLE, Secretary.

March 3, 1865.

METROPOLITAN DISTRICT RAILWAY COMPANY.

Share Certificates in respect of Scrip paid up in full are now ready for delivery at the temporary offices of the Company, No. 41 Threadneedle street.

March 8, 1865. R. EARLE, Secretary.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures to the extent of £1,200,000 at par, in sums of not less than £100 for five years, renewable at the option of the holder for a second term of five years, and bearing interest at the rate of five per cent. per annum, which will be payable by coupon at the Bank of England half-yearly.

The Bonds will be dated on the 23rd March, 1865, and will bear interest at the rate of five per cent. per annum from that date on all moneys paid on or before the 22nd March, 1865.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council, as will appear on the face of the Bonds, under the signature of the proper officer in that behalf; and the holders will have the option, after the expiration of twelve months from the date of the Bonds, and thenceforward, upon giving one calendar month's notice in writing to the secretary of the Company before the same become payable, of converting them into Extension Shares of £20 each, bearing five per cent. interest under the contract entered into with the East India Company, the said shares, when issued, being convertible into stock, and participating in the profits of the Company.

Forms of application may be obtained at the offices of the Company.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, E.C., March 2, 1865.

FORM OF APPLICATION.

To the Secretary of the East Indian Railway Company.

SIR,—I beg to apply for Bonds to the extent of £ , in terms of the notice issued by the East Indian Railway Company, under date the 2nd March, 1865, and I hereby agree to accept the same, or any less amount that may be allotted to me, and to pay the full amount thereof on or before the 22nd March, 1865.

Name (in full) .....
Residence .....
Description .....
Date .....
Signature .....

N.B.—No Bond will be issued for a less sum than £100. Applicants are requested to state the sums for which they wish to have their respective Bonds made out.

The Bonds will be issued in the names of the applicants.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

A PLAN FOR DEALING WITH THE COUNTRY ISSUES.

The Bill now before Parliament, respecting the country issues, has many enemies and only one friend. The National Provincial Bank who asked for it want it, but no one else would lift a finger to secure its enactment. On the other hand, many important interests dislike it. The London bankers fear an augmented competition. The country issuers dislike the precedent of a very heavy taxation on their circulation; most of them care little for the hindrances which the Bill removes, and some would perhaps prefer that the National Provincial Bank should still be subject to them. Many of the most thoughtful and experienced members of Parliament much dislike dealing with an intricate public question, and setting a precedent for the future by what is substantially and almost by admission a private Bill. But though this Bill excites so many enmities, and attracts such slender support, it is well worth considering whether it does not afford the basis for satisfactorily settling one of the most delicate and difficult questions—perhaps the most delicate and difficult economical question in this country. The question is so seldom raised; it is so seldom of any use to write about it, that now it *is* raised—now it is talked of by every one in England who is ever likely to talk of it.—we shall perhaps be pardoned if we write on it elaborately and at length.

There are two divisions of the subject which are often mixed, but which should be carefully kept apart. First, what is the *end*—the most desirable of attainable arrangements—to which we should begin to move and to which we should get as near as possible? Secondly, what are the best and most judicious steps that we can *now* take towards that end? We shall not be able to make the most insignificant movement wisely unless we know to what we are moving. We shall probably fail to move at all if we attempt a sudden and spasmodic leap where our footing is so slippery and where obstacles so abound.

The case has curiously altered during the last thirty years. When Lord Althorp first tried to deal with the question, he found the single issuer in the metropolis—the greatest issuer in the Kingdom—certainly willing, and perhaps anxious, to absorb the rural issues. He found an *unlimited* number of rural issuers—strong in the conviction of their own usefulness—liked and trusted by everybody about them—totally unwilling to be absorbed or touched. The local affection for and trust in local issues still remain, but the case of the issuers is altered. They went to Lord Althorp, strong with the ready arguments of freedom against limitation, of liberty against monopoly. But now they are become monopolists themselves. Sir R. Peel gave them exclusive privileges; and for these privileges they contend. If the Bank of England coveted their issue, they would have to fight against the arguments of the great privileged body with the feeble arguments of the little privileged bodies. But, happily, as their strength is lessened, the impetus of their assailant has lessened too. The Bank of England would rather not have the country issues. It feels that if, like the Bank of France, it became the sole issuer, it must, like the Bank of France, encumber itself with a multitude of branches, not with fifty-nine, perhaps, like the French bank, but still with a great number. Thirty years since when banking was in its infancy, when the circulation was the great source of present profit, and was fancied to be an indefinite source of future profit, the establishment of branches might have seemed not unattractive. But now when cheques are superseding notes, when the present profit of the circulation is known not to be very great, when it is seen that it is rather likely to diminish than to increase hereafter, the diffusion of petty establishments to pay notes in rural districts is a formidable terror to a single bank. The Bank of England do not want the country circulation, for if they gave any decent facilities to the public for getting notes and paying notes, they would not be richer, but would be poorer for its acquisition. In thirty years the argumentative resources of the country issuers have declined, but the reason for using those resources, the assailing *impetus* of the central power, has declined still more.

What, then, in this altered state of things is the end towards which we should tend—the goal towards which we should strive? The country issues must either be extended, abolished, or retained; and we must examine the effect of each cause.

1st. As to the extension of the country issues. As we recently explained at length, we believe the good effected by the country issues in England and Scotland has not at all been recognised by the dominant school of economists, and that such good can only be duly appreciated by looking at the state of continental countries like France, where a monopolist issuer is in vain trying to work its way through a vast country, to substitute paper for gold, and to diffuse banking and credit in remote districts. We believe, for reasons we have lately stated, that even granting that the right to the profit of the circulation belongs to the State, it is for the interest of the State to delegate it to local issuers in the infancy

Digitized by Google

of banking and credit. We do not believe that the rapid and effectual establishment of banks over poor districts can be secured so well,—we doubt if it can be secured *at all*, unless in the early stages of economical progress the commencing bank is subsidised by the profit of issue. Issue comes before deposit, and deposit will not grow without diffused deposit places of easy access. The arguments that the profit of the circulation should, if possible, and under the best system, belong to the State, are forcible, and supported by high authorities; but the arguments which show that the rent of land should, if possible, belong to the State, are supported by equal, indeed by the *same* authorities, and have as much force. Both the rent of land and the profit of issue are, we believe, in certain states of economical progress, delegated by the State to individuals. We do not believe that even now, in the less advanced parts of the country, small branch banks and agencies could be maintained, except for the profit of issue. And a hundred, or even fifty years ago, we do not believe that the mass of English and Scotch banking could, without that aid, have been created.

But we have not now to deal with this question. The good —the unappreciated good—which rural issuers can effect, has in this country been effected. They have substituted gold for paper; there are as many five-pound and ten-pound notes in the country as there are ever likely to be, or as the country will use. Banks are diffused almost everywhere as much as is necessary. No good, therefore, can now be effected by an *extension* of country issues. No good results to the nation when banks only compete to settle *whose* paper the currency shall consist of. The nation gains when paper is substituted for gold, but it does not gain by the substitution of notes issued by A for notes issued by B. There is, indeed, no practical question now of extending the local issues in England. Even if it were desirable, it would be impossible. The stress of public opinion for many years has been in an opposite direction.

Are the country issues then to be *abolished*? And if so, what are we to substitute for them. There are only two substitutes possible, the notes of the central bank,—of the Bank of England,—and a State issue, notes issued from the Exchequer and payable at the Exchequer. To the substitution of Bank of England notes there is a first and preliminary objection that the Bank of England, as we have said, does not wish to substitute them, and certainly could not be compelled to do so. The profit of a *secured* circulation, like that of the Bank of England, is but small. From many causes the Bank does not work its circulation so cheaply as smaller establishments; and the profit of no circulation, however cheaply worked, would support the exclusive maintenance of small branches through the country, whose principal, if not sole function, was the issue and the payment of notes. It is obvious that the establishment of many such branches in accessible situations is the necessary accompaniment and correlative of the substitution of Bank of England notes for country notes. All notes are to be of the same value as gold, and therefore to be at once convertible into gold. But a note which cannot be converted without travelling a hundred miles is not in fact convertible: it may be so in law and theory, but it may also be at a discount in practice. "The law is open to every one;" so said Horne Tooke at the London Tavern: just so a bank note, whose place of conversion is very distant, is only *certainly* convertible to those who can pay the expense of travelling to convert it. A paper circulation ought to be practically exchangeable into gold at the will of the holder: and it is not so exchangeable unless the place where gold may be demanded is reasonably near.

With these facts plainly before them, it is no wonder that the Bank Directors should see that they would be rather poorer than richer for the acquisition of the country circulation, and that they should not desire it. And even if they *did* think they could make a profit out of it, there would be no reason for giving them that profit. If there is to be a single circulation, the profit of it should belong not to the Bank of England, or to any Bank, but to the State. The present system is open to the objection that it gives an exclusive profit to *many* issuers; and this objection would not be diminished by giving an exclusive profit to *one* issuer. Privilege for privilege—the privilege of the country banks is at least as good as the privilege of the Bank of England.

What, then, are we to say to the second substitute—a *State issue*? This can indeed hardly be as yet said to be within the practical alternatives of the subject. It is not familiar to men's imaginations; its advantages have not been tested; its objections have not been foreseen; its idea is a floating cloud on the minds of most men of business, rather than a defined and measured reality. And when it comes to be defined, it will be found to have two grave defects, which will go far to vitiate any advantages which may be derived from them. *First.* There is the same difficulty which besets the diffused extension of Bank of England notes—the necessity of multiplied branches. The State must create little issue departments all over England; little reservoirs, whence notes may be sent out, and to which they may be sent back. It is *possible* that this may be practicable without spending more than the profit of the State circulation. But we doubt if it is *likely*. We once heard a Secretary of the Treasury say, "If we had the "country circulation *down here* (he was speaking in the "Treasury Chambers), it would be a charge on the Miscel- "laneous Estimates, and not an item of Miscellaneous "Revenue." In so untried and far-off a matter, it is unwise to be sure, but we believe this opinion to be right. And even if the impediment of cost could be surmounted, there would still be a serious difficulty—a grave danger, at once economical and political. How, under a State issue, are we to deal with a panic? Twice Peel's Act has been suspended; and if there had been a bad harvest last autumn, and a sudden extra demand for gold to pay for food, in addition to our other dangers, that Act would have been suspended again. The whole theory of the Act involves such suspensions whenever the subsidiary credit circulations, the refined organisation of cheques and of the clearing-house is impaired and made inefficient by panic. *Now*, in cases like this, the Bank of England is the point of attack. The public eye is fixed on the Bank Directors; it watches them, and them only. But if the issue department of the whole country were in the custody of Government, if it were not at Threadneedle street but at Whitehall, it would be close to the Houses of Parliament, it would be accessory to the inevitable influence of Parliamentary Government, it would be sensitive to approaching elections, to stray votes, to the feelings of great constituencies. We should not like to see, even in such a year as 1864, a Chancellor of the Exchequer, perhaps member for Liverpool, besieged by his constituents, pressed to relieve commerce, thundered at by a formidable Opposition, tempted to relax the currency, in order to retain his own power. The economical difficulties of a panic are sufficiently grave without adding to them political dangers.

As, therefore, it is not possible to substitute either Bank of England notes or State notes for the country issues, as their abolition is almost as impracticable as their extension, we are left with the remaining alternative—the alternative of their retention. But though they are to be retained, though they apparently *must* be retained in some form or other, it does not follow that they are to be retained as they now are. It is manifestly impossible that a bank, merely because it happened to have a circulation in 1844, should retain the profit of that circulation complete and unimpaired during all time. The case is this: we have decided that there shall not be an unlimited circulation,—we have decided that the State cannot now at least, or within any foreseen period, take that circulation into its own hands:—two conclusions are plain.

1st. The State should in the end, if not at once, have as much of the profit of the circulation as it can get. Ultimately it should farm out the circulation which it cannot manage itself between the Bank of England and the auxiliary and local banks on the best terms it can obtain.

2ndly. It should ultimately, if not now, obtain the same security from the rural banks which it now has from the central bank; it should require the country issues up to the prescribed limit to be secured, as the Bank of England issues up to the corresponding limit are secured, by a deposit of Consols, or of some stock satisfactory and sufficient. The public cannot through all time be satisfied unless the State gets its *full* share in the profit of a limited circulation, and unless *equal* security is given to the holder of every sort of note included in that circulation. When the State gets all the profit it can, and the note-holder gets complete security, a sufficiently satisfactory state of things will be reached;—the public and every one may be wholly satisfied. Two changes, therefore, neither of them agreeable to country issuers, must be looked for in the end.

Digitized by Google

1st. An increasing taxation of their issue by the State till only the minimum is left, which will make it worth their while to continue and carry it on.

2ndly. The deposit of securities satisfactory in character and sufficient in amount.

When these two conditions are complied with, there will be no more objection to the country issues than to the issues of the Bank of England. Both will be agents for the State in the same manner and to the same degree.

But if this is the aim to which we should tend, the goal to which we should approximate, what steps of approach, what fraction of movement is now possible? That movement will be slow in such a matter we all know; only a few weeks since most people would have deemed it impossible to move at all; even now, many people still think so. We do not, however, agree with them. We believe, if the policy of Sir R. Peel is followed out, some material steps of present advance are possible; and what is more, that a distinct settlement of future policy may be arrived at.

The country issuers have two great powers. 1st. The country issue, if it be not property, looks so very like property, that no one likes to impair it for fear of obvious precedent, and of weakening the confidence in the more delicate kinds of property. The country issuers were encouraged by law to invest their capital, their credit, and their industry in the attainment of these issues;—in so doing, they created the diffused banking system which is the principal reason why London is the monetary centre of the world,—why every one who wants money comes here. Any rough dealing with a property so acquired, and of such essential utility, would be certain to be unpopular, and, even with weak property-holders, would probably fail. But, secondly, the country issues are not weak. At a crisis, from their diffusion and their respectability, they possess considerable Parliamentary influence. Having a telling case, they have the means of making it tell.

Sir R. Peel perfectly understood this;—whatever has been said against the abstract theory of the Act of 1844, nothing has or can be said against it as a specimen of practical management,—of effectual tactics. He offered great present advantages to the country bankers of 1844 in return for great concessions of future principle. He gained their support by the temporary concession of an exclusive privilege, though it was apparent to every one capable of reasoning that this exclusive privilege, to its full extent, could not be retained during all time. We would advise that the same policy be pursued now; we would recommend the concession of easy terms for a sufficient number of years in return for what would now be conclusive concession of essential doctrine. We have now an opportunity of settling our final destination, if we are slow and careful in the steps which we take towards that destination.

It so happens that our course is easier, because issuing bankers are under certain peculiar disabilities. They inherit from legislation, for the most part older than 1844, certain *banking* disabilities. These are wholly in opposition to the theory and the principle of Sir Robert Peel, which places the trade of banking on the footing of other trades, though it imposes limitations and restrictions on the power of issue. Private banks cannot have more than six partners, and joint stock banks cannot carry on business in London. And it is fortunate that, by conceding these privileges, we may make our progress a *little* easier. It will only, however, be a *little* easier. Very few issuing bankers care much about these small restrictions, and some of them are, it is said, of opinion that it is dangerous for any issuing bankers to go to London. Why it should be dangerous when all banks *not* of issue have houses of business in London, why it should be dangerous to the public that banks of issue in the provinces should draw on themselves in the metropolis to the extent of a few thousands, when the Agra and other great Indian banks draw to the extent of *millions* on themselves for exchange and other purposes, has never been explained, and we do not know. The palpable fact is that issuing bankers ought to be as free in their banking business as any other set of bankers. Especially as we see that they are not likely to be soon got rid of, that we have no available and equivalent substitute for them, it is inconsistent to load them with minor restrictions and small difficulties. They are, as we have seen, not nuisances to be impaired, but agents to be employed.

Besides these restrictions, there are restrictions on the purchase of issues. These, as we have frequently before shown, are very mischievous. Bad banks have a property to keep, but not a property to sell, and the consequence is that banks in the wretched condition which we now know to have been that of Messrs Spooner and Attwood have a legislative encouragement to remain as they are, and not to transfer their issue to stronger and more solvent firms. By all means, if the banks of issue are, as time goes on, to be made agents for the State, let them, as far as law can ensure it, be good agents and not bad, solvent rather than insolvent.

As means of procuring amicable acquiescence, we would offer, therefore, to the banks of issue the removal of these restrictions, and peace and quietness for twenty years, upon their complying with *either* of two conditions:—

First. The payment of a tax of 1*l* per cent, on the amount of their circulation. The present Bill lays 2*l* 5s, but that has frightened all the issuing bankers in all the provinces.

Secondly. The deposit of security, and the payment of a nominal sum—say a shilling above what they now pay—as a recognition of principle.

Either, but not *both*; to require the simultaneous payment of a heavy new tax and the deposit of security would be too much, and would look like sudden confiscation, and would excite successful opposition. But some nominal tax, by way of recognising their position as State agents, we consider all persons who take the lease for twenty years should be compelled to pay.

We are so careful of the rights of issuing bankers—so anxious to please them—that we do not propose to make the measure we suggest compulsory; we only suggest that it should be like the Bill now before Parliament—optional and permissive. But we have little doubt that all sound and well-judging issuing bankers and all considerable issuing bankers would choose twenty years of fair certainty, in preference to their constant liability to be interferred with and their slight habitual terror. Nobody can look forward for 20 years, but we do not expect that even after 20 years the rural circulation would be abolished; we believe that the difficulties besetting a State circulation and the difficulties besetting an exclusive central bank circulation will still remain. We do not propose that the issues of the complying banks should cease to exist after 20 years of necessity, but only if the Legislature think fit, or shall be at full liberty to abolish these issues without any claim for compensation or any allegation that it is interfering with the rights of property.

We would offer these terms to issuing bankers for a limited period, say for a year only, and we are fully persuaded that before that year was out, the best, wisest, and most considerable issuers in the country would have accepted the conceded lease upon its conditions and with its explanations, and the few who did not accept for it—who ran the chance of the future—might well be left to this chance and to the mercy of Parliament.

THE DEBATE ON THE DEFENCES OF CANADA.

The debate on Monday night should have a great effect in quieting the absurd panic as to an invasion of Canada into which we appeared to be running last week. It not only brought out distinctly the various reasons which we explained in these columns last week why such a war is not to be feared, but it did much to remove the only real ground of peril by assuring the American people that such a war is at least quite needless for the purpose of inspiring England with a due respect for the *strength* of the North. The tone of silly bravado in which Mr Roebuck and others have always chosen to speak of the relative power of England and the United States, and which has had so much more power than it ought to have had to irritate the sensitive *amour propre* of American politicians, was not heard from any one on Monday night. While nobody shrank from asserting the obvious national duty of assisting any of our colonial dependencies in their resistance to external attack—a duty so clear that not even the warmest friends of the North ventured to dispute it—the tone of respect to the "territorial democracy" which rules the United States, for their persistency of purpose, and for the greatness of their resources, was in this debate at least, uniform, and not even interrupted by Lord Robert Cecil. All the speeches, whether they sympathised with the South or the North, treated the Federal *Government*, as well as the country population at its back, with the respect due to men who know their own mind, and have shown that the task on which they have entered is at least not ludicrously beyond their power to achieve. This is a great point gained. It has never been the deliberate disapprobation of the English middle-class

Digitized by Google

feeling so much as their ill-advised contempt, which has fostered the war-feeling in the United States. For that contempt there is now no sort of excuse; and the respect unaffectedly expressed in the House of Commons on Monday, though it was, for the most part, a respect accompanied with little sympathy, will do much to soothe the irritated vanity of a sensitive democracy.

For the rest, we think the expression of the fixed determination of England to aid the Canadians in defending themselves by all the means in her power, if ever an attack on Canada should be made, will be so far from increasing the irritation in America, that it will greatly diminish the chances of war. The North might possibly be persuaded by silly men, though even that is not, we think, very likely, that Canada might be taken without any substantial cost of either life or money,—that England would not offer any earnest resistance. Such a feeling, if it did exist, would lead to aggression, not merely by underrating the necessary sacrifice, but by inspiring the most aggressive mood of which the mind is capable,—contempt. If it is necessary, as it is, that England should not underrate the strength and pertinacity of the North, it is equally necessary that America should not underrate the strength and pertinacity of England. There is, however, in the debate a tone of despondency as to our power to help Canada effectually, if it should be attacked, which is founded, we think, on a very wrong impression as to our relative position. Mr Lowe, for instance, pointed out very effectually how helpless we should be in trying to hold Quebec or Montreal with say 50,000 or 60,000 English troops at most, aided by the Canadian militia, against no less an army than General Grant has now at his disposal. But, quite apart from the considerations admitted by Mr Fitzgerald and urged by many other speakers with relation to the great drain on the resources of the North in the Southern States, what ground is there for supposing that for any other war than the Union war, any such armies could be brought into the field by the United States at all? No doubt it is true that for the *particular purpose* of defending the Union, the army has been recruited from a class which in England would send no recruits except for the purpose of defending Great Britain from invasion; and that, therefore, the military resources of America are now apparently much larger than the military resources of England. But this is the source of the fallacy. The true term of comparison is not between what England can do in a war *not* affecting her national existence, and what America can do in a war affecting (as she supposes) her national existence, but what either Powers can do in a war that does not touch the life of the people, but is merely a question of honour. The true comparison for this purpose should be between what America did—perhap it would be unfair to say in the Mexican war, but quite fair to say *double* what she did in the Mexican war—and what England did in the Crimea. There might, very likely, be more popular enthusiasm for a war with Canada than there was for a war with Mexico; the greatness of the stake itself would excite the imagination of the people. But there could be nothing like the appeal to the imagination which the defence of "the old flag" against rebellion has carried with it. The power of the American army depends on its rate of recruiting. No *draft* would be possible for foreign invasion. And we should have to compare, therefore, the sacrifice American citizens would be willing to make for the sake of honour with the sacrifices England would make for the same end. Now, in the year of greatest expense in the Mexican war, the Americans paid just 40,000,000 dols (or 8,000,000*l* sterling) for their army and about 8,000,000 dols (say 1,600,000*l*) for their navy, or not 10,000,000 sterling altogether, and the army they sent into the field was, comparatively speaking, insignificant, say about 30,000 men. In a war with Canada, even after their recent exhausting efforts, they might be willing to do more than twice as much; but it is quite certain that the Western farmers, and Massachusetts merchants and lawyers, and the quiet, respectable classes generally, would not be prepared to leave their homes again for the sake of an idle conquest over a resisting people, a conquest condemned by the spirit of democracy, even if it did not rouse against it the whole force of the trembling spirit of commerce. Whatever applause the war with Canada might excite, it is, we think, absolutely certain that the very most the United States could effect *for such a purpose*, would be the concentration of, perhaps, two armies of 30,000 or 40,000 men each on the frontier, if they could do as much as that. And if that were all,—and we believe it is a very high estimate of the amount of support such a war would call out in a distracted and divided country,—is it true that our resistance would be so helpless? With a superior navy, with the power of throwing 50,000 men into Canada, and all the help the British Americans themselves could give us, which, from a population of about 3,000,000, should be at least equivalent to a force of 20,000 men, and with the advantage—always great—of acting on the defensive, we do not see that the contest, if ever provoked, need be so unequal. What we raised in the Crimean war we could, if requisite, do again. We then spent in one year about 50,000,000*l* on army and navy alone, four times as much as the American States in the Mexican war, and we feel quite sure the United States would not spend as much as that in addition to enduring the fearful loss to their commerce, for the sake of annexing Canada. It is a pure fallacy to measure the sacrifice they would make for the sake of annexing Canada by the sacrifice they have made for the sake of preserving the life of the nation. For any military purpose, other than defending the national existence, it is pretty certain that the military resources of different States are in some reasonable proportion to wealth and population. Now the population of Great Britain, added to that of British North America, outnumbers by some millions the Union, even if we count in the Southerners and the slaves. And in wealth, of course we have now—after the American resources have been drained by this tremendous conflict—an indefinite advantage, to say nothing of our having a few good financiers, which America has not.

However, our only purpose is to prove that even the *land* contest would not be nearly so unequal as is supposed by those who measure what the North would do for a purpose of foreign aggression by the gigantic efforts which she has made for a purpose of self-preservation. We think we may fairly consider that the true attitude on both sides should be one of respectful disinclination to fight,—not only moral disinclination because the contest would be a fearful calamity to the world but physical disinclination likewise, since, with proximity in favour of the aggression and wealth in favour of the defence, and no great superiority in available numbers on either side, the power of the two antagonists would be very fairly balanced, and while each would have much to fear, neither would have much to hope. We suspect this is the safest attitude in which two nations, not unfriendly but also not politically in sympathy, can remain; and we deprecate as much any material underrating of our own power to defend Canada, as we do of the power of the United States to attack it. Both are strong and tenacious powers which do not willingly change their mind when it is once made up, and, therefore, we trust both may be willing to make it up at once in favour of conciliatory negotiation on all our differences, and a firm purpose to maintain peace.

THE NEW PARTNERSHIP BILL.

Mr Milner Gibson has introduced a measure intended to carry the modern theory of partnership to its legitimate conclusions. His Bill, which is very short, and as we shall show not quite complete, is an attempt to apply the principle of limited liability to private partnerships with one important modification. The first and most efficient clause declares that a loan of money may be made to any individual, or firm, or joint stock company, or corporation, and a share in the profits received instead of interest, without constituting the lender a partner in the business carried on. Under the second, if the business fails, the lender loses the money invested, not ranking as creditor, but no other demand can be made upon him. The third enables an employer to give his clerk or other servant a a share without making him responsible, and the fourth extends that privilege to the widow or child of a deceased partner. There is no provision for registration or publicity of any kind, the partnership being obviously created by mere contract stated on the face of the paper recording the debt. Every man in busines is, in fact, allowed to take in any number of sleeping partners who will be liable to the extent of the money they have lent, and no more, and any person out of business may obtain a share in trade profits without entering upon an occupation he possibly does not understand. The entire population are, in fact, enabled to become traders

Digitized by Google

without risk and without buying shares in any company, with limited liability.

The innovation is we think a sound and beneficial one. Any measure which enables the owners of idle capital to employ it on reproductive work must be advantageous to the country, and there is still an immense quantity of such idle capital. Landowners, women, timid persons, possess large quantities of money which they are reluctant to invest in the great undertakings advertised on 'Change, but which they would very willingly employ in smaller concerns managed by men whom they personally know, and in whom they have great confidence. A great deal of money is lent by relatives in this way already, and the temptation to lend will be greatly increased by the chance of very high interest. Women, in particular, are constantly anxious to risk money in trades which they do not understand, but their sons and brothers do, but are unwilling either to accept low fixed rates of interest or to endanger the safety of their all. Every restriction upon that desire is a restriction upon business, and upon the profitable employment of capital, and it is right to take it away. The trader is greatly strengthened by its abolition, for he can obtain the capital he needs upon the security which it is easiest for him to give, while the trader's creditors obtain a heavy additional guarantee. They know, or suppose they know, the means of their debtor, but the money borrowed under this system is a clear *addition* to those means. Money borrowed under the old scheme was a deduction from them, because the lender came in as a specially secured creditor, which under this Bill he does not. Suppose a shopkeeper, for instance, now wants a thousand pounds, he probably gives a bill of sale of his furniture, fixtures, and anything tangible he possesses. That transaction is secret, and his creditors, therefore, are dealing with a man a thousand pounds poorer than they imagined him to be. But under this Bill the shopkeeper can obtain his thousand pounds by giving a share of his profits, and the firm is for all the creditors' purposes just so much the more solvent. We use the shopkeeping illustration, because there is no branch of business on which this measure will have so rapid an effect as retail trade. The position of a shopkeeper with an increasing business has always been one of exceptional difficulty. A "good-will" is often an extremely valuable property, but still it is not a security which can be pledged at a bank, and a most prosperous trade may be checked or spoiled by the difficulty of raising adequate capital without visible property to pawn. Mr Gibson's measure, in fact, enables a man to pledge under those circumstances that reasonable prospect of profit on outlay which is the shopkeeper's fortune, and which is often a very real fortune, and which no money dealer will look at except on exorbitant terms.

Again, the Bill sets free a form of capital which is very real and entirely unmarketable. John Smith understands a particular business thoroughly, and is known by his friends so to understand it, but has no capital; they would be quite willing to invest money if he is to manage it, and to accept his services as his contribution to the common fund; but under the present system they cannot do it except by becoming responsible partners in an understaking they know nothing about, or lending him money at low interest without security. Through Mr Milner Gibson's Bill they can obtain all the profit they foresee without risking more than a fixed sum, and a capital of experience, energy, or ability is set free to make the most it can of itself.

All these results are good, and they would be better if the draftsmen of the Board of Trade had made the Bill on one point a little more clear, It is obviously intended that the lender of money on these terms should have none of the responsibilities of a partner, but it is by no means so certain that he has none of the power of one. He must of course have the right of demanding accounts, or he would not advance the money, but how far is he entitled to control the course of the business? Can he forbid a speculation he thinks riskful, or compel one the manager whose liability is unlimited disapproves? We imagine he can, and it would have been wise to introduce a clause legalising partnership without control, at the option of the lender, as well as without responsibility. The trader, it is true, would not borrow of any one whom he thought could interfere with him, but the debt is transferable, and with it the power of interference. Of course it must be left open to the lender to retain his control if he so pleases, but if he is willing to give it up, why compel him to retain it? Nothing can be worse for the general public, for the private influence of an avowed partner may entirely deceive the calculations which creditors have based upon character. They know they can trust So-and-so as a man of judgment and moderation, thrifty in his habits, and not given to speculation, and will be entirely unaware that he is coerced by his sleeping partners, whose names do not appear, and whose characters are unknown. This point requires to be made much more clear, the first necessity of retail trade being that the persons who appear to be incurring liabilities should really be the persons who are incurring them, and the language of the Bill leaving too many loopholes for judge-made law. With this improvement, a short clause enabling the lenders to state whether they do, or do not, intend to reserve any right beyond their claim to examine accounts, the measure will, we believe, prove highly beneficial.

THE STRIKE IN THE IRON DISTRICTS.

The strike in the iron districts has become more serious than any similar event for a very considerable time. Not only have the men combined over a very large district, but the masters. Each party say to the other, "If you join with "other places, we must join with other places also." All over the iron districts the same great question is raised,—Are the wages offered enough, or are they not enough? The capitalists say they are adequate; the labourers say they are inadequate. Which is in the right, and which is in the wrong? If all ironmasters are on one side (and it is coming to that), and all labourers on the other, the issue raised is of singular magnitude.

Many persons grieve at the size of the controversy, but we do not sympathise with them. At least we prefer one large strife to many small strifes. In a controversy between the capital of town A and the labour of town A the nation is uninterested, and there is no watchful opinion. In the vast question between the capitalists of the entire iron trade and the labourers of the entire iron trade, there will be a national judgment. The nation cares, because the nation is hurt, and both the litigants will feel that they are watched by a diffused opinion. The magnitude of the controversy itself creates an effectual tribunal.

The important question is in all such cases—Are the men right, or are the masters right? Is capital asking too much, or is labour asking too much? The facts now known to the public scarcely, perhaps, warrant a conclusive judgment; but we will state their apparent nature, as well as the general principles by which every inference from facts in such a case is to be decided and regulated. One observation is very obvious, though also very important.

Every union, whether of masters or of labourers, is wrong if it objects to the *principle* of combination in its opponents. It stultifies itself if it does. If concert be good for one set of bargainers, it must be good for the opposite set. Capital is but a commodity, and labour but a commodity, and the sellers of either have a right to combine to get the best price they can, and the buyers of either have a right to combine to give the least price they can. It is entirely idle, though it is excessively natural, for the association of labourers to object to the association of capitalists, or the association of capitalists to the association of labourers. Both are inevitable, and when they act wisely, both are useful. But granting that both sides have the right to combine, which is right in the object for which they now combine?

If the wages in the iron districts were in what we may call their natural state—that is, if capital in the iron trade obtained the usual rate of profit, and labour in the iron trade the usual rate of wages—it is certain that both combinations, that of the men and that of the masters, would be either ineffectual or pernicious. If the masters succeeded in lowering wages below the ordinary level, they would drive labour from the trade; if the labourers succeeded in raising wages above the ordinary level, they would drive capital from the trade. As labour and capital are essential to each other, each would suffer from the banishment of the other. If wages were what they ought to be, the association of masters to lower them would injure the trade by diminishing the supply of necessary labour, and an association of men to augment wages would injure the trade by diminishing the supply of necessary capital. When the two elements of production are in their natural equilibrium, the efforts of either to alter that equilibrium are either futile or mischievous. If capital or labour

Digitized by Google

do not get in any trade the remuneration which, all circumstances considered, they get in other trades, each will leave the investment in which it has a disadvantage, and will go to the investments in which it has an advantage. A special disadvantage to particular capital created by the combination of particular labourers is an evil to the particular trade, and a disadvantage to the corresponding labourers created by the combination of the corresponding capitalists is as much an evil to that trade.

But all trades are not at all times in their normal condition. At certain times, owing to sudden augmentations of demand, capital may be getting more than the usual rate of profit or labour more than the usual rate of wages—or, on the other hand, owing to anticipated diminutions of demand, either capital or labour, or both, may be getting less than their usual rate of remuneration. In these circumstances, what is the effect of a combination on the part of the capitalists or on that of the labourers?

In a progressive state of a particular trade, capital already invested in such trade ordinarily earns unusual profits; and during that temporary period of exceptional prosperity a combination of labourers may unquestionably get a share in the advantages which are going. The capital cannot leave the trade to go into any other trade, for it is now getting peculiar profits where it is, and so long as these profits in any degree continue, it would not do to change. If in a sudden court mourning the master tailors chose to charge unusual prices for black suits, and so got an exceptional profit, the working tailors, by striking, could be sure of getting unusual wages—of getting a share in the casually high remuneration, because their co-operation is essential to the receipt of any part in that remuneration. And just so if wages in any branch of industry are beyond the common rate, a combination of capital will reduce them to that rate. Where either factor in production gains a great prize, combination may effectually and rightfully ensure that the other factor gains a prize too.

Just so in a decline of trade: if either factor do not share the decline, the other factor may, by means now familiar, compel it to do so. Here, also, the agency of combination is both effectual and beneficial. It is desirable that a decline in any trade should operate as a discouragement both to labour and to capital to embark in that trade, and the best discouragement to capital is a reduction in profits, and the best discouragement to labour is a reduction of wages. In a depressed trade, either capital or labour may, by due combination, take care that its ally should share the pain of diminishing success.

To which of these several cases does that of the iron trade at present approach? It cannot be said that the facts known to the public are at all conclusive. At the critical item, the facts of these cases commonly break down. It is always very difficult, generally impossible, to get at the balance sheet of trade—to say whether its profits or its wages are more than, less than, or only equal to, the average and usual amount. We must acknowledge that our facts are incomplete, though we may be sure that our principles are correct.

But the facts known to the public rather indicate, though they do not conclusively prove, that the masters are right in asking for a reduction of wages and that the men are wrong in resisting it. The iron trade is for the moment a declining trade. We showed this at some length in our last supplement. All the four principal metals have declined in price during the last year:—

Copper	17 per cent.
Iron	10 —
Lead	4 —
Tin	13 —

The demand for iron ship-building, lately very active, is exceedingly diminished. The new tariff in America has cut off in great part that outlet. Stocks are accumulating, and in some departments foreign competition is increasing. There is no unusual activity, but on the contrary a diminished prosperity in the iron trade.

Thus much, therefore, is clear, *if* before the diminution in the remunerativeness of the iron trade, labourers and capitalists were only getting respectively the usual rate of wages and profits—*after* the reduction in that remunerativeness, both labourers and capitalists ought to submit to some diminution in their receipts. In times of augmenting prosperity, the presumption is in favour of the greedy party—the party which *wants more*. If the adjustment was previously perfect, if both profits and wages were before at their customary level, the new good fortune of the trade ought to be divided between men and masters. But at a time of diminishing prosperity, the presumption is reversed; it is in favour of that penurious bargainer—of the bargainer who will not give so much. If capital or labour only got what it ought to get before, it will get less than that now, and, therefore, the other co-efficent be made to get less too, and so the trade correspondingly diminished. The masters in the iron trade have now proposed a reduction; the trade is declining, and till the contrary is decisively shown, an unprejudiced judgment will incline in their favour.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 16th inst. The return for the previous week is added:—

DEBTOR.

	March 16, 1865. f c		March 9, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	7,035,535 22	.....	7,025,949 37
Reserve of the bank and branches	22,105,750 14	.....	22,105,750 14
New reserve	4,000,000 0	.....	4,000,000 0
Notes in circulation and at the branches	777,523,125 0	.....	773,343,825 0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	5,041,185 95	.....	5,752,618 65
Treasury account	83,837,972 64	.....	87,134,568 33
Accounts current at Paris	129,647,424 35	.....	139,925,576 96

A new augmentation in the coin and bullion of 14,207,000f, and a diminution of 30,192,000f in the discounts, are the principal features in the Bank return of this week: they prove that commerce continues in a state of deplorable inactivity, and in fact gets worse from week to week.

On the Bourse, great interest has been excited by the financial statement of the Minister of Finance of Italy, a very large portion of the Government stock of that country being in French hands. The deficit, he announces, though considerable (625,000,000f to the 30th September, 1867) is not regarded with alarm; and his project to cover it by the sale of railways for 200,000,000f and the raising of a loan of 425,000,000f is held to be satisfactory. It is hoped that the Italian Parliament will not create any obstacles to the prompt execution of these measures: if it does, it will set against Italy the great capitalists who have assisted her in more than one sore strait, and are well disposed to aid her again. Apart from this Italian incident, the Bourse has not presented anything of interest during the past week. Both buyers and sellers have manifested discouragement, but to-day there has been a certain degree of firmness. The following are the quotations:—those of the Threes are given ex-dividend, a quarter's coupon of 75c having been detached to-day:

You were informed some months ago that the Superior Council of Commerce had recommended sweeping reforms in the laws relative to the merchant navy—namely the free import of foreign-built ships whether in wood or iron, and of all materials employed in the construction of sailing or steam vessels; the abolition in three years of differential duties on goods imported in foreign ships, and in six years of the said duties on imports in such vessels from bonding warehouses, &c. &c. By order of the Government, the Council of State has prepared a Bill for carrying these recommendations into effect, and it will no doubt be passed in the course of the present session. As may be supposed, the shipping interest, from dread of foreign competition, is not favourable to these great reforms. But thus far it is only from Bordeaux that a formal complaint has been made; and that complaint is confined chiefly to the projected admission of imports from bonding warehouses. Much surprise is expressed that the shipowners and merchants of Bordeaux, who took an active part in promoting the adoption of liberal commercial policy, should object to the abolition of exaggerated protection for shipping. Their complaint is set forth in a petition to the Emperor. The document is, however, as weak in argument as it is unreasonable in pretension.

The attacks which have lately been made on M. Emile Pereire, in connection with the Ports of Marseilles and the Credit Mobilier, have drawn forth a reply which has the appearance of being "inspired." It affirms that the amalgamation which M. Pereire effected between the Ports of Marseilles, the Immobilier, and the Rue Imperiale of Marseilles Companies saved the former from bankruptcy; and that the little irregularities that were committed in packing a meeting of shareholders of the Ports were of no consequence, since they were without effect on the vote that was given,—and were not even reprehensible in a moral point of view, since the same thing is done constantly. It draws attention to the disinterestedness of M. Pereire in making over to the amalgamated companies the building ground of the Rue Imperiale for the price it cost, when from the increased value it had obtained he might have made several millions (of francs) by it. The report, moreover, declares, that a "conspiracy" of what is called the "old Bank," by which is meant the partisans of the Bank of France, and the great bankers who generally act with it, has been formed against the Credit Mobilier, and against the St Simonian school of finance. Hostility to this school, the writer alleges, "dates from the now distant day at which the economists belonging to it descended into the arena of practical business, and engaged in operations, the object of which was not to extort money from Governments and individuals, but, whilst enriching their authors, to augment to an incalculable degree the public and private fortunes;" and he says that the hostility became greater when, desiring to complete their enterprise, and arrive at the full development of all the productive forces of France, they commenced a campaign for lowering as much as possible the interest of capital, and for placing credit within the reach of all industrious men." For so doing he cries, "O! woe to them! If, after having become possessors of an enormous capital, they had consented to come to an understanding with their seniors to turn it to the best account possible, they would have been pardoned, and would have been received with open arms; but they can only expect blame and insult when they occupy themselves with lowering the interest of money, of vulgarising credit, and developing national industry."

The stoppage of Attwood's bank at Birmingham has attracted considerable attention here, not only on account of its commercial importance, but because in the grand discussion about banks now pending, it will be used as a decisive argument against liberty of issue. The Bank of France will flaunt it in the eyes of its adversaries;—M. Wolowski will introduce it in his neat book or treatise in favour of "the unity of the bank note;"—and M. Coullet will dilate on it with much unction. But, after all, it is only one of those accidents to which banking, like any other branch of commerce, is liable.

Under the title *Questions a Examiner relativement aux Banques et a l'Organisation du Credit*, a rather singular publication has been made. It consists of a series of observations and questions on banking matters in general, and especially on the rate of discount and the issue of notes; and appears to have been drawn up, either as the outline of a book to be written, or as a basis for an inquiry into banks similar to that which the Superior Council of Commerce has, at the request of the Government, undertaken. No author's name appears on the title-page, and there is no preface to explain the object of the publication. This mystery excites considerable curiosity. It will probably be cleared up one of these days, but *en attendant* much regret is expressed that the work was not issued sooner, as it would have formed an excellent *questionnaire* for the witnesses appearing before the Council. The author of the publication, whoever he is, is evidently profoundly versed in the subject of capital, currency, and banking; and in the manner in which the points he proposes for discussion are presented, we may trace a master hand. Among the points are these:—The causes of commercial crises;—the extraordinary demands on banks they create, and the manner in which those demands are responded to;—the causes and general circumstances which regulate the rate of discount and the interest of capital;—the influence exercised by the transformation of circulating into fixed capital, and whether or not commercial crises occasioned thereby are more dangerous than others;—the effects of the exportation of capital, and whether or not it produces an equal exportation of specie;—whether commercial and monetary crises should be treated in the same manner;—whether the creation of banks with the power of issuing notes produces a lowering of the rate of disconnt;—the effects on commerce of a variable rate of discount, according to the stock of cash in banks, and of a fixed rate;—whether banks, by concentrating capital disseminated and unproductive, should not be considered as instruments for the production of wealth;—a comparison of the deposits in English and American banks with those made in the Bank of France, and the means to be taken for extending deposits in France;—in treating of bank notes, inquire whether their immediate convertibility, which is essential, is fulfilled by the principal banks, and in particular by the Bank of France;—explain the great differences which exist in the proportion of notes to capital in different countries and different banks;—inquire whether restriction on the issue of notes as in the Bank of England, or complete liberty as in the Bank of France, or an intermediary system, is the best—show how the profits of issue gained by a privileged bank can be employed to keep the rate of interest permanently low;—inquire into the proper proportion of metallic reserve to notes in circulation, and ascertain whether the expense of maintaining the reserve of a privileged bank ought to fall on the bank itself or on commerce;—whether the capital of a bank ought to be invested as a guarantee or employed in business;—how the success of joint stock banks in England has been attained;—whether there ought to be at Paris a special establishment for making advances on Government stock, and railway shares and bonds, or whether the Bank of France ought to make them;—what reason there can be for not applying to banks of issue the free competition which is adopted in all other branches of industry;—whether the theory that the augmentation of the rate of discount is the best way of filling the tills of banks be well founded, and if so, what effects it has on commerce;—the possibility of employing the capital of a great bank in obtaining supplies of the precious metals, &c., or other means of arriving at that result. Numerous other points are presented by the anonymous author of *Questions a Examiner;* but the preceding suffice to show how complete and thorough an inquiry into banks conducted on this plan would be.

The section of Political Economy of the Academy of Moral and Political Science will, I understand, in the sitting of Saturday next, recommend Mr Fonblanque, of the Board of Trade, as a corresponding member in the room of Mr Senior.

A banker of Rive de Gier, of the name of Binachon, has taken to flight, leaving liabilities to a considerable amount.

The shareholders of the Meridional Railways of Italy held a meeting a few days back at Turin, for the purpose of examining the new convention between the Government and the Company. It concedes three new lines to the company:—from Foggia to Naples; an embranchment to Termoli; and a line from Pescara to Reiti. It relieves the Company of some embranchments onerous to it, and modifies the periods within which certain sections are to be finished. The meeting unanimously approved of the convention. A report was presented stating that by the recent opening of the line from Foggia to Brindisi by Bari, the Company has 350 miles open for traffic, and that it will eventually have more than 1,000 miles.

The monthly Customs returns in France present the serious inconvenience of not grouping the quantities of goods imported and exported. They describe, for example, with great and even puerile detail, the different sorts of cotton tissues sent out and brought in, but do not state the total thereof, so that any person having need to know the entire quantity must make a tiresome addition. The same is the case with all other goods. The returns besides, though giving in excessive detail the imports and exports of merchandise from and to the principal countries with which France trades, do not state the precise quantities of each sort for each country; and this obliges the seeker for information on the points to undergo much irksome labour. It would not cost the clerks of the Statistical Department of the Board of Customs much trouble to rectify these imperfections, but from the spirit of routine which prevails among all Government officials in this country, they will certainly not make any change unless specially ordered to do so by the Director-General of Customs, or his Excellency the Minister of Finance.

In the ECONOMIST of Feb 25, an account of the *value* of the principal

Digitized by Google

imports into France for consumption was given. The following detail of the *quantities* of the more important articles is compiled from the Customs tables:—

The imports and exports of precious metals during the month of January 1865, compared with the corresponding periods of 1864 and 1863, were as follow:—

GOLD IMPORTED.

	January, 1865. francs	January, 1864. francs	January, 1863. francs
Bullion	5,417,355	16,150,536	28,392,210
Coin	31,855,785	52,800,285	23,191,230
	37,273,140	68,950,821	51,583,440

GOLD EXPORTED.

Bullion	14,310	3,925,068	55,200
Coin	21,054,267	18,242,955	12,961,800
	21,068.577	22,168,023	13,017,000

SILVER IMPORTED.

Bullion	7,032,158	6,758,961	1,485,005
Coin	14,239,279	21,482,220	9,120,680
	21,271,437	28,241,181	10,615,685

SILVER EXPORTED.

Bullion	9,786,781	17,921.322	7,630,000
Coin	7,868,834	27,401,060	9,790,560
	17,655,615	45,322,382	17,420,560

The countries from which the imports came, and to which the exports went, in January, 1865, were the following:—

GOLD.

	Imports—Bullion. francs	Imports—Coin. francs	Exports—Bullion. francs	Exports—Coin. francs
England	3,793,600	17,677,140	...	250,950
Belgium	...	89,100	14,310	124,542
Zollverein ...	...	3,258,300	...	48,825
Spain	...	...	...	33,900

Other countries	259,935	7,092,945	...	4,485,000
	5,417,355	31,855,785	14,310	21,054,267

SILVER.

England	966,816	478,984	440,000	564,400
Belgium	202,800	42,400	2,458,775	3,448,200
Russia	...	...	...	...
Zollverein ...	21,400	1,392,800	1,296,206	19,500
Spain	...	9,220,070	...	45,134
Kingd.of Italy	5,475,976	1,970,400	424,000	695,000
Switzerland ...	...	...	...	...
Turkey.....	...	...	...	27,200
Egypt	...	...	...	279,000
British India...	...	...	4,595,400	1,381,400
China	...	...	20,800	339,200
United States.	...	...	...	...
Other countries	365,166	1,133,625	551,600	1,069,800
	7,032,158	14,239,279	9,786,781	7,868,834

Turning the totals above into English money, it appears, that in January, 1865,—

	£
The imports of gold were	1,490,925
The exports of gold were	842,743
Excess of imports	648,182
	£
The imports of silver were.....	850,857
The exports of silver were.....	706,224
Excess of imports	144,633

Adding the excess of imports of gold and silver, it will appear that the stock of precious metals during the first month of 1865 increased by 792,815*l*. As to the amount sent to the East, it was as follows:—319,524*l* of gold, and 11,160*l* of silver to Egypt; 239,072*l* of silver to British India, and 14,400*l* of the same meta to China; in the w hole, 584,156*l*.

Annexed is the state of the market report:—

FLOUR.—At *Paris*, the market is firm. Yesterday, choice was 48f the sack of 157 kilogs; first quality, 47f; good, 46f; other sorts, 44f to 45f; six marks, current month, are 47f 75c to 48f; April, 48f; May and June, 49f 25c; type Paris, the 101 kilogs, 28f 75c to 29f for current month, and 30f 25c for May and June.

WHEAT.—In most of the provincial markets there is a rise. Fears are now expressed that the long continuance of rain and cold may injure the crops. At *Paris*, yesterday, prices rose, choice white being 27f for the sack of 120 kilogs; choice red, 26f to 26f 50c; first quality, 25f 50c; other sorts, 24f 50c to 24f 75c.

COTTON.—The sales at *Havre*, in the week ending Friday, were only 2,635 bales and piculs, and the arrivals 2,338. The closing quotations were 40f lower for United States, 25f to 30f lower for Brazil, 25f Surat, 15f to 30f Tinnevelly, 5f to 20f Madras, 5f to 15f China, 20f Jumel. Low New Orleans was consequently 225f; good ordinary qualities in Broach, 150f; in Tinnevelly, 130f; Madras, 100f; China, 135f; Jumel, 210f. The stock was estimated at 61,155 bales. This week, there has been more firmness, and yesterday New Orleans was 220f; Pernambuco, 212f 50c; Jumel, 180f to 250f; Oomrawattee, 145f; Broach, 150f; Dhollera, 145f; Tinnevelly, 135f; Madras, 130f to 175f, and for delivery 135f to 145f; Bengal, 90f and 95f; Kurrachee, 92f 50c; Japan, 145f; China, 123f and 137f 50c.

COFFEE.—At *Havre* in the week ending Friday, the sales were 1,050 sacks, Hayti, Port-au-Prince, and Jeremie, 82f to 85f the 50 kilogs, in bond; 100 Gonaïves, at prices kept secret; 350 St Marc, 91f; 300 ditto, for delivery, 90f 50c; 3,000 Rio, not washed, 76f 50c to 81f; 600 Santos, at different prices; 45 Java, 100f; a small lot of Guadaloupe bonifieur, 155f, duty paid, disposable; and some ditto habitant, 146f 25c; By auction, some damaged Hayti was sold. The arrivals exceeded 10,700 sacks. This week, Rio, for delivery, 78f, and 77f 50c in bond. Hayti, 82f 50c; Gonaïves, 89f Rio, washed, 107f. At *Bordeaux*, last week, 895 sacks at 118f; 560 Rio, not washed, at 81f; 170 Bahia, ; Guadaloupe bonifieur, 157f 50c; and a small quantity at 148f 50c. This week, Mysore, 118f. At *Nantes*, last week, there were no sales; this week, some damaged Port-au-Prince have been sold. At *Marseilles*, last week, by auction, some damaged Hayti, and 1,418 Brazil, ordinary, sound, 67f 75c to 72 25c. No sales this week.

SUGAR.—The sales at *Havre* in the week ending Friday were: 230 casks French West India, disposable, and for delivery, 48f the 50 kilogs, bonne quatrieme, duty paid; 293 casks usine, 58f 50c; 2,795 bales Reunion, 51f, bonne quatrieme; 500 Mauritius, 51f, ditto; 80 casks Bahia, 28f 50c, No 12 in bond; 725 casks Cuba, 48f, bonne quatrieme, duty paid; 300 Havana, clayed, 30f to 31f, No 12 in bond; 706, ditto, for delivery, 30f; 366, 28f 50c, by Spanish ship; also, some damaged, by auction. The arrivals were insignificant. This week, French West India, bonne quatrieme, 48f 50c; Havana, No 12, 30f to 29f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The total shipments of gold from Melbourne last year amounted to 1,921,462 ounces, of which 234,910 ounces were the produce of the New Zealand fields. The shipments from Jan. 1 to Jan 21, current year, were 56,329 ounces.

The arrivals and departures of ships at Calcutta have risen from 1,732, with an agregate tonnage of 827,924 and an average of 477 tons each, in 1853-54, to 2,655, with an aggregate tonnage of 1,799,268 is 1863-64. In the same ten years the value of the trade of Calcutta has risen from 19,139,370*l* to 40,532,490*l*. The import of cotton goods alone has increased in the same period from 6,571,934 pieces to 18,035,299 in 1859-60, though this enormous quantity fell to 10,271,857 in 1863-64. Imported Cheshire salt has risen from 14,647 tons to 157,330 tons. As to exports, jute has increased in the ten years from 484,440 cwt to 2,066,474 cwt—more than 300 per cent.; rice, from 160,633 tons to 500,240 tons—more than 200 per cent.; linseed, from 720,420 cwt to 2,413,059 cwt—nearly 250 per cent.; while raw cotton had gone up from 1,900 cwt in 1858-59 to 456,180 cwt in 1863-64. Prices have increased also enormously in the ten years—jute from 26s to 36s a bale; rice from 2s 6d to 4s 6d per 80 lb; and linseed from 4s 6d to 7s for the same quantity.

Stamps ditto	1,039	1,020
Balances with other banks	59,927	57,668
Sundries	78,961	78,134
Treasury reserve in coin at head office	31,941	...
Cash and currency notes at head office and branches	2,25 ,964	2,312,870
	6,056,540	6,029,740

The following is Messrs Sharp and Co.'s circular, dated Hong Kong, Feb. 1, detailing the movements of bullion at that port during the preceding fortnight :—Gold—The total receipts of the fortnight are $360,000 value, and the equivalent exported, including the Carnatic on the 15th, and excluding the Emeu to-morrow, is $940,000. The price has advanced upon the short supplies. Silver—In bar silver and Sycee the amounts inwards and outwards are almost equal, say $280,000, against $250,000; there have been but few sales. Dollar Currency—In this case also there is but small difference between the sums received and sent away: say $480,000, against $460,000. Clean coin is at its lowest price; and should the rate for sterling hold in Shanghai, some shipments of Mexicans may be expected. Discounts and Mortgages—Money has been loaned on first-class securities at seven per cent., and mortgages have been effected at ten per cent. Exchange—The rate has drooped from the opening, and, on account of the small supply of bills, closes at a reduction of nearly two per cent. The large arrivals of opium have caused a corresponding decline in the rates for Indian remittances. Exchange and Bullion—Closing Quotations—On London, 6 months' sight, 4s 8d; on India, 3 days' sight, 221 rs; on Shanghai, 3 days' sight, 72¼ tls; on ditto, 30 days' sight, 72⅝ tls. Bar silver, 9 per cent. prem.; Sycee, 7½ per cent. prem.; gold leaf, $22.55 per tael; gold bar, $22.50 per tael, equivalent 100 touch; sovereigns, $4.40 each; discount, 7 per cent.; Hong Kong and Shanghai Banking Company shares, 29 per cent. prem.

A return "of the quantity of malt used in brewing of beer in England, Scotland, and Ireland respectively, in 1861, 1862, 1863, and 1864" :—

Years ended 31st December.	Quantity of Malt used in the Brewing of Beer for Sale, in England. bushels.	Scotland. bushels.	Ireland. bushels.
1861	34,942 918	1,541,148	2,867,354
1862	35,424,061	1,635,777	2,736 379
1863	37,453,842	1,838,257	2,412,710
1864	40,099,857	2,021,424	2,597,095

Return of the number of bushels of malt charged with duty in the years 1863 and 1864 in England, Scotland, and Ireland respectivly :—

	Year ended 31st December, 1863. Bushels of Malt charged with duty.	Amount of duty charged. £ s d	Year ended 31st December, 1864. Bushels of Malt charged with duty.	Amount of duty charged. £ s d
England	42,087,482	5,708,114 6 1½	42,975,530	5,964,160 13 1½
Scotland	1,947,414	262,828 10 10	2,017,242	272,294 11 5½
Ireland	2,234,947	302,784 16 8½	2,551,350	345,889 2 10½

During the week ending March 15, the imports of the precious metals were :—Gold, 62,044*l*; silver, 6,980*l*. The exports were :—Gold, 24,293*l*; silver, 94,732*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 15th day of March, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,740,275	Government Debt	11,015 100
		Other Securities	3,684,900
		Gold Coin and Bullion	14 090,275
		Silver Bullion	...
	28,740,275		28 740,275

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023 211
Rest	3 857,083	Other Securities	20 084 483
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8,348 481	Notes	9,094,685
Other Deposits	13,785 825	Gold and Silver Coin	791,983
Seven Day and other Bills	449,973		
	40,994,362		40 994,362

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20 095 562	Securities	31,204,694
Public Deposits	8,348 481	Coin and Bullion	14 882,258
Private Deposits	13,785 825		
	42,229,869		46 086,952

Dated the 16th March 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,857 083*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£185,892
An INCREASE of Public Deposits of	670,753
A DECREASE of Other Deposits of	118,877
No change in Government Securities.	
An INCREASE of Other Securities of	255,598
An INCREASE of Bullion of	123,651
An INCREASE of Rest of	13,265
An INCREASE of Reserve of	303,991

The Bank return of this week shows little change, except such as results from the payments to Government account usual at the quarter. There is an increase of 308,991*l* in the reserve, and an addition of 123,651*l* in the stock of coin and bullion.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 19 875,702	£ 20,483,509	£ 20,012 331	£ 20,333,112	£ 20,095,562
Public deposits	5,077,843	8,011,694	9 343.499	8,670,711	8,348,481
Other deposits	11.155,862	13,340 928	13,003,088	13,105,800	13,785,825
Government securities	11,583,885	10,716,261	11,193,588	11,174,584	11,023,211
Other securities	14,521,596	18,139 828	20,191,582	20,657,580	20,084.483
Reserve of notes & coin	9.217.233	11,348,436	9,738,582	8,747,163	9,866,668
Coin and bullion	14,201,243	16,548,586	14,547,812	13,946,943	14,882,258
Bank rate of discount	5 p. c.	2½ p. c.	4 p. c.	6 p. c.	4½ p. c.
Price of Consols	93	94¼	92⅜	91⅛	89⅛
Average price of wheat	66s 11d	59s 0d	45s 3d	40s 1d	38s 4d
Exchange on Paris (shrt.	25 15 20	25 22½ 30	25 20 27½	25 25 35	25 20 27½
— Amsterdam ditto	11 17⅛ 18	11 15½ 16	11 15½ 16	11 16½ 17	11 16 17
— Hamburg (3months)	13 7 7½	13 8½ 8⅝	13 7⅛ 8	13 7⅞ 8⅛	13 8⅛ 9

In the corresponding week of 1855, the first meeting of the Vienna Congress had taken place.

In 1862, the conversion scheme of M. Fould had resulted in the exchange by the public of about 116,000,000*l* 4½ per Cent. stock for 174,000,000*l* 3 per Cents. The thirty years' railway bonds and about 2,300,000*l* 4 per Cent. stock had also been exchanged into 3 per Cents., at a present benefit of 6,200,000*l* to the French Government. Large arrivals of bullion had contributed to the increased ease of the money market.

In 1863, the marriage of the Prince of Wales had been celebrated at Windsor Castle before the Court, and great rejoicings had taken place all over the kingdom. A loan of 400,000*l* for Salvador had been brought out, and 1,000,000*l* 6 per Cent. bonds of the Italian Irrigation and Canal Company, as well as 2,350,000*l* 3 per Cent. bonds of the South Italian Railway, had also been advertised for public subscription. The rate of discount at the Bank of France had been reduced from 5 to 4½ per cent.

In 1864, an Austrian circular note had been issued with the view of tranquillising the foreign powers relative to the invasion of Jutland. The Danish coinage had been abolished in Schleswig and that of Germany substituted. The Prussians had taken Nübel, after a slight engagement. The island of Femeren had also been captured by the Prussians. A severe engagement had taken place between the Russians and Poles at Kielce. The despatch of Russian troops towards the Prussian frontiers was being continued. The new King of Bavaria had taken the constitutional oath. The Emperor of the French had charged the Duke de Morny with the preparation of a report upon the questions at issue relative to the Suez Canal. In America, the Federals had suffered a serious repulse in Florida, and their cavalry had been defeated at West Point, Mississippi. The retreat of General Grant before Dalton had been confirmed. Owing to the absence of unfavourable news, and the large influx of gold into the Bank, great buoyancy prevailed in the stock markets. The English funds had made an advance of from ½ to ⅝ on prices of the previous week.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,365,734*l*; in 1862, a deficiency of 4,798,900*l*; in 1863, a deficiency of 7,188.494*l*; and in 1864, a deficiency of 7,551,780*l*. In 1865, the deficiency is 6,298,658*l*.

DISCOUNT AND MONEY MARKET.—There is little actual alteration in the condition of the market. Money is moderately abundant, but hardly in excess of the mercantile demand, which has become slightly more active with the approach of the quarter. A larger share of business has been carried to the Bank as the Stock Exchange requirements at the settlement have absorbed much of the floating balance in the hands

Digitized by Google

of lenders at higher rates than those current in the discount market. The 1,200,000*l* East Indian 5 per cent. debentures for five years, with option to the lender to continue for a further period of 5 years, have been subscribed for, and are now dealt in at about 1 prem. General mercantile business is dull. Some few failures have been announced, and large losses are spoken of in connection with the tea and cotton trades. There is no export demand for bullion for the Continent, and arrivals are mostly carried to the Bank.

Annexed are the current discount charges on paper of various dates.

30 to 60 days	4½ per cent.
3 months	4⅝ per cent.
4 months	4¾ per cent
6 months—Bank bills	4¾ 5 per cent.
6 months—Trade ditto	5 ½ per cent.

Loans in the Stock Exchange on Government securities for short periods have been effected at 4 to 4½ per cent.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.
Do. with seven days' notice	3¾ per cent.
Do. fourteen days	4 per cent.

* At the London and Westminster 2½ per cent. only on sums below 500*l*.

The following are the discount rates quoted in the chief continental cities. In Paris and Hamburg, the value of money is still declining.

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3½
Vienna	5	5½
Berlin	4	3⅞
Frankfort	4	3½
Amsterdam	4	4
Turin	6	5½
Brussels	4	3½ 4
Madrid	9	...
Hamburg	...	2
St Petersburg	6½	...

Applications were received at the Bank of England on Wednesday last for 300,000*l* Government bills on India. The proportions allotted were on Calcutta 172,600*l*, on Bombay 102,400*l*, and on Madras 25,000*l*. The minimum price was 1s 11½d per rupee on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras at 1s 11⅝d receive about 13 per cent., and on Bombay at 1s 11¾d in full. Above these prices, applicants receive in full.

Bullion.—There have been no bullion operations at the Bank to-day.

The following changes appear in the Bank of France return of yesterday as compared with that issued last week :—

	£
INCREASE.	
Cash in hand	568,000
Notes	166,660
DECREASE.	
Treasury balance	136,000
Current accounts	540,000
Bills discounted	1,208,000

ENGLISH GOVERNMENT STOCKS.—The pacific tone of the debates in the House of Commons upon the Canadian and American questions, has had a sensible effect in allaying the fears just previously expressed concerning the probability of an early war with America. The markets, which had been greatly depressed, partly under the influence of the failure of Messrs Spooner and Attwood's, at Birmingham, have worn a more satisfactory aspect towards the close of the week, and the advance on the prices of last Friday is fairly sustained. At the close of the market, Consols are quoted 89⅜ to 89½ for April account, and for money 89⅛ to 89¼. New 3 per Cents. and Reduced, 88⅜ to 88⅝. India 5 per Cents., 104¼ to 104½.

There is no alteration in the value of Exchequer bills, which are quoted at 4s to 7s prem. India bonds, 10s to 15s prem.

FOREIGN STOCKS.—There has again been an upward movement in Spanish Certificates, with a rise of near 1 per cent. in the Passive stock. The belief is strong that the Spanish Government will be within a short space of time compelled by their financial necessities to come to terms with the holders of these securities, and the markets in consequence wear a very firm appearance. The Confederate loan has fluctuated condiderably, but with the effect of establishing a further decline. The news received to-day is variously interpreted. The closing price is 36 to 37. Turkish bonds of the foreign loans are firm. The Venezuela loan of 1862 is heavy, owing to the news received of the last measures of the Government in contravention to the terms agreed with the bondholders. The closing prices of stocks dealt in to-day are subjoined :—Brazil 4½ per Cent., 1863, 81 to 83. 6 per Cent. Columbian, 81 to 83. 7 per Cent. Egyptian, 93 to 94 ex div.; ditto, 1864, 94½ to 95½. 5 per Cent. Greek, 21 to 21½; coupons, 8½ to 9½. 3 per Cent. Mexican, 26⅛ to 26⅜. 6 per Cent. Montevidean loan, 8¾ to 9½ prem. 4½ per Cent. Peruvian, 80 to 82. 3 per Cent. Portuguese, 47¼ to 47¾. 5 per Cent. Russian, 1862, 88½ to 89½; ditto, 1864, 90½ to 91½. 3 per Cent. Spanish, 47¾ to 48¼; ditto deferred, 40¾ to 41¼; ditto Passive, 33½ to 33¾; Certificates, 17¼ to 17½. 6 per Cent. Turkish, 1854, 93½ to 94½; ditto, 1858, 70¼ to 70¾ ex div.; ditto, 1862, 72¾ to 73¼. 3 per Cent. Venezuela, 18½ to 19; ditto, 1862, 6 per Cent., 42 to 44; ditto, 1864, 40 to 42. Italian 5 per Cent., 63½ to 64.

The closing quotations of French 3 per Cent. rentes from Paris this evening is 67.15; ex dividend, 75c.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The rejection of the bill promoted by the Great Eastern and the Lancashire and Yorkshire Railway Companies in the House of Commons has been the principal topic of interest during the week. The power wielded by some of the great companies, and notably by the North-Western Railway Company in Parliament, where it has been already exerted this session in a remarkable manner, is attracting much comment. In the present instance great disappointment is felt at the rejection of a measure calculated to lower the price of coal, and thus afford relief to the inhabitants of great part of London. That the project will not be abandoned is considered certain; and it may attract sufficient attention to render the practice of obtaining promises of votes in the House of Commons much more difficult on future occasions.

In railway stocks generally there has been little business. Great Eastern, which had risen considerably has declined; and Caledonian is also lower. Great Northern stocks are firm at an advance.

In miscellaneous shares, the chief advance has been in Credit Mobilier and Foncier shares; General Credit, International Financial, and most of the other financial companies' shares have recovered somewhat from the extreme low quotations of the previous week.

Indian railway stocks are rather firmer.

RAILWAY DIVIDENDS.—The dividend proposed on Vale of Neath Railway stock is at the rate of 4 per cent. per annum for the seven months ended 31st Jan. ult.

FOREIGN EXCHANGE.—The tendency of the rates is again favourable, but the amount of business transacted was small.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold—The arrivals of gold since our circular of the 9th instant consist of 18,500*l*. per the Marco Polo, from Melbourne; 15,000*l*. per the Istamboul, from Melbourne; 39,000*l*. per the Kent, from Melbourne; 6,500*l*. per the Calabar, from Africa; 3,000*l*. per the Europa, from Boston; 89,800*l*. per the Tasmanian, from West Indies. The demand for export having materially decreased, it is not now likely that shipments of gold will be made from here to New York, as the rate of exchange is slightly rising. The Overland Mail from Australia reports the sailing of the Northam for India, on the 25th January, with 308,000*l*, and the following vessels for England:—The White Star, with 16,000*l*; the Scottish Chief, with 19,000*l*; the Asiatic, with 35,000*l*; the Kosciusko, with 55,500*l*; the Great Victoria, with 58,000*l*; the Anglesea, with 34,000*l*; the Mediator, with 8,000*l*; the Yorkshire, with 33,500*l*.

Silver.—The Tasmanian has brought 82,000*l* from the West Indies; our market is, however, so dull that prices are likely to rule lower than for the bars brought by the previous packet.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 10½d to 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz, nominal; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz, last price. Silver—Bar silver, 5s 1d per oz std, last price; ditto containing 5 grs gold, 5s 1½d per oz std, last price; Mexican dollars, 5s per oz; 5-franc pieces, 4s 11½d per oz. Quicksilver, 8*l* per bottle: discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Petitions for the winding-up of the Factage Parisien (Limited) and the Commercial Navigation Company of India (Limited) are to be heard to-morrow before the Master of the Rolls.

The failure of Mr Thomas Stirling Begbie, shipowner and merchant, of Mansion House place, has been announced, with liabilities estimated at about 150,000*l*. It is thought that the assets, which include several ships, will prove favourable.

Mr J. W. Burstall, of Hull, and Messrs S. Burstall and Co., of Bombay, have stopped papment. The liabilities are understood to range between 200,000*l* and 300,000*l*.

Notice has been given that a petition for winding up the Telegraphic News Association has been presented, and will be heard before the Master of the Rolls on the 25th inst.

The meeting of the creditors of Messrs Attwoods, Spooner, and Co. took place at Birmingham, on Thursday. The statement of accounts showed liabilities to the extent of 960,479*l* 19s, against assets amounting to 618,412*l* 9s 3d, leaving a deficit of 342,067*l*. It was unanimously resolved to take the affairs of the Bank out of the control of the Court of Bankruptcy, and to wind up under private arrangement.

The failure of Mr David Leopold Lewis, railway contractor and financial agent, is reported, with large reported liabilities.

PUBLIC COMPANIES.—At the first ordinary meeting of the English and Swedish Bank, the available balance was stated at 12,912*l*, and a dividend of 9s per share, free of income tax, was declared.

The third annual report of the Directors of the Universal Private Telegraph Company has been issued. The available balance is stated at 4,212*l* 9s 1d, out of which sum it is recommended to declare a dividend of 6 per cent. per annum, to carry 1,000*l* to a reserve fund, and the balance of 892*l* 9s 1d to next account.

At the second half-yearly general meeting of the proprietors of the National Bank of India (Limited), held at Calcutta on the 13th February last, a dividend at the rate of 6 per cent. per annum on the paid-up capital was declared.

At the meeting of the Surrey Commercial Dock Company held on Thursday, a dividend of 1*l* 10s, free of income tax, was declared on the ordinary stock and the preference A stock, for the three months ending the 31st inst., as well as a half-yearly dividend of 2½ per cent. on the B and C preference stocks.

The meeting of the directors of the Victoria and Legal and Commercial Life Assurance Company, took place on Thursday. The receipts for the year from premiums were stated at 54,775*l* 9s 7d, and from interest 19,042*l* 0s 6d, making a total of 73,817*l* 10s 1d.

The meeting of the London Bank of Mexico and South America took place on Tuesday last, when a dividend at the rate of 12 per cent. per annum was declared.

The first report of the Millwall Iron Works Company, published in anticipation of the meeting to be held on Monday next, recommends a dividend at the rate of 12 per cent. per annum, which will leave a balance of 15,794*l* 6s 7d to the credit of profit and loss account.

At the annual meeting of the Bank of Australasia, held on Monday last, the report of the directors was adopted. The net profits for the year ended October, 1864, are stated to amount to 144,633*l*. A dividend and bonus at the rate of 14 per cent. per annum, free of income tax, were declared on the old shares, as well as payment at the same rate on the first and second instalments of 10*l* each on the new shares.

The report of the directors of the Continental Union Gas Company (Limited), recommending a dividend of 8 per cent. per annum, has been issued.

Mr J. B. Carnegie has been appointed general manager of the Metropolitan and Provincial Bank, and not of the National Provincial Bank, as stated in our last issue.

The Lucan Iron Works Company (Limited) has been formed for the purchase of valuable iron works near Dublin.

MISCELLANEOUS.—Messrs Baring Brothers and Co. have received a remittance from the custom-house of Cartagena of 1,590*l* 11s 1d on account of New Granada dividends.

The Grand Trunk Railway Company of Canada have notified that holders of the Atlantic and St Lawrence sterling shares, as well as of the certificates of the deferred interest capital, may receive, on the 15th inst., warrants for the interest due thereon to the 31st December last, on presentation of the certificates and coupons dated 15th March.

The Rhos Hall Iron Company (Limited)—capital 170,000*l*, in 8,500 shares of 20*l* each,—is intended to purchase certain estates near Ruabon and Wrexham, in North Wales, which have been very favourably reported on. No royalties or rent have to be paid on the property, and the works can be put into active operation within a few months.

The South of England Wagon Company (Limited)—capital 200,000*l*, in 10,000 shares of 20*l* each (first issue 5,000 shares)—has been formed to extend to the South and South-Western districts the system of wagon companies, which has been extensively adopted in other counties, and has there been very profitable. The Company does not intend to build its own wagons, but to purchase its stock from established builders, and intends to let most of its wagons on fixed redemption rentals, so as to be as free as possible from risk or danger.

The San Pedro del Monte Silver Mining Company (Limited)—capital 75,000*l* in 15,000 shares at 5*l* each—is formed for the purchase of the San Pedro del Monte silver mines in Mexico. The mines have been surveyed, and are believed to contain much ore, and now that Mexico is under a better Government, will be worked with greater facility than at any previous period.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.5⅝ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in London than in Hamburg.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, attention was chiefly directed to dry samples of English wheat, which—owing to the limited number on offer—sold readily, at fully Monday's prices. Other descriptions of grain met a slow sale, at late rates. Flour was in moderate request, at previous quotations. This week's imports are 150 quarters of wheat, 1,500 barley, 15,560 oats, and 60 sacks of flour.

At Liverpool, this morning, wheat and flour was in steady request, at full prices. Maize advanced 6d per quarter. At Wakefield, wheat was in fair average request, at quite previous rates.

Annexed is Mr Duncan's review of the grain trade of Odessa for the past year:—The returns for exportation from this port given at foot show a very important increase in its trade during the past year, which may be attributed to the following causes. Both seed-time and harvest were exceedingly favourable. The late large importations of agricultural machinery and implements have extended the breadth of land under cultivation, and the emancipation of the serfs, followed by new and liberal laws of local government, has ensured the free labour of the peasants, whilst retaining the privileges of the landowners. The constant fluctuations in exchange, and gradually declining prices of grain in England and France, however, diminished considerably these advantages.

A far better tone has pervaded the Liverpool cotton market this week, and sales have been larger than we have been able to report for some time. The demand has chiefly been from spinners, but speculators have also operated more largely. Prices have advanced ¼d to 1d since last Friday.

From Feb. 1 to Feb. 8, the cotton trade at Calcutta was dull, and a very moderate business was transacted, at a decline in prices of 2 rupees per maund. The export to England in January was 9,956 bales.

At Madras, during the fortnight ending Feb. 13, cotton declined in value to the extent of 15 rupees per candy. Western produce was quoted at 13¼d; Salem and Coimbatore, 13⅜d per lb. The stock of all kinds was estimated at 5,000 bales. Annexed is Messrs Dymes, Cartwright, and Co.'s table of exports for January:—

EXPORTS of COTTON from MADRAS in January.

Advices from Shanghai are to Jan. 25. There had been some excitement in the cotton market, prices advancing tls 1 to 2 per picul, and again receding to about former quotations. There were not many heavy export buyers, and at the close business became very quiet, Shanghai No. 1 dry being weak at tls 17 to 17.5 and Kongpoot at tls 17.5 to 18 per picul.

The sales of cotton at Canton, for the fortnight ending Jan. 27, were as follow:—Ningpo, good to fine, tls 18 to 19.5.0 per picul; sales, 500 bales: Shanghai, tls 16.5.0 to 18.5.0 per picul; sales, 1,600 bales.

The following business was done in cotton at Shanghai from Jan. 17 to Jan. 31:—Shanghai, $25.50 to $26.50; Ningpo, $27 to $28 per picul; sales, 5,300 bales. Japan, $30 to $31 per picul; no sales.

At Yokohama, during the fortnight ending Jan. 17, very few transactions took place in cotton. The quotation was $26 per picul.

Annexed is the Egyptian Commercial and Trading Company's report of the cotton trade for the fortnight ending Feb. 28:—Since the last fortnight prices had been so irregular, and fluctuations so rapid in heavy decline or sudden rise, that in spite of the general opinion being against possibility of peace, a comparatively small business had been done. The greatest portion of our transactions consisted in purchases for contracts, which had been made for future delivery, as high as 20d free on board, and as low as 16¾d. The greatest portion of present stock consists of qualities merely fair and good middling, good fair being extremely scarce. Arrivals since our last, 28,500 bales; sales, 2,902 bales roller-ginned; 245 bales open-ginned; total, 3,147 bales.

EXPORTS of COTTON from ALEXANDRIA from Oct. 1 to Feb. 16.

1863—1864	84,378	32,903	7,291	124,572
1864—1865	136,814	19,741	6,379	162,934

As regards prices, scarcely any change has taken place in the value of colonial and foreign grocery produce in Mincing lane, this week. In the raw sugar trade, however, there has been decidedly less firmness, and the quotations have had a drooping tendency.

The coffee trade, at Colombo, from Feb. 2 to Feb. 16, was quiet, but firm. Plantation produce was quoted at 12s 6d to 13s per bushel; native ditto, unpicked, 42s 6d to 43s; picked and dried, 49s per cwt. Annexed is Messrs Fryer, Schultze, and Co.'s statement of exports:—

Advices from China state that the total export of tea to Great Britain since the commencement of the season had amounted to 105,527,810 lbs, against 100,293,370 lbs during the corresponding period in 1863-4.

The following table shows the exports of sugar from Mauritius, from Aug. 1 to Feb. 1 in each of the three last seasons.

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st of August to 1st of February.

The public sales of colonial wool have gone off with increased activity. Good and fine Australian wools are now ½d to 1d per lb. dearer than at last sales, whilst all descriptions of Cape wool command quite 1d, and, in some instances, 1½d per lb more money, as compared with the same period. The English wool trade, however, is dull, with a downward tendency in prices.

Advices from Australia state that the arrivals of wool, both at Sydney and Melbourne, had been large for the time of year. The demand was chiefly confined to good and fine samples, which fully supported previous rates. Inferior wools, however, were dull, and rather lower in value. The following were the prices current:—At Melbourne:—Greasy—Inferior to ordinary 8d to 9d, ordinary to average 9d to 10½d, good to superior 11d to 13½d, ditto cross-bred 13d to 14½d. Fleece—Inferior to ordinary 15d to 17d, ordinary to average 18d to 20d, good to superior 21d to 25d. Scoured—Ordinary 16d to 19d, good 20d to 22½d, superior 24d to 27d. At Sydney: 1st scoured 1s 11d to 2s 1d, 2nd ditto 1s 7d to 1s 9d, 3rd, seedy and skin, 1s 3d to 1s 6d, 1st fleece 1s 8d to 1s 10d, 2nd ditto 1s 4d to 1s 6d, 3rd and seedy 1s 1d to 1s 3d, 1st greasy 10d to 11d, 2nd ditto 7d to 9d, 3rd and seedy 6d to 7d. The arrivals of the new clip at Sydney had reached 33,000 bales.

The clip of wool in the South of Russia last year was large, but the bulk was of very middling quality. The following table shows the export from Odessa during the last four years:—

	1861 poods.	1862 poods.	1863 poods.	1864 poods.
Merinos—Washed	160,362	120,129	104,410	127,050

Peregone	...	...	...	17,100
	330,281	306,579	285,166	434,250

A report from Shanghai, dated Jan. 25, thus alludes to the state of the silk trade:—Throughout the fortnight we have had a dragging market, the transactions barely amounting to 500 bales. Prices may be considered nominal. Contrary to the usual custom at this season of the year, there is abundance of Sycee amongst the Chinamen, which allows the dealers to remain firm holders of silk, there being no inducement to realise, with the unusually low rate of interest. The unsold stock is estimated at 1,500 to 2,000 bales, characterised by a scarcity of good silk. The export from July 1 to date was 31,323 bales, against 30,912 bales in 1863-4.

Manufactured iron is firm, and the market for tin plates has improved. Other metals, however, rule inactive. Oils and tallow may be considered steady.

Advices from New York state that the shipments of specie

Digitized by Google

from Jan. 1 to Feb. 25, were 813,310*l*, against 1,613,500*l* in 1864; 1,442,650*l* in 1863, and 1,092,300 in 1862. The stock of bullion in the banks, on the 25th ult, was 4,018,480*l*, and in the Sub-Treasury, 5,703,100*l*. Gold, from March 4 to March 7, fluctuated between 196¾ and 200½, the latest quotation being 197¼ per cent.

THE COTTON TRADE.

LIVERPOOL—March 17.

At the close of last week the heavy decline in price of every description of cotton attracted the attention of the trade, as well as speculators and exporters, and throughout the present a large business has been done. Prices have gradually hardened, and closed yesterday at an advance of ½d to 1d upon former quotations. American has been in good demand, and is quoted ½d to ¾d per lb higher than on last Friday. Sea Island continues neglected, and during the past fortnight has declined about 2d per lb. Brazil on Friday and Saturday was much depressed, but the low rates submitted to induced large purchases, particularly on speculation. Prices recovered, and now rule ½d to ¾d higher than those of last week. Egyptian has been in good demand and gradually recovering in value during the week, and quotations are raised about 1d per lb, though yesterday the demand was more freely met. Smyrna has been in very good request from the trade, owing to the cheapness of this class compared with other short staples, and has advanced 1d per lb. A good demand for East India has prevailed, but the supply has continued liberal, and holders generally have been glad to meet the market at a moderate increase on last week's rates. A partial advance of ½d per lb has been established; but in some cases the value is the same as last week. China has been in good request, and must be quoted ½d per lb dearer. Japan has been neglected, and is unchanged in value.

No transactions "to arrive" have been reported this week.

The actual stock of cotton in Liverpool will be taken on the 31st instant.

The sales of the week amount to 75,000 bales, including 15,490 on speculation, and 9,720 declared for export, leaving 49,790 bales to the trade. The sales to-day amount to about 10,000 bales.

LONDON—March 17.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—There has been decidedly more tone prevailing in the market this week, and the sales are much more extensive than we have been able to report for some time. All descriptions have experienced a rise in value, amounting on China and Japan to ¼d to ½d, Scinde and Bengal 1d, and on most other kinds ½d per lb.

NEW YORK—Feb. 27.

The demand was quite active, and full rates were realised for all grades, particularly for choice, which is in small supply, and chiefly sought for. The sales to-day were 600 bales, at the following quotations:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	70	70	71	71
Middling	82	83	84	84
Good middling	87	88	89	99

New York, March 3.—On the whole, the cotton trade is steady. Middling upland is quoted at 82c per lb. The import since Sept. 1 amounts to 128,176 bales. The export in February was 5,802 bales, against 261 bales last year.

New York, March 7.—The market is dull, at a decline of 1c per lb, middling upland being quoted at 81c.

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been a full average business doing in cotton goods this week, at full quotations. Owing to the puddler's strike, manufactured iron is very firm in price. The coal trade has continued very active, both for home use and export.

Manchester, March 16.—A rather extensive business has been done during the greater part of this week in common and better qualities of East India shirtings, and in the yarns which compose them. A better feeling has consequently been imparted to the cotton market, and an impression has gained ground that prices have reached the bottom for the moment, inducing moderate purchases at current figures for the various other markets, and for general wants. Excepting, however, in cop yarns and shirtings, which are about ½d per lb dearer, hardly any advance has been paid, sellers being glad to take advantage of their opportunity after the recent long course of stagnation. To-day the animation has sensibly lessened, and this tendency has been hastened by telegrams from India to the 8th inst, reporting sales impossible, owing to accounts of the fall here. Producers being now well engaged to order, no other effect has so far been observed.

BRADFORD.—There have been more inquiries made for wool, and even hogs, which have been so long neglected, have been asked for. There is no improvement in prices, but less tendency downwards. Export buyers are making offers for various sorts of yarn. The home trade, however, has fallen off considerably. In pieces there has been a rather better inquiry for plain goods, and the fancy trade has become a little more active.

LEEDS.—The goods purchased have included a fair amount of ordinary blacks as well as medium goods in the white state, mixture coatings, light meltons and tweeds. The country manufacturers are rather checking their rates of production, Prices, those of wool as well as of cloth, are steady. The flax trade is not very active, and the high price of the raw material keeps operations from expanding.

WOLVERHAMPTON.—The iron trade is in a suspended state, owing to the strike in North Staffordshire and the lock-out in this district. So far buyers have not taken alarm at the possibility of the supply being cut off, and prices are no firmer.

BIRMINGHAM.—Trade is quiet, but manufacturers generally are not complaining of any scarcity of orders, most of them having sufficient to keep themselves steadily employed.

CARDIFF.—There has been a better inquiry for iron, owing mainly to some orders being offered which would have gone to Staffordshire had it not been for the lock-out there. This improved inquiry has brought about increased firmness in prices.

NORWICH.—The shoe trade has maintained itself pretty well of late here. The manufacturing industry of the town has also shown a little more animation.

GLASGOW.—The iron market has been very quiet; 50s 4½d prompt cash, and 50s 7½d one month, closing rather sellers. G.M.B., No. 1, 51s 3d; No. 3, 50s 6d; No. 1, Gartsherrie, 57s 6d; Coltness, 57s 6d; Calder, 54s; Glengarnock, 53s; Eglinton, 51s.

DUNDEE.—Our flax market continues without improvement. On contract a moderate business is doing at about former prices. Jute continues dull; the finer descriptions are in fair request at about former rates, but inferior qualities are without improvement. The demand for linens is not active.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 27.—The market for State and Western flour continues quiet, there being no demand outside of the immediate wants of the local trade; but in prices we have no material change to note. We quote:—Flour—Superfine State and Western, $9.85 to $10; extra State, $10.10 to $10.25; choice State, $10.30 to $10.40; common to medium extra Western, $10.30 to $10.55; extra round hoop Ohio, $11 to $11.10; Western trade brands, $11.15 to $12; extra St Louis, $11.60 to $14.60; common Southern, $10.75 to $11.65; fancy and extra ditto, $11.70 to $14.50; common Canadian, $10.25 to $10.45; good to choice and extra, $10.50 to $11.85 per barrel. The wheat market was very quiet, but firm, with only a moderate milling demand; the business was checked by the extravagant demands of holders, and we have only to report a sale of 5,400 bushels choice white Canada at $2.62. The corn market was moderately active, but firm, at $1.90 for old mixed Western, in store. Of new yellow Jersey corn, we have to report sales of 3,000 bushels, at $1.76 to $1.77.

NEW YORK, March 3.—Wheat, flour, and maize have sold slowly, and a further decline has taken place in prices. Very little is doing for export. The following were the total shipments in February:—

		1864.		1865.
Flour	bbls	189,592	.....	98,531
Wheat	bush	1,067,833	.....	69,186
Corn		21,225	.....	45,911

NEW YORK, March 7.—Prices continue to give way. The export demand for flour, wheat, and corn is still much restricted.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market this week, coastwise and by land-carriage, have been on a limited scale, and in but middling condition. Good sound qualities have changed hands freely, at full quotations. In other kinds very little has been passing, at previous rates. The imports of foreign wheat have been trifling Millers, generally, have purchased cautiously; nevertheless, prices have been well supported. The supply of both English and foreign barley has continued large, and sales have progressed slowly, at late rates. Malt—he show of which has not increased—has met a slow inquiry. In prices, however, no change can be noticed. There has been an inactive demand for oats, at late quotations. The aggregate arrivals have been very moderate. Beans have sold heavily, at barely stationary prices. Peas have commanded extreme rates, with only a limited supply on the stands. Both English and foreign flour has moved off steadily, at full currencies.

Most of the continental markets have been firm for wheat, and the quotations have been well supported. In spring corn, a large business has been passing, on former terms. The shipments of produce from America still continue limited.

The annexed return shows the imports of foreign and colonial produce into Ireland during the last ten years:—

	Wheat.	Barley.	Oats.	Rye.	Peas.
	qrs	qrs	qrs	qrs	qrs
1855	408,826	31,408	128	...	235

1863	1,231,489	20,881	11,655	1,933	70
1864	1,124,074	41,464	...	...	292

	Beans.	Maize.	Flour.	Indian Meal.
	qrs	qrs	cwts	cwts
1855	775	526,398	86,201	1,353
1856	1,049	646,660	65,996	426
1857	117	572,893	61,747	8
1858	...	906,810	291,700	10
1859	524	795,893	373,652	7
1860	97	1,155,270	294,353	4
1861	5,525	1,626,393	183,925	85
1862	5,675	1,412,840	225,138	366
1863	2,612	2,058,698	216,757	123
1864	...	513,419	252,893	2

The consumption of maize in Ireland fell off considerably in 1864. Out of a total import into the United Kingdom in 1863 of 2,964,000 quarters, Ireland consumed 2,058,698 quarters in that year. In 1864, the total arrivals amounted to 1,473,000 quarters, of which only 513,419 quarters were directed to Ireland. The consumption in England, therefore, keeps steady.

The shipments of produce from Ireland to Great Britain in the last ten years were:—

	Wheat.	Oats.	Barley.	Beans and Peas.
	qrs	qrs	qrs	qrs
1855	88,500	1,215,000	58,500	26,300
1856	109,300	1,174,000	70,800	23,700

1857	6,404	1,057,303	259,871
1858	2,879	978,196	255,273
1859	4,980	800,702	281,006
1860	3,057	732,346	215,443
1861	2,909	978,005	243,393
1862	2,327	878,280	207,680
1863	2,561	911,587	129,469
1864	3,399	838,307	95,670

In Scotland, fine wheat, barley, and oats, have changed hands steadily, at full prices. Otherwise, the trade has been in a most inactive state.

The Irish markets have been fairly supplied with produce. Generally speaking, the trade has been very inactive, at barely late currencies.

At Mark lane to-day, the supply of English produce on sale was small. The demand was chiefly confined to good and fine dry samples of English wheat, which sold readily, at the full prices of Monday. In the value of foreign wheat, English and foreign barley, oats, beans and peas, no change took place. Flour was in moderate request, at late rates.

Mr George Dornbusch reports the arrival off coast of only three cargoes of grain. The transactions generally in floating cargoes have been very moderate, nevertheless, prices have continued steady.

The London averages announced this day are:—

	qrs	s	d
Wheat	2841 at	41	8
Barley	1718	30	7

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—A quiet tone pervades the market, the trade generally contracting their operations, and the surplus stock has been further augmented by rather heavy landings. Quotations have in many instances fallen 6d per cwt, as the importers continue to bring forward liberal supplies. Only 830 casks West India had sold in three days, including the few parcels by auction. Jaggery Madras is lower. Gurpatta date Bengal meets with less inquiry for exportation, and the grainy sorts of Mauritius must be quoted 6d per cwt cheaper.

Mauritius.—5,637 bags, offered by auction, were about half sold: grey and yellow, 31s to 33s; middling crystallised, 34s 6d to 35s; soft brown, 25s to 28s 6d. A floating cargo has sold for France: No 11½ to 12, at 25s 3d. One for the United Kingdom, at 36s, duty paid. One No 9, at 20s 6d per cwt, in bond.

Bengal.—4,509 bags, offered by auction, partly met with buyers, at, and afterwards: Gurpatta date, 29s to 32s 6d; white Benares, chiefly bought in; a small quantity of good sold at 37s to 38s; low brown sorts withdrawn at 22s to 24s per cwt. A few parcels have sold by private contract, chiefly date sorts.

Madras.—5,200 bags mostly found buyers as follows, at, and after the sales: Jaggery, 21s 6d to 22s; pale grey, date sort, 24s per cwt.

Natal.—1,152 bags muscovado kinds sold at 27s 6d to 32s 6d per cwt.

Manilla.—4,200 bags unclayed have sold at 24s per cwt; 2,000 bags clayed have sold at 28s 6d per cwt.

Other Foreign.—At auction 2,891 boxes Havana chiefly sold: brown and yellow, 27s 6d to 34s; low brown and muscovado, 22s 6d to 27s 6d. 321 cases 959 bags Bahia were taken in above the value. 568 casks 200 barrels Porto Rico chiefly sold at 30s to 34s 6d per cwt for low greyish to good grocery.

Refined.—The market for dry goods has been steady this week.

MOLASSES.—19 puncheons St Vincent offered by auction were sold at 13s 6d to 14s per cwt.

RUM.—A few sales have been effected in West India at previous rates. Leewards, 1s 6½d; Demerara, 1s 7d; Mauritius, 1s 5d per proof gallon.

TEA.—The public sales of China growths, which commenced last week, were concluded on Tuesday, when 5,580 packages sold, making a total of 29,584 packages, out of 35,987 packages brought forward. Privately the transactions have been of very moderate extent.

COFFEE.—This market has been steady, but the supply of plantation Ceylon, in first hands, is increasing. At present, however, very little offers. A few lots by auction obtained fully previous rates. 1,859 bags native of superior quality, obtained the full valuations: small berry to fine, 69s to 73s. 3 casks 112 barrels and bags Jamaica sold at 69s to 70s 6d for ordinary qualities. 412 packages Mocha were sold, a portion being being heated and out of condition. 1,220 packages East India chiefly met with buyers: good to fine Mysore, 85s to 93s 6d; other kinds, 76s 6d to 87s; good Singapore, 72s to 75s. 243 bags African sold at 66s 6d to 67s 6d. 12 casks 720 barrels and bags Jamaica sold steadily at 65s to 80s for ordinary to middling. A floating cargo of St Domingo has sold at 68s for the Mediterranean. One of Rio, at 57s 3d per cwt for a near port. The Dutch sale of Java coffee held on Wednesday went off at rather easier rates.

COCOA.—Colonial descriptions keep firm. 384 bags Trinidad, by auction, sold from 66s to 72s 6d per cwt.

RICE.—A good business has been done in soft grain descriptions at full rates, and white Bengal is higher. Privately, the former descriptions have sold at 8s 6d to 9s 3d, according to quality. A few parcels of white Bengal have realised 12s to 14s 9d for middling to fine. 1,385 bags Rangoon, by auction, sold at 7s 9d to 8s 4½d. 1,003 bags pinky Madras were taken in at 11s to 11s 6d.

IMPORTS and DELIVERIES of RICE to March 11, with STOCKS on hand.

Stock	49300	51600	59280	28350

SPICES.—The sales have been unusually heavy. 4,635 bags Zanzibar cloves chiefly sold at full prices, from 3½d to 3¾d. 1,323 bags white pepper were chiefly bought in. A few lots Singapore sold cheaply at 6½d, but there were few buyers even at the reduction, and the bulk withdrawn. 27 cases Tellicherry white sold at 7¾d to 1s 0½d. 2,790 bags black were taken in; Penang, 3¼d to 3⅜d: Singapore, 3½d. 915 bags pimento were partly disposed of at steady rates, from 2¼d to 2½d. 93 cases brown nutmegs sold at previous quotations, from 10d to 2s 3d: one lot, 3s 7d. 59 casks low shrivelled Dutch, 6d to 7d. 40 cases mace part sold at 11d to 1s 4d. 32 barrels wormy Batavia were withdrawn at 11d to 1s per lb. 2,177 bags rough Bengal ginger only partly sold at the reduced price of 23s, the remainder withdrawn at 25s. 1,050 cases cassia lignea sold from 78s to 82s per cwt for low to fair quality.

SALTPETRE.—A small quantity of Bengal has sold at full prices: refraction 13 to 3, at 28s 6d to 30s 6d per cwt, short prompts.

IMPORTS and DELIVERIES of SALTPETRE to March 11, with STOCKS on hand.

Deliveries....	2260	2460	2830	3600
Stocks	6510	7450	6400	4950

Deliveries last week 288 tons.

JUTE continues quiet. Of 6,622 bales brought to auction on Wednesday, about a fourth part sold, and at prices mostly showing a reduction of 10s to 20s per ton, from 9l 10s to 19s 10s per ton. Few transactions have occurred by private contract during the week.

TALLOW.—The market for foreign has been steady. This morning 1st sort new Petersburg Y.C. is quoted 40s 6d; June, 41s to 41s 3d; October to December 42s to 42s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, March 13.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market continues flat. A few parcels of West India and 1,721 bags Mauritius, by auction, to-day, went at about previous quotations. 2,588 bags grocery Madras sold at 33s to 36s: soft brown and yellow, 27s to 31s 6d. Sales of West India for the week, 1,188 casks.

COFFEE quiet.

SALTPETRE.—A telegram is said to have been received that the export duty on saltpetre will be reduced 1 rupee per maund, and the market is flat.

PEPPER.—1,576 bags Singapore were taken in at 3½d; 246 bags Penang were withdrawn at 3¼d to 3¾d per lb.

SAGO.—100 boxes fine bold grain were sold at 22s per cwt.

OIL.—335 casks cocoa-nut, by auction, part sold as follows: Sydney, 32s to 36s 6d; Cochin, 40s to 41s. 174 casks palm bought in at 36s to 36s 9d per cwt.

TALLOW.—956 casks Australian offered by auction half sold at 3d to 9d decline: sheep, 40s 6d to 41s; beef, 37s to 40s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been quieter, there is no material alteration to note as respects prices. Dutch crushed is offering on rather easier.

GREEN FRUIT.—Cold weather has checked consumption, and prices depressed accordingly. Some parcels of oranges from St Michael and Terceira, sold by Keeling and Hunt at public sale, went at a reduction in price. Sound Valencia and Palermo are better supported. Lemons maintain the advance, stock being limited. Seville sours are in better demand. Nuts of all kinds without alteration.

DRY FRUIT.—The few sales in currants that have been made show a further reduction. In raisins no business is reported.

ENGLISH WOOL.—Prices lower and very little doing.

COLONIAL WOOL.—The sales are progressing firmly, with rather a better tone.

FLAX.—Market quiet.

HEMP.—More business than of late during the week at the previous quotations.

SILK.—The market still continues very quiet, with little or no change in price. Perhaps a slightly improved inquiry the last day or two.

TOBACCO.—The market has presented no change in prices. Sales chiefly of a limited character, especially American descriptions. Other growths have been freely taken at previous rates.

LEATHER.—There was a larger supply of fresh leather at Leadenhall on Tuesday than for some weeks past, and a fair demand was experienced. The transactions of the week amount to a full average, but without change in prices. Good crop hides, about 30lbs as well as 40lbs and 45lbs, English shoulders, bellies, light common hides, light shaved hides, middle-weight calf skins, horse hides, and kips were the articles most scarce and in request.

METALS.—No changes of importance have occurred in our market. Copper is in rather better inquiry, and more sales have been effected. Tin is still very heavy. Iron—Transactions are embarrassed by the lock-out; in fact, business is almost suspended. Spelter has continued quiet all the week. Tin plates and lead continue flat.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	42	0
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, March 13.—The total imports of foreign stock into London, last week, amounted to 5,905 head. In the corresponding week in 1864 we received 4,133; in 1863, 2,806; in 1862, 1,454; in 1861, 2,494; in 1860, 2,025; and in 1859, 2,424 head.

The supply of foreign beasts here to-day was rather extensive, and, with the exception of the stock from Normandy, in but middling condition. The number of foreign sheep, calves, and pigs was only moderate. The arrivals of beasts fresh up from our own grazing districts were seasonably good. On the whole, the demand for most breeds ruled at prices equal to Monday last. A few very superior Scots and crosses realised 5s 4d, but the general top figure for beef was 5s 2d per 8 lbs. There was only a limited show of sheep in the pens. About three-fourths were out of the wool, and in fair average condition. The mutton trade was very firm, and in some instances prices had an upward tendency. Prime Downs and half-breds, in the wool, sold at 6s 4d to 6s 6d, out of the wool 5s 2d to 5s 4d per 8 lbs. Shorn Lincolns were worth 4s 8d to 5s per 8 lbs. Prime small lambs sold readily, but inferior breeds were dull. Prices ranged from 6s to 7s per 8 lbs. The supply was only moderate. Calves were in moderate supply and steady request at extreme rates, viz. from 4s 6d to 5s 8d per 8 lbs.

SUPPLIES.

	March 14, 1864.	March 13, 1865.
Beasts	4250	4210
Sheep	18170	15010
Calves	82	104
Pigs	260	405

THURSDAY, March 16.—About an average supply of beasts was on sale, to-day, in but middling condition. Most breeds moved off slowly, at Monday's currency. The general top figure was 5s 2d per 8lbs. The show of sheep was only moderate. Downs and half-breds

Digitized by Google

were in good request, at full prices. Otherwise, the mutton trade was inactive, at late rates. The highest quotation was 6s 6d per 8 lbs. Lambs sold heavily, at from 6s to 6s 8d per 8 lbs. There was a fair inquiry for calves, at extreme rates, viz., from 4s 8d to 5s 8d per 8 lbs. Pigs sold at full prices, but milch cows were very dull.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Monday, March 13.—We have no alteration in our market, which remains heavy, with only a small demand for the best qualities of the last growth. Inferior descriptions and hops of earlier date are neglected. Mid and East Kents, 130s, 160s, 200s; Weald of Kents, 120s, 140s, 155s; Sussex, 116s, 135s, 145s; Yearlings, 110s, 126s, 140s.

FRIDAY, March 17.—The supply of hops on sale is very moderate. For good and fine English, as well as foreign qualities, there is a steady demand, and prices rule firm. Inferior hops are a dull inquiry at about previous rates.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, March 13.—The arrivals both coastwise and by rail have been large and the trade for most sorts heavy, at the rates of the former week. The following are this day's quotations:—Yorkshire Flukes, 120s to 140s; ditto Regents, 90s to 100s; ditto Rocks, 75s to 80s; Kent and Essex Regents, 90s to 100s; Perth, Forfar, and Fife Regents, 75s to 80s; ditto Rocks, 65s to 70s; French and Belgian whites, 55s to 60s per ton.

HAY MARKETS.—THURSDAY, March 16.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 5s 0d; clover, 5*l* 5s to 6*l* 6s 0d; and straw, 1*l* 8s to 1*l* 14s per load. A slow trade.

CUMBERLAND—Meadow hay, 4*l* 4s to 5*l* 7s 6d; clover, 5*l* 5s to 6*l* 6s; and straw, 1*l* 8s to 1*l* 14s per load. Trade inactive.

WHITECHAPLE—Meadow hay, 4*l* 4s to 5*l* 5s; clover, 5*l* 5s to 6*l* 6s; and straw, 1*l* 8s to 1*l* 14s per load. A fair demand.

COAL MARKET.

FRIDAY, March 17.—Wallsend Hetton 20s 3d—Hartlepool 19s 6d—East Hartlepool 19s 6d—Braddyll's Hetton 18s 6d—Heugh Hall 18s 6d—Riddell's 17s 3d—South Kelloe 18s 6d—Tunstall 17s 9d—West Lambton 18s 3d—Davison's West Hartley 15s—Tanfield Moor Butes 14s. Ships at market, 58; sold, 15; gas contracts, &c., 31—46; unsold, 12; ships at sea, 45.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 17.—There is no improvement to notice in the demand generally. The home trade continue to buy very sparingly, and prices show in many cases a drooping tendency. Some business has been done for export to the Continent this week at current prices, but, on the whole, our wool market has a very quiet appearance.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 17.—Market well attended. Wheat in good demand at full rates of Tuesday. Flour in moderate request, without change in value. Indian corn 6d per quarter dearer, with a better demand.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

M. Bird, Battersea, tailor—G. Parsons, Walworth, engineer—G. Miller, Kensington, grocer—J. Edwards, Old St Pancras road, shoemaker—S. Green, Bow road, licensed victualler—J. Hall, Church street—G. EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 4th of March, on 11,821 miles, to 583,691*l*, and for the corresponding week of last year, on 11,476 miles, to 552,783*l*, showing an increase of 345 miles, and of 30,908*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,314 miles, to 474,186*l*, and for the corresponding week of 1864, on 8,057 miles, to 447,425*l*, showing an increase of 257 miles, and 26,761*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, March 13.—In the share market to-day dulness very generally prevailed, and, with the exception of the Indian railways, which closed at an advance of about ½ per cent., and mines, which were unaltered, the tendency to depression affected all the several descriptions. Of the English railways, Metropolitan District improved ¾, at 6¼ to 6¾ prem., and Metropolitan a further 1, Great Northern recovered ½; South Devon, and Midland (Birmingham and Derby) declined 1 each, South-Western and Manchester, Sheffield, &c. ½ each, North-Western further ¾, and North-Eastern (Berwick) and ditto (York) a further ½ each. In colonial, Bombay and Central India, Eastern Bengal, East Indian, Scinde, Delhi, and Punjaub advanced ½ each; Great Western of Canada (6½ per cent. bonds) were finally quoted 6 lower, and Grand Trunk of Canada (4th preference) 1 lower. In foreign, West Flanders (preference) improved ¼. In American, Illinois Central (shares) relapsed ¾, and United States (5-20) declined 1¼, Atlantic and Great Western (Pennsylvanian 2nd mortgage) 1, and Erie shares (paid up) a further 1.

TUESDAY, March 14.—In the share market to-day English railways showed firmness at the close, mines were rather inclined to weakness, and the other descriptions showed no material alteration. Of the English lines, North-Western and Midland recovered ¾ each, and ditto (Birmingham and Derby) 1, Great Eastern improved ½, Great Western, Lancashire and Yorkshire, and South-Eastern 1 each, Metropolitan (new) ¼, and ditto (original) further 1¼; and North-Eastern (Berwick) and ditto (York) further declined ½ each. In colonial, Grand Trunk of Canada (4th preference) recovered 1; and Eastern Bengal relapsed ½. In foreign, San Paulo declined ½, and Lombardo-Venetian ½. In American, United States (5-20) further receded ½. In British mines, Great Wheal Vor and Drakewalls declined ½ and ⅛ respectively. In foreign mines, Linares declined ½, and United Mexican and Washoe Gold (ordinary) ¼ each.

WEDNESDAY, March 15.—This being the day for the half-monthly settlement in the share market, the majority of the transactions were for the next account, and in English railways and miscellaneous shares, and to a less extent in American securities and British mines, there was an upward tendency in the closing prices, but the other descriptions showed no material alteration. Of the English lines, North-Eastern (Berwick) and ditto (York) recovered ½ each; ditto (Leeds) and South-Western also improved ¾ each, South Devon 1, Great Western, Midland, and South-Eastern a further ¼ each, and North-Western a further ½; Great Northern advanced 1½, and ditto (A stock) 5, while Great Eastern relapsed 2. In colonial, Atlantic and St Lawrence advanced 1, and and Grand Trunk of Canada (1st preference deferred) declined 1. In foreign, Dutch-Rhenish improved ½, and Paris and Mediterranean and Paris and Orleans receded ½ each. In American, United States (5-20) recovered 1; Illinois Central (6 per cent.) advanced 1½, and ditto (shares) ¼; and Erie shares (paid up) declined ½. In British mines, East Lovell improved ½, and Grenville and East Grenville ¼ each. In foreign mines, Port Phillip declined ½.

THURSDAY, March 16.—In the share market to-day firmness was generally shown in the closing prices, especially in English and colonial railways, the few instances of lower quotations being ex dividend. Bristol and Exeter and Midland (Birmingham and Derby) advanced 1 each, ditto (original) further ¾, Lancashire and Yorkshire ¾, Great Eastern, Blackwall, Metropolitan, and North British ½ each. In colonial, Bombay and Central India, East Indian, Great Indian Peninsula, Great Southern of India, Scinde, Delhi (stock), Punjaub, and Grand Trunk of Canada severally advanced ½ each, ditto (first preference) 1, Great Western of Canada (of both descriptions) ¼ each, and Melbourne and Hobson's Bay 1½; and Atlantic and St Lawrence are now quoted ex dividend. In foreign, Great Luxembourg, Sambre and Meuse, and Lombardo-Venetian improved ¼ each, and Dutch-Rhenish a further ½; and West Flanders (preference) receded ¼. In American, United States (5.20) and Illinois Central shares further improved ¼ each. In British mines, North Wheal Bassett improved ¼, and Grenville a further ½.

FRIDAY, March 17.—There was a good demand for British railway securities, and the variations in prices were in a favourable direction. Great Northern stock advanced 1 per cent., Great Eastern ¾, and London and North-Western, and Lancashire and Yorkshire ½. Dutch-Rhenish Railway shares advanced, and San Paulo were firm. The securities of the Grand Trunk Railway of Canada met with inquiry. Indian lines ruled steady.

OFFICES AND SHOW ROOMS TO BE LET in MINCING LANE.—At No. 14: two Suites of handsome Ground-floor Offices and Show Rooms, together or separate, with North skylight.

At No. 6: three spacious lofty Offices on the first floor en-suite, adaptable to a merchant or public company, and several rooms on the third floor with North light.—Apply to Ellis and Son, 49 Fenchurch street, E.C.

TO BILL DISCOUNTERS AND OTHERS.—All persons are cautioned against negotiating or in any way dealing with any Bill or Bills of Exchange purporting to be drawn by Sibut and Company, and accepted by M. C. H. Sugden.

CHAPPELL and SHOARE.

March 13, 1865. 26 Golden square.

TO BANKERS, BILL DISCOUNTERS, and OTHERS.—LOST or STOLEN, a First BILL of EXCHANGE for £700; drawn by the Egyptian Commercial and Trading Company at Alexandria, at three months' date, on their London Board, in favour of Franghidi Brothers, endorsed by them to Charalampi Balli, and by him to Papsyanni Brothers, but not endorsed by the last-named firm. Accepted by the Egyptian Commercial and Trading Company, of London, payable at Glyn, Mills, and Co. Due 4th May, 1865.

Payment of the Bill is stopped. Communications may be made to the Egyptian Commercial and Trading Company, London; or to Messrs Papsyanni Brothers, Fenwick street, Liverpool.

EMPLOYMENT.—A GENTLEMAN who has been engaged in business pursuits in the City for the last 18 years, but who is now of independent means, is desirous of occupation for a few hours during the day. Emolument no consideration.—Address G. A., Chanoon's Post Office, Brompton road.

AGENCY.—WANTED BY THE Advertiser, 45 years of age, and married, an Agency in London, or a situation as Bookkeeper in an Office, or Manager in a Yard or on a Wharf. Undoubted references.—Address A. O., 1 Avon terrace, Shakespeare road, Stoke Newington.

A PUBLIC ACCOUNTANT AND ESTATE AGENT, &c., in Melbourne, Australia, now in London, and about to return to the colony, is ready to communicate with parties requiring attention to their interests in the Australian Colonies. Unexceptionable references.—Apply to A. B. C., care of Charles Barter and Sons, Birchin lane.

A GENTLEMAN WITH A SMALL Capital is desirous of a meeting with a Partner who has connection as an Insurance Broker. He wishes to take an active part in the management.—Address R. H., Mr Pollock's, 129 Fenchurch street, E.C.

A GENTLEMAN IN MANCHESTER engaged in the China shipping trade, wishes to represent a London firm to buy goods and yarn for the China and India markets.—Address "Manchester," care of J. J. Imray, Esq., 102 Minories, London.

A GENTLEMAN OF considerable experience, at present and for many years having had the charge of the books and office of a merchant's house in Liverpool, the number of clerks employed being generally twenty-five, desires an Engagement as Secretary and Superintendent of the books and counting house of an extensive banking, railway, or other company, where the services of a first-rate bookkeeper and accountant—a persevering, industrious man—are required.—Address X., Box L., 24 Post Office, Liverpool.

PARTNERSHIP.—TO BANKERS and Others.—A house of some years' standing, principally engaged in business as shippers and shipowners, and having first-class connections, is open to receive a Gentleman as a Partner, with a capital of not less than £25,000 to £30,000. The incoming partner's share would be considerable, as there is at present but one in the house.—Apply, in first instance, to X. Y. Z., care of W. A. Plunkett, Esq., Solicitor, 24 Milk street, Cheapside.

PARTNERSHIP.—WANTED, a Gentleman with a capital of about £10,000, in a well-established mercantile house, whose chief trade lies with the Continent. Satisfactory reasons given for the retiring partner leaving. The business is sound and profitable, and the fullest information will be given relative to the trading and other accounts of the firm: also references to some of the most eminent houses in the City.—Apply to Lovering and Minton, Accountants, 12 King street, Cheapside.

PARTNERSHIP IN THE DRUG and CHEMICAL TRADE.—A Gentleman who has been carrying on this business for upwards of thirty years, and who has formed a large and profitable connection both at home and abroad, is desirous of meeting with a Gentleman with a capital of from £5,000 to £10,000 who will be willing to join his son in carrying on the same, with a view to his retirement: arrangements which could be made for the mutual accommodation of all parties.—Apply to Messrs Tanqueray, Williams, and Hanbury, 34 New Broad street, London, E.C.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.

"THE ONLY GOOD SAUCE."

The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.

Ask for LEA AND PERRINS' SAUCE.

*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

E. MOSES AND SON, GENERAL OUTFITTERS, BABIT MAKERS, TAILORS, HATTERS, HOSIERS, WOOLLEN DRAPERS, BOOT AND SHOE MAKERS.

E. MOSES AND SON, HAVE SEPARATE DEPARTMENTS FOR BESPOKE CLOTHING, READY-MADE CLOTHING, MOURNING, LIVERIES, UNIFORMS, SAILORS' CLOTHING, MECHANICS' CLOTHING.

E. MOSES AND SON'S LONDON ESTABLISHMENTS:— Minories and Aldgate, New Oxford street, Tottenham Court road. COUNTRY BRANCH:— Bradford, Yorkshire.

W. S. LAWTON, WINE Merchant, 35 Trinity square, Tower hill, E.C., begs to offer BRUCE'S best old VIDONIA at 30s per dozen; also best Marsala, 24s; old Canary Sack, (pints) 28s; fine old Bucellas, 36s; Sound Sparkling Champagne, 30s; Clarets, from 14s; Ports and Sherries, 30s to 72s; fine old Cognac Brandy, 54s to 66s per dozen; (bottles included). Detailed Price Lists post free.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

FLUTES.—THE NEW MODEL FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—At Messrs Keith, Prowse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS, by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES, by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.

48 Cheapside.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C

TEETH.—MR ESKELL, SURGEON-DENTIST, 8 Grosvenor street, Bond street.—His patent secures the greatest improvement. Painless treatment, and only a few hours required. Comfort guaranteed. Detection impossible. A Treatise on the subject free for seven stamps. Consultations free.

CONSUMPTION, COUGHS, COLDS, ASTHMA, BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receip of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Obseerve particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

ROYAL AGRICULTURE SOCIETY OF ENGLAND.

PLYMOUTH MEETING.

ROYAL AGRICULTURAL SOCIETY of ENGLAND.

Meeting at Plymouth and Devonport, 1865.

Stock and Implement Prize Sheets are now ready, and will be forwarded on application to

H. HALL DARE, Secretary.

12 Hanover square, London. W.

AVONSIDE ENGINE COMPANY (Limited).—Notice is hereby given, that the first Ordinary General Meeting of the Avonside Engine Company (Limited) will be held at the office of the Company, Little Avon street, St Philips, Bristol, on Tuesday the 21st day of March, 1865, at one o'clock p.m.

And notice is also given, that immediately following the business of such general meeting, an Extraordinary General Meeting will be held at the same place, to consider "an alteration in clause No. 8 of the Articles of Association, so far as it relates to Five per Cent. Interest being charged on calls in arrear."

The Transfer Books of the Company will be closed until after the date of General Meeting—By order,

SAMUEL SMITH, Secretary.

14th March, 1865.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and filed. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly London.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

DR GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:

ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

REMARKS

ON THE

LONDON EXPORT TEA TRADE.

The market is now only beginning to recover from the depression of the last five months, which was caused in a great measure by the very small export demand for the Continent at the close of last season. Since then only very small parcels have been taken off the market, at about the following prices, viz. :—

Good Common Congou	1/1	@	1/2
Medium to Fine Kaysow	2/6		3/5
Monings	2/		2/9
Oopacks		...	
Souchongs	1/8		2/6
Flowery Pekoes, Fine to Finest	1/9		3/6

The heavy stocks, combined with the excessively high rates of discount, also rendered the winter months highly favourable for purchases, and buyers, who carefully watched the market, have, in many cases, secured great bargains; for instance, we have heard on good authority that a tea merchant in Warsaw, named Hering, was enabled to purchase, through his London correspondents, about 150 half-chests of the finest Kaysow on the market at 2s 11d per lb, for which three months previously 3s 4d had been refused. We congratulate Importers and the Trade in general, that this abnormal state of affairs is drawing to a close, and we look forward during the present season to a large and healthy trade.

THE PATENT KNIFE-ROLLER COTTON GIN.

(ON THE MACARTHY PRINCIPLE.)

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented.
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

Apply to the undersigned, General Engineers, and Manufacturers of

PATENT HUSKING MACHINES FOR COTTON, TURBINES, PUMPS, FANS, SHIP VENTILATORS, MINE VENTILATORS, &c.

A Gin may be seen in operation at Messrs Burton Sons, and Waller's John's place, Holland street, Southwark, close to the new Blackfriars Railway Station.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

THE PHOSPHROISED NERVINE TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great philosophical and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."

Prices: 11s per bottle, or four 11s bottles in one, 33s; and in cases containing three 33s bottles, £5, which yes £1 12s, packed securely and sent to all parts of the world.

LONDON AGENTS:—Newberry, 45 St Paul's churchyard; Sanger, 150 Oxford street; Hooper, 43 King William street, London bridge; Prout, 229 Strand.

THE LIBRARY COMPANY (Limited).

Central Offices, 25 Pall Mall, and 30 St James's square, S.W.—The Directors continue to add every work of general interest as soon as published, and in numbers, sufficient to meet the requirements of subscribers. No book for which there is a demand is excluded on any pretext whatever.

THE LIBRARY COMPANY (Limited).

Subscriptions from 10s 6d to £5 5s, according to the number of volumes required. Remittances may be made by post office order or cheque (crossed Ransom, Bouverie, and Co.), payable in London to Henry Fowler.

THE LIBRARY COMPANY (Limited).

Subscribers to this Library can (under the conditions set forth in the rules and regulations, which will be sent free on application) change their books at any depot most convenient to them. London subscribers can be transferred to any of the provincial depots, and country subscribers to any of the London depots.

THE LIBRARY COMPANY (Limited).

A list of the Company's Depots will be forwarded (free) on application.

THE LIBRARY COMPANY (Limited).

Lists of Books in circulation, with all other information, sent (free) on application.—By order.

THOMAS TURTON AND SONS, Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. AUDITORS—Messrs Johnstone, Cooper, Wintle, and Evans, 3 Coleman street buildings, E.C.

SECRETARY (PRO TEM.)—T. R. Eames, Esq.

TEMPORARY OFFICES—St Michael's House, St Michael's alley, Cornhill, E.C.

ABRIDGED PROSPECTUS.

The Company proposes to buy and lease farm lands; to improve these lands by irrigation and farming operations as carried on in Australia and New Zealand; to stock and farm them, and to import both agricultural implements from Europe and pure blood of all descriptions of stock, for the improvement of the flocks, and for sale to the farmers in the colony.

The Company will, further, be open to make advances against the produce of the country, consisting of wool, skins, ostrich feathers, and other staples.

The Company also proposes to organise forthwith a regular system of transport of merchandise from the ports to the inland towns, from which source alone a considerable income is anticipated.

The Company will take powers to negotiate loans required for public works in any of the South African colonies.

A minimum dividend of 7 per cent. for the first year, and 10 per cent. for the second and third years, is guaranteed by the vendor upon the paid-up capital. The local Board is of opinion that a much larger dividend may be expected after the second year.

In the event of no allotment being made, the deposits will be returned in full. Should a less number of shares be allotted than are applied for, the deposits will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Detailed prospectuses and forms of application for shares may be had of the Brokers, of the Secretary, at the temporary offices, St Michael's House, Cornhill, E.C., and at the offices of the International Contract Company, 85 Cannon street West, E.C. The articles of association and the agreement with the vendor may be inspected at the Solicitors', and at the temporary offices of the Company.

THE

SOUTH AFRICAN LAND AND FINANCE COMPANY, LIMITED.

Notice is hereby given, that the LIST of APPLICATIONS for SHARES in this Company will be CLOSED THIS DAY, SATURDAY 18th of March, for London, and on MONDAY, the 20th March, for the Country.—By order, T. R. EAMES, Secretary (pro tem.)

St Michael's House, St Michael's alley, Cornhill, March 18, 1865.

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA (for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

HOLLOWAY'S OINTMENT AND PILLS.—The family medicine chest that is furnished with these powerful remedies needs nothing more. Indigestion, general debility, liver complaint, eruptions, sores, wounds, ulcers, tumours, &c., are infallibly cured by their use. They purify the blood and give tone and vigour to the whole system. The Ointment, when well rubbed into the parts affected, enters the flesh just as salt enters meat, and if the Pills be taken as an auxiliary, the cure is speedy, thorough, and permanent. These medicaments are composed of raw balsams, without the admixture of a grain of mercury or an injurious substance. They are peculiarly mild and gentle in their action, and are as safe as they are efficacious.

STARCH MANUFACTURERS TO
H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY.
WOTHERSPOON and CO., Glasgow and London.

ANOTHER CURE OF LONG-STANDING ASTHMA BY DR. LOCOCK'S PULMONIC WAFERS.—"Caldicot.—I was afflicted for years with a most violent asthma, with shortness of breathing, and at times a cough so bad as to cause me violent vomiting and dry retching. I tried nearly all the medical men about here, but from Dr. Locock's Wafers I found relief almost immediately. Jas. Gardiner. Witness, Mr T. I. Jones, Chemist, 5 High street, Newport." To singers and public speakers they are invaluable for the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

Temporary Offices—37 Great George street, S.W.

Wagon companies have been for some time in successful operation in the northern, north-western, and midland counties of England, returning large dividends, after due provision made for depreciation of stock and other contingencies. This Company has been formed for the extension of the system to the south and south-western districts, in which it has been hitherto but partially known.

When it is considered that every year a vast increase to the railways of this and other countries is made, and that according to the returns made to the Board of Trade for 1863, between three and four millions of goods were carried over the lines in this particular district, it will be evident that an ample field is open for the operations of this Company.

Wagon companies are looked on with favour by railway companies and by their customers, the hire of plant being an equal convenience to the manufacturer, the coal owner, and the carrier. A profitable business can also be ensured by entering into contracts for the supply of rolling stock to foreign and colonial railways. The demand for that accommodation is very large and increasing.

The Company does not propose to construct its own wagons, but will follow the plan of purchasing its stock from established builders, which has been successfully adopted by other wagon companies. This, from its command of capital, it will be enabled to do on advantageous terms; and a large profit, unattended by any commensurate risk, cannot fail to be secured for the shareholders.

The chief sources of profit in the business proposed to be undertaken by the Company may be divided into two classes, viz.:—

The letting of Wagons at fixed rentals, and

The letting of Wagons at redemption rentals.

In the former class of contracts hirers pay the Company such an annual sum as will cover depreciation, repairs, and insurance against accidents, as well as a remunerative interest on the capital employed.

In the latter class, the hirers pay such sum as will return the capital invested, with interest; the Wagons remaining the property of the Company until the last payment has been made.

From an agreement which has been made with a well-known manufacturing firm in very extensive business, the Directors can rely on a minimum return of 7½ per cent. per annum upon the paid-up capital of the Company. The Directors, however, believe that, from the abundance of business obtainable and the pressing demand for railway plant, both in this country and abroad, the profits of the Company will be considerably larger.

Copies of the articles of association may be inspected at the bankers' and brokers', and at the temporary offices, and the agreements entered into can be seen at the offices of Messrs Bircham and Co., 46 Parliament street.

Applications for shares must be made in the annexed form; but no application will be considered unless the deposit of £1 a share has been previously paid to the bankers. This deposit will be returned if no allotment is made to the applicant; and if an allotment is made, it will be applied in payment on the shares allotted.

Prospectuses and forms of application for shares may be obtained at the temporary offices and of the brokers.

No.....

FORM OF APPLICATION FOR SHARES.

To the Directors of the South of England Wagon Company (Limited).

Gentlemen,—I request you to allot me shares of £20 each in the South of England Wagon Company (Limited), and I hereby agree to accept those shares, or any less number allotted to me, subject to the regulations of the Company, and to be a shareholder of the Company in respect thereof, and I agree to pay the further deposit of £1 10s a share on allotment; and I authorise you to enter my name on the register of shareholders of the Company in respect to the shares allotted to me.

BROKER—John Inchbald, Esq., 2 Copthall court, and Stock Exchange, London.

SUPERINTENDENT IN MEXICO—W. H. Chynoweth, Esq.

AGENTS IN MEXICO—Messrs Lobse and Sons.

SECRETARY—Mr J. A. Robertson.

Offices—79 Cannon street, London, E.C.

The Directors have entered into a provisional contract for the purchase of the San Pedro Del Monte Silver Mines, situate near the town of Istapan del Oro, in the Province of Mexico, and about two days' journey by road from the capital.

By the maps, surveys, and reports furnished to the Directors, including the map certified by the authorised Government Mining Engineer, and his report upon the mines, this property is shown to consist of two great lodes, called the San Pedro and Santa Rita, and two other lodes running parallel with them. The San Pedro and Santa Rita Mines have been opened and partially worked, and now produce silver ore of great richness, and contain a valuable ley of gold. The other two lodes have not been worked, but promise to be as good as the San Pedro and Santa Rita.

The four lodes run north and south, and Captain Eastwick reports that he has traced them at the surface to the great Mine of Tlalpujahua, out of which M. Laborde in three years raised ores to the value of more than seven millions sterling.

The vendor displays his confidence in the success of the Company by agreeing to take the whole of the purchase-money in fully paid-up shares, notwithstanding that a very large sum has already been expended in bringing the mines to their present condition. His reason for selling the mines is that he has not sufficient capital to erect smelting and reduction works, and properly conduct the business.

It will be seen from the annexed reports that no large outlay will be required to bring the mines into a paying condition, and that the ores are plentiful and exceedingly rich in quality. Samples of it assayed at the Imperial Mint in Mexico yielded 11oz of silver per quintal (100lb), or 246oz to the ton, and 20 grains of gold per marc (eight ounces).

Three samples assayed by Mr Henry Guy, of Panther Lead-works, Bristol, yielded respectively 66oz, 170oz, and 324oz of silver per ton.

Assays of three samples, taken from different parts of the mine, have been made by Messrs Johnson, Matthey, and Co., assayers to the Bank of England, with the following most satisfactory result:—

"Assay offices and ore floors, Hatton garden, London, E.C. July 7, 1864.

"Certificate of Assay.

"We have examined the samples of minerals marked as under, and find the following to be the result:—

No. 1...	Produce of gold—traces only—per ton of 20 cwt.				
—	—	silver—ozs	72·000	—	—
2	—	gold— „	1·975	—	—
—	—	silver— „	86·200	—	—
3	—	gold— „	0·975	—	—
—	—	silver— „	372.650	—	—

"JOHNSON, MATTHEY, and Co."

Certificate of Assay by Messrs Rothschild's Assayer.

"Assay office and Laboratory, 6 Coleman street, London, 4th February, 1865.

"Dear Sirs,—I have examined the sample of Mexican ore forwarded on the first inst., and find the following to be the results:—

Stone showing a considerable amount galena, gray ore, and some metallic silver.

Silver	970 oz	per ton of 20 cwt.
Gold	9 oz 16 dwts	—

Dry siliceous-looking stone, with a few specks of gray ore.

Silver	140 oz 9 dwts	per ton of 20 cwt.
Gold.....	3½	— —

(Signed) Yours truly, FRED. CLAUDET.

"To the Directors of the San Pedro Del Monte Mining Company."

There is an abundant supply of timber in the immediate neighbourhood of the mines, and labour is cheap and plentiful. Ample water power is available for the purpose of drainage and for the supply of the reduction works.

The Company will possess this property in perpetuity, free from royalties and charges of any kind whatever.

The silver mines in Mexico have long been celebrated for the great riches which they yielded for centuries to the Spaniards, and now that the country has again a settled Government under the Emperor Maximilian there is little doubt that its vast mineral wealth will command the attention of European investors.

Mr Chynoweth, the present proprietor, who has resided in Mexico and been connected with mines there for 20 years, has agreed to become the Company's superintendent in Mexico.

Captain John Eastwick, who is considered one of the best practical miners in Mexico, and was for several years in the employ of the Real Del Monte Company, is now engaged on the San Pedro Del Monte Mines, and the Directors will retain him as mining captain.

From the before-mentioned reports, it appears that rich ores can at once be raised, and that as soon as smelting and reduction works are put up, the Company will be able to bring silver into the market; and the Directors, from the information and estimates furnished to them, are of opinion that the shareholders may reasonably look to have their capital repaid to them in dividends within two years from the completion of the reduction works.

Full prospectuses, with reports and map of the mine, may be had of the brokers, solicitors, and at the offices of the Company.

SAN PEDRO DEL MONTE SILVER MINING COMPANY (Limited).

The last Mexican mail has brought additional advices from Captain Eastwick as to the prospects and working of the mine. The following are extracts:—

"Since my last letter we have made a new discovery—that of another lode, that runs south of west and north of east, and forming a junction with San Pedro and Santa Rita. We have now five lodes that meet in this spot, and here the junction at surface is from 35 to 40 varas (a vara is about three feet) wide, with rich spots of metal. My expectations of great results to be realised at this junction will speedily be borne out. We have already sunk about three varas in the new lode, and it widens and improves as it goes down. I quite believe it will become the principal lode of the mine.....I am highly pleased with this discovery.

(Signed) JOHN EASTWICK."

"Istapan del Oro, Jan. 23, 1865.

ISSUE OF 4,000 SEVEN-AND-A-HALF PER CENT MINIMUM GUARANTEED PREFERENCE SHARES OF £10 EACH.

WALLACHIAN PETROLEUM COMPANY (Limited).

AUDITORS.

Alexander Beattie, Esq.; George Hall, Esq.

Offices—66 Bishopsgate street within.

This Company was formed in February, 1864, and during the last twelve months has succeeded in providing the necessary plant, and getting into efficient working order many of its valuable oil springs situated in the important concessions it has obtained in Wallachia.

Prosessor Capellini, the eminent Italian geologist, who has made a special study of the petroleum districts of America and elsewhere, and has recently visited and surveyed those of Wallachia, states that the Principalities furnish a vast field for petroleum enterprise, and adds—"I am of opinion however, that no other company can compete with the Wallachian Petroleum Company, as they decidedly possess the richest and most accessible localities."

Upwards of 3,000 tons of oil have already been obtained from the Company's wells and from contractors; the yield at present from the wells of the Company is about 30 tons weekly.

The Directors propose to erect a refinery establishment at or near Ibraila; they estimate that when it is completed a weekly net profit of about £400 can be realised on the present limited rate of yield from the Company's wells; as these increase it is confidently expected that sixty tons or more of oil will be produced weekly, by which means it is fully anticipated that profits will be realised equal to similar enterprises in America, some of which are dividing from the profits of refined oil between 10 and 20 per cent. per month amongst their shareholders.

With the view of establishing such refinery, and to keep in reserve the uncalled ordinary capital of the Company, it has been decided to issue the above-mentioned preference shares.

Prospectuses and report above referred to of Professor Capellini, of Bologna, can be had at the offices of the Company, or from the Company's Solicitors or Broker.

WALLACHIAN PETROLEUM COMPANY (Limited).

Notice is hereby given, that the LIST of APPLICATIONS for the Preference Shares of this Company will be CLOSED on WEDNESDAY, the 22nd instant, for London, and Thursday, the 23rd instant, for the Country.—By order.

March 15, 1865.

TEMPORARY OFFICES—Clement's lane, Lombard street.

PROSPECTUS.

This Company is formed for the purpose of purchasing and working the Iron Works and Mineral grant, over a well-known extensive property, called the Rhos Hall and Llwyennion Estates, situate in the County of Denbigh, near Ruabon and Wrexham, in North Wales.

The Grant comprises 266 acres, for a term, of which 89 years are unexpired, and the property is held free from all rent and royalty whatever. The Company have also the privilege of using the surface-land adjoining that comprised in the grant, upon payment of a rental of £2 per acre. The purchase comprises the pits, furnaces, weighing machine, manager's house, and offices, and all the machinery and tools of every description.

The operations of the Company will be directed principally to the manufacture of Pig Iron. Two blast furnaces have already been erected on the property, and fourteen shafts sunk, from which ore to the extent of 150,000 tons, sufficient to supply these furnaces for three years, may be raised without much additional outlay. It is proposed to sink other shafts, and to erect one or two more furnaces. There is a good supply of coal on the Estate, and if additional fuel be required, it can be purchased from the neighbouring colliers at very moderate rates. The Coke produced from the Coal is almost free from Sulphur, an advantage of the utmost value in the manufacture of Pig Iron.

The Iron Stone already proved yields an average of from 30 to 40 per cent. of ore. The quality of other beds passed through, but not yet worked, appears to be equal to those already wrought.

The Pig Iron manufactured at these works will command a ready sale; it will be eagerly sought for in Sheffield, Leeds, Manchester, and other leading Iron-consuming districts. In quality it is equal, if not superior, to the best Yorkshire Brands.

Two railways are in immediate contiguity to the Estate, one of which, the London and North Western, will, in the course of a few months, run within fifty yards of the furnaces. Unusual facilities are thus afforded for the ready transport of the Pig Iron.

Fire Clay.—Vast quantities of excellent Fire Clay exist on the property. The Clay produces excellent Bricks, Chimney Tops, Drains and Sewage Pipes; also many articles of rustic ware.

Brick Works are also erected on the Estate. Bricks can be manufactured at such a cost as to leave a considerable profit; and independently of the economy in manufacturing them for the purposes of the additional works, there will be no difficulty in finding a ready sale for such as may not be required for this purpose, as offers have already been made to purchase all that can be manufactured, at a very remunerative price.

The property has been surveyed and favourably reported upon by Mr. Beckett, of Wolverhampton, the well-known Mining Engineer, and Mr. Darlington, the Metallurgist of London. The reports of these gentlemen fully justify the conclusion at which the Directors have arrived with regard to the remunerative character of the undertaking.

The efficient management of works of this description being of the utmost importance to the promotion of a successful result, the Directors have the satisfaction to announce that they have secured the services of Mr. Henry Cresswell (a gentleman of experience, and well-known in the Iron districts of Staffordshire) as resident Manager.

A provisional Contract has been entered into for the purchase of the Lease and Works on most advantageous terms—the Vendor taking one-half of his purchase-money in Shares, on which no dividend will be paid until a dividend of 10 per cent. has been paid upon the other Capital; and the remainder by cash instalments extending over a period of three years and a-half.

The Directors would draw especial attention to these facts—that there are no royalties or rent whatever payable under the leases; that the works can be put into active operation within a few months; that the Pig Iron and other mineral products command a ready sale; and that a railway already runs within a few hundred yards of the furnaces, and in the course of a few months will run through the Estate.

With regard to profits, the Directors are unwilling to make any statement which might appear exaggerated. They have, however, obtained from their Manager a careful estimate of the cost of production and of the sale of their manufactures; and, calculating at the rates at which Pig Iron can be produced, and adopting the present low prices in the iron trade, and adding a reasonable sum for return from fire-clay and bricks, and after allowing an ample margin for expenses of management, interest on capital, and contingencies, there would be left a highly remunerative return upon the capital employed.

By the Memorandum and Articles of Association, ample powers are conferred upon the Company to extend their operations beyond the works mentioned in the Prospectus.

Forms of Application for the remaining shares, Prospectuses, and every information, may be obtained at the Solicitors and Brokers, or from the Secretary, at the Temporary Offices of the Company, 4 Clement's lane, Lombard street, E.C.

COUNTRY AND TOWN

Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

THE LONDON AND GENERAL

WATER PURIFYING COMPANY (Limited) are prepared to SUPPLY their PATENT CISTERN-FILTER to residents in and about the metropolis, to be fixed and kept in order by the Company, upon hire, at the following annual rentals, beyond which no other expenses will be incurred:—

		£	s	d
Filter No. 1, yielding half a gallon per minute		0	7	6
— 2, —	one gallon per minute ...	0	12	6
— 3, —	two gallons per minute	1	0	0
— 4, —	four gallons per minute	1	10	0

The first two are intended for drinking purposes, the last two to filter all the water which passes through the common supply pipe.

Applications to be made to the Secretary (H. P. Keighly, Esq., at the offices of the Company, 15 Strand (W.C.), where all information can be obtained, and testimonials and the filter in operation inspected.

Attention is particularly requested to the following report from Dr Letheby:—

"17 Sussex place, Regent's park, N. W., Feb. 18, 1865.

"I have frequently been requested to express my opinion of the filter manufactured according to the patent of Mr Dauchell by the London and General Water Purifying Company, but have hitherto declined to accede to the request, because I have objected to the publication of my opinion; at length, however, I am compelled to admit that the filter is a very useful and effective contrivance. At the very first I perceived that the principles on which it is constructed are scientifically correct, and now, after a long experience of its action, I find that the operation of it is simple and certain. One of the filters was in constant use for many months in a large exposed cistern, where the growth of confervæ and microscopic infusoria was most abundant, but during the whole of the time, and often when the water was green with vegetation, the filter freely delivered the water in a clear, colourless, and wholesome condition. I am bound, therefore, to say that the apparatus is very perfect in its action, and that the simplicity of its application is a great advantage.

"HENRY LETHEBY, M.B., M.A., &c., Professor of Chemistry in the College of the London Hospital, and Medical Officer of Health for the City of London."

THE CENTRAL RAILWAY COMPANY OF VENEZUELA (Limited).

At the first Ordinary Meeting of the shareholders, held at the London Tavern, on Wednesday, the 15th of March, 1865, pursuant to notice.—

M. C. SETON, Esq. (the Chairman of the Board of Directors), in the Chair,—

the following resolutions were adopted, viz.:—

It was moved by the Chairman (Mr Seton), and seconded by the Deputy-Chairman (Mr King), and unanimously resolved,—

That the seal of the Company be and the same is hereby affixed to the Register of Shareholders produced.

2ndly. It was moved by the Chairman, and seconded by Mr King,—

That the Report of the Directors and statement of accounts to 31st December, 1864, be and the same are hereby approved and adopted; and the dividend at the rate of 9 per cent. per annum, with interest during the construction of the line at the rate of 2½ per cent. per annum, be and is hereby declared payable on the 15th April next.

The resolution was carried with one dissentient only.

3rdly. It was moved by the Chairman, seconded by Mr F. Algar, and carried unanimously,—

That the election by the Board of Messrs King, Kintrea, Banks, Layton, and Bullen as Directors of the Company be and is hereby confirmed, and that the following retiring Directors be and are hereby re-elected, viz.:—Messrs Black, Campbell, M'Master, Seton, Spicer, and Sir Wm. Smith, Bart.

4thly. It was moved by the Chairman, and seconded by Mr King,—

That Messrs Johnstone, Cooper, Wintle, and Co. (professional Auditors) and Mr Robert S. Craig be and the same are hereby re-elected the auditors of the Company, and that the remuneration amongst them be thirty guineas for their past services; whereupon it was moved and carried that the remuneration amongst them for their past services be forty guineas.

(Signed) M. C. SETON, Chairman.

Thereafter it was moved by Mr F. S. Hemming, seconded by Mr E. Clench, and resolved unanimously,—

That the thanks of the meeting be given to Mr Seton for his conduct in the chair, and to the Board of Directors for their able management of the Company; and that the meeting desires to express its confidence in the undertaking and in the Directors, and requests them to prosecute the works with all speed, having in view due economy.

(Signed) J. S. CRAIG, Secretary.

WALTER CARSON AND SONS.

CARSONS' ORIGINAL ANTI-CORROSION PAINT.—Walter Carson and Sons beg respectfully to notify that they have removed their principal Office to their Warehouse in LA BELLE SAUVAGE YARD, 37 Ludgate hill, E.C., and have discontinued their West End Office, 31 St James's street, S.W.

COMMERCIAL BANK

CORPORATION of INDIA and the EAST.
Incorporated by Royal Charter.
Capital £1,000,000 (one million sterling), with power to increase to £2,000,000.
Head Office, 64 Moorgate street, London, E.C.
Branches and Agencies at Bombay, Calcutta, Foochow, Hankow, Hong Kong, Shanghae, Singapore, and Yokohama.

The Bank negotiates and collects bills and grants drafts on its branches and agencies as above. It acts as the agent of parties connected with the East in transmitting funds, and in making investments in Indian and other public securities, effecting also the sale thereof either at home or abroad. It undertakes their safe custody and the receipt of interest or dividends thereon, and receives pay, pensions, and other moneys for remittance through the Bank or otherwise.

The Bank also receives money on deposit at rates of interest proportioned to the length of the notice of withdrawal agreed to be given, the terms of which may be ascertained on inquiry.

Office hours 10 to 4 Saturdays 10 to 2.

THE ENGLISH AND SWEDISH BANK (Limited).

At a General Meeting of the shareholders of this Bank, held at the London Tavern, Bishopsgate street, Tuesday, 14th March, 1865,

JOHN ALERS HANKEY, Esq., in the Chair.

The Secretary (Mr W. H. Clemow) having read the advertisement convening the Meeting, and the shareholders having agreed to take the Report and Accounts as read.

The following resolutions were duly moved, seconded, and carried unanimously:—

1. That the report and accounts now presented be received and adopted.
2. That a dividend of 9s per share (free of income tax) be paid to the shareholders out of the net profits of the Bank to 31st December last, and that this dividend be payable on and after the 21st day of March.
3. That John Alers Hankey, Esq., (who retires by rotation), be re-elected Director of this Bank.
4. That William Tottie, Esq. (who retires by rotation), be re-elected Director of this Bank.
5. That Leopold Brusewitz, Esq. (who retires by rotation), be re-elected Director of this Bank.
6. That the Auditors, Messrs Cooper, Brothers, and Co., appointed by the Directors, be now elected by the shareholders, and that their future remuneration be £100 per annum.
7. That the best thanks of this meeting be given to the Chairman, Deputy-Chairman, and Directors, and to the Local Directors in Stockholm and Gothenburg, for the manner in which they have conducted the affairs of the Bank.

The agency of foreign and country banks undertaken, and the London financial business of commercial firms in the country conducted.

JOHN DALRYMPLE CARNEGIE, General Manager.

THE BANK OF MADRAS.

At a meeting of the Directors of the Bank of Madras, held on Tuesday, the 31st Jan., 1865, the following resolutions were adopted in terms of the authority vested in them by clause 6 Act V. of 1862.

1. That the capital of the Bank be increased by the creation of one thousand eight hundred and seventy-five new shares, of rupees one thousand each.

2. That such shares be issued or offered to the proprietors at a premium of 10 per cent., say at rupees 1,100 each, and that they be allotted to shareholders in the proportion of one new share to each holder of two shares, and one half and one quarter share to each holder of one share and one half share respectively. Holders of odd quarter shares to receive, on application, certificates entitling them to a half interest in a quarter share. Two such certificates lodged on or before the 30th June next, will entitle the holder to one quarter share. If not so lodged, the right to such quarter share shall be forfeited.

3. That the proprietors entitled to claim the new issue shall be those whose names appear on the Register on the 1st day of March, 1865, and that the Transfer Books be closed from the 2nd to the 13th day of March, both days inclusive.

4. That the amount of the new shares, together with premium thereon, shall be payable in four instalments in the following manner:—

Rs 275 on or before 1st May, 1865.
Rs 275 on or before 1st July, 1865.
Rs 275 on or before 1st Sept., 1865.
Rs 275 on or before 1st Nov., 1865.

5. That any new shares, the amount of which, with premium as above, shall not be paid in full on the 31st December next, shall be absolutely forfeited to the Bank, and shall be disposed of at the discretion of the Directors.

6. That upon all instalments paid up on account of new shares, interest shall be allowed from date of payment to 31st December, 1865, at the rate of 7 per cent. per annum.

7. That any proprietor failing to pay the several instalments on the prescribed dates, shall be charged interest at the rate of 12 per cent. per annum from such dates to the date of payment.

8. That scrip certificates be issued on payment of the first instalment, and that as soon as all the instalments (with any interest that may be due) on each new share shall have been paid up, share certificates be given in exchange.

9. That the premium on shares taken up by the proprietors, and also any profit that may be realised on unclaimed and forfeited shares, be added to the reserve fund.

10. That the new shares shall be entitled to dividend from 1st Jan., 1866.

11. That a copy of the foregoing resolutions be forwarded to each proprietor, and that they be duly advertised.—By order of the Board,
JOHN McIVER, Secretary and Treasurer.
Bank of Madras, Jan. 31, 1865.

SOUTH AUSTRALIAN BANKING COMPANY.

WILLIAM PURDY, Manager.
London, 54 Old Broad street, E.C.

THE LONDON BANK OF MEXICO AND SOUTH AMERICA (Limited).

At the adjourned General Meeting of the shareholders of this Bank held at the London Tavern, Bishopsgate street, on Tuesday 14th March, 1865.

JOHN PATERSON, Esq., in the chair.

The Secretary having read the advertisement convening the meeting, and the shareholders having agreed to take the report and accounts as read,

It was moved by the Chairman and seconded by W W. Cargill, Esq., M.P., and unanimously resolved:—

1. That the report and accounts be adopted.

It was moved by the Chairman and seconded by F Harrison, Esq., and unanimously resolved,

2. That a dividend of 7s per share free of income tax be declared, payable on and after the 29th instant.

It was moved by Joseph Joshua Barry, Esq., and seconded by James Slater, Esq.,

3. That £2,500 shall be set apart for the remuneration of the Directors to 31st December, 1864.

It was moved by the Chairman and seconded by the Hon. Col. Rowley, M.P., and carried unanimously,

4. That Messrs John Young and John Macnab be appointed Auditors of the Company, and be paid £50 for their services during the current year.

It was proposed by the Hon. Col. Rowley, M.P., and seconded by J. S. Rivolta, Esq., and carried unanimously,

5. That the best thanks of the shareholders be given to the Directors for their valuable services,

UNIVERSAL LIFE ASSURANCE SOCIETY, 1 King William street, London, E.C.

Established 1834, with branches at Calcutta, Madras, and Bombay. Very economical home and colonial rates for civil and military lives. Division every year of one-fifth of profits. Premiums on all participating policies six years in force reduced one-half for the year ending May 1865, so that £50 only of each £100 of premium falling due is charged. Total Assurances issued exceed 7 millions sterling; claims paid, 1¼ million; cash bonuses to assured, £565,000; or an average annual return of Nine Shillings in the pound at 25 divisions of profit. Advances made on Life Interests, and on real and other property, in connection with Assurances.

FREDERICK HENDRIKS. Actuary and Secretary.

THE ROYAL EXCHANGE ASSURANCE.

Incorporated A.D. 1720, by Charter of George the First.

Chief Office—Royal Exchange, London.
Branch—29 Pall Mall.

Fire, Life, and Marine Assurances on liberal terms.

Life Assurances with, or without, participation in Profits.

Divisions of Profit every Five Years.

Any sum up to £15,000 insured on the same Life.

A liberal participation in Profits, with the guarantee of a large invested Capital Stock, and exemption, under Royal Charter, from the liabilities of partnership.

The advantages of modern practice, with the security of an office whose resources have been tested by the experience of nearly a Century and a half.

A prospectus and table of bonus will be forwarded on application. ROBERT P. STEELE, Secretary.

LIFE ASSOCIATION OF SCOTLAND.

CHAIRMAN IN LONDON.

Sir Wm. Dunbar, of Mochrum, Bart., M.P.

While affording all the advantages and facilities usual with other offices, this institution possesses

SPECIAL and ATTRACTIVE FEATURES

peculiar to itself, and during the twenty-six years of its operations it has largely contributed to the extension of Life Assurance throughout the whole of Great Britain and Ireland.

The SYSTEM and REGULATIONS

have been framed, and from time to time improved, so as to secure to the policy holders not only the utmost value for their payments, but especially the following:—

As small present outlay as possible.

No responsibility, whether of partnership or mutual assurance.

No liability to forfeiture, or so little that only gross carelessness can effect the policy.

A liberal return to the policy holder, if he desire to relinquish his policy, or

The loan or a sum nearly equal to its office value, without cancelling the policy.

The eminent usefulness of the institution is apparent from its having paid policies on deceased lives amounting, during last year alone, to

NINETY THOUSAND POUNDS.

ONE whole YEAR'S ranking for PROFITS over all later Entrants will be secured by Assuring before 5th April.

THOS. FRASER, Res. Secy.

London (Chief Office), 20 King William street, City.

IV. Comprising the Districts or Unions chiefly in Essex, Suffolk, and Norfolk. 120 pp. Price 1s 3d.

V. Comprising the Districts or Unions chiefly in Wilts, Dorset, Devon, Cornwall, and Somerset. 158 pp. Price 1s 8d.

VI. Comprising the Districts or Unions chiefly in Gloucester, Hereford, Salop, Stafford, Worcester, and Warwick. 172 pp. Price 1s 9½d.

VII. Comprising the Districts or Unions chiefly in Leicester, Rutland, Lincoln, Notts, and Derby. 128 pp. Price 1s 4d.

VIII. Comprising the Districts or Unions chiefly in Cheshire and Lancashire. 108 pp. Price 1s 1½d.

IX. Comprising the Districts or Unions chiefly in Yorkshire. 142 pp. Price 1s 6d.

X. Comprising the Districts or Unions chiefly in Durham, Northumberland, Cumberland, and Westmoreland. 112 pp. Price 1s 2d.

XI. Comprising the Districts or Unions chiefly in Monmouthshire and Wales. 136 pp. Price 1s 5d.

CENSUS OF ENGLAND AND WALES, 1861. Population Tables. Vol. III. General Report. 264 pp. foolscap folio. Price 2s 10d.

CENSUS OF ENGLAND AND WALES, 1861. General Index to the Names of Parishes and Places separately returned in the Population Tables. 160 pp. foolscap folio. Price 1s 8d.

The above, and all descriptions of Parliamentary Papers may be had at very low prices of—

Mr Hansard, 32 Abingdon street, Westminster, and 13 Great Queen street, Lincoln's Inn Fields.
Messrs Eyre and Spottiswoode, New street square, Fleet street, E.C.
Messrs Longman, Paternoster row, E.C.
} London;

Messrs Black, Edinburgh;
Messrs Thom and Sons, } Dublin;
Messrs Hodges and Smith, }

And generally of all booksellers in all parts of the country.

FORD'S COLOURED EUREKA SHIRTS, 6 for 39s.

Superior quality, and made expressly to measure; the new patterns sent to select from on receipt of three stamps.

R. Ford and Co., 38 Poultry, E.C.

FORD'S ILLUSTRATED PRICE LIST, Post Free.

Intending purchasers who cannot favour us with a call, will find it of great assistance; it contains over forty drawings of shirts, shirt collars, &c., All the new fashions are to be found in it.

The Political Economist.

In accordance with the suggestions of many subscribers, it is intended to publish the series of articles on the "Money Market for Men of Business" separately, carefully revised, and with a Preface.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

THE Bank return is this week singularly favourable. The liabilities of the Banking Department are—

	£
Public deposits	10,198,989
Private ditto	13,551,794
Seven day bills	455,396
	24,206,179

and the reserve of notes and coin is 10,385,141—figures which might have warranted an immediate reduction, and which make a speedy reduction quite certain.

The scarcity of bills, which is the inevitable accompaniment of a diminished trade, will certainly for the next few weeks depress the value of money. It seems almost certain that the Bank will lower its rate to 4 per cent. next week, and in the existing stagnation of commerce, it is dubious whether that reduction will be final, and whether a further fall may not be looked for.

THE PROVISIONAL GOVERNMENT.

ITS ADVANTAGES AND ITS DANGERS.

THE Session is wearing away. People of the old school are murmuring that not only nothing is done, but that nothing is proposed, that nothing is even expected. We look for the Budget and important remissions of taxation, but we hope for nothing else, and think of nothing else. A Bill to improve the rating for the relief of the poor is by far the best measure of Government likely to mark this session, and both important foreign action and important interior legislation are for the moment suspended and delayed.

The truth is, we are living under a Provisional Government. We are living under the rule of a very old statesman as to whom public opinion has of late years entirely changed. In 1850 he was considered as a very active but rather reckless Foreign Minister, who was apt to get into scrapes, and bring about continental crises, if not wars. In a clever novel published then a nobleman intended for Lord John Russell is made to say, "I wish myself to keep quiet. I do not want to 'pull "about' the Crowns of Europe, and I wish I could teach my "friend *Tiverton* so." And such was the popular idea of that time. Lord Palmerston was a sort of incendiary who liked little fires so much that it was feared he might, without meaning it, cause a big one. Who would in 1850 have guessed, that in 1865 all England would have looked at the same Lord Palmerston as the safe man *par excellence*—as the man to keep Earl Russell right—as the man to evade if not to conquer difficulties—as the best Premier of the Aberdeen type—as our present refuge from a perplexing, and perhaps difficult, future? If anything could teach us caution in judging of the character of our statesmen, so great a change of opinion would teach it. Nothing, we fear, will. A hasty confidence—an accidental opinion—is one of the greatest diseases in popular Government, and the incomplete degree in which the real characters of important statesmen are expressed in their conspicuous life will always make the judgment of a people about its statesmen, as in this case, not only very false, but very discordant. Perhaps posterity will trace a likeness of Lord Palmerston neither resembling that of 1850 nor that of 1865. But we have nothing to do with that likeness now. We only say that we are living under a Government almost avowedly provisional—which justifies itself because it is about to cease—which says, "Our Premier is eighty, and after him there "will be a great change."

The curious thing is that we should be content with such a Government. We are not so loyal, we have no such ardent affection to Lord Palmerston as is said. An old man of the world like him is the last to excite and the first to laugh at a romantic attachment. We acquiesce in this state of expectancy because it suits us, because it is agreeable to the most influential classes of society at this particular time. There is no question of great popular interest now open for discussion—no subject for which a great number of people now care, and on which a definite issue can be raised. There are three latent topics beneath the horizon, but they have not yet come to the surface—they have not gained the definite outline and the concentrated essence which are necessary to attract the curiosity and the interest of the mass of men. They are as yet more or less problems for the few, not measures for the many. The first of these in importance is that great mass of topics and suggestions which are vaguely lumped together as the "Church question." This already excites far keener interest than anything else. The "Essays and Reviews" case, and the Colenso case, create almost wherever they are mentioned a vigorous discussion with which no other question can compete—to which no other can even compare. If we could foresee the future,—all such attempts are idle,—but if we could compute out of unknown elements a distant probability, we should predict that this Church question, in some of its aspects or some of its ramifications, is likely to be the great question of the next age. If so, it will be a question of greater difficulty perhaps than any the last age has

Digitized by Google

considered, and certainly of not less magnitude. But as yet, and this is our *present* point, it sleeps; it does not disturb us; it is one of the topics which our Provisional Government leaves alone, and which we are glad it leaves alone.

A second question is that of Parliamentary Reform. And though from habit, from a sort of habitual dread of known words, it disquiets us a little, it does not disquiet us much. Nobody sees any revolutionary force at work. Mr Stansfeld, with the accurate perception of public opinion so well befitting an accomplished speaker, said lately, "That if the working "classes gained anything, it must be something which the "middle classes did not fear." Philosophers are at work to see how working men can have some power and yet not have all power. But, except philosophers, very few really care much about the matter. The working classes themselves care more for the wages question than for the vote question. The great conservative forces of society rely on their habitual power. There is nothing strong enough to shake them or destroy them. The Reform question is one which we expect will disturb us hereafter, but it does not disturb us now.

The third question is how we should improve what we may call vaguely but not inexpressively call the *workmanship* of our Government. With this now, nobody can profess to be satisfied. We say that the English Government works excellently on the whole,—that it does well on a great scale; but we cannot profess to say that it acts artistically,—that it works perfectly in detail. Whenever we come to any part of English law that is in the least out of the way—that is not made clear by daily litigation,—we come across confusion. In the Colenso case counsel argued for weeks whether the Court of the Bishop of Cape Town had primary jurisdiction, and then whether the Privy Council had appellate jurisdiction. Yet it ought at all times to be clear what the Court to decide a question is, though all Courts at times, from the complication of human life, have questions of difficulty brought before them. Jurisprudence may easily make clear the deciding tribunal, though that tribunal will not always find its work plain. And the decision in the Colenso case is more to the point still. It states that the Crown lawyers made out the patent in a wrong form—in a form adapted to a Bishopric created by Act of Parliament, and not adapted to a Bishop created solely by the prerogative; and that this mistake has caused all this waste of money, argument, and time. The Colonial Office put into the mouth of the Crown words of the highest solemnity, which it now turns out the Crown had no power to use, and which, therefore, mean nothing. The Alexandra case was as bad. Even after most tedious discussion and elaborate pains, we did not succeed in getting a decision on the principal question contained in it, though it was of immediate, critical, and international importance. By a clumsy handling of defective machinery, the case went off on a minor point. The Alabama case was nearly as teasing. While our lawyers were considering, and our offices exchanging telegrams, the *ship*—the sole subject of consideration and telegrams—slipped away. We are so used to such blunders of administration, such defects of routine, that we scarcely lament them or think twice of them. But why should we not mend them? Burke, no doubt, exhorted our forefathers in 1793 to be content with the British Constitution, because it worked "tolerably well"; and in those dangerous times—when the body politic was so irritable that the least incision might create painful inflammation—doubtless Burke was right. But these are quiet times. Our political condition is wholesome, sound, calm. Whatever is necessary to be borne it can bear. We should mend whatever needs mending without fear and without qualm. No disposition is so unfit for these times as the disposition of Lord Eldon. He had, in truth, only one political opinion. He thought and said a thousand times,—"The British Con-"stitution is an inexplicable machine which works well, and "which our wise ancestors made in a way we do not understand: "don't touch it, or it may stop and go wrong, and then we "shall be all ruined." We have now discovered by many alterations that the British Constitution is no magical entity, but a rational contrivance—that it is good only because it is conducive to certain ends, and that it may be improved by looking steadily and shaping it carefully towards those ends. There is no reason why we should not make our law, polity, and administration work like a scientific machine, precise in detail, as well as effective in broad results—why it should, like a bad old watch, be right only as to the hours, and not, like a good watch of the nineteenth century, be correct also for minutes and seconds. But from its nature, this last coming subject is not more likely to trouble our present peace than the two former ones. It can never excite us much, and it does not yet interest us enough.

It is impossible to doubt that such a state of calm and inaction must have several great advantages. Those who regard politics as an intellectual excitement will not indeed think so, but the great mass who regard Government as a means of welfare and happiness will be sure to think so. "Happy the people whose annals are vacant," is an old and wise saying. "Happy the people which *wishes* to do nothing," is even a truer saying. There may be unknown deficiencies, latent unconscious wants for which something ought to be done; but, as the world goes, in a state of life so habitually imperfect as ours, it is much for a great nation to have no *felt* wants, no imperious unsatisfied cravings, which cause present misery or suggest wild ambitious longing. That a nation thinks itself happy enough to stay as it is, is a sign of very unusual satisfaction

A great part of this happiness consists of the common harmony of habitual society. Old ladies of quiet habits, whose notions were formed not by the present times but by old times, may still be heard to say "I do not like politics. They "make people quarrel so." A few old gentlemen too may still be heard to argue eagerly. But the rising generation views them with wonder, and carefully catalogues them for after times as amusing relics of a dying past. Dull as, except on choice occasions, English society mostly is, there is little of it so inanimate and so torpid as its common political conversation.

But it is at least equally certain that this diffused sensation of political contentment deprives us of much instruction and much vigour which other ages gained from the crises of political struggle. We are not likely to be the same men as our fathers. Looking not at the general world, but at occupied business Englishmen, we fear they are likely to miss the great means of education which developed their fathers, and to be subject to stupifying influences from which their fathers were exempt. As a fact, the middle classe have (religion apart) been mainly educated by political influences. The discussion in Parliament on Catholic Emancipation, on Free Trade, on Parliamentary Reform, on a hundred similar and hardly inferior topics gave the last generation of Englishmen such an education as no previous generation ever had, and as it was scarcely possible for them to neglect. Its merit, indeed, greatly lay in its compulsory character. A free people cannot neglect the obvious questions of its time. It was a matter of plain observation that certain vicious laws impaired the welfare and impeded the progress of the English people. When a few active clever men forcibly pointed this out, sensible men could not help taking heed to it. They could not help seeing that their own lives would be better if these bad laws were removed. Accordingly, a diffused atmosphere of instructed political reflection was created by those now extinct controversies, which is beginning to become extinct too. "Men," says a great writer, "are not "fatigued by the efforts of their fathers," nor are they instructed either. They do not do the work, and they do not get the learning. They often rather dislike the learning. They have been brought up by those who exaggerate it, and have cause to feel how little it is. "Zealous men," it has been said, "make revolutions, and revolutions make men "zealous for nothing." Just so, ardent men suggest intellectual controversies which ere long alter the world, and then the world gets tired of the formal discussions, sees that there is much beside them, and does not care to hear about them any more.

It is certain, too, that the political controversies and interests of the last age generated many intellectual defects, as well as much intellectual vigour. They made men exert themselves to know what they could, but they also made men think they knew what they could not know, because they had no *data* for learning. The most consummate observer of his day noticed this trait. Sir Walter Scott used to say, that when he visited in London and met Cabinet Ministers every day, he found it difficult to get political information. But when he got down to Abbotsford, to his country neighbours on Tweedside, there was no difficulty. All the secrets of the State and of the Court were thoroughly known there. From such fancied knowledge the present generation is exempt, but only because it does not care enough to fancy. The last generation had much real interest, and much maginary as

Digitized by Google

well as much real knowledge. The present has little interest, and therefore little knowledge, sound or unsound.

The deeper intellectual movements of the present day, and its far wider acquaintance with miscellaneous facts and *un*political knowledge, do indeed supply an aid to intellectual development in some degree likely to counterbalance the deficiency in the instruction lately given by political information. And for intellectual men of leisure this counterweight is probably sufficient. They have the curiosity to want to know out-of-the-way things, and have the means too of knowing them. But for occupied men of business these quiet, distant, so to say, *extra* subjects are not sufficient. They do not force themselves upon the attention; they do not agitate the market place; they are not discussed on 'Change. A few men of business may have special literary tastes, but even then they have not the same literary tastes; they cannot bring their intellectual pursuits into the atmosphere of their business, as political pursuits are necessarily brought. As politics decline in interest, it is to be feared that, unless mercantile men take care, an increased narrowness of mind, an increased engrossment in mere business, may steal upon them.

The temptations to such engrossment in the present day are augmenting. Incessant occupation in business was in former times often not possible. The life of a quiet capitalist or manufacturer who had invested all his capital in a steady trade abounded in leisure. He had one of the best positions in human life. He had necessary work enough to enliven him, but not necessary work enough to tire him. But now such a man is apt to become, is tempted to become, a director of half-a-dozen companies. Besides his regular trade, he has the chance of gaining more money by employing his spare time in *extra* investments. The time and the mind which, under the old system, he might have given to *un*pecuniary thoughts and studies, he now gives to *new*, to additional pecuniary thoughts and occupations. Just when, from the decay of politics, intellectual subjects are beginning to press less imperiously, to force themselves less pertinaciously on the minds of men of business, men of business are less inclined to attend to them, even if they were equally compulsory. The stimulant is weakened just when the attention is impaired.

There is no complete cure for these evils. Every age has its characteristic temptations, and each age must meet them as it can. But the first step to judicious protection is a just perception of danger; and it is well we should see that both the aids and the difficulties of the present times are very different from those of the recent past.

THE MINISTERIAL DEFEAT.

The precise question at issue between Mr Sheridan and Mr Gladstone on Tuesday night seems to be a little misunderstood out of doors, and was, indeed, misunderstood within the walls of the House of Commons. Most of our contemporaries seem to think, as Mr Hubbard evidently thought, that the Chancellor of the Exchequer, in resisting the resolution declaring it expedient to reduce the fire insurance duty at the earliest opportunity, was questioning the right of the House to take off or reduce a tax. Mr Gladstone had no such idea. If the House of Commons has one clear and unmistakeable function, it is that of pointing out a popular grievance, or insisting on the removal of a popular burden, and the Chancellor of the Exchequer no more dreamed of interfering with that function than of restricting members' right of speech. Indeed, he said so as plainly as he could speak before Mr Hubbard rose, for while drawing that fine distinction between operative and inoperative resolutions, he allowed that a resolution to take off a burden must be treated with the utmost consideration, and form a "material element" in the Ministerial decision. It was only as to the time at which the House ought to exercise its right that he demurred, and we confess that in spite of the heavy majority against him, we still think he was in the right. The House, even when dealing with burdens, must bind itself by some forms of procedure, otherwise its action will soon become capricious, and one of the most useful of those forms is the one which selects the time for considering the national account, the day of the "Budget," as the proper one for discussing burdens. As the House did not see its utility, and this kind of proceeding is becoming frequent, it may be as well to state the reasons which justify the established practice. Four of them at least are important.

1. It is a most dangerous practice to begin discussing reductions before the accounts of the year have been made up and the Budget settled. Till those things have been done, nobody, not even the Chancellor of the Exchequer, can do more than guess at the resources which the Government will have at its disposal. There is supposed to be a large surplus this year, for instance, but telegrams might be received within the next six days which would very materially alter its disposition, might even in easily conceivable cases change a surplus into a deficit. To attempt to forestall the general account is, therefore, just as wise as it would be for a private individual to spend his profits before he had realised them. He might be uninjured, but he would certainly run the risk of most disagreeable breaches of promise. This time the objection is one no doubt principally of form, but the form which forbids you to count your chickens before they are hatched is a very wise and prudent one, the neglect of which, when the surplus is small or uncertain, may entail very annoying consequences.

2. A resolution passed under these circumstances can never be final, for a Government may not obey it, and every financial resolution which is not final deranges trade and makes the value of property uncertain. Suppose the House had resolved that the Malt Tax ought to be at the earliest moment reduced one-half. Until it was known whether Government would accept the resolution or not, malt would be nearly unsaleable, and a most important trade thrown into consternation. Something of this kind has occurred once or twice in the case of sugar, and it ought never to occur. A Chancellor of the Exchequer who told a speculator the duty he meant to reduce, would be justly considered unworthy of his post, but an independent resolution does this without absolutely securing that the promise shall be carried out. In a question of insurance the danger is not so great, but the shares in insurance companies represent a very large amount of capital, and they must all be affected by the prospect of increased business consequent on a reduction of the tax. If the tax were reduced by the resolution that would not signify, but the vote only amounts to an opinion that it ought to be reduced, and the value of the shares is really measured by the owner's speculations as to whether the formal opinion will be taken or not. Even if everybody were sure, as most people will be, there would remain very considerable doubt on the extent of the reduction, for Mr Sheridan talked about 1s 6d, and the Chancellor of the Exchequer about 1s, as the fitting maximum for the duty. Uncertainty of this kind, when produced by the action of a governing body, is very injurious.

3. But above all, every such resolution must be based upon defective information, upon an idea of the positive demerits of one particular tax, and not of the comparative demerits of many taxes. Every tax is bad, and where it is proposed to rescind or greatly reduce one, it is easier to make out an apparently unanswerable case. For the true answer is not that the tax is good—no tax is good, not even one on hair powder—but that other taxes are worse, and this answer the Chancellor of the Exchequer cannot give. To do so it would be necessary to review his surplus, and the condition of taxation, and the incidence of particular imposts, and his hopes for the future; in fact, to state his Budget before it had been fully prepared. In the present instance, the case against the insurance duty looks good, indeed is good, but nobody knows but Mr Gladstone the precise badness of other cases. Suppose he comes down to the House on the 27th April and proves that the taxes on locomotion diminish internal traffic ten per cent., or that the spirit duties will produce a rebellion in Ireland, or that we could sell twenty millions a year to Austria if we halved the tobacco duty, where would the goodness of the insurance case be then? To legislate in this piecemeal way on finance, is to believe yourself prosperous, when you know only your income and none of your liabilities, or declare yourself a "good life" before the doctor has seen you. We regard this incompleteness of information as a final answer to those who argue that a tax being proved bad is reason enough for the House to remove it.

4. We are not very willing to produce this last reason, but it ought to be stated. The country will never get good Ministers if it is determined to deprive them of power. The pay of office is in England no temptation to ambition, and if power is to be taken away too, ambition will soon take another line than public service. The only hour of visible and real power allowed to the English Minister of Finance, the only time when he can feel that he is exercising a genuine initiative,

Digitized by Google

a distinct influence for good on the fortunes of his country, is when producing the Budget. If that is taken away, and his Budget made for him in advance by persons like Mr Sheridan, and interests like those of the companies behind Mr Sheridan, strong men will not seek the office of Chancellor of the Exchequer, and the kingdom will lose in ten years advantages equivalent to a dozen such reliefs from taxation. To Mr Gladstone in particular the chief attraction of his work, apart from the good to his countrymen, is the scientific completeness and perfectness with which the confidence of the House has hitherto enabled him to perform it, a completeness which may be seriously marred by "snap" resolutions of this sort.

But, says Mr Hubbard, we are always told when the Budget is produced that the thing is done and we cannot alter it; and if we are not to interfere before the Budget, and not to interfere after it, then "the country is governed entirely by the Administration." We might reply, that is the precise theory of the Constitution, which gives power to Her Majesty's Ministers, and to the House of Commons the right of selecting them; but we are aware it would be a quibble. In practice, however, the House ought not to reject a bit of a great design before it has seen the remainder, and must put up with the occasional difficulty of getting rid of a wart rather than run the risk of prematurely amputating a limb. Serious opposition to a Budget can, as Mr Hubbard knows, be made very effective without forcing a Ministry to resign, and it is we suppose only on very serious grounds that he would refuse to Her Majesty's advisers their initiative in finance. At least if he would, and the House would, the post of Chancellor of the Exchequer is not one which will be readily filled by any sensitive man.

THE DIFFICULTIES OF SOUND FINANCE IN THE UNITED STATES.

One Secretary of the Treasury succeeds another in the almost hopeless task of reducing to anything like order the chaos of Federal finance. The *Times* tells us that the new Secretary, Mr Hugh M'Culloch is imbued with really sound principles, and certainly it quotes views of his on the subject of paper money and the spurious "stimulus to industry" given by a vast war expenditure which are sound enough. And that Mr M'Culloch's great object will be to labour for a return to specie payments we know from his own official statement. Still sound views on currency are absolutely of no avail without sound views on the subject of taxation. The key to any possible solution of the currency question is contained in broad and enlightened views on the subject of raising the revenue. The money for a vast expenditure must be got somehow. If it cannot be got by revenue, then the only way for a people who are determined to go on with the expenditure is to get it by forced issues of paper as long as such paper has any value at all. Even if capital remains to lend to the Government, capital will not be lent without guarantees for good interest and the safety of the principal, and such guarantees entirely depend on the raising of an ample revenue by taxation. Whatever, therefore may be Mr Hugh M'Culloch's merits as a currency theorist, his sound views on that subject will be of no use to him unless he has also sound views on the the subject of taxation. And this we must say is, we fear, very doubtful. At least the New York papers which panegyrise him most emphatically are the same which also ridicule the theory of free trade, and compliment Secretaries of the Treasury who inform them that a falling off in the Customs revenue, owing to excessive, and, in effect, prohibitive duties, will be more than made up to the country by the stimulus to native industry. "The increase of duties on "imports," said the Secretary, who has just retired, to an approving Congress and an admiring public, "under the Act of "June 30, 1864, has already had the effect to decrease im- "portations to a considerable extent, and the same effect will "be likely to continue. In the judgment of the Secretary, "this disadvantage in a financial point of view, is more than "counterbalanced by the stimulus afforded to domestic in- "dustry, and the *consequently* increased revenue from that "source,"—a remark which seems rather likely to give intelligent men a reliable measure of Mr Fessenden's judgment, than a reliable measure of the "consequently" increased revenue from Excise.

But the truth is that even if Mr M'Culloch's views on taxation are as sound as Mr Gladstone's, he will be practically helpless in the present state of senatorial and representative wisdom at Washington. How ignorant these gentlemen are on the subject may be gathered from the recent Secretary's very candid admission. He said a few months ago, before taking office, "*I am entirely inexperienced in these things, as we* "*all are more or less*; and I must say, that after all the study "I have tried to give the subject, and in all the advice I have "tried to get from experienced men, I have come to the con- "clusion at last upon the whole, that owing to the peculiar "condition of things in this country for so many years, "nobody knows much on the question of finance, not even "those most familiar with it." We heartily agree with Mr Fessenden, and conceive that he gave the most remarkable practical illustration of the truth, at least as regarded himself, in almost everything he did and advised while in office. The mere fact alleged above, that he congratulated the country on the diminution of its Customs revenue—the only source by the way on which it relied for gold to pay the interest of the gold-interest-bearing loan, a purpose for which even last year it was hardly adequate,—on the ground that domestic industry would thus receive an impulse, and so return more into the Inland revenue than had been lost from the Customs, proclaims the density of the darkness which wraps his candid mind. The "stimulus to native industry," of course, consists in making it individual men's interest to abandon *natural* production,—production for which the country offers the highest advantages—in order to produce something else for which the country offers little or no advantage; and how this is to increase its wealth and resources no man can ever know. But these are the views which are received with applause in both Houses of Congress; and these are the views to which any Secretary of the Treasury must shape his measures. Let us see how they have already operated.

Mr Fessenden admitted that he expected to *lose* 6,000,000*l* sterling a year in Customs duties from the new and heavy scale of Customs duties approved on the 30th of June last. He ventured, however, to hope that the loss would be more than balanced by the gain on inland revenue. The inland duties had, however, been increased and complicated at the same time with the Customs duties, so that the Commissioner of Inland Revenue, while doing his best to back up Mr Fessender's hopes, had still to complain that *his* revenue too had been growing smaller under the new scale than under the old. It is true, he hoped for a larger revenue between June, 1864, and June, 1865, than in the previous year; but he did not venture to hope this on the *ground* of the higher scale of duties, but because during the previous year, the department had got more accustomed to its work, and had drawn into its nets in the latest months far more than it had managed to get in its earlier. The total receipts of 1864-5 would, therefore, he hoped prove to be on the *scale* of May and June 1864, but scarcely even this, because the heavy new duties had already somewhat diminished the Inland Revenue receipts. Thus—

	£	
May produced an Inland Revenue of	2,419,000	under the old rate
June — —	2,999,000	—
July — —	3,314,000	under the new rate
August — —	3,142,000	—
September — —	3,164,000	—
October — —	2,725,000	—

Hence the increase from May to June, when there had been no increase of duty, was greater than that from June to July, when the duty had been heavily increased, and since then it had fallen again to a revenue much nearer that of May than of June. "The increase of taxes," says the Commissioner in his report, "has had the usual effect of such a measure to "check production at least temporarily, and to abate the "activity of inland trade till business should become accom- "modated to the new circumstances." Thus Mr Fessenden thinks the falling off of Customs duties must be made up by the increase in inland revenue, while his subordinate at the inland revenue is reporting on the abated acivity of inland trade. Mr Fessenden hoped to raise 49,900,000*l* by inland revenue between last June and next, but on the average of the first four months of the financial year, it is evident he would raise only about 36,000,000*l*; and yet neither he nor his subordinate at the inland revenue, nor any member of Congress, could think of any device for increasing the revenue, but weighting still more heavily the already over-weighted tariff, and complicating with new interferences the already overburdened internal trade of the country. We have not yet seen the new

Digitized by Google

tax law agreed to by the Congress which ceased to exist on the 4th March last; but we know that it was conceived on the old idea of squeezing still harder a nearly dry sponge. The tax on sales—a device apparently for discouraging one of the most useful class of distributors, middle-men—was, indeed, rejected at the last moment by the House of Representatives, after it had been passed by the Senate. There were, however, some seventy or eighty different licence taxes, over eighty articles on which *ad valorem* internal revenues of different magnitudes were levied, more than a hundred on which specific internal duties were levied, besides the complicated Customs tariff; and the great majority of this great number of taxes yield little or nothing, costing probably nearly as much to collect as they bring into the Treasury. Still the Congress and its advisers could think of nothing but new taxes to increase the revenue, and it is in this state of the financial world of America that Mr Hugh M'Culloch appears on the scene giving vague hopes of a gradual return to specie payments. We fear he has not even the elements of success. Till Congress ceases to entertain economical views which are as silly as they are vehement in favour of protection, and the newspapers cease teaching that the war has taught the country the enormous advantages of protective legislation, Mr Hugh M'Culloch may be as sound a financier as he pleases, but he will not succeed in raising by taxation any such proportion of his war expenditure as can afford any reasonable hope of a gradual return to cash payments.

LIFE INSURANCE PROFITS.

It might seem incredible that any sort of business computation could make out the *net* profits to be *more* than the *gross* receipts, and yet such was actually the case on one occasion with a young insurance office. The particulars are to be found in a blue book of the proceedings of a committee over which the late Mr Wilson presided. But we should not refer to the matter now if the fundamental error which produced this absurd result had not some plausibility in itself, and if it had not lately been prominently obtruded in an important instance.

There is no class of calculations of which people think so little or comprehend so little as insurance calculations. They pay their premiums; they receive their bonus. Even the best and most careful men of business do no more. They suppose some one understands how these figures are arrived at, and they know quite certainly that they themselves do not understand it. They accept what is allotted, but they do not comprehend the *rationale* of the gift. We cannot undertake to teach the difficult science of life insurance in a short article. But we do undertake to show the absurdity of a principle which legitimately and naturally leads to the notion that the divisible proceeds may be greater than the entire receipts.

The difficulty of life insurance calculations may be illustrated by comparing them with the case of bank calculations. In the latter, everything is immediate or close at hand. The banker is bound to pay his creditors at once or very soon; he ought to have an immediate or rapid control over the means of so doing. But both the liabilities and the resources of an insurance office are deferred. The premium comes in only slowly during the course of a long life, the liability accrues only at the distant extremity, at the close of that life. As roughly speaking in banking, everything is present, so roughly speaking in life insurance, everything is future. In reality, however, this difference, though it makes life insurance more difficult and complex than banking calculations, does not make them when properly and cautiously computed, less reliable or less intelligible.

The first rule is to reduce both the future outgoings and the future incomings to their *present value*—to the value that is which any one would pay down to be rid of the liability and the value which any one would give to receive the income. The yearly premium is an annuity, which may be valued like any other annuity—the sum necessary to get of a liability, of the future liability to pay 10,000*l* when the rate of interest is given, is known at once by the tables. Taking both the incoming annuity and the prospective payment at their computed value, we arrive at a first result, and to those who only consider the matter for a moment, it might seem that this result was complete.

But this was the very method by which the young office we first mentioned accurately proved that their divisible profits were more than their gross receipts. By the practice of offices, the premiums yearly charged and yearly payable include two elements. First, the mathematical element—the pure element—which will, on the selected table of mortality and at the selected rate of interest, be enough to meet the ultimate liability; next, the *alloy*—the unmathematical element—which, over and above the former, is necessary to pay—first, the expenses of its office, and then the profits. Now, if in the reduction to *present* value, we compute the alloy, as well as the pure premium, it is quite certain that the assets will be far more than the liabilities. The liabilities contain no extraneous element; they are net, no one needs to add to them, and no one does. But the pure assets—the net premiums receivable—are augmented. A per centage is added to pay expenses, and a per centage also to pay profits. The debit side, therefore, is a *net* account, and the credit side is a gross account, and there is no end to the fallacies to which this may give rise.

A young insurance office with promising young lives, *at once* shows a divisible profit much greater than all the money that it has ever received. It has only received say one year's premiums, but it calculates on receiving the additional premium—the *alloy*, as we have called the allowance for expenses and risk for many years to come—during the probable continuance of the lives insured. If the society starts with many young lives, this future annuity for anticipated expense and calculable profit will certainly be very large. It is quite possible, as in the case mentioned, that this unrealised but anticipated profit may be far greater than any hard cash ever received.

In an old society the notion of dividing the *un*mathematical premium will give rise to very curious and very dangerous results. It has been suggested by some persons who take an active part in the matter that one of the most important insurance offices in existence—the SCOTTISH WIDOWS' FUND—should act on this idea. Their balance sheet is as follows. They call by the technical name of loading, the annual charge made to the assured for the expense and profit of the office—what we call the alloy:—

LIABILITIES.	£	s	d
Liability, sums assured, &c.	5,752,365	0	0
Free surplus	762,014	6	9
	6,514,379	6	9

ASSETS.	£	s	d	£	s	d
Value of (gross) premiums	3,745,186	0	0			
Less loading	749,037	0	0			
				2,996,149	0	0
Funds in hand				3,518,230	6	9
				6,514,379	6	9

It has been contended that not only the 762,014*l* which the directors are willing to appropriate, but also the 749,037*l*, the anticipated compensation for future expense, and the anticipated resource for future profit, should be at once divided. But to this there are four obvious objections:—

1st. That the part of the additional premium which is expected profit, may never be received.

2ndly. The part of such premium which is anticipated expense, can never be divisible.

3rdly. That if the division were once made as suggested on the same business—on the same policies, no further division must ever be made. By the very principle of the calculations you have anticipated all future profit, and, therefore, cannot divide any more profit when it comes,

4thly. That no new person would ever insure in a society which had ever acted on this principle unless he was sure that his premiums would not go in aid of the old blunders. The computers reckon as divisible profit what is really outgoing expense, and a new insurer will ask "Will my money go to "pay that old miscalculation, and if it does, how will my "policy be met when it becomes a claim?"

The true rule is that in all insurance calculations, both the assets and the liabilities should be reckoned *pure*, that no division should be made of anticipated profit, much less of anticipated expense; that the mere *alloy*, as we have called it, should not be prospectively reckoned as accruing gold. If it were not for the very remarkable discussion which has arisen in Scotland, we should have thought these principles too obvious to need any exposition.

Agriculture.

CHEMICAL ELUCIDATIONS.

FARM-YARD MANURE.

It is quite consoling to those who know something of the difficulties of practical farming, after all the denunciations of farming practices and farming ignorance which have been launched from the high tables at agricultural meetings and in scientific treatises, to find that actual practice and true science are not wide asunder in English husbandry, as some would-be advisers have asserted. Every day proves that the operations of husbandry, dictated by careful observation, though unaided by chemical or scientific knowledge on the part of the observers, conform, for the most part, to the rightly-understood dictates of science. Husbandry is an art of great simplicity, dealing as it does with the grand but simple workings of nature. The ordinary practices of a careful and intelligent farmer are commonly such as meet with the approval of the scientific chemist, who has had opportunities of testing his experience in the laboratory by the every-day operations of husbandry. Not that we would use this as any argument against imparting to the farmer, or the farmer's son, all or any scientific knowledge which may mediately or immediately appertain to his avocation, but rather to induce greater respect for the views and claims of farmers, on whom the stimulus of self-interest will have a far more beneficial effect than all the advice, amateur and scientific, tendered to them during the last twenty years.

Now, there is, perhaps, no subject on which farmers have been more lectured or more found fault with, than their management of their farm-yard manure. And this has been applied not merely to the negligent farmer, who, partly by reason of his wretched farm premises, allows some of his manure to run to waste, but also to the provident man who preserves and applies all the manure he can make according to his own experience and that of his district. Some years ago, the chemists would have it that all were wrong, and various plans and compounds for "fixing the ammonia" of farm-yard manure were energetically recommended to farmers. Gradually, facts were ascertained which modified such extreme views, until at the present time the simple question is how can the farmer obtain more manure to use as he has hitherto used it.

There are few scientific men of the present day who pay more regard to the practical application of science to agriculture than Professor Voelcker, and, in a lecture lately delivered by him to the Maidstone Farmers' Club, on "The best means of preserving the fertilising properties of farm-yard manure, and on its application to light and heavy land," he fully adopted such a practical view of the subject.

After entering at large into the feeding properties of the various kinds of food given to our farming stock, and explaining the chemical reasons for the differences found in the manure made by animals feeding on different substances, with the nature and chemical character of such manures, he came to the practical application of manure on the farm.

In rotten dung all the constituents are much more soluble than in fresh dung. The chemical means recommended for fixing the ammonia of farm-yard manure are of no value whatever, for there is no free ammonia in such manure. The cattle having plenty of straw, and the manure being made under shelter or in boxes, the ammonia will fix itself. The liquid manure is absorbed by the straw under similar conditions. The Professor said "it was generally assumed that this (farm-yard) manure contained a great deal of ammonia, and for this reason some people hesitated to spread it on the land. They thought they must plough it in at once, or the valuable matter flew into the air. They were led to this policy by the fact that the farm-yard manure had a pungent smell." Such effluvia did not arise from ammonia. But "there was nothing whatever lost when they spread their farm-yard manure on the land in a thin layer. They might do that with perfect safety, nor need they plough it in immediately. The ammonia which was gradually produced in the manure became fixed in the measure in which the straw rotted, and produced humic acids." It was only when manure fermented that it yielded up ammonia, and he therefore advised that manure heaps should be turned as little as possible. For mangold and turnips on a sandy soil, rotted manure was necessary, but it should not be turned over oftener than necessary, and should be applied to the land as soon as fit.

But on land containing a fair proportion of clay, there is no need of presenting the manure in so soluble a state. The following four simple rules for preserving the fertilising properties of manure were stated by the Professor:—"First, they must make their manure in a convenient and appropriate manner; secondly, they must cart it on to the field as soon as possible; thirdly, they should not turn their manure heaps more then they possibly could avoid; and fourthly, let them spread their manure on the land at once, as thin as possible, and let the rain wash it in."

But the farmer cannot always do just as he likes. Sometimes the weather prevents him from carting or spreading his manure on the land at the time he wishes, and then it must be put up into a heap. Such heaps should be in a conical form, covered over with road scrapings or any other materials at hand, and the top shaped like the roof of a house. In this way, all that is of value in a manure heap will be preserved.

Manure, when applied to strong land, cannot be too fresh, the long straw having an important mechanical effect, over and above the chemical constituents of the manure. The straw renders arable land looser during the winter months, allowing the "air to penetrate and mellow it down, the straw at the same time decomposing in the land produces carbonic acid, which, acting on the mineral portion of the soil, renders it soluble, and by this means tends to prepare from the soil itself valuable mineral fertilising matters."

He would cart out the manure on the strong land as fast as made, and then spread it and plough it in. By ploughing in the straw at once, the full mechanical effect upon the soil is produced. The objection to leaving the manure in small heaps in the field, as is often done, is not that the manure is materially injured thereby, but because in so doing some spots get more heavily manured, and the crop ripens unequally. Even in the driest weather, the manure would be better spread than left in heaps, for, "though some people thought the sun would dry up and dissipate the valuable properties, why did it not have this effect on their grass fields? A good deal had been said at agricultural dinners, cattle shows, &c., about the ignorance of practical men in carting their manure on the fields, spreading it out, and then allowing the sun to drive off the ammonia, and also about their ignorance of chemistry in not using fixers of ammonia, and various other matters bearing on the same point. But the most careful investigation of the whole matter had convinced him that the old practice so much condemned—of carting out the manure as soon as possible, and spreading it for a convenient season to be ploughed in—was the most rational that could be adopted, and certainly the one most in accordance with true scientific principles. Altogether, the chemistry and application of farm-yard manure was far more simple than was generally supposed."

When we consider the obstacles to the performance of the many operations of a farm by the weather, the amount of work to be done, often in a short time, and other causes, it is in no slight degree satisfactory to find that the valuable properties of our farm-yard manures are not of that fleeting and evanescent character which scientific chemists some few years ago would have led us to believe. The rewards of husbandry are not large, and the notion that they are dependent upon anything so inaccessible to the mass of farmers as accurate chemical knowledge, certainly would not be hopeful. On the other hand, whatever goes to show that the simplest and cheapest plans of dealing with manure are scientifically the best, is encouraging to all who hope for agricultural progress.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 23rd inst. The return for the previous week is added:—

DEBTOR.	March 23, 1865. f c		March 16, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	7,038,528 72	.....	7,035,535 22
Reserve of the bank and branches	22,105,750 14	.....	22,105,750 14
New reserve	4,000,000 0	.....	4,000,000 0
Notes in circulation and at the branches	774,556,625 0	.....	777,523,125 0

	1,271,248,099 67	.....	1,258,108,447 47

The Bank return, it will be seen, again presents a large augmentation in the coin and bullion—20,383,000f, and a diminution in the discounts 4,702,000f. It is much to be desired, for the sake of commerce, that the discounts should increase, and the coin and metal diminish. On the 5th January the discounts stood at

Digitized by Google

690,000,000f (round figures), and to-day they are only 509,000,000*l*, a decline of 181,000,000f.

The Bourse has been very inactive during the week. The dividend of the Credit Mobilier has again been a subject of discussion, but what it will be is not known. The Credit Industriel will, it is believed, distribute one of 47f, which is 2f more than last year. The decision of the Italian Parliament on the sale of the railways is waited for with some interest. The following are the quotations:—

	March 16. f c		March 23. f c

The reforms in the merchant navy, which the Government, on the proposition of the Superior Council of Commerce, has resolved on adopting, are just now the subject of much pre-occupation in the seaports; but the shipping interest is by no means unanimous in its manner of regarding them. At Nantes and Havre, the projected abolition of the differential duties on foreign ships bringing cargoes from producing countries is strongly opposed, as likely to be ruinous to the French navy. At Bordeaux, on the contrary, it is accepted as a painful but inevitable consequence of the liberal commercial policy which the country has adopted; but fierce objections are made to the abolition of differential duties on imports from bonding warehouses in Europe, albeit it is not to take place for six years to come. At Marseilles, which is the greatest port in France, the shipowners and merchants appear to think the reforms on the whole reasonable, as thus far they have not made any marked opposition to them.

The Comptoir d'Escompte has undertaken the issue, for the Government of the Bey of Tunis, of 73,568 bonds at 380f, to be paid off at 500f in fifteen years, and to bear interest of 35f, dating from the 1st of January last. The loan and the interest are guaranteed by the Customs revenue and the duty on olive trees. The subscription is to be opened on Monday next, and is to be kept open to the 30th, unless, indeed, all the bonds offered are previously taken. The sum of 80f is to be paid on subscribing, and the rest in three instalments, payable from the 1st to the 10th of each of the months of May, June, and July. From the last, however, half a year's interest may be deducted. Subscriptions are to be admitted for their full amount each day except the last, and on that, if they exceed the total required, they are to be reduced proportionally. From the patronage of the Comptoir, and from the abundance of unemployed capital, the operation will no doubt obtain complete success.

In the meeting of the shareholders of the Societe Generale pour favoriser le developpement du Commerce et de l'Industrie en France, which is to be held on Saturday, a dividend of 6f per share is to be declared up to the 31st Dec. last. As only 125f have been called on each share, as the company has not been in operation many months, and as last year was in every respect a very unfavourable one for finance companies, the result must be regarded as satisfactory. The directors will, I understand, announce to the shareholders that the society has taken part in the formation of a company for working the magnetic iron mines of Mokta el Hadid, near Bona, in Algeria, the capital of which is 15,000,000f; and of the Societe des Transports Maritimes a Vapeur, capital 20,000,000f, which is to carry on operations on the Algerian coast, and between Algeria and France. Both these companies are on the limited liability principle, and have been got up by influential capitalists. The directors will further announce, I hear, that they have taken measures for an extension of the banking business of the company,—that is, receiving deposits at interest repayable by cheques.

The annual meeting of the shareholders of the Parisian Gas Company (Compagnie Parisienne d'Eclairage et de Chauffage par le Gaz) was held a few days back. A report on the operations of 1864 was presented. It stated the profits at 17,366,676f. A dividend of 105f was declared. It exceeds by 10f that of 1863, and of it 20f have been paid on account. The Directors represented that in order to provide for the increased demand of gas, especially in the suburbs, it would be necessary to raise a loan, and they proposed one of 16,000,000f. One of the shareholders argued that as the Company is prosperous it ought not to be under the necessity of borrowing; but his opinion was not supported, and the loan was voted. The meeting besides decided that it should be obtained by the issue of 32,000 bonds of the nominal value of 500f, and that they should be reserved to the shareholders at 451f. A complaint was made that the dividend should be only 105f, when the Gas Company has earned 170f, but seeing that the dividends have increased every year since 1856, when they were only 40f, it was regarded as unreasonable.

In the recent discussion at London about the modifications in the fixing of the tariffs of the Vera Cruz to Mexico Railway Company, the precise text of the new convention relative thereto was not, I believe, quoted. It is as follows:—

"Art. 8. The tariffs shall be regulated on the following basis for the epoch at which the entire line from Vera Cruz to Mexico shall be brought into operation:—First-class, 100 piastres per ton; second-class, 90 piastres; third-class, 80. There shall be three classes of carriages for travellers. The tariff of the first-class shall be established proportionally to the basis adopted for goods, but in such a manner that the third-class travellers shall not pay more than half of those of the first-class. On the preceding prices a deduction of 15 per cent. shall be made during the first ten years of the working of the line. After these ten years there shall be made a reduction of 10 per cent. in the tariffs. After the first twenty years, a commission, composed of the Minister of Fomento and of Public Works, of the Governor of the Imperial Bank, and of a representative of the company, shall decide if the public interest combined with that of the company requires a new reduction in the tariff, but without preventing the company from distributing to its shareholders a dividend which shall not be less than 12 per cent. per annum. It is perfectly understood that any reduction of tariffs proposed by the company with the view of augmenting the importance of its traffic will always be well received by the Government.

Another reduction in the interest on Treasury bills was made on and from 20th:—the rate fixed being 2½ per cent. for bills of from 3 to 5 months, 3 per cent. of from 6 to 11 months, and 3½ for a year.

The Board of Directors of the Orleans Railway will propose, in the meeting of shareholders to be held on Tuesday next, that the revenue of the old shares for 1864 shall be fixed at 100f.

The annual meeting of the shareholders of the Northern Railway is to be held on the 20th April.

The Messageries Imperiales Company announces the payment from the 1st April of the interest on bonds. It is 6 per cent per annum.

A statement has been made in agricultural newspapers that the Government intended increasing the import duty on grain from 50c the 100 kilogs to 2f 50c or 3f; but it has been contradicted on some official authority.

The quantity of beetroot sugar manufactured in France from the beginning of the season (1st September) to the end of February was 141,862 tons, which was 36,349 more than in the corresponding period of last year. After adding the stock in hand from the preceding season, and deducting the consumption, there remained in the manufactories on the 28th February, 40,700 tons. There was besides very nearly the same quantity in the entrepots.

An official return relative to railways was lately issued. It shows that of what is called the "Old Net-work,"—that is the great trunk and other lines on which the Government guarantee no interest—the total length worked on the 31st Dec., 1864, was 7,755 kilometres (4,846 miles), which was 295 kilometres more than at the corresponding date of 1863. The average length worked in 1864 was 7,606 kilometres (4,378 miles); an increase of 130 kilometres. Of the "New Net-work"—that is the embranchments and prolongations on which interest is guaranteed by the Government,—the length worked on the 31st Dec., 1864, was 5.270 kilometres (3,293) miles, which was 813 kilometres more than on the same date of 1863. The average length worked during 1864 was 4,741 kilometres; in 1863 it was 4,042. It thus appears that at the end of 1864, 13,025 kilometres (8,140 miles) of railway were at work; and that it was more at the end of 1863 by 1,008 kilometres (630 miles). The receipts in 1864 of the Old Net-work were 424,323,759f, and of the New 98,937,074f;—total, 523,260,833f (20,930,433*l*). In 1863 the total receipts were 497,459,072f (19,898,363*l*). There was consequently an increase of 25,801,761f (1,032,070*l*). The following is a detail of the receipts in 1864 and 1863 of the lines of the Old Net-work:—

Names of Railways.	1864 francs		1863. francs
Northern	71,173,116	.....	66,629,302
Eastern	50,098,665	.....	46,532,029
Western	52,680,358	.....	49,792,610
Orleans	72,512,689	.....	70,651,606
Lyons and Mediterranean	139,391,291	.....	138,549,859
Southern	30,896,204	.....	30,346,020
Victor Emmanuel (Section du Rhone)	1,823,994	.....	1,825,597

Southern	4,601,539	.....	3,416,450
Total	98,937,074	.....	87,352,050

In the old net-work the receipts per kilometre on the Northern line were 6.82 per cent. more than in 1863 ; on the Eastern, 6.34 more ; Western, 5.80 ; Southern, 1.81 ; Ceinture, 4.05 ; Graissessac to Beziers, 6.22. On the Orleans line there was a diminution of 0.5 per cent. ; on the Mediterranean, 3.03 ; Victor Emmanuel, 0.09 ; Besseges to Alais, 4.10 ; Anzin to Somain, 20.74 ; Carmaux to Albi, 18.66 ; La Croix Rousse to Sathonay, 8.21. On the new net-work there was an increase on the Eastern line of 3.73 per cent. : on the Western, 0.70 ; Orleans, 7.48 ; Southern, 6.01. There was a decrease on the Northern line of 14.04 per cent. ; and on the Mediterranean, 9.05.

The Belgian Government has adopted a post-office reform which might perhaps be imitated with advantage in England. It is to make letter carriers pay post-office orders at the houses of the persons for whom they are destined. For this service 1 per cent. is charged. The Belgian Post Office has besides determined to grant orders payable, if required, to bearer, instead of to individuals specially named.

The following is the market report :—

FLOUR.—At *Paris* business is calm, but prices are firm. Yesterday, choice was 48f 50c to 49f the sack of 157 kilogs ; first marks, 47f ; good, 46f ; other sorts, 44f to 45f. Six marks, current month, 48f 25c ; April, same price ; May and June, 49f 25c. Type Paris, the 101 kilogs, 29f 25c ; four months of May, 31f.

WHEAT.—At *Paris*, yesterday, holders demanded a new rise ; choice white went at 27f 50c and 27f the sack of 120 kilogs ; choice red, 26f to 26f 50c ; first quality, 25f to 26f ; current sorts, 24f 50c to 25f.

COTTON.—The market at *Havre* was more active in the week ending Friday, the sales being 5,908 bales and piculs. The arrivals were 6,635 bales. The closing quotations were 10f higher for Jumel, 5f to 10f higher for Broach, Oomrawuttee, and Dhollerah, 5f for Tinnevelly and China ; but 15f to 18f lower for Coconada, and other sorts unchanged. Low New Orleans was consequently 225f the 50 kilogs ; good ordinary qualities in Broach, 155f ; Tinnovelly, 135f ; Madras, 160f ; China, 140f ; Jumel, 220f. The stock was estimated at 62,970 bales. This week the market has been calm. Yesterday, Oomrawuttee was 165f and 135f ; Broach, 145f and 140f ; Tinnevelly, 130f ; Madras, 170f, and for delivery in June, 132f 50c ; Kurrachee, 80f ; Japan, 137f 50c ; China, 120f ; Pernambuco, 190f ; America, 215f.

COFFEE.—The demand was regular at *Havre*, in the week ending Friday : 400 sacks Port-au-Priuce and Jeremie, disposable, 82f to 83f the 50 kilogs in bond ; 303 ditto for delivery, 82f ; 300 Gonaives, 89f to 90f 50c ; 500 Rio, not washed, disposable, 77f ; 2,920 ditto, for delivery, 75f to 78f ; 312 washed, for delivery, 107f to 110f 50c ; 56 Santos, disposable, 72f to 81f ; 215 Malabar, 86f to 87f ; 500 Rio Nunez, direct import, high duty, 90f ; some Guadaloupe habitant, disposable, 147f 50c duty paid ; and for delivery, 146f 25c. Various lots of damaged were also sold by auction. The arrivals were about 1,200 sacks. This week, Hayti, 83f and 82f ; Malabar, 90f ; and ditto plantation, 106f ; Gonaives, 90f ; Cape, 86f ; St Marc, 90f ; Bahia, 81f ; Guadaloupe habitant, 140f and 141f. At *Nantes*, last week, a cargo of about 400 tons Ceylon native, at prices not seated. Some damaged Port-au-Prince was also sold. No sales this week. At *Bordeaux*, last week, 200 sacks La Guayra, for delivery, at prices kept secret ; 160 Mysore, 118f. By auction, 20 sacks Guatemala, 110f, duty paid ; 394 sound Rio, washed, in bond, 98f 50c to 99f ; 80 ditto, 106f 50c to 107f ; 104 Guayra, 105f 50c ; 89 Bahia, 83f 50c to 84f. This week, Rio, not washed, 81f. By auction, Rio washed, sound, 102f 50c to 106f 50c ; also some damaged Mysore. At *Marseilles*, last week, no sales except an auction of 1,400 sacks. Rio slightly damaged, 75f to 80f. This week, some damaged Brazil has been old by auction.

SUGAR.—At *Havre*, in the week ending Friday, the demand was more active. 950 casks French West India, disposable and for delivery, 48f 50c, bonne quatrieme, duty paid ; 1,800 bales Reunion, 51f 50c ; 282 ditto, 47f 50c, on sample ; 7,400 sacks Mauritius, 51f 50c, bonne quatrieme, duty paid ; 400 casks Havana, direct import by French ship, 30f for No. 12 in bond ; 183 ditto, from bonding warehouses, 29f same number. The arrivals were only 1,529 casks Havana. It was announced that certain refiners of Paris have entered into a contract with one of the principal plantations in the French West Indies to take all the production of next season, estimated at about 7,500 casks ; the price to be that of bonne quatrieme at Havre at the time of arrival. This week, French West India, bonne quatrieme, 48f 50c ; Havana, No. 12, 30f in bond. At *Nantes*, last week, 270 sacks Reunion, 52f, bonne quatrieme ; 2,048 at 52f 25c ; 2,484 at 52f 50c ; 400 crystallised, 58f 50c ; 9,788 Mauritius, taken at London, 25s 6d ; 1,600, from bonding warehouses, 31f 25c for No. 12 ; 8,450, by English ship, 31f 15c, floating conditions. It was announced a fortnight ago 9,612 sacks Mauritius were taken at prices equal to 52f 25c, bonne quatrieme. In Martinique, 2,500 casks usine, of which 1,000 to be delivered this year, the rest next year, at 7f 50c above Reunion bonne quatrieme. In Brazil, 448 casks, expected, 49f, bonne quatrieme. This week, some large sales of Reunion, 52f 25c, bonne quatrieme. At *Bordeaux*, last week, a small quantity of French West India, 48f 75c, bonne quatrieme ; and a few casks low quality at prices not given ; 1,300 sacks Reunion, 52f 50c, bonne quatrieme ; 1,450, for delivery, 52f 75c ; 9,741 Mauritius, to be taken at Havre, 51f 50c, bonne quatrieme ; 1,500 expected from London, 53f 50c, ditto. This week, Reunion, disposable, 51f ditto and 58f 25c. At *Marseilles*, last week, 54 casks French West India, 32f 50c, bonne quatrieme of Havre ; 200 bales Reunion, low quality, 19f. This week, French West India, 32f 50c, bonne quatrieme of Havre.

INDIGO.—The sales at *Havre*, in the week ending Friday, were only 22 chests Bengal, at 50c to 65c above the estimates. The arrivals were 17 chests. This week, Bengal at a premium of 50c ; Guatemala at prices not stated. At *Bordeaux*, last week, 50 chests Bengal, at 10f 25c the ½-kilog, a premium of 1f 48c ; 4 Madras, at 5f 10c ; 1 Kurpah, 5f 75c. Low and good qualities rare. This week, Bengal at prices not stated.

HIDES.—At *Havre*, in the week ending Friday, 1,500 La Plata, dry, 93f the 50 kilogs for cow, 97f to 99f ox ; 150 ditto superior, 57f 50c ; 631 Monte Video, salted mataderos cow, 41f 50c ; 1,600 Rio Grande, dry, 76f 50c to 90f ; 4,100 ditto salted ox, 56f ; cow, 45f 50c to 46f ; 300 Pernambuco, salted, 47f ; 100 Tampico, dry cow, 78f ; 21 Trinidad, dry, 65f ; 300 Valparaiso, dry salted cow, 71f ; 478 ditto ox, 79f ; 1,670 ditto, salted, 47f to 55f ; 300 New Orleans, salted ox, 33f ; 500 Calcutta calf, 52f 57c ; 27 bales ditto, 62f 50c. There was also a few public sales of sound and damaged at which, out of 9,614 offered, 6,714 were sold. The arrivals were about 4,400 and some bales. This week Monte Video, dry, 74f ; Buenos Ayres, salted cow, 46f ; Pernambuco salted, 47f ; Valparaiso salted ox, 52f 50c. By auction different sorts of damaged.

WOOL.—At *Havre*, in the week ending Friday, the sales were 90 bales La Plata, unwashed, 1f 95c and 2f 30c per kilog ; 9 bales Russian, washed, 6f ; 2 bales La Plata and lambskin, stillborn, 140f the 100 kilogs. The arrivals were between 800 and 900 bales. This week, La Plata sheepskin, washed, 3f 10c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 52f 50c the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 73f ; 3-6 beetroot, first quality, 90 deg., 64f.

COMMERCIAL AND MISCELLANEOUS NEWS.

A telegram from Calcutta, dated the 10th inst., announces that the Indian Government have reduced the export duty on saltpetre by one-half.

The Spanish Minister of Finance has presented to Congress his Budget for 1865-66. The ordinary expenditure is estimated at 2,139,703,680 reals, and the extraordinary at 553,718,190 reals. The ordinary revenue is stated to be 2,184,178,130 reals. The resulting deficit is to be covered by the proceeds of the sale of the national property.

A return just printed of the tariff alterations made by foreign countries during the past two years gives the following results :—Sweden has made nine changes, all of them on the liberal side, with one exception, namely, an increase of the duty on certain coarse kinds of cast iron wares to 3s 11½d per cwt, which is about three times the previous rate. From gutta percha the duty is removed, and the other alterations consist of reductions ranging between 16⅔ and 60 per cent. on various sorts of wrought iron, miscellaneous articles, and cotton tissues. Hamburg has made a reduction of 50 per cent. in the whole of her import duties. Portugal has enacted that tobacco shall be allowed only to be imported by contractors authorised by the Government. Spain has made several changes, all adverse, consisting chiefly of 25 per cent. additional duty on linen fabrics, and an increase, ranging from 20 to 67 per cent. on woollen goods. Italy has effected numerous modifications, all of a liberal character, chiefly consisting of reductions ranging between 13 and 74 per cent. in linen and silk goods and metals. The Papal States have reduced their duties on linen yarns and woollen drugget 60 per cent., and Switzerland has reduced her duty on arms of all kinds for private use 86⅔ per cent.

Annexed is a return of the amount of bullion purchased and sold by the Bank of England, distinguishing gold from silver, and bar gold from foreign gold coin, in 1864 :—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 22nd day of March, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,104,340	Government Debt	11,015,100
		Other Securities	3,684,900
		Gold Coin and Bullion	14,454,340
		Silver Bullion	...
	29,104,340		29,104,340

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,023,211
Rest	3,913,584	Other Securities	21,264,411
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	10,198,989	Notes	9,530,845
Other Deposits	13,551,794	Gold and Silver Coin	854,296
Seven Day and other Bills	455,396		
	42,672,763		42,672,763

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,028,891	Securities	32,384,622
Public Deposits	10,198,989	Coin and Bullion	15,308,636
Private Deposits	13,551,794		
	43,779,674		47,693,258

Dated the 23rd March 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,913,584*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£66,672
An INCREASE of Public Deposits of	1,850 508
A DECREASE of Other Deposits of	234,031
No change in Government Securities.	
An INCREASE of Other Securities of	1,179,928
An INCREASE of Bullion of	426,378
An INCREASE of Rest of	56,501
An INCREASE of Reserve of	498,473

The large addition of 1,850,508*l* to the Government deposits is chiefly owing to the payment of 1,200,000*l* on East India 5 per cent. railway debentures. The same cause has led to th

Digitized by Google

increase of 1,179,928*l* in the private securities. The reserve is 498,473*l* in excess of the amount published last week, and the stock of coin and bullion is higher by the sum of 426,378*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	19,893,253	20,814,655	20,136,276	20,366,705	20,028,891
Public deposits	5,539,467	8,413,275	10,364,471	9,841,323	10,198,989
Other deposits	11,140,540	13,154,258	12,742,282	12,480,154	13,551,794
Government securities	11,581,067	10,895,242	11,293,864	11,273,114	11,023,211
Other securities	14,279,061	18,214,965	20,505,474	20,742,429	21,264,411

Price of Consols	93¼	93⅞	92⅜	91½	89⅛
Average price of wheat	66s 6d	59s 5d	45s 0d	39s 9d	38s 3d
Exchange on Paris(shrt)	25 12½	17½ 25 30	57½ 25 20	25 25 20	27½ 25 20 30
— Amsterdam ditto	11 17½	17⅝ 11 16	16½ 11 16	16½ 11 16	16½ 11 17 17½
— Hamburg (3months)	13 7	7½ 13 8½	9 13 7½	8 13 7½	8 13 9 9⅛

In the corresponding week of 1855, the attack of the Zouaves on the Malakoff had been repulsed by the Russian garrison. No change of importance had taken place in the relative positions of the contending forces at Sebastopol.

In 1862, gold was freely entering the Bank, and money continued easy at 2½ per cent. The proximate introduction of Turkish, Russian, and Egyptian loans was expected.

In 1863, the demonstrations of sympathy with Poland, and the debates in the French Senate on the subject of the insurrection in that country, were attracting attention. In London, money was easy. An Italian loan for 39,500,000*l* stock, or 28,000,000*l* sterling, had been advertised in Paris, London, and Turin. A loan for the Confederate States of America had been issued for 3,000,000*l* stock, at 90, and 7 per cent. per annum interest.

In 1864, the bombardment of Düppel was being carried on by the Prussians, and a severe engagement had taken place along the whole line of forts. The bombardment of Fredericia had also been commenced. The Danish Rigsdag had been closed. The equalisation of the land tax in the different Italian provinces had been adopted by the Chamber of Deputies at Turin. The Italian Senate had passed a Bill for the establishment of a Bank of Italy. Blockade running had been resumed at Charleston. The Bank of Frankfort had reduced its rate of discount from 4 to 3½ per cent. A Mexican loan for 200,000,000f had been concluded with Messrs Glyn, Mills, and Co., of London. The Bank of France had reduced its rate of discount for bills to 6 per cent. The English stock markets were quiet. There was a heavy demand for advances at the Bank of England discount office.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 3,132,521*l*; in 1862, a deficiency of 5,090,707*l*; in 1863, a deficiency of 7,763,192*l*; and in 1864, a deficiency of 8,262,275*l*. In 1865, the deficiency is 7,712,617*l*.

Discount and Money Market.—For several successive weeks the returns published by the Banks of England and France have been of a favourable nature. There is a growing inquiry for long-dated bills, and the terms on which they are taken are becoming easier in proportion to the reduction of the amounts offered in the market. As the contraction of trade, in consequence of the lock-out in the iron districts, continues to diminish the little demand previously existing, and as the produce markets are all dull, a greater degree of ease may be looked for with a further influx of the precious metals, for which no export inquiry exists at present. The tendency of the continental exchanges is in favour of this country, and, with the payment of the April dividends, it is expected that a reduction in the Bank of England rate will take place.

Annexed are the current discount charges on paper of various dates :—

30 to 60 days	4⅜ ½ per cent.
3 months	4½ per cent.
4 months	4½ per cent
6 months—Bank bills	4⅝ per cent.
6 months—Trade ditto	5 ¼ per cent.

Money has been more actively employed in the Stock Exchange than "out of doors" owing to the payment of the East India Railway 5 per cent. debentures. The rate has varied between 4 and 4½ per cent. To-day the supply has been abundant. The India Council offer to lend money in the Stock Exchange for two months at 3 per cent., but little has been taken, as the general impression that lower rates must prevail, prevents dealers from entering into engagements for that length of time.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.
Do. with seven days' notice	3¾ per cent.
Do. fourteen days	4 per cent.

* At the London and Westminster 2½ per cent. only on sums below 500*l*

The following are the discount rates quoted in the chief continental cities. The Bank of Holland have reduced their rate from 4 to 3½ per cent. In Paris, the value of money in the open market is from 3 to 3¼ per cent.; and in Hamburg it has declined to 1¾.

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3¼
Vienna	5	5¼
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	6	5½
Brussels	3½	3½ 4
Madrid	9	...
Hamburg	...	1¾ 2
St Petersburg	6½	...

Bullion.—There is no export demand, and arrivals are all carried to the Bank. Some returns of sovereigns have been received from Alexandria, and further amounts are still looked for. 16,000*l* in bars have been bought by the Bank to-day.

The amount of Government bills on India, for which tenders will be received at the Bank of England on the 5th proximo, is 300,000*l*.

The changes in the return published by the Bank of France give the following results as compared with that last issued :—

	£
Increase.	
Cash in hand	813,330
Advances	45,000
Treasury balance	860,000
Decrease.	
Commercial bills	186,660
Notes	120,000
Current accounts	180,000

English Government Stocks.—Some slight decline followed the rise from 88⅝ to 89⅓, and Consols, which on Monday were quoted at 89½ to 89⅝, reacted to 89¼. The tone has been firmer to-day, owing to the fresh references made last evening in Parliament to the American question, and close this evening near 89⅜. The amount of business is very small, and appears to show a preponderance of sales on the part of the public, as the purchases of the Government broker have barely sustained the price of securities in this market. The closing quotation of Consols for money is 89⅛ to 89¼. New Three per Cents. and Reduced, 87¼ to 87½. India Five per Cents., 104¾ to 105.

Exchequer bills are dull, and without alteration, at 3s to 7s prem. India bonds, 15s to 17s prem.

Foreign Stocks.—The negotiation with the Spanish Government is said to be progressing, and various rumours are afloat with regard to the terms on which the question of the certificate-holders' rights is to be settled. Nothing has, however, transpired of a reliable nature as to the actual position of affairs in the matter. The price of Spanish certificates is rather lower than the extreme quotation of 18 to 18¼, to which they were at one moment carried. The Passive stock has declined. Turkish securities are firm. The closing quotations of stocks dealt in to-day are subjoined :—5 per Cent. Danish, 1864, 97 to 99. 7 per Cent. Egyptian, 93½ to 94½ x d; ditto, 1864, 95½ to 96½. 5 per Cent. Greek, 21½ to 22. Italian scrip, 3½ to 3 dis. 3 per Cent. Mexican, 26⅛ to 26⅜. 2 per Cent. New Granada, 28½ to 29½. 3 per Cent. Portuguese, 47¼ to 47¾. 3 per Cent. Russian, 1857, 53½ to 54½; 5 per Cent. ditto, 1862, 88½ to 89½; 5 per Cent. ditto, 1864, 90½ to 91½. 3 per Cent. Spanish, 47¾ to 48¼; ditto 3 per Cent. deferred, 40¾ to 41¼; ditto Passive, 32½ to 32¾; ditto Certificates, 17½ to 17¾. 6 per Cent. Turkish, 1854, 93½ to 94½; ditto, 1858, 70¾ to 71¼ x d; ditto, 1862, 73¼ to 73¾; ditto, 1863, 69 to 71. 6 per Cent. Venezuela, 1864, 41 to

Digitized by Google

43. Italian 5 per Cent., 63¼ to 63¾. The Confederate loan, after having been extremely dull, closes 1 per cent. higher than in the early part of the day, at 35 to 37.

The closing quotation of French 3 per Cent. rentes from Paris this evening is 67.25.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

Railways and Other Shares.—There are some symptoms of a recovery in the stock markets, which however remain very quiet. The prices generally show an improvement over those quoted last week, but without any important variation. Bristol and Exeter exhibits the largest advance, having risen 3 per cent. Caledonian is 1 per cent. higher, and Great Eastern 1 per cent. higher. Great Northern ordinary stock has declined ½ per cent., and the A stock has advanced ½ per cent. Great Western is rather lower, and Lancashire and Yorkshire notes an improvement of ¾ per cent. Metropolitan has advanced 2 per cent., and South Eastern ½ per cent.

In financial and miscellaneous shares the sustained advance in those of the Credit Mobilier and Foncier is the only feature of importance. Business has been dull as in almost all the departments of the Stock Exchange.

Indian stocks have been rather more inquired for and at advanced quotations.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day:—

RAILWAYS.

	Closing prices last Friday.	Closing prices this day.

Foreign Exchanges.—Rates are steady with a sustained favourable tendency, owing to the small amount of paper afloat.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The demand for export having almost entirely ceased, the Bank of England has received about 195,000*l* since our last circular of the 16th inst.; this amount includes 80,000 sovereigns returned from Egypt, and we look for further arrivals from that country. The City of Boston has brought 2,060*l* from New York, the White Star 16,000*l* from Melbourne, and the Ripon 9,900*l* from Alexandria.

Silver.—The fine silver has been sold at 61d per oz standard, and the Dore at 61½d per oz standard. Our market is exceedingly quiet, and there is scarcely any demand for the East for silver to be shipped from here. The Ceylon has taken 20,500*l* to India; and the Messageries steamer Peluse, from Marseilles, has 192,000*l* for India and China.

Mexican Dollars.—The Messageries steamer Louisane has arrived at St Nazaire with 20,000*l* in dollars. Our market for this coin is not active, but there is no alteration in price, which remains as last quoted, 60d per oz. The Ceylon has taken 76,100*l* to China and the Straits.

The Bank of New Zealand are inviting tenders for 400,000*l*. 8 per cent. New Zealand Government Treasury Bills, to be issued in sums of 100*l* each, redeemable in series between Dec. 31, 1866, and Dec. 31, 1867.

Failures and Mercantile Embarrassments.—Messrs Smith, Douglas, and Co., of London, and Messrs James Smith and Co., of Liverpool, have stopped payment, with liabilities amounting to between 300,000*l* and 400,000*l*.

A meeting of the creditors of Mr T. S. Begbie was held to-day. The liabilities were stated at about 35,000*l*. It was resolved to wind up under inspection.

A second dividend of 5s in the pound, payable at Norwich, to the creditors of the East of England Bank, has been announced by the liquidators. The bank stopped payment on the 20th of July last, and the first dividend of 10s in the pound was paid in October.

Public Companies.—A general court of the proprietors of the Bank of England was held on the 16th inst. The net profits for the half-year ending the 28th February, were 807,317*l*, making the amount of the "Rest" on that day, 3,830,084*l*. A half-yearly dividend of interest and profits of 5*l* 10s per cent., without deduction on account of income tax, was declared, after the payment of which the "Rest" will stand at 3,029,669.

A circular has been issued by the directors of the Continental Bank Corporation (Limited) recommending to the shareholders the adoption of 20*l* shares.

The report of the Home and Colonial Assurance Company (Limited) has been issued. The directors recommend a dividend at the rate of 6 per cent. annum, free of income tax. After all deductions, there will remain a net amount of 100,430*l* 5s 1d to be carried forward.

The report of the directors of the Australian Mortgage, Land, and Finance Company (Limited) has been issued. The balance available for dividend is stated at 3,631*l* 19s, which sum, after deducting the interim dividend of 5 per cent., paid to the proprietors in August last, and writing off 5 per cent. of the preliminary expenses, will allow a further dividend of 6 per cent. for the year ended 31st December last.

At the meeting of the Millwall Iron Works Company, held on Monday last, a dividend at the rate of 12 per cent. per annum was declared, and a balance of 15,794*l* carried forward.

The share list of the San Pedro Del Mark Silver Mining Company (Limited) closes on Tuesday next, the 28th inst.

The reports of the Scinde Railway Company, of the Indus Steam Flotilla, of the Punjaub Railway, and of the Delhi Railway, have been published, and notwithstanding some indications of the present depressed state of trade, disclose in general a satisfactory state of business.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in London and Paris.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.6¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

On and after the 1st of April next, the postage upon letters transmitted by post between places within the United Kingdom, instead of being twopence for every additional ounce above the first ounce, will be at a uniform rate throughout of one penny for every half-ounce. The rates of postage will then be as follows, viz. :—Upon a letter not exceeding ½ oz in weight, 1d; above ½ oz and not exceeding 1 oz, 2d; above 1 oz and not exceeding 1½ oz, 3d; above 1½ oz and not exceeding 2 ozs, 4d; above 2 ozs and not exceeding 2½ ozs, 5d; above 2½ ozs and not exceeding 3 oz, 6d. If no postage be paid in advance, double rates will be charged.

The postage on newspapers and other printed papers addressed to Portugal, the Cape de Verds, Senegal, Brazil, Uruguay, or the Argentine Confederation, as well as to Martinique, Guadaloupe, St Lucia, St Vincent, Grenada, or Trinidad, Cuba or Mexico, forwarded via France and by French mail packet, on the 1st April next and thenceforward, will be as follows :—For each newspaper registered for transmission abroad, not exceeding 4 ozs, 2d; above 4 ozs and not exceeding 8 ozs, 4d. For a packet of other printed papers, not exceeding 4 ozs 4d; above 4 ozs and not exceeding 8 ozs, 8d: above 8 ozs and not exceeding 1 lb, 1s 4d; above 1 lb and not exceeding 1½ lb, 2s. These rates of postage must, in all cases, be paid in advance. It must be understood that, if more than one newspaper is enclosed in a packet, postage according to the above scale will be chargeable on each newspaper.

On the 1st April next, the following alterations will take effect in the existing arrangements in respect to newspapers and book packets addressed to Malta or to Egypt. First—The combined British and foreign postage on newspapers forwarded to Malta or Egypt, via Marseilles, and conveyed by British packet, will be twopence for each newspaper not exceeding four ounces in weight, instead of threepence for each newspaper without regard to its weight. Secondly—The combined British and foreign postage on newspapers forwarded to Malta, via Marseiles, and conveyed in French packet, will, in like manner, be twopence for each newspaper not exceeding four ounces in weight, instead of one penny for a packet of newspapers the weight of four ounces. Thirdly—Book packets which can, at present, be sent to Malta via Southampton only, may in future be sent via Marseilles also. The postage chargeable on book packets, or packets of printed papers, sent to Malta, Alexandria, Cairo, or Suez, via Marseilles, will be as follows :—For a packet not exceeding 4 ozs, 4d; above 4 ozs and not exceeding ½ lb, 8d; above ½ lb and not exceeding 1 lb, 1s 4d; above 1 lb and not exceeding 1½ lb, 2s; every additional ½ lb, 8d.

On the 1st April next, and thenceforward, book packets addressed to Shanghai, Canton, Amoy, Foo Chow Foo, Ningpo, Swatow, or Whampoa, may be forwarded by the British mail packets, either via Southampton or via Marseilles, under the same conditions in all respects as book packets addressed to Hong Kong. The charge will be as follows, viz. :—Via Southampton—For a packet not exceeding 4 ozs, 4d; above 4 ozs and not exceeding ½ lb, 8d; above ½ lb and not exceeding 1 lb, 1s 4d; above 1 lb, and not exceeding 1½ lb, 2s; every additional ½ lb, 8d. Via Marseilles—For a packet not exceeding 4 ozs, 6d; above 4 ozs and not exceeding ½ lb, 1s; above ½ lb and not exceeding 1 lb, 2s; above 1 lb and not exceeding 1½ lb, 3s; every additional ½ lb, 1s. This postage must in all cases be paid in advance.

On the 1st April next, and thenceforward, the postage on newspapers brought to this country, by British mail packet via Panama, from the Republic of Chili, will be reduced from 6d to 3d for each newspaper not exceeding 4 ozs in weight, and on newspapers from Ecuador, Bolivia, or Peru, will be raised from 2d to 3d for each newspaper of a like weight. The same charges will be made on newspapers forwarded to Ecuador, Bolivia, Peru, or Chili, via Panama.

Arrangements have now been made under which, on the 1st of April next, and thenceforward, the provisions of the book post to Sweden will be extended. The rates of postage, which must be paid in the United Kingdom, will be as follows :—For a packet not exceeding 4 ozs in weight, 3d; above 4 ozs and not exceeding 8 ozs, 6d; above 8 ozs and not exceeding 1 lb, 1s; above 1 lb and not exceeding 1½ lb, 1s 6d; and so on, increasing 6d for every ½ lb or fraction of ½ lb. No further charge will be made upon book packets for Gottenburgh, but upon book packets addressed to any other town in Sweden, a small inland rate of postage will be levied in Sweden for their conveyance from Gottenburg to their destination.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended March 18, 1865:—

	Quantities So'd.	Average Price.
	qrs bush	s d
Wheat	70,688 6	38 3
Barley	41,679 5	28 10
Oats	7,614 5	21 4

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of home-grown produce on sale at Mark lane, to-day, was small. Foreign wheat, beans, and peas, were in very moderate supply, but the show of foreign barley and oats on the stands—the former of which was, for the most part, of poor quality—was tolerably large. The leading features of the trade were a firm trade for good and fine wheats—both English and foreign—at fully Monday's currency, and a somewhat improved inquiry for oats, with an upward tendency in prices. Other articles moved off slowly, at late rates. This week's imports consist of 460 quarters of wheat, 1,310 barley, 12,990 oats, and 630 sacks of flour.

At Liverpool, this morning, wheat, flour, and maize, were in moderate request, at Tuesday's currency. At Wakefield, wheat advanced 1s per quarter, and a similar improvement took place in the value of good and fine malting barley.

The excitement which prevailed in the Liverpool cotton market last week has again entirely subsided, and prices under the influence of unfavourable American advices have again fallen. The trade buy but sparingly, and only to supply their immediate wants. Speculators' and exporters' operations are conducted on the narrowest scale. Meanwhile the stock steadily increases, and at Liverpool alone is estimated at 603,030 bales. Rumours as to the credit of certain houses and of impending disasters to the Confederate arms, tend to keep the market in a dull state. To-day the market closes flat, with sales amounting to 3,000 bales, prices in favour of buyers.

Advices from New Orleans state that the stock of cotton in that port on the 23d of February last was 10,469 bales. From Bombay, we learn that the shipments from March 3, to March 17, were about 50,000 bales.

The markets for the various descriptions of colonial and foreign grocery produce have continued inactive, and, in some instances, prices have given way. The leading change, however is in China tea, some descriptions of which, at the public sales held during the week, have declined in value to the extent of ½d to ¾d per lb. Common descriptions of raw sugar have also sold at rather lower prices. In the coffee market, *new* plantation Ceylon produce has realised full currencies; but old qualities are decidedly lower in value. Rice, dry fruit, rum and brandy have changed hands at previous quotations.

The public sales of colonial wool, still in progress, but which will be brought to a close on Monday next, have passed off during the week at the recent improvement in prices as regards good and fine Cape and Australian produce, but inferior wools from both colonies have been less competed for, though without leading to any quotable change in their value. Continental buyers continue to operate freely in the better classes of wool; but for the American trade scarcely any business is doing. Up to this evening, about 80,000 bales have been disposed of. The public sales of low wool—comprising 8,640 bales—will be be held on Tuesday and Wednesday next, the 28th and 29th of March.

In the metal trade, there has been rather more activity, but it is chiefly confined to Scotch pig iron and Straits tin—the former of which has sold at 50s 10d cash, mixed numbers, and the latter at 85*l* 10s to 86*l* cash. Most oils have met a slow sale, at about previous rates. Tallow, in the early part of the week, was firm, at 40s 9d for P.Y.C., on the spot; the quotation, however, for immediate delivery, has since fallen to 40s 6d per cwt.

The state of trade at New York for the week ending March 11 was somewhat unhealthy, the transactions in most articles being strictly confined to the immediate wants of buyers, whilst the tendency of prices was decidedly in an unfavourable direction. In the coffee trade the greatest degree of firmness was manifested, owing to continued purchases by Government contractors for the supply of the Federal army. Breadstuffs commanded scarcely any attention for export to Great Britain. Petroleum was firm in price, notwithstanding that the shipments showed a large falling off from last year, the export from all ports, from Jan. 1 to March 6, being 2,051,807 gallons, against 4,799,092 gallons in 1864, and 6,134,713 gallons in 1863. The return showing the exports of provisions from New York exhibited a large decrease in the shipment of hams and bacon in January and February, current year, as compared with 1864, but as regards most other provisions, the statement showed a favourable comparison of the first two months of 1865 with the corresponding months last year. The money market was quiet, at 8 to 8½ per cent. for prime short-dated commercial paper. Gold opened at 199 per cent., subsequently fell to 186⅜, and closed at 191½ per cent. The stock of bullion in the banks on the 4th inst. was 4,244,130*l*, and the balance in the Sub-Treasury 5,754,100*l*. The export of specie for the week ending March 4 was 6,700*l*, making a total, since Jan. 1 of 818,200*l*, against 1,766,000*l* in 1864, 1,718,050*l* in 1863, 1,296,460*l* in 1862. and 238,580*l* in 1861. The imports of dry goods for the week ending as above were valued at 261,960*l*, against 715,100*l* in 1864, and 484,440*l* in 1863, whilst the total import of dry goods and general merchandise from Jan. 1 to March 4 was valued at 4,533,100*l*, against 8,571,520*l* in 1864, and 6,274,300*l* in 1863. The receipts for customs at New York for the seven months ending Jan. 30 were 5,741,130*l*, against 8,244,700*l* in 1863-4, and 6,263,730*l* in 1862-3.

THE COTTON TRADE.

LIVERPOOL—MARCH 24.

After the receipt of the China's advices the market was unfavourably influenced by the critical position of affairs in America, and has declined in prices from day to day, closing heavily and freely supplied, although the trade have shown increasing disposition to buy during the last few days. Sea Island continues in limited request, and being freely offered, the few sales effected have been at prices in the buyer's favour. American has been in limited demand, and is quoted ½d to ¾d below last week's rates. Brazil is pressed upon the market, and the desire to realise has caused a decline of fully 1d per lb. Egyptian continues in good demand, and on Friday morning advanced ½d per lb, but has since relapsed, and closes 1d below former quotations. Though Smyrna has been in fair request, it closes dull, at about 1d per lb decline. East India has been in moderate request, but towards the close of the week has been pressed for sale, and prices have suffered a general depreciation of ½d to 1d per lb. China has changed hands to a fair extent, closing at a reduction of fully ½d, and Japan has fallen 1d per lb from last week's rates.

No transactions "to arrive" have been reported during the week.

The sales of the week amount to 28,600 bales, including 2,840 on speculation, and 5,240 declared for export, leaving 20,520 bales to the trade. The sales to-day will probably amount to about 4,000 bales.

N.B.—The actual stock of cotton in Liverpool will be given out on the 31st instant. On Tuesday next instructions upon the subject, with a view to secure accuracy, will be addrssed to each member of the Association.

NEW YORK—March 7.

All descriptions of cotton are in slow request, at our quotations. The arrivals during the last three days have amounted to 11,854 bales, making the total import, since Sept. 1, 140,030 bales. From Savannah, the import from March 4 to March 7 was nearly 9,000 bales. The export from this port, from Jan. 1 to Feb. 28, was 9,607 bales, against 311 bales; and from March 1 to March 7, 853 bales, against 219 bales last year.

New York, March 10.—Produce continues to arrive from Savannah—the receipts from that quarter during the last three days being 3,573 bales,—and the cotton trade is heavier on easier terms, Midland Upland quality being quoted at 72 cents per lb. The total import since September 1 is 143,785 bales. The following are the prices current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	55	55	55	55
Middling	72	72	72	73
Middling fair	77	77	77	77

MARKETS IN THE MANUFACTURING DISTRICTS.

For the time of year there has been a fair average business doing in goods in the manufacturing districts, and the quotations have been well supported. We have no improvement to notice in the demand for or value of iron. Coals have realised high rates, with an active inquiry.

Manchester, March 23.—Heavy imports of cotton in the beginning of the week, and unfavourable accounts from the leading markets, have depressed prices day by day, and rendered sales all but impossible. Buyers for the East, having over-bought themselves in the preceding week, will not even make offers, and prices in this department remain nominal, owing to the amount of engagements on hand. In all other departments sellers are anxious, and would sacrifice considerably to induce business. Yarns may be quoted down 1d to 2d, and even 3d per lb in exceptional cases. American news have added to the general discouragement; but as some approach to peace prices is being attained before the war is finished, that influence is not regarded as paramount.

Comparative Statement of the Cotton Trade.

Bradford.—Short wools and certain wethers are selling to some extent, but hogs and all long wools are almost entirely neglected. Prices of yarns continue to droop. Increased caution characterises all transactions in pieces. Prices are still drooping, and stocks of plain goods cannot be moved off.

Leeds.—There is no perceptible improvement in the woollen trade here. Though the woollen is quiet, and manufacturers are rather contracting their productive powers, prices keep very steady, and the remark applies to both goods and wool. The flax trade is not so active as we lately had to report it.

Rochdale.—Business is still dull. Some few and rather good shipping orders have, however, come to hand. Wool is very dear in consequence of the quotations at the current wool sales, and manufacturers buy none, except when compelled for the purpose of completing orders in hand.

Leicester.—There has been about an average amount of business going in most classes of hosiery goods, and business generally is in a satisfactory state. Yarns are selling at late quotations, and spinners are working to order.

Nottingham.—There is no improvement in the lace trade, Business in most branches remains dull. In cotton goods there is very little doing, indeed less than for a considerable time past. The hosiery trade is without much change. Business in both the home and foreign departments is rather quiet. Yarns are unchanged in value.

Cardiff.—There is an average export demand for steam coal, and a good number of vessels are taking in cargoes. The inquiry from the French markets continues moderately active, and there is also a large quantity going to Denmark and Spain. The demand from the Italian markets has fallen off a little of late.

Birmingham.—The trade of this town is quiet; the tendency in that direction has increased in the course of the last 10 days, the orders on account of the home trade being moderate—unusually so for the time of year, when the retail dealers should be making up their stocks for the spring trade.

Sheffield.—The iron trade is here is paralysed by the lock-out. The steel trade continues moderately active for the home markets, though the foreign demand is generally dull. There are moderate stocks of iron on hand, and as yet little check has been given to the steel trade by the lock-out.

Wolverhampton.—The iron trade is at a standstill, but so far as inquiries go and information from agents, there is as yet no great pressure by purchasers of iron.

Glasgow.—Iron—There was no change to report in this market; the business done was very limited. G.M.B., No. 1, 51s 3d; No. 3, 50s 6d; No. 1 Gartsherrie, 57s; Coltness, 57s; Calder, 54s; Glengarnock, 53s; Eglington, 51s.

Norwich.—A fair amount of activity prevails in the shoe trade, and in the manufacturing industry of the city there has also been more animation noticed of late.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, March 7.—The demand both for wheat and flour has ruled heavy during the last three days, and prices have given way. The export inquiry is still greatly restricted. Corn may be considered steady, without material change in value. The prices now current are as follows:—Flour—State, superfine brands, $9.75 to $9.90; State, extra brands, $10.6 to $10.25; State, choice brands, $10.30 to $10.50; Ohio, common brands, $10.20 to $11.; Ohio fancy brands, $11.5 to $11.10; Ohio, good and choice extra brands, $11.15 to $11.75; Michigan, Indiana, Wisconsin, &c., $9.75 to $10.40; Genesee, extra brands, $10.55 to $11.50; Missouri, $10.50 to $15; Canada, common, $10 to $10.30; Canada, good to choice extra, $10.35 to $11.50 per barrel. Wheat—Milwaukee club, $2.10; winter red Western, $2.38; white ditto, $2.75. Corn—Yellow Southern, $1.79; old Western mixed, $1.89 per bushel.

NEW YORK, March 10.—The export demand for flour and wheat is still greatly restricted. Prices exhibit a further decline, the leading quotations being as follows:—State flour, $9.90 to $10.60; Ohio, $10.85 to $11.65; Canada, $10.25 to $11.60 per barrel. Milwaukee club wheat, $2.05 to $2.08; amber winter ditto, $2.30 to $2.33; yellow Jersey corn, $1.65 to $1.66; Southern, $1.69; and old Western mixed, $1.86 to $1.87 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat fresh up to our market, this week, have been very moderate; but most of the samples have come to hand in improved condition. Good and fine qualities have moved off freely, and, in some instances, the quotations have advanced 1s. per quarter. Other kinds have sold steadily, at full prices. The imports of foreign wheat have been trifling. The show, ex granary, however, has been reasonably large. Good dry corn has commanded extreme currencies, with a steady inquiry. In damp parcels very little has been doing, at late rates. Malting barley has sold freely on former terms; but grinding and distilling sorts have ruled inactive. The transactions in malt have been on a moderate scale, at full prices. Oats have sold freely, at extreme quotations; but the inquiry for beans has fallen off. Peas have ruled quite as dear as last week. The flour trade may be considered steady.

Most of the local markets have shown more firmness for wheat; but other kinds of produce have met a dull inquiry.

On the continent, wheat is tending upwards in price, and a steady business is doing in spring corn for export to England.

In Scotland, wheat has commanded rather more money, with a steady inquiry. Barley and all other articles have realised extreme rates.

The Irish markets have shown more firmness. The export demand, however, has not increased.

The supply of English wheat on sale at Mark lane, to-day, was small, but a fair proportion was received in good condition, and the trade ruled firm for all qualities, at fully Monday's currency. The market was but moderately supplied with foreign wheat, and both American and continental produce was held at quite previous rates. The barley trade was in a sluggish state, yet no change took place in prices. Oats, however, were firmer, and sweet qualities commanded rather more money. Beans and peas met a slow sale, at late rates. The flour trade was firm, at full quotations.

Mr Ed. Rainford reports the arrival off coast of only 5 cargoes of grain. Wheat has moved off slowly, at the late advance in the quotations. Maize has improved 6d to 1s per quarter. Other produce has ruled about stationary.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened flatly, but no general decline in prices occurred to yesterday, attributable only to the small quantity brought to auction. About 686 casks West India sold in three days. Crystallised Demerara, 33s to 36s 6d; muscovado, 29s to 30s; grainy Berbice, 31s to 33s 6d per cwt. A few floating cargoes have sold for near ports. 76,800 baskets Java brought to auction by the Netherland Trading Company, were sold at lower rates. The landings last week were 4,513 tons; the deliveries 5,040 tons (including 760 tons for exportation). Stock at the close 97,437 tons: against 63,081 tons in 1864.

Mauritius.—2,222 bags offered by auction, sold at about previous rates: grainy and crystallised, 32s 3d to 35s 6d; soft brown, 26s to 26s 6d. A steady business is reported by private contract, including good yellow at 32s. One floating cargo has sold for France, No. 12½, at 25s 4½d per cwt.

Bengal.—613 bags in public sale, chiefly sold at 32s to 32s 6d per cwt for good Gurpatta date; and a few hundred bags privately, at 29s 6d to 31s 6d per cwt.

Foreign.—A floating cargo of Cuba has sold for the United Kingdom at 21s. One of Paraiba, for a near port, at 19s 3d; and one of Maceio, at 20s 1½d; 192 casks 62 barrels Porto Rico, by auction, sold steadily, at 30s 6d to 35s per cwt.

Refined.—Dry goods are offering at lower rates, viz. 42s per cwt for common, with other grades in the same proportion.

MOLASSES.—70 puns Trinidad have sold at 13s 6d per cwt.

COFFEE.—There have been increased supplies brought forward, of which a considerable quantity sold, at prices occasionally 6d to 1s lower. 321 casks 2,922 bags native Ceylon were partially disposed of at 69s to 72s for good ordinary to fine. Plantation of the new crop barely supported its former value. 608 casks 527 barrels and bags chiefly sold; good to fine, 85s to 90s 6d; small berry to good middling, 78s to 84s 6d. 54 casks 614 cases, &c., 1,820 bags East India, principally sold at 73s 6d to 83s 6d: ordinary Mysore and Madras, 71s to 71s 6d. 31 bales Mocha: greenish and pale long berry mixed with ragged, 82s. 124 barrels and casks 32 bags Jamaica: good to fine, 82s to 90s; ordinary, 67s to 69s 6d. 5,570 bags Rio partly sold at 61s to 69s per cwt.

RICE.—A full amount of business has been done in soft grain sorts at 8s 7½d to 9s 6d. 200 tons white Bengal have sold to arrive at 14s 6d per cwt without guarantee of quality.

IMPORTS and DELIVERIES of RICE to March 18, with STOCKS on hand.

	1865.	1864.	1863.	1862.

TEA.—Further large sales have been held this week, the catalogues containing 39,319 packages, including 36,445 packages printed "without reserve." Fair quality red and black leaf congou declined ½d to 1d per lb. A few breaks of Ping Suey green went at 2d to 3d per lb decline for fine. Shanghai green of the better grades sold well, but the commoner sorts were cheaper. 18,000 packages sold in the three days.

COCOA.—340 bags Trinidad, offered by auction, sold at rather higher rates for the better sorts: fine Caracca kind, 102s 6d; ordinary mixed to good qualities, 65s to 86s per cwt. The stock of colonial descriptions is 5,750 bags, against an average of 10,700 bags in the two preceding years at the same period.

RUM.—Several contracts have been made in West India at previous

Digitized by Google

rates; Demerara at 1s 7d; Berbice, 1s 6½d; and some Penang is reported at 1s 4½d per proof gallon.

SPICES.—The markets generally are quiet. No public sales of nutmegs have taken place. 556 cases cassia lignea partly sold at 83s to 84s for good, and 77s to 80s for second quality. 100 bags African ginger were taken in at 40s. 500 bags Bengal withdrawn at 23s. 51 cases cassia buds bought in at 11*l*. White and black pepper are dull, at previous rates. 965 bags sea-damaged Singapore black were disposed of at 3⅛d to 3⅜d. 160 bags of sound Penang of low quality at 3⅜d, cash in fourteen days. 506 bags Zanzibar cloves sold steadily at 3⅛d to 3⅜d. 336 bags pimento realised 2¼d to 2½d per lb.

SALTPETRE.—The few sales effected in Bengal have been at lower rates, and the market continues dull: refraction 3½, 29s; 7½ to 6¼, 28s 3d per cwt, the latter for cash. 1,195 bags, offered by auction, were taken in above the value. 1,331 bags low Bombay were bought in at 22s 6d to 25s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to March 18, with STOCKS on hand.

	1865	1864	1863	1862
Imports .....tons	1585 ...	2926 ...	5994 ...	5450
Deliveries.....	2590 ...	4685 ...	3240 ...	3830
Stocks	6400 ...	7400 ...	6600 ...	4720

DRYSALTERY GOODS.—Gambier and Cutch remain steady.

SAFFLOWER is unchanged. No further business reported.

TURMERIC.—1,660 bags Madras part sold, at 22s per cwt.

LIMA WOOD.—4,170 tons, offered by auction, were taken in at 15*l* to 19*l*; billet wood, 12*l* per ton.

SHELLAC.—A few parcels have sold during the week at irregular prices, but the market is now firmer.

METALS.—The markets are still in a quiet state. Considerable business has been done in Straits tin at 85s 6d to 86s 6d. Scotch pig iron closes firmly at 51s cash, mixed numbers. British manufactured kinds are steady. Bars in Wales quoted 6*l* 15s to 7*l* per ton. Copper is firm. Spelter quiet. A sale has been made at 19*l* 10s per ton, May and June shipment.

JUTE.—On Wednesday, 7,320 bales offered by auction and fully three-fourths sold, there being rather more competition at a further decline of 10s to 15s Low to fine quality, 9*l* 10s to 25*l* 15s per ton. The deliveries continue large, far exceeding those of last year.

OILS.—Olive is more steady: Gallipoli, 52*l*; other kinds, 47*l* 10s to 51*l*. Sperm steady, at 82*l*. About 100 tuns of cod have sold at 51*l* per tun. Palm is easier, with arrivals: fine, 36s to 36s 6d. Cocoa-nut firm, and prices tending upward: Cochin to arrive has sold at 43s. Linseed oil is dull, at 32s to 32s 3d per cwt on the spot. Rape continues firm at last week's quotations.

LINSEED is quiet and easier. Calcutta has sold at 57s per quarter.

TALLOW.—The market is quiet, and the improved rates paid for foreign at one period this week cannot be obtained now. 1st sort new Petersburg Y.C., 40s 6d; October to December, 42s per cwt. Town melted unaltered.

PARTICULARS OF TALLOW.—Monday, March 20.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market continues dull. 151 casks West India have sold, making 835 casks for the week. 3,008 bags Mauritius found buyers at the previous value. 2,035 bags Bengal: good middling white Bengal, 34s 6d to 35s; grainy, 32s 6d to 33s 6d. 523 baskets Java were bought in, duty 11s 8d. Gurpatta date, 28s to 31s 6d; yellow and white, 37s 6d to 38s. 602 bags Siam were bought in above the value.

COFFEE.—600 casks 54 barrels 1,333 bags plantation Ceylon offered by auction, part sold at 78s to 90s 6d. 230 bags native, 68s to 69s. 5 cases 363 bags East India sold on previous terms. 460 bags Costa Rica were taken in at 83s to 85s per cwt.

RICE.—4,038 bags were partly sold, chiefly at 10s 6d to 11s for broken to good pinky. A floating cargo of new Rangoon sold at 10s 6d for the United Kingdom; or 10s 1½d if for the Continent.

TEA.—The fair qualities of red and black leaf Congou met with rather a better demand at the previous decline, also Ping Suey green. 17,700 packages remains over till next week.

SAFFLOWER declined 5s per cwt to-day.

CUTCH.—600 bags were bought in at 26s per cwt.

OIL.—197 casks palm, by auction, part sold at 36s to 36s 6d. 950 casks cocoa-nut: fine Cochin, 42s 6d; Ceylon, 39s 6d; Sydney part sold at 37s; Manilla bought in at 30s per cwt.

TALLOW.—676 casks Australian, by auction, part sold: beef, 39s to 39s 3d; good sheep, 41s 6d. 190 casks 384 barrels North American, 40s 9d. 312 casks South American, 40s to 41s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar is not so well supported this week. Prices rather in favour of the buyer. Considerable sales of Dutch crushed have been made for forward delivery on rather easier terms.

DRY FRUIT.—Currants rule dull, the trade making but very few inquiries: low fruit for a price appears to be at a further discount, and fine is not to be found. Raisins continue quiet, though a few offers have been made for parcels this week and refused. Sultanas in fair request.

TOBACCO.—An improved demand has been experienced for home trade American descriptions, and sales effected to a considerable extent, at prices slightly in favour of buyers, especially for medium quality. Other growths have been taken freely at previous rates. Sales for exportation of a limited character.

LEATHER.—The transactions in leather during the past week have shown no change in value. At Leadenhall, on Tuesday, the supply was about an average, but the demand was not very extensive. The articles lately enumerated as being chiefly in request still found buyers, particularly English shoulders, heavy English bellies, the lightest shaved hides, calf skins of all weights, and good light kips.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	42	0
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs.....	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, March 23.—There was about an average supply of beasts on sale here to-day, in but middling condition. Sales progressed slowly, at Monday's currency. The best Scots sold at 5s 2d per 8 lbs. Sheep—the show of which was only moderate—ruled steady, at full quotations. Downs, in the wool, sold at 6s 6d to 6s 8d; out of the wool, 5s 6d per 8 lbs. Lambs were dull, at from 6s to 6s 8d per 8 lbs. There was a fair inquiry for calves, at full prices, viz., from 4s 6d to 5s 8d per 8 lbs. Pigs moved off steadily, at late rates; but milch cows were a dull inquiry, at from 18*l* to 22*l* each.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Monday, March 20.—We have no alteration to notice in our market, which remains steady, with only a small demand for the best qualities of the last growth. Inferior sorts and old hops are not in request.

FRIDAY, March 24.—The supply of English hops on sale is small. Good and fine samples are in steady request, and prices rule firm, but inferior qualities move off slowly at late rates. The best descriptions of foreign hops command a steady sale at full currencies. Inferior foreign hops, however, are a dull inquiry. Mid. and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 140s; American, 60s to 75s per cwt.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, March 20.—The arrivals coastwise and by rail have been large, and the prices of the former week barely maintained. The following are this day's quotations:—Yorkshire Flukes, 120s to 140s; ditto Regents, 90s to 100s; ditto Rocks, 75s to 80s; Kent and Essex Regents, 90s to 100s; Perth, Forfar, and Fife Regents, 75s to 80s; ditto Rocks, 65s to 70s; French and Belgian whites, 55s to 60s per ton.

FRIDAY, March 24.—The supplies of potatoes are seasonably large. The trade is somewhat inactive; nevertheless, good and fine samples are firm in price. Yorkshire Regents, 90s to 110s; ditto Flukes, 130s to 150s; Scotch Regents, 80s to 90s; Dunbar Regents, 110s to 130s; foreign, 60s to 75s per ton.

HAY MARKETS.—THURSDAY, March 23.

SMITHFIELD.—Meadow hay, 4*l* 4s to 5*l* 5s 0d; clover, 5*l* 5s to 6*l* 6s 0d; and straw, 1*l* 8s to 1*l* 14s per load. A moderate demand.

CUMBERLAND—Meadow hay, 4*l* 4s to 5*l* 7s 6d; clover, 5*l* 5s to 6*l* 6s; and straw, 1*l* 8s to 1*l* 14s per load. Supply limited.

WHITECHAPEL—Meadow hay, 4*l* 4s to 5*l* 5s; clover, 5*l* 5s to 6*l* 7s 6d; and straw, 1*l* 7s to 1*l* 14s per load. Trade inactive.

COAL MARKET.

FRIDAY, March 24.—Wallsend:—Haswell 22s—Hetton 22s—East Hartlepool 21s 6d—Braddyll's Hetton 20s 3d—Cassop 20s 9d—Gosforth 19s 3d—Heugh Hall 20s 3d—South Hartlepool 20s—South Kelloe 20s 3d—Tunstall 19s 3d—West Lambton 20s—Byas's Bebside West Hartley 15s—Cowpen Hartley 15s—Lambert's West Hartley 14s 9d—Dean's Primrose 13s 6d. Ships at market, 46; sold, 17; gas contracts, &c., 25—42; unsold, 4; ships at sea, 45.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 24.—We have no change to report in our market. The demand continues languid, and the sales made are consequently of limited extent, and at prices rather in favour of buyers.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 24.—Fair attendance, and the quotations of last week maintained for all articles.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 11th of March, on 11,821 miles, to 587,385*l*, and for the corresponding week of last year, on 11,476 miles, to 548,216*l*, showing an increase of 345 miles, and of 39,169*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,314 miles, to 475,603*l*, and for the corresponding week of 1864, on 8,057 miles, to 444,423*l*, showing an increase of 257 miles, and 30,580*l* in the receipts.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, March 20.—In the share market to-day there was a very small amount of business, and although miscellaneous shares were generally firm, and in colonial railways and mines the few movements in the final quotations were in advance, in the other descriptions there was no material average change. Of the English railways, Bristol and Exeter advanced 2, Brighton a further ½, and Great Eastern (East Anglian) and Great Northern ½ each; ditto (A stock) relapsed 1, ditto (B stock) receded ½, Great Western (South Wales) 2, North-Western and Midland ¼ each; and North-Eastern (Leeds) and ditto (York) relapsed ½ each, and Lancashire and Yorksbire ¼. In colonial, Great Western of Canada bonds (1873) advanced 5, ditto (1877-8) 3½, Great Western of Canada (4th preference) 1, and Madras (5 per cent) ½. In foreign, not a single movement was recorded. In American, United States (5-20) and Illinois Central shares relapsed ¼ each. In British mines, Grenville improved 2, and West Seaton declined 5, West Chiverton 1¼, East Lovell ½, and Chiverton ¼. In foreign mines, Washoe Gold (of both descriptions) improved ¼ each.

TUESDAY, March 21.—In the share market to-day any change of tone was scarcely perceptible in any of the descriptions. English railways showed a slight tendency to improvement; Great Eastern advanced ½. Metropolitan 1½, ditto (new) ⅛, Scottish Central 2, South Devon 1, and Bristol and Exeter a further 1; and North British (Edinburgh, Perth, &c.) declined 1, Manchester, Sheffield, &c. ½, and Midland, North-Eastern (Leeds), and ditto (York) a further ½ each. In colonial, the Indian railways were generally higher, and the Canadian lower; Madras (4⅜ per cent. and 4½ per cent.) being each 1 better, Eastern Bengal, Scinde, Punjaub, and Delhi (stock) each ½ better, ditto (shares) ⅜ better, and Bombay, Baroda, &c. (F shares) ¼ better. In foreign, Lombardo-Venetian improved ⅛; and Northern of Buenos Ayres receded ½, and Dutch Rhenish ⅛. In mines and American securities no movement occurred.

WEDNESDAY, March 22.—In the share market to-day dullness was the prevailing feature, and the banks and foreign railways were the only descriptions closing with a slight tendency to firmness, and the alteration of tone in the other descriptions was not of material extent. Of the English lines, Caledonian advanced ½, and Midland (Birmingham and Derby) and Great Northern (A stock) receded 1 each, and ditto (original) ½. In colonial, Great Western of Canada shares (of both descriptions) improved ⅛ each, and Atlantic and St Lawrence receded 1. In foreign, Dutch-Rhenish recovered 4, Northern of France and West Flanders (preference) improved ½ each, Lombardo-Venetian relapsed ⅛, and Great Luxembourg declined ⅛. In American, United States (5-20), and Illinois Central shares advanced ¾ each, and Erie shares declined ¼ each. In British mines, Wheal Buller advanced 4½, and South Wheal Frances declined 2½, Great Laxey 1, and East Wheal Russell ¼. In foreign mines there was again no alteration.

THURSDAY, March 23.—The share market to-day was generally again very inactive, but the banks again showed a slight degree of firmness, and the other descriptions showed no material average alteration. Of the English railways, Great Eastern, in which there were several transactions, closed ½ better, Great Western (Oxford) 1 better, and Metropolitan District (10*l*) ½ better, at 9 to 10 pm.; and Manchester, Sheffield, &c., Midland, and North-Eastern (Berwick) declined ½ each, and Great Western (original), Lancashire and Yorkshire, and North-Western ¼ each. In colonial, Great Western of Canada (shares of both descriptions) were further ⅜ better. In foreign, European Central declined 1, and Imperial Mexican after official hours were quoted ½ better, at 1½ to 1 discount. In American securities and foreign mines no improvement occurred. In British mines, East Lovell improved 1½, which was the only alteration recorded.

FRIDAY, March 24.—The railway market was firmer to-day, and the variations in prices were in a favourable direction. Metropolitan stock improved ¾ per cent., London and North-Western and Great Northern ½, and Midland and South-Eastern ¼. Indian lines were inquired for. There was also a demand for Great Western of Canada, Paris and Lyons, and Paris and Orleans Railway shares.

Advices from Melbourne to Feb. 24, state that the shipments of gold since the departure of the previous mail had amounted to 51,250 ounces.

TEMPORARY OFFICES.

No. 60 King William street (opposite Eastcheap), London. E.C.; 5 Rue de L'Echelle, Paris.

---

1. This Company was established last year for the purpose of extending the benefits of Life, Fire and Guarantee business generally, throughout Great Britain, France, Europe, India, the colonies, and other parts of the World, and to offer greater facilities for effecting the same at such reasonable rates as experience has found to be safe and practicable; the Company having already done a large amount of business in this country, and established influential Boards in Paris, Florence, and the Mauritius, with a thousand active agents throughout France, they now come before the public for the purpose of still further extending their operations at home and abroad.

2. Life Assurance has made rapid progress in this country during the last twenty years, yet at the present time there is not 7 per cent. of the population assured, and although it is beginning to attract serious attention in France, Belgium, Germany, and Italy, yet there is not in all Europe 2 per cent. of the population assured; there is therefore no limit to the vast field open to this Company; and it only requires care, energy, and perseverance, with careful attention to the interests of the assured, to obtain a business unlimited in amount, with proportionate benefit to the shareholders and the public.

3. The life policies of this Company are indisputable. Felony and fraud alone excepted.

4. The profits will be divided in the following manner, viz.:—To the shareholders, five per cent. interest, payable half-yearly, and all the profits of the general business yearly, with twenty per cent. of the life profits divided as a bonus every five years. To the assured for life, eighty per cent, of the profits as a bonus every five years, which may be applied in making the policies payable during life, in reduction of premiums, or by adding the amount to the policy.

5. Fire Insurance.—It is well known that there is property amounting to upwards of two thousand millions uninsured in this country alone, and in France there is a still greater amount uninsured, and as the duty on fire insurance will no doubt be shortly taken off, or reduced to one shilling per cent., the increase in this business will be very great, and offer ample and profitable employment for this Company

6. Guarantee.—There are only two old established guarantee societies in England, and in other countries there is no institution of the sort, it is, therefore, believed that there is ample room for the Company's operations in this branch of business, viz., guaranteeing Government contracts, Government officials, receivers in Chancery, and of rents, and of all persons requiring security; the counter-guaranteeing private sureties, and offering greater facilities to bankers, merchants, railway and all public companies, and for obtaining security for the honesty of their employes upon moderate terms, with the certainty that all claims will be fairly met and promptly paid. There has hitherto been a feeling of uncertainty on these points, and in consequence, guarantee societies have not altogether superseded private suretyship. In order to counteract this feeling, and give greater confidence to the public, this Company proposes to refer all doubtful claims to the decision of competent mercantile men, who will, assisted by the Directors, examine and settle the amount to be paid, thus avoiding all litigation; and it is believed that a Company, established upon this basis, will meet with the support and confidence of the Mercantile world. To employes requiring security, advantages will be offered for the assurance of their lives in connection with the guarantee upon a reduced scale of premiums, so that while securing their employers, they will at the same time be providing for their families in case of death on more favourable terms than it is possible to do in any other way.

7. The influential Councils of Administration already established in Paris, Florence, and the Mauritius, with those now in course of formation in the chief States of Europe, will, it is believed, enable this Company not only to extend the business of life and fire insurance, but also place it in a position to negotiate concessions of works of public utility, and to assist States and individuals in the development of their resources, by introducing sound and beneficial undertakings to capitalists and finance companies in this and other countries.

8. Table showing the present Value of Shares in the following Assurance Companies in England and France:—

English Companies.

Name of Offices.	Amount Paid per Share.	Present Value.	Increased Value per Cent.
	£ s	£ s	
Argus	4 0	50 0	1,250
Atlas	5 10	11 10	109
County	10 0	86 0	760
Imperial	50 0	384 0	668
Liverpool and London	2 0	9 15	387
Mercantile	10 0	15 15	57
Commercial Union	5 0	9 5	85
Royal Exchange	100 0	295 0	195
Royal (Liverpool)	2 0	6 0	200
London	12 10	45 0	433
Sun	10 0	205 0	1,950
Union	20 0	265 0	1,225
Rock	0 10	8 17/6	1,675
Law Life	10 0	84 0	740
Star	1 5	12 5	1,000

French Companies.

	francs.	francs.	
Nationale	1,000	1,420	42
Generale	7,500	22,500	200
Union	1,000	1,200	20
Paternelle	100	500	400

9. The security and value of investments of this description may be estimated by the above table, which shows the extraordinary and permanent increase in the value of shares in fifteen existing Companies in England, and four Companies in France, and it may be safely stated that no description of investment offers more satisfactory results.

10. These plain facts, and the very favourable circumstances under which this Company has been established, having received the cordial support of several old-established assurance offices, and secured the services, as Manager, of Mr Charles C. Green, for many years the Manager of an Assurance Company in the City, and part of the capital having been subscribed, the Directors determined some months since to commence business, and thus practically test the promises of support made from so many quarters before bringing the Company before the public; and they have the satisfaction of stating that they have received 1,272 proposals, amounting to the large sum of £1,034,431, as appears by the books of the Company, the premiums on which, they believe, exceed in amount the first year's income of many existing insurance offices of high standing and respectability. Advantageous arrangements have been made with an Established Fire Insurance Company for re-insuring half their risks, by which nearly 600 policies will at once be opened by the Company in that department. And in order still further to extend the operations of the Company and take advantage of the offers of new business received from various quarters, the Directors now offer the remaining shares to the public, believing it will prove a safe and profitable investment.

11. In the event of no allotment of shares being made, the deposit will be returned in full. Should a less number of shares be allotted than are are applied for, the deposit will be made available towards the payment due on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of applications for shares may be made to the Solicitors, the Bankers, Brokers, and to the Manager, at the offices of the Company, No. 60 King William street (opposite Eastcheap), London.

To be retained by the Bankers.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Financial Insurance Company (Limited),
60 King William street, E.C.

Gentlemen,—Having paid to your Bankers the sum of £ , I request you to allot me shares in the Financial Insurance Company (Limited), and I hereby agree to become a member of the Company, and to accept such shares, or any less number that may be allotted to me; and I request you to place my name on the register of members in respect of such shares.—I am, gentlemen, your obedient servant,

J. A. ROBERTSON, Secretary.

Offices, 79 Cannon street, London, March 21, 1865.

NEW ZEALAND GOVERNMENT TREASURY BILLS, £1,000,000 sterling.

Authorised by Act of the Legislature of the Colony intituled "The Debentures Act, 1864," to be raised in anticipation of "The Loan Act, 1863."

The undersigned, acting on behalf of the Government of New Zealand, now Offer to Public Competition, by Tender, the First Instalment of the above Treasury Bills, amounting to £400,000 sterling.

The Treasury Bills will be issued in sums of £100 and £1,000 each, with the Coupons attached, bearing interest at the rate of 8 per cent. per annum from the date of issue, viz., 1st of April, 1865, payable half-yearly on the 1st day of January and the 1st day of July, redeemable as follows:—

Series 1, £100,000, on Dec. 31, 1866, 21 months' currency.
— 2, 150,000, June 30, 1867, 27 —
— 3, 150,000, Dec. 31, 1867, 33 —

Both principal and interest will be made payable either at the Colonial Treasury, Wellington, or the Bank of New Zealand, London, to suit purchasers.

Tenders will be received for the whole or any portion of the Treasury Bills, not being in sums less than £100 or more than £1,000, until 1 p.m. on Friday, 31st March, 1865.

The tenders should be enclosed in a sealed envelope, addressed to the undersigned, at the Bank of New Zealand, 50 Old Broad street, with the words, "Tender for the New Zealand Government Treasury Bills," written on the outside.

All tenders received will be opened at the Bank of New Zealand, in the presence of interested parties, at one o'clock on the 31st March precisely.

The Treasury Bills will be allotted to the highest bidders, provided the prices offered are not below the minimum fixed in the usual manner.

Tenders at a price including the fraction of a shilling other than sixpence will not be accepted, and, in the event of tenders beyond the amount to be issued, a pro rata distribution on such tenders will be made.

A deposit of £5 per cent. on the amount of each tender must be previously paid into the Bank of New Zealand, and on allotment the balance in two equal portions, with intervals of 14 days between each. The Treasury Bills will be issued in exchange for the bank receipt on a day to be fixed upon hereafter.

The principal and interest of such Debentures or Treasury Bills are payable out of and charged upon the revenue arising in the Colony of New Zealand from all sources, but without prejudice to any securities heretofore charged upon the same revenue; but it is distinctly understood that these Treasury Bills will be redeemed out of the proceeds of the Three Million Permanent Loan of 1863, when sold.

Full information as to the existing loans of the New Zealand Government may be obtained at the Bank of New Zealand, together with forms of tender. Also the following documents may be seen, viz.:—

Financial Statement by the Hon. Mr Fitzherbert, Colonial Treasurer, dated 3rd December, 1864.

The "Debentures Act, 1864."

The "New Customs Duties Act, 1864," by which it is expected that an addition will be made to the colonial revenue of £190,000 per annum, &c.

FALCONER LARKWORTHY,
ROBERT PORTER,
WILLIAM SMELLIE GRAHAME,
Agents appointed by the Governor of New Zealand for the issue of Treasury Bills under the "Debentures Act, 1864."

Bank of New Zealand, 50 Old Broad street, London, March 18, 1865.

LONDON, CHATHAM, AND DOVER RAILWAY. LOANS ON DEBENTURES.

The Directors are prepared to receive LOANS on DEBENTURES for three or five years, to replace Loans falling due. Offers to be addressed to the undersigned. W. E. JOHNSON, Secretary.

Victoria Station, Pimlico, S.W., March 21, 1865.

METROPOLITAN RAILWAY COMPANY.—LOANS on DEBENTURE.

The Directors of this Company are prepared to receive Tenders for Loans on Debenture Bonds, in sums of not less than £1,000, for a term of three or five years, dating from 15th January last, with interest from date of payment, at the rate of 4½ per centum per annum to replace bonds falling due.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster, S.W.

EDGWARE, HIGHGATE, AND LONDON RAILWAY COMPANY.

The Directors of the above Company are prepared to receive tenders for Loans on Debentures, repayable in 3, 5, or 7 years. The line will shortly be opened and will be worked by the Great Northern Company, who have subscribed one-third of the capital.—Applications to be made to the undersigned,

EDWARD BELLAMY, Secretary.

19 Duke street, Westminster, S.W., March 16, 1865.

EAST INDIA RAILWAY COMPANY.

The East India Railway Company is prepared to receive Tenders for the supply and delivery of a Quantity of Rough Plate Glass, as per specification to be seen at these offices.

Tenders endorsed "Tenders for Plate Glass," must be delivered to the undersigned on or before twelve o'clock at noon, on Tuesday the 6th day of April instant.

The Company is not bound to accept the lowest or any Tender,—By order of the Board,

D. L. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 23rd March, 1865.

ATLANTIC AND GREAT WESTERN RAILWAY.—NEW YORK DIVISION—SECOND MORTGAGE BONDS.—PENNSYLVANIA DIVISION—FIRST MORTGAGE BONDS.

Interest payable 1st April, at the Consolidated Bank (Limited).

The COUPONS from the above bonds will be PAID on the first April, at the rate of 4s to the dollar, and must be left two clear days at the office of the Company, No. 2 Old Broad street, London, E.C., for examination.

If sent by post, a cheque for the amount will be remitted in course.

2 Old Broad street, London, E.C., March, 1865.

ITALIAN COMPANY OF THE MERIDIONAL RAILWAYS.

The holders of bonds of series A and B are informed that the coupon No. 5 of series A and No. 3 of series B, falling due on the 1st April, 1865, will be paid as under:—

THE OTTOMAN RAILWAY

(from Smyrna to Aidin) of HIS IMPERIAL MAJESTY the SULTAN.

Notice is hereby given, that the Fourteenth Half-Yearly Ordinary General Meeting of the shareholders in this railway will be held at the London Tavern, Bishopsgate street, London, on Friday, the 31st day of March now next ensuing, at Two o'clock precisely, to receive the Report of the Council, Statement of Accounts, and Balance Sheet to the 31st December, 1864; to elect three members of the Council in place of Alexander Devaux, Esq., William Dent, Esq., and Joseph Henry Trewby, Esq., who, in accordance with the Company's Statutes, retire from office, but are eligible and offer themselves for re-election; to elect two Auditors in the place of George Smith, Esq., and Henry Lloyd Morgan, Esq., who also retire, but being eligible for re-election offer themselves accordingly, and for the transaction of the general business of the Company.

Shareholders intending to take part in the proceedings of the General Meeting must deposit their Share Certificates at the Offices of the Company in London; or at their Bankers in Turkey, Messrs C. S. Hanson and Co., Constantinople; or Messrs Hanson and Co., Smyrna, at least twenty-one days before that on which the meeting will be held.—By order of the Board,

MACDONALD STEPHENSON, Chairman.

S. J. COOKE, Secretary.

Company's Offices, 2 St Michael's House, Cornhill, London, February 3, 1865.

PENNSYLVANIA CENTRAL RAILROAD SIX PER CENT. CONVERTIBLE STERLING BONDS.

The Dividend Warrants, due on the 1st of April next, on the Pennsylvania Central Railroad Six per Cent. Convertible Sterling Bonds, negotiated through T. Wiggin and Co., will be paid on the 1st of April, or any succeeding day (Friday excepted), between the hours of 10 and 2, at their Counting House, 15 Old Jewry, where lists may be obtained as usual. The Warrants must be left two clear days for examination.

PHILADELPHIA AND ERIE RAILROAD SIX PER CENT. STERLING BONDS.

The Dividend Warrants due 1st April next, on the Philadelphia and Erie Railroad Six per Cent. Sterling Bonds, issued and guaranteed by the Pennsylvania Railroad Company, will be Paid by T. Wiggin and Co., on the 1st of April, or any succeeding day (Friday excepted), between the hours of 10 and 2, at their Counting House, 15 Old Jewry, where lists may be obtained as usual. The Warrants must be left two clear days for examination.

THE MADRAS IRRIGATION AND CANAL COMPANY. NOTICE OF CALL.

Notice is hereby given, that, in pursuance of a resolution passed at a meeting of the Board of Directors, the shareholders of this Company are requested to Pay, at the Company's Bankers', Messrs Ransom, Bouverie, and Co., No. 1 Pall Mall East, London, S.W., a Call of £5 per share (making £10 per share paid), on or before the 15th day of April next, upon which sum of £5 per share interest, guaranteed by the Secretary of State for India in Council at the rate of 5 per cent. per annum, will be paid from the 17th day of April next.—By order of the Board, JOHN WESTWOOD, Secretary.

27 Cannon street, E.C., London, March 9, 1865.

THE LIBRARY COMPANY (Limited).

Central Offices, 25 Pall Mall, and 30 St James's square, S.W.—The Directors continue to add every work of general interest as soon as published, and in numbers, sufficient to meet the requirements of subscribers. No book for which there is a demand is excluded on any pretext whatever.

THE LIBRARY COMPANY (Limited).

Subscriptions from 10s 6d to £5 5s, according to the number of volumes required. Remittances may be made by post office order or cheque (crossed Ransom, Bouverie, and Co.), payable in London to Henry Fowler.

THE LIBRARY COMPANY (Limited).

Subscribers to this Library can (under the conditions set forth in the rules and regulations, which will be sent free on application) change their books at any depot most convenient to them. London subscribers can be transferred to any of the provincial depots, and country subscribers to any of the London depots.

THE LIBRARY COMPANY (Limited).

A list of the Company's Depots will be forwarded (free) on application.

THE LIBRARY COMPANY (Limited).

Lists of Books in circulation, with all other information, sent (free) on application.—By order.

IN COURSE OF FORMATION.

THE BURGLARY, ROBBERY, FRAUD, AND BREACH OF TRUST INSURANCE COMPANY (Limited).

This Company has been formed to meet what recent events prove to be a necessity of the times, and to extend the boon of Insurance beyond its present limits. It will offer complete protection to the Banker, Merchant, Tradesman, and Householder, who will be able, for a small annual charge, to insure his property or valuables as effectually in the case of Robbery and Fraud as he can in the case of Fire. It will also be of great importance to the heads of establishments wherein a number of assistants are employed, from the fact of its combining the business of a Guarantee Society with the novelties to carry out which it has been specially organised.

The complete Propspectus will shortly be issued.

FORWARDING AGENCY FOR RUSSIA at HAMBURG.

Having been authorised by the St Petersburg Insurance and Forwarding Company, Nadeshda, to undertake on their behalf the forwarding of Goods for all parts of Russia, with or without insurance, I beg to bring this notice before the trading public, requesting that goods destined for Russia may be sent direct to my address.

On taking charge of same I shall furnish the senders with Receipts, and on production of these documents at the place of destination, the goods will be delivered up by the offices of the Nadeshda Company.

Disbursements on the goods can, at the option of the senders, be charged forward.

The conditions of insurance by said Company are very favourable, and any claims for average are settled promptly.

The Nadeshda Company have Agents and offices at all important places of the Russian Empire, and goods sent by their medium are, as is well known, forwarded in the safest and most expeditious manner.

For further particulars, apply to

C. SUHRBERG,
Agent to the St Petersburg Insurance Company,
Nadeshda, 4 Grosse, Johan-nisstrasse.

Hamburg, March, 1865.

AT THE FIRST ORDINARY GENERAL MEETING OF THE

MILLWALL IRON WORKS, SHIP-BUILDING, AND GRAVING DOCKS COMPANY (Limited),

held at the London Tavern at 1 o'clock on Monday, March 22, 1865,

Sir J. C. D. HAY, Bart., M.P., in the Chair,

The Secretary read the notice convening the meeting.

The following resolutions were proposed, seconded, and adopted unanimously:—

That the report, with the balance sheet accompanying it, be taken as read.

That a dividend of 6s per share be now declared, payable on and after the 31st of March instant.

That Messrs Quilter, Ball, and Co. be elected Auditors of this Company, and that their remuneration be fixed at £50 per annum.

An extraordinary general meeting was held at the same place on the same day, when the following resolution was submitted and carried unanimously:—

That No. 85 of the Articles of Association of this Company be altered by striking out the words "not exceeding in the aggregate, in any year, the rate of 5 per cent."

That the best thanks of the shareholders be offered to the Chairman, Deputy-Chairman, and the Board of Directors for their able management of the affairs of the Company.

(Extracted from the Minutes).

(Signed) C. M. CHICHESTER, Secretary.

Fire and Life Assurances may be effected with this Corporation on advantageous terms.

Farming-Stock.—No extra charge is made for the use of Steam Thrashing-machines.

The Reversionary Bonus on British Life Policies has averaged nearly 2 per cent. per annum on the sum assured.

Equivalent reductions have been made in the Premiums payable by persons who preferred that form of Bonus.

The divisions of profit take place every five years.

Any sum not exceeding 15,000*l* may be insured on one Life.

This Corporation affords to the assured.

Liberal participation in profits, with the guarantee of a large invested Capital-Stock, and exemption under Royal Charter, from the liabilities of partnership.

The advantages of modern practice, with the security of an office whose resources have been tested by the experience of nearly a CENTURY AND A HALF.

ROYAL EXCHANGE, LONDON.

ROBERT P. STEELE, Secretary.

BORWICK'S BAKING POWDER,

recommended by the Analyst to the LANCET and Author of "Adulterations Detected," for making

DIGESTIVE BREAD

without yeast, and for rendering Puddings and Pastry light and wholesome. Sold everywhere.

IMPORTANT ANNOUNCEMENT.—

JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition.

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

ASIATIC BANKING CORPORATION.

The Directors of this Corporation are prepared to issue Debentures bearing interest at 6, 6½, and 7 per cent., for one, two, and three years respectively.

They are also prepared to transact financial business, to make advances on approved Securities, to promote industrial enterprise, and to receive moneys on deposit at rates to be agreed upon.

J. FRED. PRIGGEN, Secretary.

15 Ladenhall street.

AUSTRALIAN, MORTGAGE LAND AND FINANCE COMPANY (LIMITED).

At the Ordinary General Meeting of the shareholders of this Company, held at the London Tavern, on Friday, the 24th March, 1865, at 12 o'clock noon,

T. M. Mackay, Esq., in the chair,

It was resolved unanimously—

That the Directors' report of proceedings for the year 1864, with the balance-sheet and statement of profit and loss as now read, be approved and adopted, and

That a dividend at the rate of £6 per cent. per annum upon the paid-up capital of the Company, computed from the time of the respective payments thereof, be now declared for the year ended the 31st December last, after deducting the payment of 2½ per cent. for the half-year on account of dividend made to the Proprietors in August last, and be payable on and after the 3rd day of April proximo to the shareholders who were registered in the Books of the Company on their being closed on the 18th day of March instant.

The Meeting was then constituted an Extraordinary General Meeting, and the following resolutions were passed unanimously:—

That with reference to the agreement entered into between this Company and Messrs R. Gibbs and Co., the resolution of the Directors to issue the remaining moiety of the nominal capital of the Company be and is hereby approved; and that—

20,000 shares of £5 each be accordingly issued. And

That in accordance with the said agreement, the Directors be and they are hereby authorised to allot to Messrs Gibbs and Co., upon the terms of the said agreement, 15,000 shares of £25 each, part of the further issue of 20,000 shares upon which £3 per share shall be credited as having been paid. And

That the Directors be and they are hereby authorised to allot the remaining 5,000 shares at such time and upon such terms as they shall deem best for the interests of the Company, to such of the shareholders in the company registered at the time of the issue as shall desire to subscribe for the same under the terms of the paragraphs 28 and 68 of the Articles of Association.

That the directors be and they are hereby authorised to have prepared one or more official seals for and to be used in any one or more of the colonies of Australasia in which the business of the Company shall be carried on pursuant to the "Companies' Seals Act 1864," and to be used subject to any directions or regulations which the Directors may from time to time decide on.

That John Ball, Esq., be and he is hereby appointed Auditor to the Company for the ensuing year, and that his remuneration be fifty guineas.

That the thanks of the meeting be given to the Chairman for his conduct in the chair, and to the Directors generally for their management of the Company's business.

HENRY N. LONG, Secretary.

132 Gresham House, E.C., 24th March, 1865.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

SALOM'S NEW OPERA AND FIELD GLASS.

The Reconnoitrer Glass, price 10s 10d (sent free). This "Tourist's Favourite," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Major Starkey, Wrenbury hall, Nantwich—"Quite as powerful as that for which I gave £5 5s." Captain Seadey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tested it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an inspensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

NUNN'S MARSALA OR BRONTE

WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity - THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

FLUTES.—THE NEW MODEL

FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ guineas and 7 guineas. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs Keith, Prowse, and Co's manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—

At Messrs Keith, Powse, and Co.'s manufactory, 48 Cheapside, may be found CONCERTINAS, which for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 12 guineas. Ordinary concertinas two guineas.

HARMONIUMS,

by Alexandre.—The new Church HARMONIUM, with stops and knee pedals, Venetian swell, and four rows of Vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs Keith, Prowse, and Co., 48 Cheapside.

MUSICAL BOXES,

by Nicole Frères.—Messrs Keith Prowse, and Co., direct importers, offer parties seeking really fine, well-tuned INSTRUMENTS, a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.

48 Cheapside.

NO MORE GREY HAIR.—

MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. TEETH.—MR ESKELL, SURGEON-

DENTIST, 8 Grosvenor street, Bond street.—His patent secures the greatest improvement. Painless treatment, and only a few hours required. Comfort guaranteed. Detection impossible. A Treatise on the subject free for seven stamps. Consultations free.

CONSUMPTION, COUGHS, COLDS, ASTHMA, BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Douloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

VENEZUELA SIX PER CENT. LOAN, 1864.

The Half-yearly Interest, on the Bonds of this Loan, negotiated by the General Credit and Finance Company of London (Limited), falling due 1st April, 1865, will be Paid on that day and any succeeding day, between the hours of 11 and 2 o'clock, at the Offices of the said Company, 7 Lothbury. The Coupons, with lists arranged in numerical order, must be left two clear days for examination. Forms to be obtained at the Office on and after Friday, 24th current.

R. J. BUTLER, Secretary.

March 23, 1865.

SIX PER CENT. DEBENTURES,

for Three, Five, or Seven Years, secured on FREEHOLD PROPERTY in LONDON.

The Directors of the INNS of COURT HOTEL COMPANY (Limited) will receive Tenders of Loans, at 6 per cent. per annum, for three, five, or seven years, on Debentures of £50 or £100 each, to be a first charge on the freehold property of the Company, valued at not less than £120,000.

The sum of about £70,000 has already been expended in purchase of site and on the building.

The powers of the Company to borrow on these debentures will be limited by deed to £80,000; that sum therefore cannot be exceeded. In allotting the debentures, priority of application will be considered.

This Company is one of the few which offer debentures secured on freehold property in England not otherwise mortgaged.

For further particulars and forms of application apply to the Secretary, at the offices, 63 Lincoln's inn fields, W.C. H. T. L. BEWLEY, Secretary.

LOAN OF THE TUNISIAN GOVERNMENT.

Issue of 73,568 Bonds of 500 francs each.

These bonds are issued at the rate of 380 francs, with interest from the 1st of January, 1865. They produce an annual interest of 35 francs, payable at the rate of 17 francs 50c every six months, dating from the 1st of July and 1st of January of each year. They are to be reimbursed at 600 francs each, by way of drawings, in the course of fifteen years, dating from the 1st of July next, and so forth every six months. Pursuant to a treaty made with the Tunisian Government, the revenues of the Custom houses and the tax upon olive trees are specially appropriated as a guarantee for the payment of the interest and the sinking fund of this Loan.

The subscription will be opened at the Comptoir d'Escompte de Paris, No. 14 Rue Bergere, on Monday next, the 27th of March instant, from 10 till 4 o'clock daily, until and inclusive of the following Thursday, the 30th instant, at the latest.

The statement of applications for shares will be drawn up daily, without any reduction, so long as the subscription list is not filled. But on the day the application for shares shall exceed the number of bonds remaining to be disposed of, the subscript on will be closed, and the applications of the said day will consequently be diminished in proportion.

Eighty francs per bond must be paid down on application for each bond. The remainder will be payable in thirds, by monthly instalments, as follows:—

	f	c
On subscribing	80	0
From the 1st to the 10th of May next...	100	0
From the 1st to the 10th of June	100	0
From the 1st to the 10th of July f100	0	
Deduct interest due	17	50
	82	50
	362	50

Subscribers will have the option at any period after the closing of the subscription list of paying up the total amount. Interest at the rate of 6 per cent. will be allowed upon the payments so made in advance. The bonds are made payable to bearer. But the bank will deliver to those persons who desire it a certificate of the deposit in their own names.

The first drawing of the bonds to be reimbursed will take place on the 1st of June, 1865, and the subsequent drawings on the 1st of December and the 1st of June of each year, at the offices of the Comptoir d'Escompte de Paris, especially appointed to pay the interest and to reimburse the amount of the bonds which are designated to be reimbursed at each drawing.

Of all sorts of Manchester, Scotch and Yorkshire goods—of Steam Engines—Water Wheels—Bullock Gear—Mill Gear—Cotton Gins—Corn Mills—and Cotton Seed.

Patterns collected free, and references sent on application.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

London: Tweedie, 337 Strand.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

DR GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES:

ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Subtitutions.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

TO AGRICULTURISTS, CAPITALISTS, and OTHERS.—The owner of a most fertile and productive estate in the centre of Asia Minor, is desirous of meeting with a gentleman of means, to undertake the cultivation thereof on mutually advantageous terms. The estate is most eligibly situated, and grows beet root, madder root, opium, cotton, oil seeds, corn, and is also suitable for grazing cattle on a large scale, and the climate is most healthy.—Apply, by letter, to Messrs Stibbard and Beck, Solicitors, 27 Leadenhall street, London.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA (for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

COUGHS, ASTHMA, AND Incipient Consumption are effectually cured by KEATING'S COUGH LOZENGES, which are daily recommended by the Faculty—testimonials from the most eminent of whom may be inspected—as the most effectual, safe, speedy, and convenient remedy for Cough and all Disorders of the Lungs, Chest, and Throat.—Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 11s each, by T. KEATING, Chemist, 79 St Paul's Churchyard, London. Sold retail by all Druggists, &c.

ANOTHER CURE OF LONG-STANDING ASTHMA BY DR. LOCOCK'S PULMONIC WAFERS.—"Caldicot.—I was afflicted for years with a most violent asthma, with shortness and difficulty of breathing, and at times a cough so bad as to cause me violent vomiting and dry retching. I tried nearly all the medical men about here, but from Dr. Locock's Wafers I found relief almost immediately. Jas. Gardner. Witness, Mr T. I. Jones, Chemist, 5 High street, Newport." To singers and public speakers they are invaluable for the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

MORE CURES OF COUGHS, COLDS, and HOARSENESS by DR LOCOCK'S PULMONIC WAFERS.—From Messrs Fergyson and Son, Auctioneers, Leek:—"Sir,—The beneficial effects we have derived from your Pulmonic Wafers, make us feel it a duty to offer you our gratuitous testimony to their superiority over any other remedy we have ever tried for colds, coughs, and hoarseness, so peculiarly troublesome to the profession." They have a pleasant taste. Sold by all Druggists at 1s 1½d, 2s 9d, 4s 6d, and 11s per box.

HOLLOWAY'S OINTMENT.—In bad legs, ulcers, scrofulous sores, and glandular swellings, this Ointment operates very gently, but very surely, and with a rapidity that resembles magic. It should be rubbed into the parts affected, after they have been fomented with lukewarm water. The purifying and curative powers of this marvellous unguent have never been disputed by any one who has given it a fair trial. It contains not a particle of any noxious nature, nor is there a case on record in which it has done the slightest harm; while there are authentic reports of innumerable cures effected by it in all countries. It is as mild in its action as it is powerful and beneficial in its effect.

THE PHOSPHORISED NERVINE TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great philosophical and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."

Prices: 11s per bottle, or four 11s bottles in one, 33s; and in cases containing three 33s bottles, £5, which saves £1 12s, packed securely and sent to all parts of the world.

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MEDAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14. 1850

THE PATENT
KNIFE-ROLLER COTTON GIN.
(ON THE MACARTHY PRINCIPLE.)

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented.
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

The Special General Meeting of the Society, convened for the purpose of finally sanctioning the Alteration in the Laws which has been so long under consideration, and which has now been introduced with universal assent, having been fixed to take place on a date which almost exactly coincided with the expiry of Fifty Years from the time when the Society commenced business, it was thought desirable to celebrate the occasion as THE FIFTIETH ANNIVERSARY OF THE SOCIETY. *Gentlemen connected with various Local Boards and other leading Members from a distance were accordingly invited to be present.*

A Paper giving the Statistics of the Society's Business during Fifty Years was read by the Manager.

The Meeting also derived importance from the fact that the discussion of certain views entertained by some of the Members had, after subsisting for four years, been brought to the stage at which the Society's final judgment regarding them was imperatively called for.

The Chairman, in the name of the Directors, announced their deliberate and unalterable resolution to reject and oppose the views referred to, and called upon the Members, for their own interest, and for the credit and prosperity of the Society, to support the Board in putting down further agitation of the proposals referred to.

The response given to this appeal by the large and influential Meeting of 29th ult. was cordial, emphatic, and conclusive.

For the information of the Members generally, the Directors now submit to them the Report of the interesting and important proceedings which took place at the Society's FIFTIETH ANNIVERSARY, *including the Statistics of the Fifty Years now ended.*

REPORT

OF THE

50th ANNIVERSARY MEETING OF MEMBERS

OF THE

SCOTTISH WIDOWS' FUND

AND

LIFE ASSURANCE SOCIETY,

HELD WITHIN THE ROYAL HOTEL, EDINBURGH,

ON THURSDAY, 29TH DECEMBER, 1864,

ARCHIBALD DAVIDSON, Esq., Advocate, Sheriff of Aberdeenshire, in the Chair.

There was a very large attendance of members, the room being crowded throughout the whole proceedings.

The Secretary read the minutes of the last general court, which were approved of.

It was agreed that the resolutions, which had been before the members for the last six months, should be held as read.

The Chairman then rose and said—Gentlemen, it has unfortunately fallen to me, by the rules of the Society, to occupy the chair upon this occasion; and occupying that place, it is my duty now to move the resolutions which are held to have been read, making a change upon the laws of the Society. The change embodied in these resolutions has been more or less under the consideration of the Directors for many years—since 1852, at all events; and they have proceeded in the matter, as the Directors of this Society have always proceeded, with the greatest deliberation and caution. They have taken the best legal advice, in Scotland and in England, as to our power of making this change in our constitution. They have called to their assistance the best professional advice from the Actuarial profession. Two of those gentlemen whom they consulted, I am happy to say, we have the pleasure of having among us to-day,—Mr Jellicoe and Mr Tucker. (Applause.) They consulted them as to the safety and expediency of a change, and the best mode of doing it, if it was to be done; and so these resolutions were framed, and this change, if you adopt it, will be made without altering our constitution, and without touching, in the slightest degree, the vested rights and interests of a single member. (Applause.) Now, when these resolutions were before the last general court in May, the meeting unanimously approved of them; and now we are here to-day for the purpose of considering them again, and, I trust, finally adopting them. (Applause.) You are aware that, by the rules of our Society, great safeguards are thrown around any change upon its fundamental laws. Any proposed change must be considered, in the first place, by an extraordinary Court of Directors; it must be approved of by them, and be recommended by a second extraordinary court to two several general meetings or courts of the Society, held at a considerable distance of time between the two. It is only after that ordeal that the change can be adopted. Now, gentlemen, this is the last stage in regard to these resolutions; and I do not think it necessary now, after the exposition and discussion that the subject has been subjected to, that I should enter into any explanation of what the nature and effect of these changes are, or say one word to induce you to adopt them. And so, gentlemen, I simply move, without further observation, that these resolutions be now adopted; and if they are adopted, and another resolution, which is in an earlier stage, be also disposed of, I have then to make a statement, in regard to another matter, on the part of the Directors of the Society. In the meantime, I move the adoption of these resolutions, the object of which, as stated in the notices calling this meeting, is—

1st. To substitute the Carlisle Table of Mortality, and a rate of interest at three per cent., for the Northampton Table of Mortality, and a rate of interest at four per cent.

2nd. To maintain a guarantee fund not less in amount than five per cent. of the net liability existing at each investigation, and to add to the sum payable at decease of each member entitled to participation his proper share of such fund, with interest thereon.

3rd. Subject to the retention of such guarantee fund, to distribute at each investigation the whole free surplus or excess of assets over and above the liabilities.

4th. To appropriate no part of such surplus on account of prospective bonus, but to allow the profits of the succeeding interval to stand charged with the cost thereof; such bonus, however, to be at a rate less by 5s per cent. per annum than that of the retrospective bonus last declared. And giving power also to the Directors to increase the premiums payable by future entrants, with the view of equalising the contributions of all the members.

Continuation of Scottish Widows' Fund Advertisement.

The motion was unanimously adopted. Mr Sturrock, however, stated that he would afterwards make some remarks.

The Chairman.—The next matter is in reference to a resolution which the Secretary will read, and which comes before the Society for the first time at this meeting. At the last general meeting the report, which was then adopted, stated that if this change in the law were adopted, the Directors would then propose a supplementary resolution, which will give the benefit of the change to that portion of the insured who may die before next investigation at the end of 1866; and they have accordingly framed a resolution of that kind. It has passed the extraordinary court, and the extraordinary court now put it to this general meeting for adoption for the first time. If it is adopted now, a court will be held at a future date to re-consider the subject.

The Secretary then read the following resolution:—

That in supplement of the resolutions approved of at the last general meeting, a sum equal to five per cent. on the calculated value, as at 31st December, 1859, of each policy in existence when the change proposed in said resolutions becomes part of the laws of the Society, and emerging before 31st December, 1866, with interest thereon at three per cent. per annum from said 31st December, 1859, to date of claim, shall be added to the bonuses already declared on said policies, at and prior to 31st December, 1859.

The Chairman.—Is it the pleasure of the meeting to adopt that resolution? (Applause.)

The Chairman.—The meeting have adopted that resolution at this their first meeting to consider it, and intimation is now given that a special general court will be held on Thursday, 29th June, 1865, at three o'clock p.m., for the purpose of finally disposing thereof. (Applause.)

The Chairman then rose and said—This concludes the special business of the meeting.
